

**PRE-SOLICITATION NON-COMPETITIVE –
Notice of Intent to Sole Source**

1. **SOLICITATION NUMBER:** 75N98026Q00214
2. **TITLE:** Insulated-Sensing Myocardial Navigation Guidewire, Initial R&D and In Vivo Test
3. **RESPONSE DATE:** April 28, 2026, at 1:00 pm EDT.
4. **PRIMARY POINT OF CONTACT:**
Nicholas Capobianco
nicholas.capobianco@nih.gov

I. INTRODUCTION:

THIS IS A PRE-SOLICITATION NON-COMPETITIVE (NOTICE OF INTENT) SYNOPSIS TO AWARD A CONTRACT WITHOUT PROVIDING FOR FULL OR OPEN COMPETITION (INCLUDING BRAND-NAME).

The Division of Intramural Research (DIR) at the National Heart, Lung, and Blood Institute (NHLBI) requires contractor support for a translational research and development project focused on the design, fabrication, and testing of an insulated-sensing intramyocardial electrosurgical guidewire.

The purpose of this requirement is to evaluate the engineering feasibility of a 0.014-inch insulated electrosurgical guidewire capable of controlled myocardial tissue traversal, electrogram sensing, electroanatomic mapping, and radiofrequency ablation within a preclinical research setting.

The contractor shall provide design and engineering support, prototype fabrication, bench-level validation, and delivery of refined prototypes suitable for in vivo animal laboratory evaluation. The contractor shall also provide technical support associated with prototype evaluation and iterative design refinement.

**II. NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS)
CODE and SET ASIDE STATUS**

The NAICS code for this requirement is 541714 – Research and Development in Biotechnology (except Nanobiotechnology), with a size standard of 1,000 employees. This acquisition is NOT set aside for small business.

III. REGULATORY AUTHORITY

The resultant contract will include all applicable provisions and clauses in effect through the current Federal Acquisition Circular (FAC).

This acquisition is conducted under the procedures prescribed in FAR Part 13—Simplified Acquisition Procedures.

IV. STATUTORY AUTHORITY

This acquisition is conducted under the authority of FAR 13.106-1(b)(1)(i), Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements.

V. DESCRIPTION OF REQUIREMENT:

A. PURPOSE AND OBJECTIVES:

The objective of this requirement is to determine the feasibility of an insulated, sensing intramyocardial electrosurgical guidewire through iterative design, fabrication, and testing.

Purchase Description:

The contractor shall:

- Develop mechanical and electrical design profiles for a 0.014-inch interventional guidewire with enhanced insulation and conductive properties
- Design and implement insulation strategies to support electrosurgery and electrogram sensing
- Fabricate initial prototype variants for bench evaluation
- Perform mechanical and electrical validation testing, including dielectric screening and performance characterization
- Iterate the design based on test results and Government feedback
- Fabricate and deliver approximately 10–20 refined prototypes suitable for in vivo animal laboratory evaluation
- Provide technical support during evaluation and incorporate feedback into final documentation

Salient Characteristics:

The required guidewire prototypes must:

- Be comparable in mechanical performance (e.g., torque response, flexibility, and trackability) to commercially available high-performance 0.014-inch interventional guidewires
- Incorporate electrical insulation capable of supporting radiofrequency electrosurgery without degradation
- Enable intramyocardial electrogram sensing and compatibility with electroanatomic mapping systems
- Maintain structural integrity and performance under specified testing conditions
- Be suitable for preclinical in vivo evaluation

Quantity:

One (1) lot of prototype development, fabrication, testing, and technical support services.

Delivery Date:

Delivery shall be completed within approximately 10–15 weeks after contract award.

Deliver to:

Building 10, Room 2C713
10 Center Drive
NHLBI, NIH
Bethesda, MD 20892

PERIOD OF PERFORMANCE:

Date of Award through approximately 15 weeks thereafter.

**VI. CONTRACTING WITHOUT PROVIDING FOR FULL OR OPEN
COMPETITION (INCLUDING BRAND-NAME) DETERMINATION**

The determination by the Government to award a contract without providing for full and open competition is based upon the market research conducted.

In accordance with FAR Part 10, market research was conducted to identify potential sources capable of fulfilling the requirement for the design, fabrication, and testing of insulated-sensing intramyocardial guidewire prototypes. This research included a review of vendors with capabilities in precision medical device fabrication, consultation with technical subject matter experts, and evaluation of vendors currently supporting similar efforts within NIH laboratories.

The results of this market research indicate that while multiple vendors may be capable of producing general guidewire components, only Resonetics has been identified as possessing the unique combination of specialized engineering expertise, experience with comparable high-performance interventional guidewire platforms, and familiarity with the Government's specific technical requirements necessary to meet this requirement within the required timeframe.

Award to any other source would result in substantial duplication of cost to the Government and unacceptable delays in fulfilling the agency's requirements due to the need for additional design development, technology transfer, and validation efforts.

The intended source is:

Resonetics

115 Flanders Rd, Suite 202
Westborough, MA 01581

VII. CLOSING STATEMENT

THIS SYNOPSIS IS NOT A REQUEST FOR COMPETITIVE PROPOSALS. However, interested parties may identify their interest and capability to respond to this requirement.

A determination by the Government not to compete this proposed contract based upon responses to this notice is solely within the discretion of the Government. All responsible sources may submit a capability statement, proposal, or quotation which shall be considered by the agency. The Government will not be responsible for any costs incurred in responding to this notice.

Responses must include sufficient detail to demonstrate the capability to meet the requirement and shall include pricing information, delivery terms, business size status, and SAM registration.

All responses must be received by the closing date and time and must reference Solicitation Number **75N98026Q00214**. Responses must be submitted electronically to Nicholas Capobianco, Contract Specialist at nicholas.capobianco@nih.gov.
