

UNCLASSIFIED

NATIONAL GEOSPATIAL-INTELLIGENCE AGENCY

7500 GEOINT Drive
Springfield, Virginia 22150

REQUEST FOR INFORMATION

Office of Protective Services

1.0 DESCRIPTION & PURPOSE

1.1 The National Geospatial-Intelligence Agency (NGA) in support of the Office of Protective Services is seeking information on how an interested contractor could provide a comprehensive, fully integrated, public safety and police administration system. The desired solution must unify multiple facets of law enforcement technology into a single, cohesive platform. This includes, but is not limited to, a core police administration system, body-worn cameras, TASER 10 energy weapons, in-vehicle mobile data terminals (MDTs), and automated license plate readers (ALPRs).

1.2 The purpose of this Request for Information (RFI) is to identify sources capable of providing a comprehensive, fully integrated, police administration system. The desired solution must unify multiple facets of law enforcement technology into a single, cohesive platform. This includes, but is not limited to, a core police administration system, body-worn cameras, TASER 10, in-vehicle mobile data terminals (MDTs), and automated license plate readers (ALPRs).

A critical requirement of this system is the capability for seamless data integration with the National Geospatial-Intelligence Agency (NGA) to support advanced operational and analytical functions.

Purpose of this Request for Information

The purpose of this RFI is to conduct market research and gather detailed information from potential vendors about their ability to deliver a fully integrated law enforcement technology ecosystem. This information will be used to understand the current landscape of available solutions, find qualified vendors, and assess the feasibility of potential future procurement.

Specifically, this RFI seeks to:

- Identify companies that can provide a holistic solution encompassing a police administration system, body-worn cameras, TASER 10s, mobile data terminals, and license plate readers.
- Understand the integration capabilities of proposed systems, with a particular focus on the ability to integrate with and leverage data from the National Geospatial-Intelligence Agency.
- Gather information on the technical architecture, data management protocols, security features, and operational workflows of potential solutions.
- Assess the maturity and readiness of available technologies and vendor capabilities to meet the specified requirements.
- Inform the development of a potential future Request for Proposal (RFP) by clarifying requirements and showing potential challenges and opportunities.

UNCLASSIFIED

1.3 THIS IS A REQUEST FOR INFORMATION (RFI) ONLY. This RFI is issued solely for information and planning purposes – it does not form a Request for Proposal (RFP) or a promise to issue an RFP in the future. This RFI does not commit the Government to contract for any supply or service whatsoever. Further, NGA is not seeking proposals at this time and will not accept unsolicited proposals. Responders are advised that the U.S. Government will not pay for any information or administrative costs incurred in response to this RFI. All costs associated with responding to this RFI will be solely at the interested party's expense. Not responding to this RFI does not prevent participation in any future RFP, if any is issued.

2.0 BACKGROUND

NGA has a mission-critical need for comprehensive and fully integrated law enforcement and security solution to support its protective service mission. The current operational environment demands advanced technological capabilities to ensure the safety and security of NGA personnel, facilities, and assets. To meet these evolving requirements, NGA needs a modern, unified system that includes a Police Administration System, Mobile Data Terminals, License Plate Readers, Body Worn Cameras, and TASER 10 energy weapons. A critical part of this requirement is that all elements must seamlessly integrate to create a single, cohesive ecosystem. Furthermore, the entire solution must integrate with and adhere to the NGA's specific and stringent IT infrastructure requirements to ensure operational integrity, data security, and interoperability with existing enterprise systems.

2.1 PLANNED ACQUISITION: Statement of Objectives.

2.2 PERFORMANCE:

2.2.1 PERIOD (POP): TBD

2.2.2 LOCATION(S): Saint Louis, MO. Springfield, VA. Arnold MO.

2.3 CONSTRAINTS AND LIMITATIONS: The following are anticipated to apply to this acquisition: The proposed solution is not a standalone system and must be fully compatible and interoperable with the National Geospatial-Intelligence Agency's (NGA) existing enterprise IT architecture. This includes adherence to NGA's stringent security protocols, authentication services, data interoperability standards, and network infrastructure. Respondents should describe their approach to integrating with a complex, high-security federal IT environment.

Operational Environment Overview: The solution will work within NGA's secure, controlled environment. Key considerations for industry partners should include:

- High-Security Posture: All hardware, software, and data handling must follow Intelligence Community (IC) and Department of Defense (DoD) security directives.
- Geospatial Data Centricity: The system must be capable of ingesting, processing, and leveraging NGA-native geospatial data formats and services.
- High Availability: The system is mission-critical and will require high levels of availability and reliability, with defined uptime and failover capabilities.

Government-Furnished Information/Equipment (GFI/GFE): The Government will not provide any GFI or GFE during this RFI phase. All demonstrations, proofs-of-concept, and proposed solutions should be based on commercially available offerings.

Proprietary Solutions: While the Government is open to considering proprietary solutions, a strong preference will be given to systems built on open standards and non-proprietary interfaces to ensure long-term flexibility and avoid vendor lock-in. Respondents should detail their use of open standards and provide a clear data rights strategy.

