

STATEMENT OF WORK

SECTION C – DESCRIPTION/SPECIFICATION/WORK STATEMENT

C.1 BACKGROUND

The Naval Surface Warfare Center Dahlgren Division (NSWCDD), Weapons Control and Integration Department (H), Missile Systems, Threat Engineering, and Weapons Effectiveness Division (H30) designs, develops, integrates and evaluates weapons systems. The Division performs weapons systems integration; electrical and mechanical analysis, design, and simulation; computational physics solutions, real-time kill assessments, land-based and waterfront integration testing, and system of systems engineering.

There are five (5) branches within the Missile Systems Integration, Threat Engineering, and Weapons Effectiveness Division: Target Vulnerability and System's Effectiveness (H31), Non-Kinetic Lethality (H32), Missile Systems Engineering & Integration (H33), Weapon Systems Engineering Branch (H34), Kinetic & Lethality (H35), and Threat Engineering (H36). Each branch is chartered with the research and development of new and innovative ways to advance the Warfighter, therefore eroding an adversary's power, influence, and will. To ensure the respective systems are integrated into the battlespace transparently; development efforts are cross-functional, and ever emergent, supporting both Naval and non-Naval end users.

C.2 SCOPE

This Statement of Work (SOW) sets forth the requirements for non-personal professional system engineering, mechanical engineering, electrical engineering, computer hardware and software engineering, design and technical direction agent engineering, configuration management (CM), logistics support services, mechanical and electrical engineering technician services, project management and project management support functions, accounting and business services, technical writing services, information assurance (IA) support services, and system administration services to the Missile Systems Integration and Weapons Effectiveness Division.

The Contractor shall support all technical and engineering stages of development, test, integration, and fielding of safe and innovative weapon control systems, advanced weapon systems support, missile systems, launcher system weapons effectiveness, simulation and testing, and mechanical and electrical technician support towards assembly and integration. Other duties indirectly supporting these efforts include providing business operational and financial reporting support, writing technical documentation, maintaining technical databases, editorial support of technical publications, configuration management, IA, and system administration. Specific programs or projects to be supported under this Task Order may require tasks to be completed under one or more of these areas. Support under this Task Order shall be provided for both United States (US) and US provided Foreign Military Sales (FMS) systems.

This is a Task Order for the provision of services by the Contractor. In accordance with (IAW) law and policy and with the terms and conditions of this Task Order, Contractor personnel shall perform as required by this SOW, and such work shall include working in cooperation and collaboration with Government personnel. Performance of this Task Order work shall require

the Contractor to access and use Government owned data such as software, documentation, technical data, process and report templates. Any and all software, documentation, and technical data generated from such access and use shall remain Government owned data. The Contractor's use of and access to Government owned data shall neither constitute nor create any Contractor rights in or license to such data; the only Contractor permissions to use and access the data shall be those necessarily required by the Contractor to perform the work herein. Rights in data constituting and contained in contract deliverables required by the Contract Data Requirements List (CDRL) shall be governed by the appropriate contract clauses.

C.2.1 APPLICABLE DOCUMENTS

The following documents are applicable to this SOW. The most current versions of these documents are accessible through the internet or will be provided to the Contractor upon request.

Other Department of Defense Specifications/Standards/Other Applicable Documents may become applicable throughout the life of the Task Order and may be added to the Task Order via modification.

The Contractor shall ensure compliance with the most current versions of these documents throughout the life of the Task Order:

Number	Document Name
DOD 8570.01-M	Information Assurance Workforce Improvement Program
SAE AS5553	SAE Aerospace Standard 5553
NISPOM – 32 Code of Federal Regulation Part 117	National Industrial Security Program Operating Manual (NISPOM)
NSWCDDINST 5510.4B	NSWCDD Command Security Manual
SEAD-3	Security Executive Agent Directive 3 – Reporting Requirements for Personnel with Access to Classified Information or Who Hold a Sensitive Position
SEAD-3 Implementation Memo	Implementation of Security Executive Agent Directive 3, Reporting Requirements for Personnel with Access to Classified Information or Who Hold a Sensitive Position
DODI 5200.48	Controlled Unclassified Information
SECNAVINST 5210.8F	Department of Navy Records Management Program
NSWCDDINST 5100.1F	Occupational Safety and Health Program
NAVADMIN 216/15	Cyber Hygiene Authorization to use Personal Wearable Fitness Devices
NAVSEA S0420-AA-RAD-010 – REV 2A	Radiological Affairs Support Program (RASP) Manual
DODI 8510.01	Risk Management Framework for DOD Systems
CJCSI 6211.02D	Defense Information Systems Network (DISN) Responsibilities
DODM 1000.13	Department of Defense Identification (ID) Cards

Number	Document Name
NAVSEAINST 4200.19 (series)	Planning, Use and Control of Services Contracting
COMUSFLTFORCOM/COMPACFLT 6320.3B	Medical Screening for U.S. Government Civilian Employees, Contractor Employees, Guests and Visitors Prior to Embarking Fleet Units
MIL-HDBK-61B	Configuration Management Guidance
MIL-HDBK-454C	General Guidelines for Electronic Equipment
MIL-D-23140D	Drawings, Installation Control, for Electronic Equipment
MIL-STD-31000B	Technical Data Packages

C.3 REQUIREMENTS

C.3.1 SYSTEMS ENGINEERING REQUIREMENTS AND PLANNING SUPPORT

C.3.1.1 The Contractor shall provide subject matter expertise and recommendations to user, sponsor, and peer reviews, working groups, design reviews (Preliminary Design Reviews, Critical Design Reviews), Integrated Product Teams (IPTs), and technical interchange meetings. (CDRL A002)

C.3.1.2 The Contractor shall identify a range of technically feasible engineering approaches or solutions to meet operational requirements, cost constraints, program or project timelines during engineering solution concept generation or refinement. (CDRL A002)

C.3.1.3 The Contractor shall perform feasibility analyses of Government or other vendor identified engineering approaches, solutions, or designs. (CDRL A002)

C.3.1.4 The Contractor shall design, develop, generate, or provide subject matter expertise into: Analysis of Alternatives; tradeoff assessments; studies of new systems or technologies; developmental schedules; or cost estimates of the engineering solutions. (CDRL A002)

C.3.1.5 The Contractor shall design and develop system, subsystem, or component model, or architecture, capturing operational context and envisioned concepts. (CDRL A003)

C.3.1.6 The Contractor shall develop and document operational, functional, and interoperability requirements in specifications. (CDRL A002, A003)

C.3.1.7 The Contractor shall develop and document the system, subsystem, or component boundaries and interfaces. (CDRL A002, A004)

C.3.1.8 The Contractor shall develop, refine, or provide subject matter expertise into system engineering plans for maritime, launcher, missile, weapon, or weapon control systems. (CDRL A003, A002)

C.3.1.9 The Contractor shall develop, or provide subject matter expertise into strategic plans for maritime, launcher, missile, weapon, or weapon control systems. (CDRL A003, A002)

C.3.1.10 The Contractor shall provide subject matter expertise and recommendations to the selection of system, subsystem, or component solutions considering operational needs, system requirements, cost, schedule, test and evaluation strategy, and technology or operational integration risks. (CDRL A003, A002)

C.3.1.11 The Contractor shall develop or provide subject matter expertise into operational documents and plans. (CDRL A003, A002)

C.3.1.12 The Contractor shall develop and document reliability, availability, and maintainability analyses or requirements. (CDRL A003)

C.3.1.13 The Contractor shall develop detailed system engineering cost estimates to support system, subsystem, or component materiel solution decisions. (CDRL A003)

C.3.1.14 The Contractor shall develop and generate system or force level integration plans. (CDRL A003)

C.3.1.15 The Contractor shall perform requirements assessments and analysis; develop or refine lower-level requirements; analyze or refine system architecture; develop system behavioral modeling; perform functional analyses or functional flows; document systems baselines; and perform system performance interface and interoperability analyses. (CDRL A002, A002)

C.3.2 SYSTEMS ENGINEERING DESIGN SUPPORT

C.3.2.1 The Contractor shall develop or refine designs for systems, subsystems, components, and interfaces for new or existing maritime, launcher, missile, weapons, weapons control, and weapons effectiveness systems. (CDRL A003, A002, A005)

C.3.2.2 For hardware designs, the Contractor shall generate design models; drawings; Technical Data Packages (TDPs); specifications; interface documents; and the appropriate technical and integration data, analyses, and documentation to support engineering decisions. The Contractor shall review or prepare Computer-Aided Design (CAD) system electronic or mechanical drawings and ensure drawings are clear and technically accurate based upon design specification. (CDRL A002, A004, A005, A00T)

C.3.2.3 For software designs, the Contractor shall generate design data; specifications; interface control documents; software description documents; software version description documents; code; and the appropriate technical and integration data, analyses, and documentation to support engineering decisions. The Contractor shall derive and implement lower-level requirements from system and software requirements specifications. (CDRL A002, A006, A007)

C.3.2.4 The Contractor shall refine or finalize hardware and software designs for maritime, launcher, missile, weapons, weapons control, and weapons effectiveness systems, subsystems, and components to document the product baseline for production or resolve deficiencies discovered during manufacture or end-use if needed. The Contractor shall provide subject matter expertise and recommendations on system, subsystem, and component readiness to begin

production and/or deployment. The Contractor shall assist in the setup of hardware and software labs onsite at Dahlgren. (CDRL A002)

C.3.2.5 The Contractor shall develop assigned portions of various engineering studies, plans, and related documents to include Weapon System Explosives Safety Review Board (WSESRB) and Software System Safety Technical Review Panel (SSSTRP) data packages and presentations. (CDRL A003, A00A, A00C)

C.3.2.6 The Contractor shall provide weapon system subject matter expertise to conduct reverse engineering design analyses to build representations of threat kinematics, signatures, trajectories and other system performance elements for the purpose of developing simulations for integration with weapons development test beds. (CDRL A002)

C.3.3 ENGINEERING LIFE CYCLE SUPPORT

C.3.3.1 The Contractor shall conduct system, subsystem, or component performance, as well as effectiveness improvement studies. (CDRL A002, A004)

C.3.3.2 The Contractor shall perform obsolescence analyses with recommendations for replacement components or systems. (CDRL A002)

C.3.3.3 The Contractor shall provide subject matter expertise to investigate system, subsystem, or component level failures during design, integration, test, manufacture, or end-use and provide recommendations for corrective actions. Testing and Validation shall be performed on Government agency or other organization designs, but shall not be performed on the Contractor's own designs. (CDRL A002)

C.3.3.4 The Contractor shall analyze deficiencies discovered during testing, outlined in production reports, maintenance reports, or user feedback trouble reports, and provide recommendations on corrective actions. (CDRL A002)

C.3.3.5 The Contractor shall perform trade studies or analyze production processes to: determine the most cost-effective fabrication or manufacturing process; resolve a failure observed during testing attributed to manufacture; or reduce manufacture process technology risk. (CDRL A002)

C.3.3.6 The Contractor shall develop and generate assembly procedures; and analyze approaches or generate plans to validate fabrication and manufacturing processes. (CDRL A003)

C.3.3.7 The Contractor shall develop and generate operator manuals, maintenance manuals, and installation and removal procedures. (CDRL A003, A002, A008)

C.3.3.8 The Contractor shall develop and generate demilitarization plans. (CDRL A003)

C.3.3.9 The Contractor shall provide subject matter expertise into, develop new, or modify existing Production Automated Test Equipment (ATE) hardware and software that can

successfully run Factory Acceptance Tests (FAT) for United States Navy (USN) tactical electronics hardware.

