

Sole Source (Including Brand Name) Justification - Simplified Procedures for Certain Commercial Items

NOTE: If a Justification was approved for the preceding acquisition, a copy of the approved Justification for the predecessor action must be included in the staff package for approval of the instant Justification. This applies to Justification staff packages that are submitted for review and approval at a level above the contracting officer. The predecessor Justification will be used as a reference document by the approving official.

Sole Source (Including Brand Name) Justification - Simplified Procedures for Certain Commercial Items

I. Contracting Activity.

39th Contracting Squadron, Surety Support Flight, Incirlik AB

II. Nature and/or description of the action being processed.

This requirement will be awarded as a new firm fixed price contract.

III. Description of supplies/services required to meet agency needs.

This action is a request for a sole source procurement of 12 each DroneBuster Block 4 handheld Counter-Small Unmanned Aircraft Systems (C-sUAS) to support installation force protection operations at Incirlik Air Base.

[REDACTED]

The 39th Security Forces Squadron requires the procurement of 12 DroneBuster Block 4 handheld Counter-UAS systems. The DroneBuster Block 4 utilizes radio frequency (RF) jamming technology designed to disrupt the control, communication, and navigation signals of small unmanned aircraft systems. These systems will provide security forces personnel with a portable and rapidly deployable capability to detect and mitigate drone threats to personnel, aircraft, and critical infrastructure at Incirlik Air Base.

IV. Statutory authority permitting other than full and open competition.

Statutory authority permitting other than full and open competition for this acquisition is FAR 6.302-1 Only one responsible source and no other supplies or services will satisfy agency requirements.

V. Demonstration that the contractor's unique qualifications or nature of the acquisition requires the use of the authority cited above (applicability of authority).

Based on the research conducted, DZYNE (<https://dzyne.com/patents/>) is the patent holder of the required DroneBuster Block 4 handheld (C-sUAS) and Flex Force Enterprises LLC is a subsidiary of DZYNE, an authorized distributor of the products. Market research efforts reveal that DZYNE, through its authorized distributor, is the sole source provider of the DroneBuster Block 3 and 4 under separate DOW contracts.

These systems provide specific RF jamming capabilities designed for handheld tactical use against small unmanned aircraft systems. The requested system is required to maintain compatibility with existing counter-UAS equipment currently utilized by the 39th Security Forces Squadron and

Sole Source (Including Brand Name) Justification - Simplified Procedures for Certain Commercial Items

provides capabilities not readily available from other vendors in a handheld form factor. Use of this specific system ensures continuity of operations and enhances response capability against emerging sUAS threats.

VI. Description of efforts made to ensure that offers are solicited from as many potential sources as practicable.

Based on the market research, There is a centralized procurement for DroneBusters by A4S however, the leadtime would not meet the required timeframe for delivery. It has been determined that identified DroneBuster Block 4 and it's previous versions such as DroneBuster Block 3 have been procured from the same contractor as sole source acquisitions, supported by approved sole source justifications. Based on this research, it has been determined that Government's requirement cannot be satisfied by any other resources and Flex Force Enterprises LLC is the only vendor that can provide the required handheld counter-UAS system that meets the operational requirements for portability, RF jamming capability, and compatibility with existing counter-UAS systems used by the installation. No other known vendors provide the same combination of capabilities required to meet mission needs.

VII. Determination by the Contracting Officer that the anticipated cost to the Government will be fair and reasonable.

The estimated cost is determined fair and reasonable by the Contracting Officer through comparison with previous government purchases, vendor pricing information, and other available pricing data for similar counter-UAS equipment.

In FY23, under contract FA480023P0097, 633 CONS procured 6 each DroneBuster Block 4 for the price of USD 338,740.80. As a result of this acquisition, Government paid USD 56,456.8 per unit.

In FY25, 47 CONS has recently procured 3 each DroneBuster Block 4 under contract number FA309925QP001 for the price of USD 179,779.80. As a result of the acquisition, Government paid USD 59,779.80 per unit.

Flex Force Enterprises LLC's quote of [REDACTED] for 12 each DroneBuster Block 4, USD 61,896.40, an increase from FY25's price by 3.5% this is deemed to be fair and reasonable by the contracting officer as it's difference from 2025's annual CPI is 0.7%.

VIII. Description of the market research conducted and the results, or a statement of the reasons market research was not conducted.

As a result of the market research conducted through historical purchases for the same or similar products as well as reviewing commercially available counter-UAS systems and handheld RF jamming solutions, DroneBuster Block 4 was identified as the only system meeting the operational requirements for portability, frequency coverage, and mission effectiveness required by the 39th Security Forces Squadron. Given the fact that DZYNE as the patent holder, historical sole source

Sole Source (Including Brand Name) Justification - Simplified Procedures for Certain Commercial Items

acquisitions made from Flex Force Enterprises LLC and no drastic changes have occurred in the market since the last purchase. Hence, a separate market research in the local market, due to DECA, has not been conducted.

IX. Any other facts supporting the use of Other Than Full and Open Competition.

The threat of small unmanned aircraft systems operating near military installations has increased due to regional conflicts. The 39th Security Forces Squadron currently relies on legacy DroneBuster Block 3 systems, of which only two of four units remain fully operational. Procurement of DroneBuster Block 4 systems will replace aging equipment and provide enhanced counter-UAS capability to protect U.S., Turkish, and NATO personnel and assets assigned to Incirlik Air Base. As a result, only a sole source acquisition of 12 DroneBuster Block 4 systems can satisfy the Government's needs.

X. List of any sources that expressed, in writing, an interest in the acquisition.

None.

XI. A statement of the actions, if any, the agency may take to remove or overcome any barriers to competition before making subsequent acquisitions for the supplies or services required.

The Government will continue to conduct market research and evaluate commercially available counter-UAS technologies to identify additional vendors capable of meeting operational requirements. If alternative systems become available that provide equivalent capabilities and compatibility with installation counter-UAS operations, future acquisitions may be competed.

XII. Certification by the Contracting Officer.

As evidenced by my signature above, I have determined this document to be both accurate and complete to the best of my knowledge and belief.

XIII. Certification by the technical/requirements personnel.

As evidenced by my (our) signature(s) above, I (we) certify that any supporting data contained herein, which is my (our) responsibility, is both accurate and complete.
