

ARMY CONTRACTING COMMAND - ABERDEEN PROVING GROUND (ACC-APG)

The Procurement Pulse

ACC-APG's Quarterly Industry Newsletter

April 2026

Army Contracting Command Aberdeen Proving Ground (ACC-APG)'s quarterly newsletter, "The Procurement Pulse," is intended to serve as an additional resource to share information about our teams and integrated defense acquisition activities.

Feedback and/or suggestions on types of content for future issues is welcome. [Send us a note!](#)

ABOUT US

ACC-APG is one of the supporting contracting centers aligned under ACC headquarters, which is a major subordinate command of Army Materiel Command (AMC). ACC-APG provides comprehensive contracting, business advisory support and sustained expertise through eight major competency areas: research and development; command, control, communications, computers, cyber, intelligence, surveillance, and reconnaissance (C5ISR); test and evaluation; chemical, biological, radiological, and nuclear defense (CBRND), sustainment and Soldier protection; and digital capabilities.

Our executive director and staff components are located at APG, MD; and we have a contracting presence in Adelphi, MD; Ft. Belvoir, VA; Ft. Huachuca, AZ; Frederick, MD; Natick, MA; Research Triangle Park, NC; Tobyhanna Army Depot, PA; Austin, TX; Orlando, FL; and White Sands Missile Range, NM.

SAVE THE DATE: ABERDEEN PROVING GROUND APBI

Team Aberdeen Proving Ground (APG) will host the APG Advance Planning Briefing to Industry (APBI) from 21–22 April 2026, at APG, MD. Registration for this year's event is now OPEN!

[Register for Tuesday, 21 APR \(Day 1\)](#)

[Register for Wednesday, 22 APR \(Day 2\)](#)

NOTE: Virtual attendance does not require registration.

The APG APBI is a critical tool for industry stakeholders, offering a glimpse into the organization's future contracting landscape and providing a foundation for strategic planning and partnership. By aligning potential contracting opportunities with the organization's key mission areas and strategic initiatives, the APG APBI supports the development of innovative solutions that address emerging challenges and drive long-term success.

ARMY OPEN SOLICITATION

The Army's Open Solicitation (AOS) is a continuously open contracting vehicle designed to solicit and receive innovative technology submissions from across the industrial base.

By aligning with the Program Acquisition Executive (PAE) structure – which aims to streamline procurement and requirements processes to accelerate the delivery of mission critical capabilities to Warfighters – the AOS empowers faster, more agile acquisition decisions, ensuring that bold ideas move from concept to capability at the speed of relevance.

Moving away from time-constrained solicitations, the AOS represents a departure from traditional and reactive contracting models by establishing an “always open” framework that enables the Army to rapidly respond to industry proposals on emerging requirements.

This proactive approach serves as continuous encouragement for industry to bring forth innovative solutions and create opportunities to align and invest in strategic partnerships with the Army.

Industry is encouraged to monitor SAM and the [AOS](#) for opportunities. [Learn more here.](#)

MARKETPLACE FOR THE ACQUISITION OF PROFESSIONAL SERVICES (MAPS)

The long awaited MAPS is here!

Thank you to our Industry and Government Partners for a successful MAPS & Industry Update Day back in January, and for the constructive feedback on each draft RFP, which has led us to this point.

The [MAPS solicitation](#) was released via SAM on 01 April, with Amendment 01 posted on 07 April. The following documents are available for your review:

- A summary of key changes
- The amended solicitation document
- All amended attachments

Please continue to monitor SAM for the latest information.

The objective of the MAPS IDIQ contract is to provide Army customers, Portfolio Acquisition Executives (PAE), CPEs, Department of War (DoW) agencies, and other federal agencies with uncommon knowledge-based professional services and support the Army enterprise infrastructure and infostructure goals with information technology (IT) services worldwide (inside the contiguous United States (CONUS) and outside the contiguous United States (OCONUS)), including hostile areas. By combining these vehicles, the Army aims to enhance flexibility, reduce redundancy, and improve cost-efficiency in acquiring uncommon knowledge-based professional services.

SMARTER ACQUISITION: ENTERPRISE CONTRACTS

ABERDEEN PROVING GROUND, Md. (March 11, 2026) – The U.S. Army is optimizing its procurement strategy to more effectively leverage enterprise-wide buying power through the expanded use of enterprise contracts, while maintaining a robust competitive environment where vendors still compete for Army requirements.

Comparable to "buying in bulk," enterprise contracts allow the government to purchase large quantities of technology or services under a single unified contract. These contracts will maximize the Army's procurement dollars by eliminating redundant processes, avoiding the complexities and overhead of multiple individual contracts.

"This is just common sense. Why would we keep buying the same things from the same vendors at different prices and terms? Let's work smarter, not harder," said Danielle Moyer, executive director, Army Contracting Command – Aberdeen Proving Ground (ACC-APG). "We are shifting from just processing transactions to making strategic decisions that have a massive ripple effect."

Over the last eight months – and with each action completed in just weeks – the Army has awarded 15 enterprise contracts, a move that has yielded significant benefits. This consolidation is a strategic effort to reduce thousands of manhours and millions of dollars on both the government and industry teams and saves the taxpayer...