C.3.4 ENGINEERING STUDIES AND ANALYSES

C.3.4.1 The Contractor shall perform vulnerability analyses and develop recommendations for mitigation. (CDRL A003)

C.3.4.2 The Contractor shall analyze foreign weapons systems for application and use or for threat studies. (CDRL A003)

C.3.4.3 The Contractor shall develop or provide subject matter expertise into system threat studies or analyses. (CDRL A003, A002)

C.3.4.4 The Contractor shall develop, document, or provide subject matter expertise into Joint Technical Coordinating Group for Munitions Effectiveness (JTCCG/ME) documents or analyses. (CDRL A003, A002)

C.3.4.5 The Contractor shall provide analysis, design, implementation, verification and documentation for new and existing shipboard combat weapons delivery systems. This shall include: shipboard topside surveys; analyses of ships' plans and drawings; calculation of safe standoff angles from ships' structures for missiles; preparation of weapons checkout forms; coordination with local Governmental and Contractor support personnel, updating associated documentation; and design of pointing and firing cutout zones (both new and revisions to existing), including verification of weapons' performance for development of cut-out zones. (CDRL A002)

C.3.5 MODELING AND SIMULATION SUPPORT

C.3.5.1 The Contractor shall perform and document computer solid layout modeling and simulation. (CDRL A003)

C.3.5.2 The Contractor shall perform and document static and dynamic structural modeling and simulation. (CDRL A003)

C.3.5.3 The Contractor shall perform and document thermal modeling and simulation. (CDRL A003)

C.3.5.4 The Contractor shall perform and document blast, lethality, and effectiveness modeling and simulation. (CDRL A003)

C.3.5.5 The Contractor shall develop, verify, validate, update, and document models and simulations to support weapons effectiveness analyses, including any associated graphical user interface. (CDRL A003)

C.3.5.6 The Contractor shall develop, verify, validate, maintain/update, and document models and simulations for threat missile systems and enemy surface combatant combat management systems to support blue force weapons efficacy assessments. (CDRL A003)

C.3.5.7 The Contractor shall document and provide source code for all models and simulations, as appropriate. (CDRL A002, A006, A007)

C.3.6 DESIGN, PROVING, TEST AND VERIFICATION ANALYSIS SUPPORT

C.3.6.1 The Contractor shall develop and generate system or force level test or exercise plans, test or exercise reports, as well as lower-level test plans and reports. (CDRL A002, A003, A009)

C.3.6.2 The Contractor shall develop and generate Test and Evaluation Master Plans (TEMPs), as well as lower-level test and evaluation plans. (CDRL A003, A00A)

C.3.6.3 The Contractor shall develop test objectives, plans, and reports involving the design and analysis of test items and test fixtures. The emphasis of this work shall be associated with bench level, system integration lab, computer lab or off-site testing, not NSWCCD Range testing. (CDRL A003, A002, A00A)

C.3.6.4 The Contractor shall perform requirements analyses including the review of Design Agent requirements traceability documentation to ensure the traceability of hardware and software requirements to test events and test procedures. The Contractor shall develop recommended supplemental documentation for functional, threat, and cost analysis. (CDRL A003)

C.3.6.5 The Contractor shall perform software code review or analyses, such as static or dynamic code analysis in support of design engineering and perform software testing such as Independent Verification and Validation (IV&V). The emphasis of this work shall be on design verification and not system safety analyses. (CDRL A003, A00B)

C.3.6.6 The Contractor shall perform tests and analyses to verify that the system, subsystem, or component meets the functional, allocated, or product baseline or satisfies other requirements documentation. The Contractor shall provide subject matter expertise into the reduction of system, subsystem, and component-level risk. (CDRL A003, A00A)

C.3.6.7 The Contractor shall analyze test and evaluation data and perform trade off or analysis of alternatives assessments. The Contractor shall provide subject matter expertise and recommendations on reduction of design or technology risk and assess compliance with system requirements. (CDRL A003)

C.3.6.8 The Contractor shall participate in off-site system, subsystem, or component testing by performing test planning and set up, execution, data collection, test data analysis functions, and development of problem reports discovered during testing. (CDRL A002, A008, A00D)

C.3.6.9 The Contractor shall prepare or give recommendations to test documentation such as test requirements, test plans, test reports, test schedules, Mission Control Panel briefings, Mission Readiness Reviews, Test Readiness Reviews, Standard Operating Procedures (SOP), countdown checklists, safety requirements and presentations to safety review. (CDRL A003, A009, A00B)

C.3.6.10 The Contractor shall provide system software testing and analysis of software-based weapon systems. The Contractor shall develop test procedures from the documented requirements and software trouble reports; perform unit, module, end-to-end, or endurance testing including the development of test procedures and test execution; perform white and black box testing; participate in or conduct independent verification and validation testing; prepare test reports and conduct analysis of test results to develop recommendations for mitigation or correction. (CDRL A00B)

C.3.7 DESIGN IMPLEMENTATION AND INTEGRATION SUPPORT

C.3.7.1 The Contractor shall fabricate and assemble systems, subsystems, components, and interfaces for new or existing maritime, launcher, missile, weapons, weapons control, and weapons effectiveness systems based on design or requirements documentation.

C.3.7.2 The Contractor shall integrate systems, subsystems, components, and interfaces for new or existing maritime, launchers, missiles, weapons, weapons control, and weapons effectiveness systems based on design or requirements documentation.

C.3.7.3 The Contractor shall develop and generate integration, installation, or change documentation to document as built configurations. (CDRL A002)

C.3.7.4 The Contractor shall fabricate, assemble, install, solder, and connect components, sub-assemblies, and systems (including cables, wiring harnesses, cable assemblies, and circuit card assemblies).

C.3.7.5 The Contractor shall maintain, repair, troubleshoot, modify and install various types of electronic equipment and related devices such as electronic transmitting and receiving equipment (e.g., radar, radio, display devices, telecommunication, sonar, and navigational aids); tactical computers, servers, and terminals; industrial, measuring, and controlling equipment. (CDRL A00R)

C.3.7.6 The Contractor shall assemble and maintain mechanical and electrical systems in support of rapid prototyping, initial hardware (mechanical or electrical) assessment, prototype evaluation, hardware assembly for initial outfitting, and system operations support. (CDRL A00R)

C.3.7.7 The Contractor shall fabricate, install, maintain, or troubleshoot mechanical, electrical, or software sub-assemblies and systems during engineering events that includes weapons system platform installations, temporary system platform installations in support of system demonstrations, and system test events both on and off-site. (CDRL A00R)

C.3.7.8 The Contractor shall provide software integration expertise to facilitate integration of threat engineering models and simulations with enterprise test beds for blue force weapons efficacy assessments. (CDRL A003)

C.3.8 LOGISTICS SUPPORT

C.3.8.1 The Contractor shall provide Integrated Logistic Support (ILS) including, providing technical inputs to and maintaining provisioning and preparation of program documentation. (CDRL A003, A002 A00Q)

C.3.9 CONFIGURATION MANAGEMENT SUPPORT

C.3.9.1 The Contractor shall provide configuration management (CM) support performed at the program, project, system, and subsystem levels.

C.3.9.2 The Contractor shall attend and provide technical subject matter expertise to Configuration Control Boards (CCBs) to evaluate proposed changes for system, subsystem, or component level impact or other associated system applicability. (CDRL A003, A00E, A00F)

C.3.9.3 The Contractor shall generate or maintain formal Configuration Management Plans and related documentation. (CDRL A003, A00E, A00F)

C.3.9.4 The Contractor shall develop and implement CM tracking processes, including the use of tracking tools such as the Dynamic Object Oriented Requirement System (DOORS). The Contractor shall track configuration metrics. (CDRL A003, A00D, A00F)

C.3.9.5 The Contractor shall establish program or project-level CM technical data repositories tracking engineering change proposals (ECPs) and other configuration item data. The Contractor shall maintain and operate web-based CM server repositories. (CDRL A006, A00D, A00F)

C.3.9.6 The Contractor shall generate or review configuration item change documentation such as Class I and Class II ECPs, Ship Change Documents, Requests for Deviations (RFDs), Request for Waivers (RFWs), Specification Change Notices (SCNs), and Notice of Revisions (NORs). (CDRL A00G, A00H, A00J, A00K, A00L)

C.3.9.7 The Contractors shall generate, maintain, or revise drawings associated with components, sub-assemblies, and systems. The Contractor shall participate in the CM process by maintaining controlled or versioned documentation in accordance with the program or project Configuration Management plan. The Contractor shall interface with the CM board or program processes by participating in drawing or program reviews to baseline or revise documentation. (CDRL A00T)

C.3.10 PROGRAM AND FINANCIAL MANAGEMENT SUPPORT

C.3.10.1 The Contractor shall organize and facilitate meetings by scheduling conference rooms at the Government and Contractor facility, generating agendas and invitations, disseminating

invitations, and printing and binding presentation materials. The Contractor shall perform classified material data management, which includes receiving, tracking, and distribution of classified materials. The Contractor shall provide coordination of and provide escort for visitors, including international visitors. (CDRL A00C)

C.3.10.2 The Contractor shall attend meetings to generate attendee lists, meeting minutes, and Action Items (AIs). The Contractor shall track meeting action items and maintain status and records reflecting both open and closed action items. The Contractor shall make real-time edits to documentation during meetings. The Contractor shall contact open action item Points of Contact (POCs) for status updates and document any updates prior to recurring meetings. (CDRL A00P, A00M)

C.3.10.3 The Contractor shall generate, update, and maintain program, project, or budget estimates, tracking budget execution by appropriation and funding type, addressing budget issues, recommending responses to budget data calls tracking forecast and trends of program resources and funding. The Contractor shall attend program reviews to provide financial status, budget requests, and funding projections. The Contractor shall utilize NSWCCD financial systems to track budget status. The Contractor shall execute what-if analysis for scope, schedule, and budget changes.

C.3.10.4 The Contractor shall provide project Earned Value Management (EVM) support including coordinating, participating, and assisting in Integrated Baseline Reviews (IBRs); calculating and tracking earned value metrics; tracking EVM execution; and working with the Program Financial Managers to define and enter tasking into Government systems. (CDRL A00N)

C.3.10.5 The Contractor shall coordinate Government inputs, generate and deliver program weekly reports, monthly reports, program review presentations, and program status updates or highlights. The Contractor shall generate, update and maintain project action items relative to IPTs or Working Groups (WGs). The Contractor shall develop meeting minutes assigned by the designated IPT or WG. (CDRL A00C, A00M, A00P)

C.3.10.6 The Contractor shall provide support for requirement gathering from engineers, development of documentation for Government review and submission, entering data into systems, tracking procurements, and receiving and organizing information for delivery of micro-purchase procurements. The Contractor is not authorized to receive any items that require NSWCCD plant accounting.

