

Statement of Requirement (SOR)

1.0 Background/Introduction:

USS Theodore Roosevelt Ship requires specialized, all-electric nonhydraulic rescue tools designed for cutting and spreading in emergency services.

2.0 Minimal Technical Requirements/Salient Characteristics:

Item#	Qty	Unit	Description
1	1	EA	RESCUE TOOL SYSTEM
2	1	EA	RESCUE TOOL
3	1	EA	CONTROLLER UNIT

Rescue tool system Rescue tool system shall be environmentally sound, such that there are no hydraulic or gasoline fluids.

Rescue tool system shall be lightweight and portable.

Rescue tool system shall be suitable for outdoor and indoor use.

Rescue tool system shall be powered by 12 Volts DC.

Rescue tool system components shall be color-coded for enhanced safety and ease of operation (i.e cables, connectors, etc.).

Rescue tool system Rescue tool shall be certified by a recognized third-party testing organization as compliant to NFPA-1936, Standard on Powered Rescue Tool Systems, 2010 Edition.

Rescue tool shall provide for interchangeable application attachments (i.e. spreaders and cutters, etc.), and enable quick-change of the attachments by using ball-detent pins.

Rescue tool shall provide both spreading and cutting capability.

Controller unit shall be provided which controls the 12 Volts DC electrical power to the rescue tool for opening and closing of the application attachments (i.e. spreaders and cutter).

3.2 Controller unit shall automatically turn off power to the rescue tool when maximum tool output force is achieved. This will prevent damage to the motor and/or mechanical system as well as save battery energy

3.0 Additional Requirements:

Power hawk shall include the following:

- Power cable
- Battery pack
- Battery charger
- Sawzall kit
- Jumper cables
