

STATEMENT OF WORK

Aircraft Ownership Data Analysis and Compliance Support

1. Introduction/Overview

The Internal Revenue Service (IRS), Large Business & International (LBI), Eastern Compliance Practice Area Transportation Industry (ECPATI) require Aircraft Asset Data accessible via a web-based user license subscription.

2. Background

The mission of the IRS is to identify civil and criminal activity reported. ECPATI support business units IRS-wide in risking and auditing aircraft issues. Specifically, Aircraft data will be used to identify potential civil and criminal tax non-compliance, perpetrated through a variety of known means and emergent threats.

3. Scope

The objective of this engagement is to identify, analyze, and assess aircraft ownership, usage, and related entity structures to evaluate potential tax reporting obligations, compliance risks, and planning opportunities.

1. Beneficial Ownership Analysis

- Identify the beneficial ownership of aircraft, including those held in disregarded LLCs or other entities not readily apparent on federal tax returns.
- Evaluate ownership structures to determine the true economic owner(s) of the aircraft.

2. Entity Structure & Related Party Review

- Analyze entity structures to identify related entities and individuals.
- Assess relationships that may indicate additional aircraft ownership or shared usage arrangements.

3. Aircraft Acquisition & Disposition Review

- Determine aircraft purchase and sale dates.
- Verify current ownership status.
- Assess whether aircraft dispositions have been properly reported on applicable tax returns.

4. Documentation Review (Purchase & Financing)

- Review purchase agreements, loan documents, and financing arrangements.
- Identify the appropriate taxpayer eligible to claim depreciation and other tax benefits.

5. Historical Ownership Analysis

- Evaluate prior ownership of the aircraft.
- Identify transfers between related parties or entities and assess potential tax implications.

6. Operational Classification Review (FAA Regulations)

- Determine under which Federal Aviation Regulation (FAR) Part of the aircraft is operated and maintained.
- Identify operational structures (e.g., Part 91, Part 135) that may indicate:
 - Charter activity
 - Lease or service arrangements
 - Related or unrelated party agreements
- Assess whether associated income has been properly reported.

7. Aircraft Management Company Review

- Identify involvement of any aircraft management company.
- Evaluate agreements to determine:
 - Revenue streams
 - Expense allocations
 - Potential passive activity considerations

8. Flight Log Analysis

- Review flight logs to determine aircraft usage by date, location, and purpose.
- Classify usage (e.g., business, personal, charter).
- Utilize findings for:
 - Risk assessment and classification
 - Identification of potential audit issues
 - Substantiation of tax positions

3.1 Web Based Application support:

The contractor shall provide web-based application support via a customer service team or outlined procedure which shall be provided in the contractor's quote and assigned to the COR for issuance of procedures to the users. IRS employees using the provided licenses shall be able to receive web-based troubleshooting in the event of a malfunction of the provided web-based application and software.

3.2 Training and onboarding

That contractor shall provide an onboarding/initial training package to the COR and users of the contractor's product. Onboarding/initial training shall be in the form of either pre-recorded, virtual, or documented. The contractor shall provide continuous training for any updates or changes to the software for which the licenses are issued.