C.3.10.7 The Contractor shall generate, update and maintain Work Breakdown Structures (WBS). (CDRL A00N)

C.3.10.8 The Contractor shall generate, update, and maintain POC listings such as IPT, WGs, inventories, and procurements in process, procurement actions, and organizational matrices with locations. (CDRL A002, A00C)

C.3.10.9 The Contractor shall generate, update, and maintain Integrated Master Schedules (IMSSs), identifying resources, critical path items, addressing schedule issues, and synchronizing the IMS with other program IMSSs. (CDRL A00C)

C.3.11 TECHNICAL WRITING AND EDITING SUPPORT

C.3.11.1 The Contractor shall perform direct writing to engineers, scientists, and other personnel who author technical and administrative publications. Configuration control shall be maintained at all stages of document generation and maintenance. (CDRL A002, A00C)

C.3.11.2 The Contractor shall perform technical editing of existing Government documents and presentations to ensure technical consistency, format consistency, and proper grammar. The Contractor shall maintain configuration control at all stages of document generation and maintenance. (CDRL A002)

C.3.11.3 The Contractor shall prepare the publication of documents as directed by the Technical Point of Contact (TPOC) through the NSWCD public document process. The Contractor shall submit and track the document through the approval process.

C.3.12 DATABASE SUPPORT

C.3.12.1 The Contractor shall organize program, project, and IPT level documentation into repositories, including web-based repositories, and maintain the repository to facilitate documentation storage and retrieval. The Contractor shall convert program documents, weapons data and records to include video or microfiche into digital format for access via the Internet or to distribute and archive using electronic means including CDs and DVDs. (CDRL A00T)

C.3.12.2 The Contractor shall maintain current databases reflecting Data Center holdings to facilitate literature searches and access by others. These databases include all types of gun and electric weapon systems and weapon control and integration documentation, including Design Agent-generated documentation, deliverables from this contract, as well as data received from other sources. The Contractor shall also perform an outreach function to ensure holdings represent current versions. For all databases developed or maintained, the Contractor shall prepare or modify, as necessary, the following documentation: database design and structure and User instructions. The Contractor shall provide training to the Government in the use of these databases. (CDRL A00C)

C.3.13 CYBERSECURITY

C.3.13.1 The Contractor shall support the research of cybersecurity products and assess the impact of implementation of those products into the cybersecurity framework of H30 programs and products.

C.3.13.2 The Contractor shall provide IA support for the development and tactical hardware suites of equipment for H30 programs and products, including laboratory/land-based systems and operational afloat systems. This support includes performance, monitoring, and management of

IA duties to include Information Assurance Vulnerability Management compliance (IAVMc), system patching, System Test and Evaluation (ST&E), user management, log management, and Assessment & Authorization (A&A) documentation preparation and review.

C.3.13.3 The Contractor shall utilize Department of Defense (DoD) approved monitoring and scanning tools in support of system vulnerability management and reporting. This includes vulnerability status tracking and reporting in DoD systems.

C.3.13.4 The Contractor shall serve as the Certifying Agent Representative (CAR) for H30 programs and systems.

C.3.13.5 The Contractor shall assist in the preparation of the accreditation documentation for submission to the NSWCDD Information Systems Security Manager (ISSM) or other program specific Designated Approving Authority (DAA), utilizing the appropriate DoD Accreditation standards, policies, and directives.

C.3.13.6 The Contractor shall perform activities in compliance with current guidance for administrators and users relating to the policies, procedures and controls required by Navy standards for A&A processes and shall support and interface with local Information Assurance Officer (IAO) to ensure compliancy with current Government IA regulations.

C.3.13.7 The Contractor shall observe, test, and monitor changes in information systems that might affect the security posture. The Contractor shall report to the assigned Information Systems Security Officer (ISSO) and the ISSM on Cybersecurity issues affecting Information Technology (IT) systems and software they are assigned to support.

C.3.13.8 The Contractor shall ensure the Cyber-security related requirements are identified and addressed for the IT systems.

C.3.13.9 The Contractor shall verify the System under test is in compliance with IA controls and weapon system security requirements.

C.3.13.10 The Contractor shall develop security penetration test plans (CDRL A00V), security test specifications, security test procedures (CDRL A00W), and security test reports (CDRL A00X).

C.3.13.11 The Contractor shall provide system administration support to maintain, develop, and operate the hardware and networks suites of equipment utilized in the development of software products. This support includes the establishment and maintenance of operating and network operating system development environments, and providing system and network design, implementation, maintenance, and network support. Additionally, the Contractor shall support Cybersecurity related administration tasks, including system remediation, configuration, and development of A&A documentation.

C.3.13.12 The Contractor shall provide system initialization, deployment, accreditation and system administration functions for all Unclassified & Classified development servers and

workstations to include the following: performing user accounts management; performing Local Area Network (LAN) and application management support including switches, routers, firewalls, and loggers; performing system backup management and restore systems in the event of system or disk crash; performing system patching; supporting Navy standards for A&A processes and procedures (e.g. Risk Management Framework (RMF), and Platform Information Technology (PIT)); implementing and validating Security Technical Implementation Guidelines (STIG) requirements, installation checklists, and other security process requirements; providing support for web-based tools and services.

C.3.13.13 The Contractor shall develop and follow a Software Development Plan (SDP) for all computer software to be developed or maintained under this effort. (CDRL A010)

C.3.14 LAB & FACILITIES SUPPORT

C.3.14.1 The Contractor shall provide facilities support including installation and maintenance of hardware and software, licenses, patches; performance of system administration functions including network configurations and connectivity.

C.3.14.2 The Contractor shall assist the Government with the design, layout, creation, updates, and repair of developmental and tactical environments, networks, and IT related environments to include classified and unclassified computers and equipment.

C.3.14.3 The Contractor shall maintain, repair, troubleshoot, modify, and install various types of electronic equipment and related devices such as electronic transmitting and receiving equipment (e.g., radar, radio, display devices, telecommunication, and Global Positioning Systems (GPS) navigational aids); tactical computers, servers, and terminals; industrial, measuring, sensory, and controlling equipment.

C.3.14.4 The Contractor shall transport, ship, fabricate, assemble, repair, maintain, and install systems, subsystems, components, cables, electrical enclosures and hardware interfaces for H30 supported systems and products. Installation support shall include local and remote land-based sites, and shipboard locations.

C.3.14.5 The Contractor shall prepare excess or obsolete systems and equipment for proper Government disposal.

C.3.14.6 The Contractor shall track the inventory spare and consumable supplies of IT equipment.

C.3.14.7 The Contractor shall provide support for the Facilities Helpdesk to include the tracking of maintenance contracts, data entry, and trouble report processing.

C.3.14.8 The Contractor shall develop, maintain, and update facility and security drawings for related facilities documentation utilizing a computer-based tool (e.g. Visio, PowerPoint, etc.). The drawings shall be clear and technically accurate electrical, network, and mechanical drawings based on design tolerances and specifications (CDRL A012).

C.3.14.9 The Contractor shall provide an analysis of the electrical, mechanical, network, and space requirements for the introduction of new equipment, reconfiguration of existing equipment, or proposed changes in the usage of space.

C.4 Task Order Management

The Contractor shall provide sufficient supervision to ensure all personnel work instructions and schedules originate with the Contractor rather than with the Government technical office. This supervision shall ensure that the Contractor's personnel are not assigned work instructions and schedules outside this SOW. Any perceived conflicts with the SOW shall be directed to the Contracting Officer and Contracting Officer's Representative (COR).

C.4.1 Progress Report

The Contractor shall submit a Contracting Officer's Management Report. (CDRL A001) The Contractor shall maintain and provide a list of all personnel assigned to the Task Order. The Contractor shall provide copies of invoices received from Sub-contractors and consultants as well as evidence of its review to ensure that all invoiced costs represent services that have been performed and deliverable items. In accordance with G-232-H005 and FAR 52.216-7, the Contractor shall provide the COR supporting documentation, including receipts, for all travel and material purchases with each invoice submission.

C.4.2 In Progress Reviews (IPRs)

The Contractor shall participate in both formal and informal IPRs of work performed. The Government will schedule formal reviews in Government spaces. At the time the review is scheduled, the Government shall communicate the specific purpose of the review. The Contractor shall, within 60 days of the Task Order award date, conduct an initial IPR and follow an agenda agreed to by the Task Order's COR. Subsequent IPRs shall be held approximately every 90 days thereafter unless waived by the Government. (CDRL A00C)

C.4.3 Task Prioritization Meetings

The Contractor shall participate in periodic Task Prioritization Meetings with the COR and Subject Matter Experts (SMEs). The purpose of these meetings is to convey the Government's technical program schedules and priorities and to identify corresponding task priorities for this order. The Contractor shall document meeting minutes of the meetings. (CDRL A00M, A00P)

C.4.4 Telework

In accordance with H-216-H002 LEVEL OF EFFORT--ALTERNATE I (NAVSEA) teleworking at an alternative worksite is permitted. Telework is also dependent upon the type of work being performed.

C.4.13.4.1 In accordance with SEA 5252.216-9122 Alt 1 - Level of Effort Clause Alternate I (May 2010) and concurrence from the Government SME and COR, teleworking at an alternative worksite is permitted with no more than 20% of the work being performed at an alternative worksite. Telework is also dependent upon the type of work being performed.

C.4.13.4.2 Telework is permitted subject to Government requirements. In the event of telework, the Contractor shall track all Government Furnished Property, listing personnel, asset tag numbers and serial numbers for all NMCI computer equipment in the Contractor's possession for telework. All equipment shall be returned to the Government by the end of the Task Order or when equipment is no longer in use, whichever comes first.

C.4.5 Project Conclusion Transition-Out Plan

(a) Within thirty (30) days of the beginning of the final period of Task Order performance, the Contractor shall develop and submit a transition-out plan that assumes re-compete of the Task Order requirements resulting in award, and transition, to another Contractor. The transition-out plan shall address:

- (1) Minimum duration of transition
- (2) Staff requirements and their role in transition
- (3) Level of tasking to be performed and any impact it will have on transition
- (4) Knowledge transfer
- (5) Intellectual property transfer
- (6) Gantt schedule of transition
- (7) Formal handover (conclusion of transition) and Government acceptance.
- (8) List of any Government Furnished/Contractor Acquired Property

(b) The plan shall address the step-by-step transition of responsibility for support of the program's current operation without discontinuity of workflow or loss of integrity of the program's current operation. The plan shall establish interfaces for technical and Task Order administration. In addition, the plan shall identify any services, support, or other items that will be required from the Government to facilitate the transition (**CDRL A00S**).

C.4.6 Facility Location:

The Contractor's primary facility must be located within 60 miles of NSWCDD, Dahlgren, VA.

C.5 SKILLS AND TRAINING

C.5.1 The Contractor shall provide capable personnel with qualifications, experience levels, security clearances, and necessary licenses, certifications, and training required by Federal, State, and Local laws and regulations. Information assurance functions require certifications specified in Defense Federal Acquisition Regulation Supplement (DFARS) 252.239-7001 Information Assurance Contractor Training and Certification.

C.5.2 Per the requirements set forth in DOD 8570.01-M Information Assurance Workforce Improvement Program, as a condition of meeting requirements, personnel performing

Information Assurance (IA) functions outlined in the manual will be tracked for compliance, designated in writing from the Local Command Authority as Cyberspace Workforce (CWF), shall already be in possession of an approved commercial certification for their environment at time of performance start, and shall satisfy both preparatory and sustaining DOD IA training and certification requirements as outlined in Chapters 2-5 of DOD 8570.01-M. Additionally, personnel with Privileged Access must sign acknowledging duties on a "Privileged Access Agreement", be able to maintain the appropriate investigation type, sign a System Authorization Access Request-Navy (SAAR-N) with "privileged" indicated, complete applicable Operating System/Computer Environment (OS/CE) training to Navy's standards, and maintain a valid commercial certification that meets outlined designations. Failure to maintain all requirements at the appropriate level, may result in the removal of elevated accesses and removed from tasks being performed. Non-privileged Information Assurance Workforce (IAWF) members may be removed from tasks being performed. In both situations accesses will be returned once the failure(s) are corrected.