2.4 SECURITY REQUIREMENTS: Personnel Security Clearances: All contractor personnel proposed to perform services under this acquisition, including development, implementation, project management, and on-site support, must have an active Top Secret/Sensitive Compartmented Information (TS/SCI) security clearance at the time of proposal or quotation submission. Personnel without the requisite clearance at the time of submission will not be considered. Responders must be prepared to provide verification of clearances upon request.

System Accreditation: The proposed solution must be capable of meeting the stringent security requirements of the Intelligence Community (IC) and the Department of Defense (DoD). The system will be required to undergo a full security assessment and authorization process in accordance with the Risk Management Framework (RMF) as defined in DoD Instruction 8510.01 and obtain Authority to Operate (ATO) on NGA networks.

Information Assurance Compliance: The solution must follow all applicable IC Directives (ICDs), including but not limited to ICD 503 ("Intelligence Community Information Technology Systems Security Risk Management"), as well as NGA-specific security policies and implementation guides.

Data Security: All data, both at rest and in transit, must be encrypted using FIPS 140-2 (or successor) validated cryptographic modules. The system must ensure the confidentiality, integrity, and availability of all data processed and stored.

Supply Chain Risk Management (SCRM): Responders will be required to demonstrate a robust SCRM plan to mitigate the risk of tampered or counterfeit components within the hardware and software supply chain. The Government reserves the right to review and approve SCRM plans and practices.

2.5 ORGANIZATIONAL CONFLICT OF INTEREST: This acquisition is for commercial and non-developmental items. Per FAR Part 9.5, please discuss any performance which may lead to an Organizational Conflict of Interest (OCI) and how the Offeror would mitigate, avoid, or neutralize the conflict. All Offerors must disclose any potential OCIs, including but not limited to situations where the Offeror or its affiliates have provided systems engineering, technical direction, or advisory services to the National Geospatial-Intelligence Agency (NGA) that could affect the objectivity of this procurement. Should a potential OCI exist, the Offeror must submit a comprehensive mitigation plan with their response.

3.0 REQUESTED INFORMATION

Responses must only contain UNCLASSIFIED information and be marked “UNCLASSIFIED” on all pages in both the header and footer. No classified information may be included in your response.

Neither proprietary or classified concepts, nor classified information should be included in the submittal. Input of the information contained in the responses may be solicited and reviewed by NGA non-Government consultants or experts who are bound by appropriate non-disclosure agreements.

3.1 ADMINISTRATIVE

Information to include the following as a minimum:

3.1.1. Name, mailing address, overnight delivery address (if different from mailing address), phone number, fax number, company website, and e-mail of designated point(s) of contact.

3.1.2. BUSINESS TYPE.

Based upon North American Industry Classification System (NAICS) code 541512 computer system design services applicable to this acquisition, the responder is to provide answers to the following questions:

<i>To be considered for a Small Business set-aside, at least 50 % of the cost of contract performance incurred for personnel shall be expended for employees of the responder. (FAR 52.219-14, Limitation of Subcontracting)</i>	RESPONSE
Are you a Small Business? (FAR 19.102), If so, which type:	☐ YES ☐ NO
Small Disadvantaged small business? (FAR 19.304)	☐ YES ☐ NO
Service-Disabled small business? (FAR 19.14)	☐ YES ☐ NO
8(a) Small Disadvantaged small business? (FAR 19.8)	☐ YES ☐ NO
HUBZone small business? (FAR 19.13)	☐ YES ☐ NO
Woman-Owned Small Business? (FAR 19.15)	☐ YES ☐ NO
Involved in a mentor and/or protégé program? (DFARS 219.71)	☐ YES ☐ NO

3.1.3 Recommendation for alternative NAICS Code? Provide rationale for any NAICS Code applicable to the planned acquisition other than the NAICS code identified above.

3.1.4 UEI Number: _____

3.1.5 Commercial and Government Entity (CAGE) Code: _____

3.1.6 Defense facility security clearance? What type? What level? _____

3.1.7 Do you hold a GSA Federal Supply Schedule (FSS) contract applicable to the NAICS code (s) shown above? If yes, provide contract number(s). _____

3.1.8 Are you registered in SAM? _____

3.1.9 Are you interested in: Prime contract? Teaming to include Joint Venture? Subcontractor opportunities? _____

3.1.10 Include additional details that are not already requested based on the constraints of the information request.

3.2 EXPERIENCE

3.2.1 COMMERCIAL.

Provide relevant details on the responder providing the same or similar services offered or made to the general public or to non-governmental entities for purposes other than governmental purposes in the last three (3) years. Relevant details to NGA's proposed acquisition should include, but not be limited to, information regarding the contract value, size and length of the effort, responder performing as a prime or subcontractor, customary practices (warranty, financing, discounts, contract types, etc.) under which the sales of the service(s) are made, security details, the customary practices regarding customizing, modifying, or tailoring of a service(s) to meet customer needs and associated costs, the kinds of factors that are used to evaluate performance; the kinds of performance incentives used; the kinds of performance assessment methods commonly used; the common qualifications of the people performing the services; and requirements of law and/or regulations unique to these service(s), that can demonstrate the responder's abilities and capacity to meet NGA's statement of objectives.

