5. Commercial and Government Entity (CAGE) code
(http://www.dlis.dla.mil/cage_welcome.asp) _____
6. Business Size, according to the specified NAIC code 237990, to include designation as HUBZone, 8(a), Service-Disabled Veteran Owned Small Business, Small Disadvantage Business, Woman Owned Business, and Large Business. The Government must be able to verify SBA certification of HUBZone, 8(a), and SDB via the System for Award management (SAM) (<http://www.sam.gov/>)

7. Bonding capability for your firm in terms of Single and Aggregated Bonding

8. Please provide a capability statement addressing the following:
 - Does the contractor have the capability to access the placement site area from the river and avoid placement of equipment on the adjacent wetlands?
 - What is the estimated construction timeline to place material and create design grades using heavy equipment?
 - Will there be on-site personnel able to identify any engineering and/or hydraulic issues associated with sediment depositing into the adjacent tidal creeks?
 - What means and methods can be used to prevent pumped material from flowing into or entering the adjacent Marsh beyond the Placement area? At all tides.
 - What means and methods can be used to prevent losses and retain as much material as possible from leaving the placement into the surrounding waters while pumping is ongoing?

- How will material be prevented from entering or removed to reestablish the existing 2 Creeks?