C.5.3 Training necessary to ensure that personnel performing under this Task Order maintain the knowledge and skills to successfully perform the required functions is the responsibility of the Contractor. Training necessary to maintain professional certification is the responsibility of the Contractor. The Contractor shall provide training opportunities to maintain Contractor capabilities and/skills to coincide with changing technology environments. All costs for DOD 8570.01-M certification shall be borne by the Contractor for new employees on this Task Order.

C.5.4 Training on non-commercial and department-specific tools and procedures will be provided by the Government.

C.5.5 Notwithstanding the above, it is understood that the Government may require services requiring knowledge and skills of a newly emergent technology. The Contracting Officer may, on a case-by-case basis, authorize the expenditure of Government funds for the training of Contractor personnel. Advance approval is required. The Contractor is encouraged to suggest a cost-sharing arrangement that addresses registration, tuition, travel, and labor costs.

C.5.6 The Contractor shall complete all mandatory training as prescribed by the Government. These training requirements are accessed through Government web-based training (WBT), classroom training, or combination of both.

C.5.7 Mandatory Training Completion Log - The Contractor shall submit a CWF report (CDRL A00Z). The CWF report shall address required CWF training including annual continuous learning training requirements. The Contractor shall also submit Mandatory Training Completion Log (CDRL A00Y). The Mandatory Training Completion Log shall address all mandatory training completed as directed by the COR, as well as which contractor employees have created which training and a date the training was completed

C.6 OTHER DIRECT COSTS

During the performance of this Task Order the Contractor will have to travel and procure material and consumables to perform the tasking of the SOW.

C.6.1 Travel

The Contractor shall be required to travel in performance of this Task Order. The numbers of trips and types of personnel traveling shall be limited to the minimum required to accomplish work requirements and shall be requested of and authorized in advance by the COR in writing or by electronic email. All requests must show the appropriate Task Order number, the number of people traveling, the number of days for the trip, the reason for the travel, an estimated cost (with G&A separate), and any high cost or unusual costs expected. The Contractor is not authorized to perform any travel that is not in conjunction with this effort. All travel shall be conducted in accordance with Federal Acquisition Regulation (FAR) 31.205-46 Travel Costs. Locations will be determined by the Government and are subject to change.

Representative travel locations include:

- Albuquerque, NM
- Baltimore, MD
- Colorado Springs, CO
- Columbia, MD
- San Diego, CA
- Dam Neck, VA
- Norfolk, VA
- Manassas, VA
- Crystal City, VA
- Dahlgren, VA
- Washington, DC
- Aberdeen Proving Grounds, MD
- Minneapolis, MN
- NSWC Carderock, MD
- NSWC Crane, IN
- NSWC Port Hueneme, CA
- NSWC Corona, CA
- NSWC Panama City, FL
- Fort Johnson, NY
- Fort Walton Beach, FL
- Eglin AFB
- Everett, WA
- Huntsville, AL
- Joint Base Pearl Harbor Hickam, HI
- Mobile, AL
- Indianapolis, IN
- Largo, FL
- Los Angeles, CA
- San Diego, CA
- Marinette, WI
- Mayport, FL

- McLean, VA
- Nashville, TN
- Nellis AFB
- Pacific Missile Range Facility Kauai, HI
- Patuxent River, MD
- Point Mugu, CA
- Oak Ridge National Laboratory
- Offutt AFB
- Richardson, TX
- Tucson, AZ
- White Sands Missile Range Las Cruces, NM
- Moorestown, NJ
- Brussels, Belgium
- Shrivenham, United Kingdom
- Ephrata, PA
- Key West, FL
- Lake Forest, CA
- Rota, Spain
- Bahrain
- Singapore
- Guantanamo Bay, Cuba
- Panama
- Colombia
- Croatia

The Contractor shall submit trip information in the Contracting Officer's Management Report following any travel under this effort. (CDRL A001)

C.6.2 Direct Charge of Materials

C.6.2.1 Materials and Equipment Costs

During the performance of this Task Order, it may be necessary for the Contractor to procure materials or equipment (hereafter referred "materials") to respond to the mission requirements listed in the Statement of Work (SOW). This Task Order is issued from a service contract and the procurement of materials of any kind that are not directly related to and necessary for contract performance may be determined to be unallowable costs pursuant to FAR Part 31. The term "material" includes supplies, parts, equipment, hardware, and Information Technology (IT) resources including hardware, services, and software. Any material provided by the Contractor is subject to the requirements of the FAR, DFARS, and the applicable Department of Navy regulations and instructions. Charges related to material costs may include general and administrative (G&A) expenses, but shall not include fee or profit.

C.6.2.2 Materials List

The materials and equipment contained in the following list are authorized for purchase once the Contractor has complied with approval requirements as stated in Sections C.6.2.3 and C.6.2.4 below:

- Fasteners and miscellaneous hardware
- Connectors and miscellaneous electrical hardware
- Special tools and tooling (such as dial calipers, measurement gauges, torque wrenches, depth micrometers, etc.)
- Prototype quantities of miscellaneous hardware and fixtures
- Prototype quantities of miscellaneous electrical cabling and enclosures
- Prototype quantities of circuit boards and electrical hardware
- Incidental material or logistics costs (shipping/packaging) in direct support of SOW tasking and in quantities appropriate for prototype or R&D efforts
- Specific IT tools that are required to support SOW tasking for particular project requirements
- Test support consumables, equipment, and building materials
- Transportation costs related to the movement of hardware

Materials not fitting the description listed in this Section may not be purchased and reimbursed as an Other Direct cost to this contract unless mutually agreed to by both the Government and the Contractor and subsequently added to the contract by Task Order Modification.

C.6.2.3 Requiring Approvals for ODCs

All purchases of materials, exceeding \$3,500 per individual purchase, and all Personal Protective Equipment (PPE), require COR approval prior to purchase. As well as approval by the COR, prior written approval from the Procuring Contracting Officer (PCO) shall be required for all purchases of materials under the following circumstances:

a) If the Contractor possesses an approved purchasing system, the following applies:

1) A purchase of materials in accordance with what is stated in Section C.6.2.2 above, that is greater than \$3,500 and less than or equal to \$10,000 per individual purchase may be executed with COR review and written approval. PCO approval is not required.

2) A purchase of materials in accordance with what is stated in Section C.6.2.2 above that exceeds \$10,000 per individual purchase may NOT be executed unless the COR reviews the proposed purchase and the Contract Specialist issues an electronic written PCO approval.

b) If the Contractor does not possess an approved purchasing system, the following applies:

1) A purchase of materials in accordance with what is stated in Section C.6.2.2 above that equals \$3,500 or less per individual purchase may be executed with COR review and written approval. PCO approval is not required.

2) A purchase of materials in accordance with what is stated in Section C.6.2.2 above that exceeds \$3,500 per individual purchase may NOT be executed unless the COR reviews the proposed purchase and the Contract Specialist issues an electronic written PCO approval.

c) Separate multiple purchases of amounts valued below those thresholds stated in this section shall not be submitted to circumvent the COR and PCO review and approval procedure. Splitting purchase requirements to defeat purchasing thresholds shall not be approved.

C.6.2.4 Procedure for Obtaining COR/PCO Approval

To obtain COR and/or PCO approval, the Contractor shall:

a.) Submit a written request for purchase of materials to the COR (email is acceptable). The COR shall review the request. If it is in accordance with the list above and requires PCO approval, the COR shall submit the request via the Contract Specialist to the PCO for review and approval.

b.) Minimum requirements for a written request for purchase are as follows:

1. Complete description of the material to be purchased
2. Quantity
3. Unit and Total Cost
4. Delivery/ Freight Charges
5. Any associated service charges such as assembly, configuration, packing, etc.
6. An explanation for the need for the material
7. List the competitive quotes received from potential suppliers
8. The basis for the selection of the selected supplier
9. Price reasonableness determination
10. If the procurement is sole sourced to a particular supplier or manufacturer, include the rationale for limiting the procurement to that supplier/manufacturer.

c.) Once the COR and/or PCO have reviewed the request, the Government shall notify the Contractor of the outcome. Issues or details may be discussed with the Contract Specialist acting on behalf of the PCO until a final Government determination is made as to whether to approve, modify, or reject the purchase.

C.6.2.5 Property Management System

The Contractor is required to possess and maintain an adequate property management system. The system must track all materials/ODCs associated with this Task Order. Upon completion of the Task Order Period of Performance, all material associated with this Task Order that were purchased by the Contractor and not depleted or previously delivered to the Government during the performance of this Task Order shall become the property of the Federal Government. The Contractor shall transfer all materials, not depleted or previously delivered to the Government, to the COR by way of a Material Inspection and Receiving Report (DD Form 250) in accordance with DFARS PGI 245.402-71.

C.6.2.6 Disposition of Material

Upon completion of the period of performance, all materials associated with this contract that were purchased by the Contractor and not depleted during the performance of the contract shall

become the property of the Government. The Contractor shall transfer all materials not depleted to the COR. The Contractor's Monthly Progress Report shall include a complete list of all material purchased to date under the contract.

The Contractor shall deliver all material (end items) to the Government through Building 125, Central Receiving with a DD1149. The DD1149 shall include the following:

- 1) Dollar Value
- 2) Purchase Request Number
- 3) Item Description
- 4) Serial Number
- 5) Model Number
- 6) Quantity
- 7) Task Order Number
- 8) Technical Point of Contact
- 9) Assigned Unique Serialized Identification Number

In addition, each deliverable shall have an IUID tag and the corresponding information uploaded into iRAPT (Invoicing, Receipt, Acceptance and Property Transfer).

C.6.2.7 Information Technology (IT) Resources

IT Resources shall not be purchased unless DOD and Navy purchasing procedures have been satisfied and approvals obtained. IT resources include personal computers (PC's), laptops, printers, software, servers, hubs, routers, phones, fax machines, and any related maintenance, telecommunications, training, or other support services. All IT Resource Other Direct Cost Purchases require COR and PCO approval regardless of the dollar value associated with the purchase.

C.6.2.8 General Purpose Business Expenses

The costs of general-purpose business expenses required for the conduct of normal business operations will not be considered allowable direct costs in the performance of the Task Order - unless supported by DCMA as a procedure of the Contractor's accounting procedures. General purpose business expenses include the costs for items such as telephones (including cell phones) and telephone charges, copy machines, word processing equipment, personal computers, and other office equipment and supplies.

C.6.3 Counterfeit Parts and Materiel

(a) The following minimum processes shall be implemented and flowed down by the Contractor to all Sub-contractors in order to minimize the risk of use of counterfeit parts.

(b) The Contractor shall establish processes to minimize the risk of procuring and using counterfeit parts and materiel. The Contractor shall document these processes and provide those documented processes to Government representatives upon request. The contractor shall ensure that all requirements are flowed down to sub-contractors and suppliers at all tiers.