3.2.2 GOVERNMENT.

Provide relevant details on the responder providing the same or similar services offered or made to Government agencies other than NGA in the last three (3) years. Relevant details to NGA's proposed acquisition should include, but not be limited to contract value, information regarding the contract number, agency, responder performing as a prime or subcontractor, size and length of the effort, type of pricing and/or cost, security details, the kinds of factors used to evaluate performance; the kinds of performance incentives; the kinds of performance assessment methods; the qualifications of the people performing the services; and any unique terms and conditions, that can demonstrate the responder's abilities and capacity to meet NGA's statement of objectives.

3.2.3 NGA.

Provide relevant details on the responder providing the same or similar services offered or made to NGA in the last three (3) years. Relevant details to NGA's proposed acquisition should include, but not be limited to contract value, information regarding the contract number, program name, size and length of the effort, responder performing as a prime or subcontractor, type of pricing and/or cost, security details, the kinds of factors used to evaluate performance; the kinds of performance incentives; the kinds of performance assessment methods; the qualifications of the people performing the services; and any unique terms and conditions, that can demonstrate the responder's abilities and capacity to meet NGA's statement of objectives.

3.3 CAPABILITIES

The following is the responder's capabilities to meet the proposed acquisition set forth in section 2 of this RFI including the Statement of Objectives, Statement of Work, or Performance Work Statement.

3.3.1 Government requirements needed to support the RFI statement of objectives

3.3.1.1 Requirement capabilities that the responder currently possesses. Responses should include the relevant information about specific skills, experience, and security clearances that its employees, by labor category, currently possess in performing these services, and any needed hardware or software.

3.3.1.2 Detail the service capabilities that the responder currently does not possess in order to meet the SOO, SOW, or PWS.

3.3.2 Recommended type of pricing for this type of service (e.g., FFP, FPIF CPIF)

3.3.3 Extent to which the responder could meet the proposed acquisition.

3.3.4 Notional schedule and type of plan for transition-in and transition-out (based on previous or similar work efforts).

3.3.5 Security capabilities and plans that prove the ability to meet NGA's security requirements beginning at contract award and throughout the POP.

3.3.6 Extent to which the responder is aware of any potential OCI issues per FAR Part 9.5 or any non-mitigatable OCI related to current development work at NGA.

3.4 RECOMMENDATIONS

The responder is invited to provide information and recommendations for fashioning this proposed acquisition. Recommendation areas may include the type of contract, anticipated contract terms & conditions, incentives, variations in delivery schedule, price and/or cost proposal support, and data requirements, contract pricing, and any other areas that the responder believes are relevant for the Government to achieve its stated objectives. The responder may opine what portion of the work could be set aside for small businesses if all the required work cannot be provided by a small business. Details to support any recommendations for partial small business set-asides should be included.

4.0 RESPONSES

4.1 Interested parties are directed to respond to this RFI with a white paper.

4.2 White paper shall be in Microsoft Word for Office or compatible format and shall not exceed 15 pages. A page is defined as each face of an 8½" x 11" sheet with information contained within a one-inch margin on all sides. Font type shall be Times Roman 12 point.

4.2.1 Interested parties are encouraged to use the Comment Matrix format in their white paper when providing comments, questions, and/or suggestions to the Statement of Objective

4.3 Responses containing the white paper are due no later than **5:00 pm ET on 30 April 2026**. Responses shall be limited to and submitted via e-mail only as a message attachment to

UNCLASSIFIED

Kenneth.M.Lehrmann@nga.mil and Janet.D.Richards@nga.mil with the message subject line “RFI Response – SIP Administration System.

4.3 Proprietary information, if any, should be minimized and **MUST BE CLEARLY MARKED**. To aid the Government, please segregate proprietary information. Please be advised that all submissions become Government property and will not be returned.

5.0 MEETINGS AND DISCUSSIONS

The Government representatives may or may not choose to meet with potential RFI service providers. Such meetings and discussions would only be intended to get further clarification of potential capability, especially any development and certification risks.

6.0 QUESTIONS

Questions and the whitepaper about this RFI should be submitted in writing by e-mail to **Kenneth.M.Lehrmann@nga.mil and Janet.D.Richards@nga.mil**.

7.0 SUMMARY

This RFI is only intended for the Government to find sources that can provide the services needed to fulfill the Government’s statement of objectives. The information provided in this RFI is subject to change and is not binding to the Government. The Government has not made a commitment to obtaining any of the RFI requirements discussed, and release of this RFI should not be construed as such a commitment or as authorization to incur cost for which reimbursement would be needed or looked for. All submissions become Government property and will not be returned.