(c) At a minimum, these processes shall ensure that:

- Materiel that is either in production or currently available shall be purchased from an original manufacturer, aftermarket manufacturer, or other authorized supplier.
- Materiel that is neither in production nor currently available may be purchased from suppliers, including unauthorized suppliers, that meet appropriate counterfeit avoidance criteria documented in Industry anti-counterfeit standards. The Contractor shall notify the KO and COR when critical or high-risk materiel is procured from an unauthorized source. The Contractor shall provide this notification before materiel is installed so mitigation actions can be taken.
- The Contractor shall generate a Counterfeit Prevention Plan in accordance with DI-MISC-81832 Counterfeit Prevention Plan, and the requirements of this Data Item Description (DID) and SAE Aerospace Standard 5553 (SAE AS5553) Counterfeit Electronic Parts; Avoidance, Detection, Mitigation, and Disposition. (CDRL A011)
- The Contractor shall maximize the use of authentic, originally designed and/or qualified parts.
- The Contractor shall assess potential suppliers to minimize the risk of receiving counterfeit parts or materiel.
- The Contractor shall have purchasing procedures which confirm whether a selected supplier is authorized (as defined in SAE AS5553) for each purchase.
- The Contractor shall define minimum inspection and test requirements for parts being procured and shall ensure that in-house, third-party, and/or supplier inspection and test procedures and facilities comply with the requirements of this section. These minimum inspection and test requirements shall specify appropriate test methods to detect potential counterfeit parts and materiel.
- The Contractor shall require a certificate of conformance (as defined in SAE AS5553) and supply chain traceability for all electronic part purchases.
- The Contractor shall use government or Industry services such as Government-Industry Data Exchange Program (GIDEP) and other commercially available services to identify part or supplier quality or authenticity problems.
- The Contractor shall maintain critical or high-risk materiel traceability that enables tracking through the supply chain to the original manufacturer if purchased from an authorized source or to the unauthorized source at a minimum if purchased from an unauthorized source.

(d) The Contractor shall immediately notify the COR of the occurrence of a suspect or confirmed counterfeit part or materiel. Contractor shall notify the COR of all actions taken to identify, contain, and impound all product from the lot, within 7 working days of confirmation of the counterfeit status. The Contractor shall initiate and submit an ALERT to GIDEP within 60 days of knowledge of the counterfeit part or materiel.

(e) Suspect counterfeit parts and materiel shall be impounded with all other items from the same lot. The Contractor shall identify and locate all potential users or hardware items with the suspect part or materiel and contain the product which has this suspect part or materiel, pending confirmation of the part or materiel's authenticity. The Original Equipment Manufacturer (OEM) may be involved at this point in order to verify authenticity. Confirmed counterfeit materiel shall be contained and provided to investigative agencies for ongoing investigation or prosecution. The counterfeit product shall not be scrapped or otherwise disposed of without

approval from investigative authorities or the Contracting Officer. Confirmed counterfeit product shall be disposed of in a way which would not allow its resale or reuse.

(f) Counterfeit parts are defined in SAE AS5553. Counterfeit parts may be electronic or mechanical in nature. Counterfeit electronic parts may typically be used parts which have been refurbished and represented as new. Commonly counterfeited electronic parts include parts such as microcontrollers or specially screened devices, or common parts, which have several pin-compatible versions from multiple manufacturers, such as memory devices and operational amplifiers. Counterfeit mechanical parts are typically improperly made, marked, or treated products. Examples are improper anodization or heat treatments (or falsified data), mismarked parts sold as higher grade steel, or used/fake parts such as valves or circuit breakers.

C.7 GOVERNMENT FURNISHED SPACE/GOVERNMENT FURNISHED PROPERTY/GOVERNMENT FURNISHED INFORMATION

C.7.1 Government Furnished Space

(a) Government Furnished Office Space will be provided for the following labor categories and number of personnel. This office space will be the primary work location for these positions.

Labor Category	Number
Senior Systems Engineer	0.5
Senior Electrical Engineer	2
Principal Engineer	2
Electrical Engineer - Junior	2
Electrical Engineer - Mid/Journeyman	2
Principal Systems Engineer	2
Computer System/Software Engineer	1
Software Developer (Threat Engineering)	4
Junior Engineer	5
Configuration Management Analyst	2
Program Analyst	7.5
Senior Writer/Editor	1
Engineering Technician V	2
Windows System Admin	4
Linux System Admin	2
IA Specialist (Cyber Lethality Support)	3
Total	42

(b) The Government will provide access to Navy Marine Corps Intranet (NMCI)/other Government computer resources as required.

(c) Government Furnished Property (GFP) (hardware, software, firmware) will be provided to support access to NMCI/other Government computer resources as required during performance of this Task Order.

(e) Access to Government lab space will be provided. Lab space does not constitute office space. Government Furnished Lab Space will be provided for the following labor categories and number of personnel.

Labor Category	Number
Engineering Technician V	2
Technical Specialist	1
Total	3

C.7.2 Government Furnished Property (GFP)

(a) GFP may be issued under this Task Order. The Government will make available the Government Property identified in the GFP Attachment J.1 on a rent-free basis in performance of the Task Order. The Contractor is responsible for all costs related to making the property available for use, such as payment of all transportation, installation, or rehabilitation costs.

(b) The Contractor shall maintain and report the inventory of GFP (**CDRL A00U**) issued under this Task Order. This requirement is in addition to anything required by regulation, statute, or the assigned Government Property Administrator.

C.7.3 Government Furnished Information (GFI)

C.7.5.1 The Government will provide existing Government program documentation (directives, agendas, minutes, instructions, letters, plans, procedures, current change documents, current financial information) upon award of the contract.

C.8 SECURITY

C.8.1 Personnel and Facility Clearance Requirements

(a) Facility Clearance Level (FCL) Requirement: The Prime Contractor supporting this Task Order is required to have an FCL of TOP SECRET and safeguarding clearance level of SECRET at the primary facility supporting this Task Order.

(b) Personnel Clearance Level (PCL) Requirement: All personnel directly supporting this Task Order, except Management and Support personnel, are required to have, as a minimum, a current SECRET security clearance in the Defense Industrial Security System (DISS). Interim clearances are acceptable. Personnel performing in the following labor categories shall have a final TOP

SECRET security clearance with Sensitive Compartmented Information (SCI) eligibility in DISS: Senior Systems Engineer (2.5 FTE); Senior Mechanical Engineer (2 FTE); Senior Software Engineer (1 FTE); Senior Electrical Engineer (2 FTE); Principal Engineer (2 FTE); Software Developer (Threat Engineering) (4 FTE) and IA Specialist (Cyber Lethality Support) (3 FTE) . In addition, each FTE shall be able to obtain and maintain Sensitive Compartmented Information (SCI) access once sponsored by the Government.

C.8.2 The Contractor will have access to information and compartments with a SECRET classification. All deliverables associated with this Task Order are unclassified unless otherwise specified. Access to classified spaces and material and generation of classified material shall be in accordance with the attached DD Form 254 (Attachment J.7).

C.8.3 The Department of Defense Contract Security Classification Specification (DD Form 254) provides the security classification requirements for this effort. The Contractor shall obtain facility and personnel security clearances as required by the National Industrial Security Program prior to starting to work on tasks requiring clearances. Access to classified spaces and material and generation of classified material shall be in accordance with the National Industrial Security Program Operating Manual (NISPOM) 32 Code of Federal Regulation (CFR) Part 117 and the NSWCDD Command Security Manual.

C.8.4 Some work accomplished under this Task Order will be classified up to the level of TOP SECRET. The Contractor shall maintain the capability to store information up to and including SECRET. All data generated under this Task Order shall be classified in accordance with the guidance in the NISPOM 32 CFR Part 117 and the NSWCDD Command Security Manual.

C.8.5 The Contractor must comply with guidelines specified on the DD Form 254. Contractors SCI indoctrinated in support of this contract shall comply with the reporting requirements as outlined in DOD policies Security Executive Agent Directive (SEAD)-3 dtd 12 June 2017 and SEAD-3 Implementation memo dtd 02 Nov 2020, and SEAD-4 Implementation memo dtd 12 Jan 2018. All deliverables associated with this Task Order will be non-SCI.

C.8.6 The Contractor shall require access to Communications Security (COMSEC) information and materials. A COMSEC account is also required in order to maintain and use COMSEC Material, which includes accountable/non-accountable COMSEC Material and Controlled Cryptographic Items (CCI). The Contractor shall utilize CRYPTO and have access to Secure Terminal Equipment (STE) and associated encryption device(s) at the Contractor site(s). Additionally, Contractor must be authorized for the use of the Defense Courier Service. The Contractor will be required to receive and generate classified material, as well as store classified hardware. The storage of classified hardware is not to exceed two (2) cubic feet until such time as storage capacity is verified by the Contractor. The Contractor requires access to Non-SCI Intelligence in order to perform analysis of weapons systems. Access to Non-SCI intelligence is needed in order to utilize intelligence documents related to foreign government weapons systems.

Access to the North Atlantic Treaty Organization (NATO) is required to obtain a SIPRnet account and to utilize the Defense Technical Information center (DTIC) system to obtain documents on intelligence. Access to Foreign Government Information is required to obtain United Kingdom documents on specific weapon systems. Access to Critical Nuclear Weapons Design Information, Restricted Data, and Formerly Restricted Data is required to access information required for modeling and simulation of weapons and threats. The Contractor shall identify covered defense information and mark information in accordance with the DoD procedures for identification and protection of controlled unclassified information (CUI) found in DoDI 5200.48, Controlled Unclassified Information, Controlled Unclassified Information (CUI). Controlled Unclassified Information (CUI), formerly For Official Use Only (FOUO) and Personally Identifiable Information (PII), generated and/or provided under this contract shall be safeguarded and marked as specified in DoDI 5200.48 and DoDM 5400.07. All above accesses are needed to support and provide the system engineering, software development, and maintenance of Navy tactical initiatives and spiral and baseline developments to support NSWCDD. In performing under this Task Order, the Contractor shall have access to U.S. classified information outside the U.S., Puerto Rico, U.S. Possessions, and Trust Territories including the following locations: United Kingdom, Bahrain, Belgium, Spain, Singapore, Cuba, Panama, Columbia, Croatia.

C.8.7 Physical Security: The Contractor shall be responsible for safeguarding all Government information or property provided for Contractor use. At the end of each work period, Government information, facilities, equipment and materials shall be secured as specified by the 32 CFR Part 117 and the NSWCDD Command Security Manual. Secret storage is required at the Contractor's facility in order to meet requirements of receiving and generating classified material in accordance with this Task Order.

C.8.7 Contractors working in Open Storage Secret (OSS) spaces with Open/Close privileges shall be aware of their responsibility and be trained in procedures for end-of-day security checks to include Closing OSS spaces.

C.8.9 Electronic Spillage

C.8.9.1 Electronic Spillages (ES) are unacceptable and pose a risk to national security. An electronic spillage is defined as classified data placed on an information system (IS), media or hardcopy document possessing insufficient security controls to protect the data at the required classification level, thus posing a risk to national security (e.g., sensitive compartmented information (SCI) onto collateral, Secret onto Unclassified, etc.). The Contractor's performance as it relates to ES will be evaluated by the Government. ES reflects on the overall security posture of NSWCDD and a lack of attention to detail with regard to the handling of classified information of IS security discipline and will be reflected in the Contractor's performance rating. In the event that a Contractor is determined to be responsible for an ES, all direct and indirect costs incurred by the Government for ES remediation could be charged to the Contractor.

C.8.9.2 NSWCDD Security will continue to be responsible for the corrective action plan in accordance with the security guidance reflected on the DOD Contract Security Classification Specification – DD Form 254. NSWCDD Security will identify the Contractor facility and contract number associated with all electronic spillages that involve the Contractor. NSWCDD

Security will notify the Contracts Division with the Contractor facility name and contract number, incident specifics and associated costs for clean-up. The Contracting Officer will be responsible to work with the Contractor Facility to capture the costs incurred during the spillage clean up. The Contractor is also responsible for taking Information Security Awareness training annually, via their Facility Security Officer (FSO), as part of the mandatory training requirements. If a spillage occurs additional training will be required to prevent recurrence.

C.8.10 Portable Electronic Devices (PEDs)

C.8.10.1 Non-Government and/or personally owned portable electronic devices (PEDs) are prohibited in all NSWCCD buildings with the exception of personally owned cell phones which are authorized for use in General Office Spaces (GOS). All personnel need to be aware of the PEDs policy and being permitted in a building by asking authorized personnel or reviewing the entrance area signs and instructions. The Contractor/personnel visiting shall ensure the onsite personnel remain compliant with this PED policy. NSWCCD instruction defines PEDs as the following: any electronic device designed to be easily transported, with the capability to store, record, receive or transmit text, images, video, or audio data in any format via any transmission medium. PED's include, but are not limited to, pagers, laptops, radios, compact discs and cassette players/recorders. In addition, this includes removable storage media such as flash memory, memory sticks, multimedia cards and secure digital cards, micro-drive modules, ZIP drives, ZIP disks, CD-RWs, DVD-RWs, MP3 players, iPads, digital picture frames, electronic book readers, kindle, nook, cameras, external hard disk drives, and floppy diskettes.

C.8.10.2 Personal Wearable Fitness Devices (PWFDs) marketed primarily as fitness or sleep devices are allowed in all Navy spaces, if they are compliant with NAVADIN 216/15, where collateral non-Sensitive Compartmented Information (SCI), classified information is processed, stored, or discussed up to and including SECRET. The user must ensure the PWFD is compliant with all requirements in NAVADMIN 216/15, Cyber Hygiene Authorization to use Personal Wearable Fitness Devices (e.g., FitBit, Jawbone UP, etc.) in Navy Spaces, dated 14 September 2015 and register PWFD in the NSWCCD Fitness Device Tracker.

C.8.10.3 Personnel requiring the use of Medical Portable Electronic Devices (MPEDS) must submit Form NSWCCD 5239/4 for SCIF authorization to the SCIF authorizations to the Special Security Officer (SSO). For Special Access Program Facility (SAPF) authorizations, follow the guidance provided by the Government Special Access Program Security Officer (GSSO). Authorizations for use in SAPFs that are co-utilized within NSWCCD SCIFS require coordination between both the GSSO and SSO. For authorizations to use MPED in Collateral Classified spaces, submit form to the Special Programs Branch, Code 1053.

C.8.10.4 PED's belonging to an external organization shall not be connected to NSWCCD networks or infrastructure without prior approval from the NSWCCD Information Assurance and Compliance Branch. This approval will be granted using the Temporary Approval Request for Information System (TARIS) form and action tracker process.

C.8.10.5 Personally owned hardware or software shall not be connected or introduced to any NSWCCD hardware, network or information system infrastructure.

C.8.10.6 Navy-issued peripheral:

C.8.10.6.1 Government procured headsets with or without microphones must be wired, use either a 3.5 millimeter (mm) audio jack or universal serial bus (USB) port, cannot contain active-noise cancelling functionality and may be used on systems of classification up to and including collateral Top Secret. The headsets are considered unclassified when unplugged, and must be unplugged when not in use.

C.8.10.6.2 Government procured Bluetooth earbuds and headsets that do not require a USB dongle or any other physical connection to enable wireless connectivity are allowed for use on Government issued tablets, phones, and personal devices in telework environments or unclassified general office space where no classified discussion are occurring.

C.8.10.6.3 Web cameras may only be used on systems at the classification level of the space. For example, in a collateral SECRET open storage area an external web camera may be connected to the SECRET workstation only. No camera pass is required for these devices.

C.8.10.6.4 Government provided printers and/or scanners are authorized in a telework environment. Users must ensure that any paper or media containing CUI or unclassified information not authorized for public release is safeguarded by locking in a drawer, cabinet or room. CUI and unclassified information not approved for public release must be returned to the worksite for destruction.

C.8.10.6.5 Government issued peripherals may be used on personal devices.

C.8.10.6.6 While connected to any Navy network, whether on site or while in a telework environment, the use of headsets with microphones and web cameras are restricted to official Government duties.

C.8.11 Operations Security (OPSEC)

Contractor personnel shall follow OPSEC concepts and principles in the conduct of this requirement to protect critical information, personnel, facilities, equipment, and operations from compromise. All Contractors (including Sub-contractors) shall supplement their current security practices by requiring any personnel involved in executing this Task Order to complete Government-sponsored and administered Operations Security (OPSEC) training. In addition, all Contractors shall be aware of the Critical Information and Indicators List (CIIL) for the organization they are supporting as well as the OPSEC manual for NSWCCD. These OPSEC requirements will be in effect throughout the life of the procurement from award through the conclusion of services at the end of the period of performance (PoP) or other procurement termination. The Contractor must immediately notify the Government upon the discovery of any nonconformance with the OPSEC manual

C.8.12 Privacy Program Training

Privacy training is mandatory for all NSWCD personnel (military, civilian, and Contractor) and must be completed annually. Total Workforce Management Services (TWMS) is the official database for workforce training and is the tool for taking and recording Privacy Act training. The Contractor is responsible for ensuring individual annual privacy training requirements are met.

C.8.13 IT-1 Designation Requirements

C.8.13.1 In accordance with (IAW) DON Chief Information Officer (CIO), NSWC Headquarters, and NSWCD guidance, IT Level-I positions are defined as users with privileged access. Contractor employees assigned to an IT Level-I designated position with SECRET access will be required to have a favorably adjudicated T5/T5R completed every 5 years. Contractor employees that require a SECRET Clearance as part of their job duties, with IT Level-I designation, will be initiated by the Government, and will be at the Government's expense. Contractor employees that require a Top Secret Clearance as part of their job duties, with IT Level-I designation, shall be initiated by the Contracting Company.

C.8.13.2 Any Contractor employee, who has a final clearance and submitted T5/T5R that is accepted by Office of Personnel Management (OPM) along with a favorable fingerprint check (SAC), is eligible for IT-1 designation. The Command Security Office will review all SF-86 paperwork for all Contractor employees nominated for IT Level-I designations if the T5/T5R is not completed.

C.8.13.3 Contractor employees that do not have a final clearance investigation within DISS are ineligible for IT Level-I designation until the T5/T5R has been favorably adjudicated, shall remain at IT level-II status and shall not be assigned to a contract position requiring IT Level-I designation.

C.8.14 Visits by Foreign Nationals and Foreign Representatives

C.8.14.1 Task Order performance may require that the Contractor host, at an off-base location, foreign nationals and/or foreign representatives. A foreign national is a person who is a citizen of a foreign nation, and who is not a citizen of the United States. A foreign representative is a person who represents a foreign interest in dealings with the U.S. Government, either directly or through dealings with a U.S. Government Contractor. A foreign representative may be a United States citizen.

C.8.14.2 A Contractor-hosted visit of a foreign national or foreign representative may be either an "official" visit or an "unofficial" visit. An official visit is a visit where the foreign national or foreign representative is representing a foreign government in an official capacity. An unofficial visit is a visit where the foreign national or foreign representative is not representing a foreign government.

C.8.14.3 A visit by a foreign national or a foreign representative may be either "DOD Sponsored" or "Non-DOD Sponsored". A DOD Sponsored visit is a visit that is coordinated by a DOD entity. A Non-DOD Sponsored visit is a visit that does not involve DOD coordination (A

visit by either a foreign national or a foreign representative pursuant to performance by the Contractor under this Task Order is not considered to be, by itself, a sponsored visit).

C.8.14.4 The Contractor hosting a visit by either a foreign national or a foreign representative is responsible for adherence to Department of Defense and Department of the Navy directives, instructions, regulations, and manuals that govern foreign disclosure. "Foreign Disclosure" is defined as the disclosure of Classified Military Information (CMI) and Controlled Unclassified Information (CUI) to foreign nationals and/or foreign representatives. Disclosure of such information may be accomplished orally, visually, in writing, or by any other medium.

C.8.14.5 Classified Military Information (CMI). This is information that is originated by or for the Department of Defense, or a Military Department, or an entity under its jurisdiction and control, and which requires protection in the interest of national security. Such information is designated as TOP SECRET, SECRET, or CONFIDENTIAL.

C.8.14.6 Controlled Unclassified Information (CUI). This is information that although unclassified is subject to access or distribution limitations in accordance with statute or regulation. Included is information exempt from mandatory release to the public under the Freedom of Information Act, or information that is subject to export control.

C.8.14.7 NSWCDD Foreign National Visitor and Foreign Disclosure Application process. The NSWCDD has established a foreign national visitor approval and foreign disclosure process. Whenever, pursuant to the terms of this Task Order, a visit to a Contractor facility or Contractor workspace by a foreign national or foreign representative is anticipated, and one or more NSWCDD employees will be in attendance at this visit/meeting for the purpose of potential discussions, above the public release level, resulting in disclosure of either CMI or CUI, a completed "NSWCDD Foreign National Visitor and Foreign Disclosure Application" e-form must be supplied to the Contractor's Facility Security Officer (FSO). The accountable NSWCDD personnel attending the meeting must ensure that the NSWCDD disclosure process has been complied with and an approved copy of the "NSWCDD Foreign National Visitor and Foreign Disclosure Application" generated e-form has been provided to the COR and the Contractor's FSO. The Contractor's FSO should ensure that approved copies of the e-form are maintained at their facility as a record of compliance with requirements set forth in 32 CFR Part 117 as well as the requirements set forth above.

C.9 ON-SITE ENVIRONMENTAL REQUIREMENTS

C.9.1 The Contractor shall strictly adhere to all Federal, State and local laws and regulations, Executive Orders, and Department of Defense and Navy policies.

C.9.2 The Contractor shall ensure that each Contractor employee who has been or will be issued a Common Access Card (CAC), performs work in direct support of NSWCDD programs under the NSWCDD Commanding Officer, and sits on-site at NSWCDD, completes the NAVSEA Environmental Awareness Training (TWMS-695388) within 30 days of commencing Task Order performance and at least every three (3) years thereafter or as directed by their NSWCDD training coordinator or their COR.

C.9.3 The Contractor shall ensure that each Contractor employee not required to complete the training described above (i.e., those who do not have and will not be issued a CAC, do not perform work in direct support of NSWCDD programs under the NSWCDD Commanding Officer, and do not sit on-site at NSWCDD) reads the NSWCDD Environmental Policy Statement within 30 days of commencing Task Order performance. This document will be available from the COR, however, the policy is also provided on the publicly-available NSWCDD website, <https://www.navsea.navy.mil/Home/Warfare-Centers/NSWC-Dahlgren/Resources/>.

C.9.4 Within 30 days of commencing Task Order performance, the Contractor shall certify by email to their COR that the requirements captured above have been met. The email shall include each employee name and work site and shall indicate which requirement each employee has satisfied.

C.9.5 Contractor copies of the records generated by the actions described above will be maintained and disposed of by the Contractor in accordance with Secretary of Navy Instruction (SECNAVINST) 5210.8F Department of the Navy Records Management Program.

C.9.6 The Contractor shall perform work under this Task Order consistent with the relevant policy and objectives identified in the NSWCDD environmental management system (EMS). The Contractor shall perform work in a manner that conforms to all appropriate EMS Plans of Actions and Milestones identified by the NSWCDD EMS Plan. In the event an environmental nonconformance or noncompliance associated with the contracted services is identified, the Contractor shall respond and take immediate corrective and/or preventative actions to ensure the actions do not continue. In addition, the Contractor shall ensure that their employees are aware of their roles and responsibilities identified by the NSWCDD EMS and how these requirements affect their work performed under this Task Order.

C.10 ON-SITE SAFETY REQUIREMENTS

C.10.1 The Contractor shall strictly adhere to Federal Occupational Safety and Health Agency (OSHA) Regulations, Environmental Protection Agency (EPA) Regulations, NSWCDDINST 5100.01 Occupational Safety and Health Program (current revision), and all applicable state and local requirements.

C.10.2 The Contractor shall ensure that each Contractor employee reads the document entitled, "Occupational Safety and Health (OSH) Policy Statement" within 30 days of commencing performance at NSWCDD. This document is available at: https://flankspeed.sharepoint-mil.us/sites/NAVSEA_NSWCDD_SE/SitePages/OSH-Bulletin-Board.aspx.

C.10.3 The Contractor shall provide each Contractor employee with the training required to do his/her job safely and in compliance with applicable regulations. The Contractor shall document and provide, upon request, qualifications, certifications, and licenses as required. Contractors conducting lead or asbestos abatement activities shall also provide a written abatement plan to the Safety & Environmental Branches for review and approval.

C.10.4 The Contractor shall provide each Contractor employee with the personal protective equipment required to do their job safely and in compliance with all applicable regulations.

C.10.5 Contractors working with ionizing radiation (radioactive material or machine sources) must comply with the latest revision of NAVSEA S0420-AA-RAD-010 (provided upon request). Prior to bringing radioactive materials or machine sources on base, the Contractor must notify the Command Radiation Safety Officer in the Safety Branch.

C.10.6 Contractors shall not procure hazardous material (HAZMAT) on behalf of NSWCDD without following the approved HAZMAT procurement process and obtaining approval from the Safety & Environmental Branches. For emergency HAZMAT purchases only, the Contractor shall alert the Safety & Environmental Branches and request a waiver to procure outside the HAZMAT procurement process. For emergency purchases, the Contractor shall submit an Authorized Use List Addition form and the Safety Data Sheet to the Safety & Environmental Branches for approval. Once the HAZMAT arrives onsite, the Contractor shall alert the Environmental Branch so that it can be barcoded and added to the inventory.

C.10.7 HAZMAT owned by the Contractor and brought into NSWCDD workspaces for temporary use shall be reviewed and approved by the Safety & Environmental Branches prior to use. The Contractor shall submit the Safety Data Sheet that must be routed through the Government supervisor responsible for the specific work area. This HAZMAT must clearly be marked that it is Contractor owned and shall not be stored in NSWCDD spaces.

C.10.8 Contractors shall not procure lithium batteries on behalf of NSWCDD without first receiving an approved Initial Procurement Report or certification letter and obtaining approval from the Safety & Environmental Branches.

C.10.9 Applicable Contractors shall submit Total Case Incident Rate (TCIR) and Days Away, Restricted and Transfer (DART) rates for the past three (3) years upon request by the Safety Branch. A Contractor meets the definition of applicable if its employees worked 1,000 hours or more in any calendar quarter onsite and where oversight is not directly provided in day-to-day activities by the command.

C.10.10 The Contractor shall report all work-related injuries/illnesses that occurred while working at NSWCDD, or an off-site location (including shipboard), to the Safety Branch.

C.11 INFORMATION SYSTEMS (IS) AND COMPUTER USAGE

In accordance with U.S. Navy policy, any personnel, including the Contractor, who utilizes DOD owned systems, shall assume responsibility for adherence to restrictions regarding internet and email usage. Navy policy prohibits racist, sexist, threatening, pornographic, personal business, subversive or politically partisan communications. All personnel, including the Contractor, are accountable and must act accordingly. DOD computer systems are monitored to ensure that the use is authorized, to facilitate protection against unauthorized access, and to verify security procedures, survivability and operational security. During monitoring, information may be

examined, recorded, copied, and used for authorized purposes. All information, including personal information, placed on or sent over a DOD system may be monitored. Use of a DOD system constitutes consent to monitoring. Unauthorized use may result in criminal prosecution. Evidence of unauthorized use collected during monitoring may be used as a basis for recommended administrative, criminal or adverse action.

C.12 USE OF INFORMATION SYSTEM (IS) RESOURCES

Except in special circumstances explicitly detailed elsewhere in this document, the Contractor shall provide all IS resources needed in the performance of this Task Order. This includes, but is not limited to computers, software, networks, certificates, and network addresses.

C.12.1 CONTRACTOR USE OF NSWCD IS RESOURCES

(a) In the event that the Contractor is required to have access to NSWCD IS resources, the login name used for access shall conform to the NMCI login naming convention. If the Contractor requires access to applications/systems that utilize client certificates for authentication, the Contractor is responsible for obtaining requisite certificates from a DOD or External Certificate Authority

(b) If this Task Order requires that the Contractor be granted access and use of NSWCD IS resources (at any site), the IS shall be accredited for Contractor use in accordance with procedures specified by the Information Assurance Office.

C.12.2 CONNECTIONS BETWEEN NSWCD AND CONTRACTOR FACILITIES

If there is a requirement (specifically delineated elsewhere in this Task Order) for interconnection (e.g., link level or Virtual Private Network (VPN)) between any facilities and/or ISs owned or operated by the Contractor and ISs owned or operated by NSWCD, such interconnection shall take place only after approval from the Information Assurance Office. All such connections as well as the ISs connected thereto will be accredited in accordance with DOD policy (DODI 8510.01 Risk Management Framework for DoD Systems) by the cognizant Designated Approving Authority (DAA) and comply with the requirements of Chairman Joint Chiefs of Staff Instruction (CJCSI) 6211.02D Defense Information Systems Network (DISN) Responsibilities regarding Memorandums of Agreement. All such connections will be made outside the appropriate NSWCD firewall.

C.13 PRIVACY INFORMATION

Work under this Task Order may require that personnel have access to Privacy Information. Contractor personnel shall adhere to the Privacy Act, Title 5 of the U.S. Code Section 552a, FAR 52.224-2 Privacy Act, and applicable agency rules and regulations.

C.14 NON-DISCLOSURE AGREEMENTS (NDAs)

(a) Access to and preparation of sensitive information subject to Privacy Act and Business Sensitive safeguarding and destruction may be required in the execution of tasking associated with this Task Order. NDAs may be utilized to allow for access to company sensitive/proprietary or Privacy Act data. For tasks requiring NDAs, the Contractor shall obtain appropriate agreements for all their employees that are associated with the task requiring such an agreement.

(b) Contractor personnel may be required, from time to time, to sign NDAs as applicable to specific SOW tasking. The COR will notify the Contractor of the number and type of personnel that will need to sign the NDAs. The signed NDAs shall be executed prior to accessing data or providing support for information that must be safeguarded. Copies of all executed NDAs shall be provided to the COR for endorsement and retention.

C.15 NON-PERSONAL SERVICES/INHERENTLY GOVERNMENT FUNCTIONS

(a) The Government will neither supervise Contractor employees nor control the method by which the Contractor performs the required tasks. The Government will not direct the hiring, dismissal or reassignment of Contractor personnel. Under no circumstances shall the Government assign tasks to, or prepare work schedules for, individual Contractor employees. It shall be the responsibility of the Contractor to manage its employees and to guard against any actions that are of the nature of personal services or give the perception that personal services are being provided. If the Contractor feels that any actions constitute, or are perceived to constitute personal services, it shall be the Contractor's responsibility to notify the Contracting Officer immediately in accordance with FAR 52.243-7 Notification of Changes.

(b) Inherently-Governmental functions are not within the scope of this Task Order. Decisions relative to programs supported by the Contractor shall be the sole responsibility of the Government. The Contractor may be required to attend technical meetings for the Government; however, they are not, under any circumstances, authorized to represent the Government or give the appearance that they are doing so.

C.16 CONTROL AND ADMINISTRATION OF CONTRACTOR PERSONNEL

(a) The Contractor shall comply with the requirements of NAVSEA and NSWCDD instructions regarding performance in Government facilities. All Contractor personnel engaged in work while on Government property shall be subject to all applicable DOD and Navy Standards of Conduct.

(b) The Contractor shall be required to obtain identification badges from the Government for all Contractor personnel requiring regular access to Government property. When on-site in Government office spaces, laboratories, test facilities, or ship assets, Contractor employees shall be clearly identified as a Contractor (e.g., utilizing badge identifications and sign identifications in office spaces). The identification badge shall be visible at all times while employees are on Government property. The Contractor shall furnish all requested information required to facilitate issuance of identification badges and shall conform to applicable regulations in the

Department of Defense Manual (DODM) 1000.13 DoD Identification (ID) Cards ID Card Life-Cycle concerning the use and possession of the badges.

(c) The Contractor shall ensure that all identification badges issued to Contractor employees are returned to the appropriate Security Office within 48 hours following completion of the Task Order, relocation or termination of an employee, and upon request by the Contracting Officer.

(d) All Contractor personnel shall identify their company affiliation when answering or making telephone calls and sending email and when attending meetings where Government personnel or representatives from other Contractors are present. In addition, Contractor personnel cannot lead/manage/supervise Government personnel. Contractor program/project managers shall be clearly identified and known as such by Government employees.

(e) All persons engaged in work while on Government property shall be subject to search of their persons (no bodily search) and vehicles at any time by the Government and shall report any known or suspected security violations to the appropriate Security Department. Assignment, transfer, and reassignment of Contractor personnel shall be at the discretion of the Contractor. However, when the Government directs, the Contractor shall remove from Task Order performance any person who endangers life, property, or national security through improper conduct.

C.17 TERMINATION OF EMPLOYEES WITH U.S. GOVERNMENT BADGES

(a) The Contractor shall ensure that all employees who have a DOD Common Access Card (CAC), turn in the CAC immediately upon employee separation and/or termination of their employment under this Task Order. The above requirement shall be made a part of the standard employee facility clearance procedures for all separated personnel. The Contractor shall advise Command Physical Security of all changes in their personnel requiring DOD base access.

(b) For involuntarily separated personnel and those separated under adverse circumstances, the Contractor shall notify Command Physical Security in advance of the date, time, and location where the Command representative retrieve the DOD CAC prior to the employee departing the Contractor's facility. In the event the employee is separated in his or her absence, the Contractor shall immediately notify Command Physical Security of the separation and make arrangements between the former employee and Command Physical Security for the return of the CAC. If circumstances arise which necessitate urgent revocation of a CAC after normal business hours, the Mission Partner Identity, Credential and Access Management (MP ICAM) Mission Partner Affiliation Sponsor (MPAS) shall be immediately contacted. MPAS contact information will be provided by the COR after Task Order award.

C.18 LABOR CATEGORIES/QUALIFICATIONS

See Attachment J.4, Personnel Qualifications Guide.

C.19 POST AWARD CONTRACTOR PERSONNEL APPROVAL

(a) See NAVSEA C-237-H002 SUBSTITUTION OF KEY PERSONNEL, regarding substitution of key personnel. Requests for post award approval of additional and replacement key personnel shall be submitted via email. Email submissions shall be made simultaneously to the Contract Specialist, COR, and the Alternate COR. Electronic notification via email from the Contract Specialist will serve as written approval or disapproval on behalf of the Contracting Officer. This approval is required before an individual may begin charging to the Task Order.

(b) Resumes shall be submitted in the format required in C.20. However, minor deviations in formatting may be overlooked, providing sufficient information is submitted for an independent comparison of the individual's qualifications with Labor Category requirements.

C.20 POST AWARD RESUME FORMAT AND CONTENT REQUIREMENTS

In order to facilitate evaluation of resumes submitted in accordance with C.19 and C-237-H002, all résumés shall be provided in the following format and are not to exceed three (3) pages each. The page limit does not apply to the certification and signature.

(a) HEADER

- Complete Name
- Current Employer
- Task Order Labor Category
- Contractor Labor Category
- Percentage of time to be allocated to this effort upon award of this Task Order
- Current security clearance level per DISS (identify if interim or final)
- Current work location
- Planned work location upon award of this Task Order

Note if the individual is key on another contract with a Period of Performance that will overlap this requirement. Note plans to satisfy both contracts if the candidate is approved.

(b) EDUCATION/PROFESSIONAL DEVELOPMENT

Show any degrees, honors, publications, professional licenses, specialized certifications, and other evidence of professional accomplishments that are directly relevant and will impact the Offeror's qualifications to perform under the Task Order. For education and training, the following format is preferred:

- Academic: degree(s); date(s); institution; major/minor
- Academic: course title, date(s), approximate length (as cited in labor categories)
- Non-Academic: course title, date(s), approximate length
- Professional licenses and specialized certifications. (Note the date obtained for each, as well as the date when each license/certification requires renewal.)

(c) CHRONOLOGICAL WORK HISTORY/EXPERIENCE

(i) Employer: dates (month/year); title(s) held

(ii) Work experience shall be presented separately for each employer, clearly marked with proper category of experience (i.e., relevant experience; nonrelevant experience.). If relevant and nonrelevant experience were obtained while at the same employer, separate time periods shall be noted for each assignment. Responsibilities shall be discussed in sufficient detail for each assignment so as to permit comparison with experience levels in Attachment J.4, Personnel Qualifications Guide. Specific examples of work assignments, accomplishments, and products shall be provided.

(iii) Phrases such as “assisted with,” “participated in,” or “supported” are unacceptable except as introductory to a detailed description of the actual work performed. If no such description is provided, the sentence or bulleted information will not be considered in the résumé evaluation process.

(iv) Résumé information is encouraged to be presented in bullet format.

(v) Lack of specific definition in job responsibilities, services performed, or products produced may be viewed as a lack of understanding of the Labor Category requirements.

(vi) All relevant military experience claimed shall be described such that each relevant tour is treated as a separate employer. Time frames/titles /responsibilities shall be provided in accordance with the level of detail prescribed above. Military experience not documented in this manner will not be considered.

(vii) Gaps in experience shall be explained.

(viii) Certification of correctness of information signed and dated by both the person named and the Contractor. The employee certification shall include the following statement:

CERTIFICATION: “I certify that the experience and professional development described herein are complete and accurate in all respects. I consent to the disclosure of my résumé for NSW CDD Task Order TBD by [insert company name] and intend to make myself available to work under the Task Order.”

Employee Signature and Date

Contractor Signature and Date

(ix) Résumés without this certification, together with either a handwritten or digital signature, will be unacceptable and will not be considered.

(x) If the employee is not a current employee of the Contractor (or a Sub-contractor), a copy of the accepted offer letter shall be provided. The letter shall identify the projected start date.

C.21 LABOR TRIPWIRE JUSTIFICATIONS

The Contractor shall monitor monthly average actual spend rates compared to monthly average fully burdened proposed rates on a per CLIN basis. The Contractor shall advise the COR and the Contract Specialist, by email, of any variation of actual-to-proposed rate averages greater than 15 percent. The Contractor's notification shall include the following information:

- (a) an actual vs. proposed average dollar per hour comparison;
- (b) the percentage variation between the actual and proposed average;
- (c) explanation of what is causing the variation;
- (d) whether or not the Contractor expects this condition is temporary or permanent;
- (e) the Contractor's plan for addressing and correcting the variation; and
- (f) additional information as requested by the Government to assist in reporting per the NAVSEAINST 4200.19(series) Planning, Use, and Control and Services Contracting.

C.22 DATA RIGHTS

- (a) This is a Task Order for the provision of services by the Contractor. In accordance with law and policy and with the provisions of this Task Order, Contractor personnel shall perform as required by this Task Order, and such work shall include working in cooperation and collaboration with Government Personnel.
- (b) Performance of this Task Order work shall require, among other things, the Contractor to access and use Government-owned data such as software, documentation, technical data, process and report templates, and the like. Any and all software, documentation, technical data, and the like generated from such access and use shall also be and remain Government-owned data and shall be included in an appropriate technical report or other deliverable. The Contractor's use of and access to Government-owned data shall neither constitute nor create any Contractor rights in or license to such data; the only Contractor permissions to use and access the data shall be those necessarily required by the Contractor to perform the work herein.
- (c) On occasion and incidental to the provision of support services by the Contractor, the Contractor may be tasked to independently create discrete new data products (e.g., technical analysis, drawings) that do not derive from existing data. Such products shall be specifically identified by the Government in writing and shall be delivered pursuant to the appropriate Contract Data Requirements List (CDRL) document. Rights in such products shall be governed by the appropriate Task Order clauses.

C.23 DIGITAL DELIVERY OF DATA

(a) Delivery by the Contractor to the Government of certain technical data and other information is now frequently required to be made in digital form rather than in hardcopy form. The method of delivery of such data and/or other information (i.e., in electronic, digital, paper hardcopy, or other form) shall not be deemed to affect in any way either the identity of the information (i.e., as “technical data” or “computer software”) or the Government’s and the Contractor’s respective rights therein.

(b) Whenever technical data and/or computer software deliverables required by this contract are to be delivered in digital form, any authorized, required, or permitted markings relating to the Government’s rights in and to such technical data and/or computer software must also be digitally included as part of the deliverable and on or in the same medium used to deliver the technical data and/or software. Such markings must be clearly associated with the corresponding technical data and/or computer software to which the markings relate and must be included in such a way that the marking(s) appear in human-readable form when the technical data and/or software is accessed and/or used. Such markings must also be applied in conspicuous human-readable form on a visible portion of any physical medium used to effect delivery of the technical data and/or computer software. Nothing in this paragraph shall replace or relieve the Contractor’s obligations with respect to requirements for marking technical data and/or computer software that are imposed by other applicable clauses such as, where applicable and without limitation, DFARS 252.227-7013 Rights in Technical Data – Other Than Commercial Products and Commercial Services and/or DFARS 252.227-7014 Rights in Other Than Commercial Computer Software and Other Than Commercial Computer Software Documentation.

(c) Digital delivery means (such as but not limited to Internet tools, websites, shared networks, and the like) sometimes require, as a condition for access to and/or use of the means, an agreement by a user to certain terms, agreements, or other restrictions such as but not limited to “Terms of Use,” licenses, or other restrictions intended to be applicable to the information being delivered via the digital delivery means. The Contractor expressly acknowledges that, with respect to deliverables made according to this contract, no such terms, agreements, or other restrictions shall be applicable to or enforceable with respect to such deliverables unless such terms, agreements, or other restrictions expressly have been accepted in writing by the Contracting Officer; otherwise, the Government’s rights in and to such deliverables shall be governed exclusively by the terms of this Task Order.

C.24 OPERATION OF GOVERNMENT VEHICLES

(a) The Contractor shall be required to drive Government vehicles both onsite at NSWCDD and offsite in the performance of duties associated with the tasking of this Task Order. Government provided vehicles shall be used solely for the purposes as described in the SOW. All drivers must present proof of a valid state driver's license prior to operating a Government vehicle. A valid state driver's license shall be accepted as proper authority for operation of vehicles up to and including 10,000 pounds gross vehicle weight and carrying less than 15 passengers. For vehicles over 10,000 pounds and carrying more than 15 passengers a valid state driver's license and proof of required Navy training for vehicle are required. The state driver's license must be valid for the class and weight of the vehicle which the Contractor will be operating.

(b) An authorized drivers list shall be added to the Monthly Status Report and maintained by the Contractor. The Contractor shall submit within the preceding 30 days a Department of Motor Vehicles (DMV) driving record to the COR for review and approval, prior to adding an individual to the Authorized Driver List. No Driving Under the Influence (DUI) or Driving While Intoxicated (DWI) convictions in the past 11 years will be considered.

C.25 SHIPBOARD PROTOCOL

(a) This tasking may involve platform engineering and fleet support onboard ship. As such, the Contractor is reminded of its responsibility to assure that shipboard protocol is stringently followed. Specifically, visit clearances must be arranged through the Government sponsor and must be forwarded to the individual command being visited as well as to all supporting commands, such as the base, squadron, tender, etc. that the visitor must pass through to get to the ship; the Contractor is responsible for obtaining and maintaining specialized training (i.e. nuclear awareness, safety, quality control, etc.) and certification (i.e. Submarine Safety Program (SUBSAFE) certificates etc.); personnel performing on board US Navy Ships must have at a minimum, a current SECRET Security Clearance; if not led by a Government representative the Contractor is responsible for briefing the ship/command upon arrival; and the Contractor is responsible for debriefing the ship/command upon departure to include operational status of the equipment.

(b) The Contractor shall ensure its personnel adhere to these requirements when performing shipboard tasking. Compliance shall be reported in the Contracting Officer's Management Report (CDRL A001).

(c) All assigned personnel must possess, at a minimum, a current SECRET Security Clearance.

(d) All personnel, while shipboard, shall conform to the rules and regulations of the ship. It is the responsibility of the Contractor to determine the proper rules, regulations, actions, policy and procedures.

(e) Alarms - actual or drill - shall be reported and procedures appropriately adhered.

(f) Safety - hardhats, tag-outs, safety shoes, goggles, safety harnesses, etc., as appropriate - shall be utilized.

(g) Some shipboard tasking may require ascending and descending vertical ladders to and from the highest points of the ship both pier side and underway.

(h) Each Contractor employee must be able stand; walk; climb stairs; balance; stoop; kneel; crouch or crawl around and lift a maximum of 50 lbs. (single person) in the test environment.

(i) HAZMAT must be used safely according to local Standard Operating Procedures (SOPs).

(j) The designated team lead shall, upon arrival, brief the Commanding Officer or his/her designated representative as to the purpose of the visit and expected duration.

(k) The designated team lead shall, upon final departure, debrief the Commanding Officer or his/her designated representative as to the success of the tasking and the operational condition of affected equipment.

(l) The Contractor shall comply with the Commander, U.S Fleet Forces Command (COMUSFLTFORCOM)/Commander, U.S. Pacific Fleet (COMPACFLT) INSTRUCTION 6320.3B regarding the medical and dental screening of all personnel that may embark aboard any U.S. Navy vessel.

(m) The Contractor shall ensure that repair and maintenance employees working aboard vessels, dry docks and piers shall have a valid 10 hour OSHA Maritime Shipyard Employment Course #7615 completion card within 60 days of employment.

DRAFT
