ABERDEEN PROVING GROUND ADVANCED PLANNING BRIEFING TO INDUSTRY

MG James D. Turinetti IV, U.S. Army
Communications-Electronics Command, CG

22 APRIL 2026

UNCLASSIFIED

ARMY SOFTWARE & INNOVATION CENTER (ASIC) STRATEGIC VISION

Mr. Garrett Shoemaker, Director, ASIC

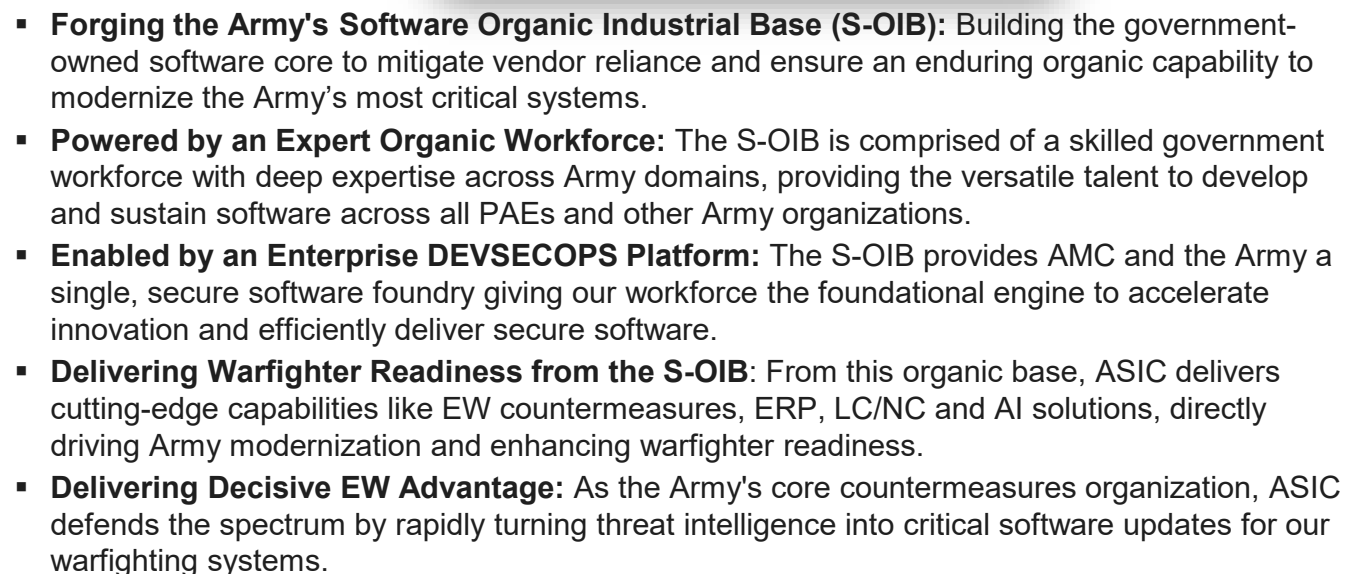

22 APRIL 2026

Domain Centric, Sustainment / Legacy Focused

- ## Customer Centric, Modern, Solution Focused

The Army's Software OIB, enabling software solutions for the Army enterprise

ARMY SOFTWARE & INNOVATION CENTER

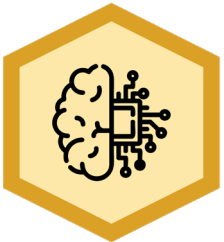

ARMY SOFTWARE & INNOVATION CENTER

MISSION

Deliver agile, secure, and modern software services for the Army.

CORE COMPETENCIES

AI & Machine Learning

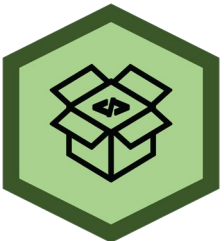

Army Enterprise Resource Planning Modernization

Cybersecurity

Modern Software Development

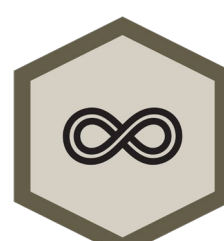

Operationalizing COTS Solutions

Rapid Electromagnetic Warfare Reprogramming

Real-time Data Visualization & Analytics

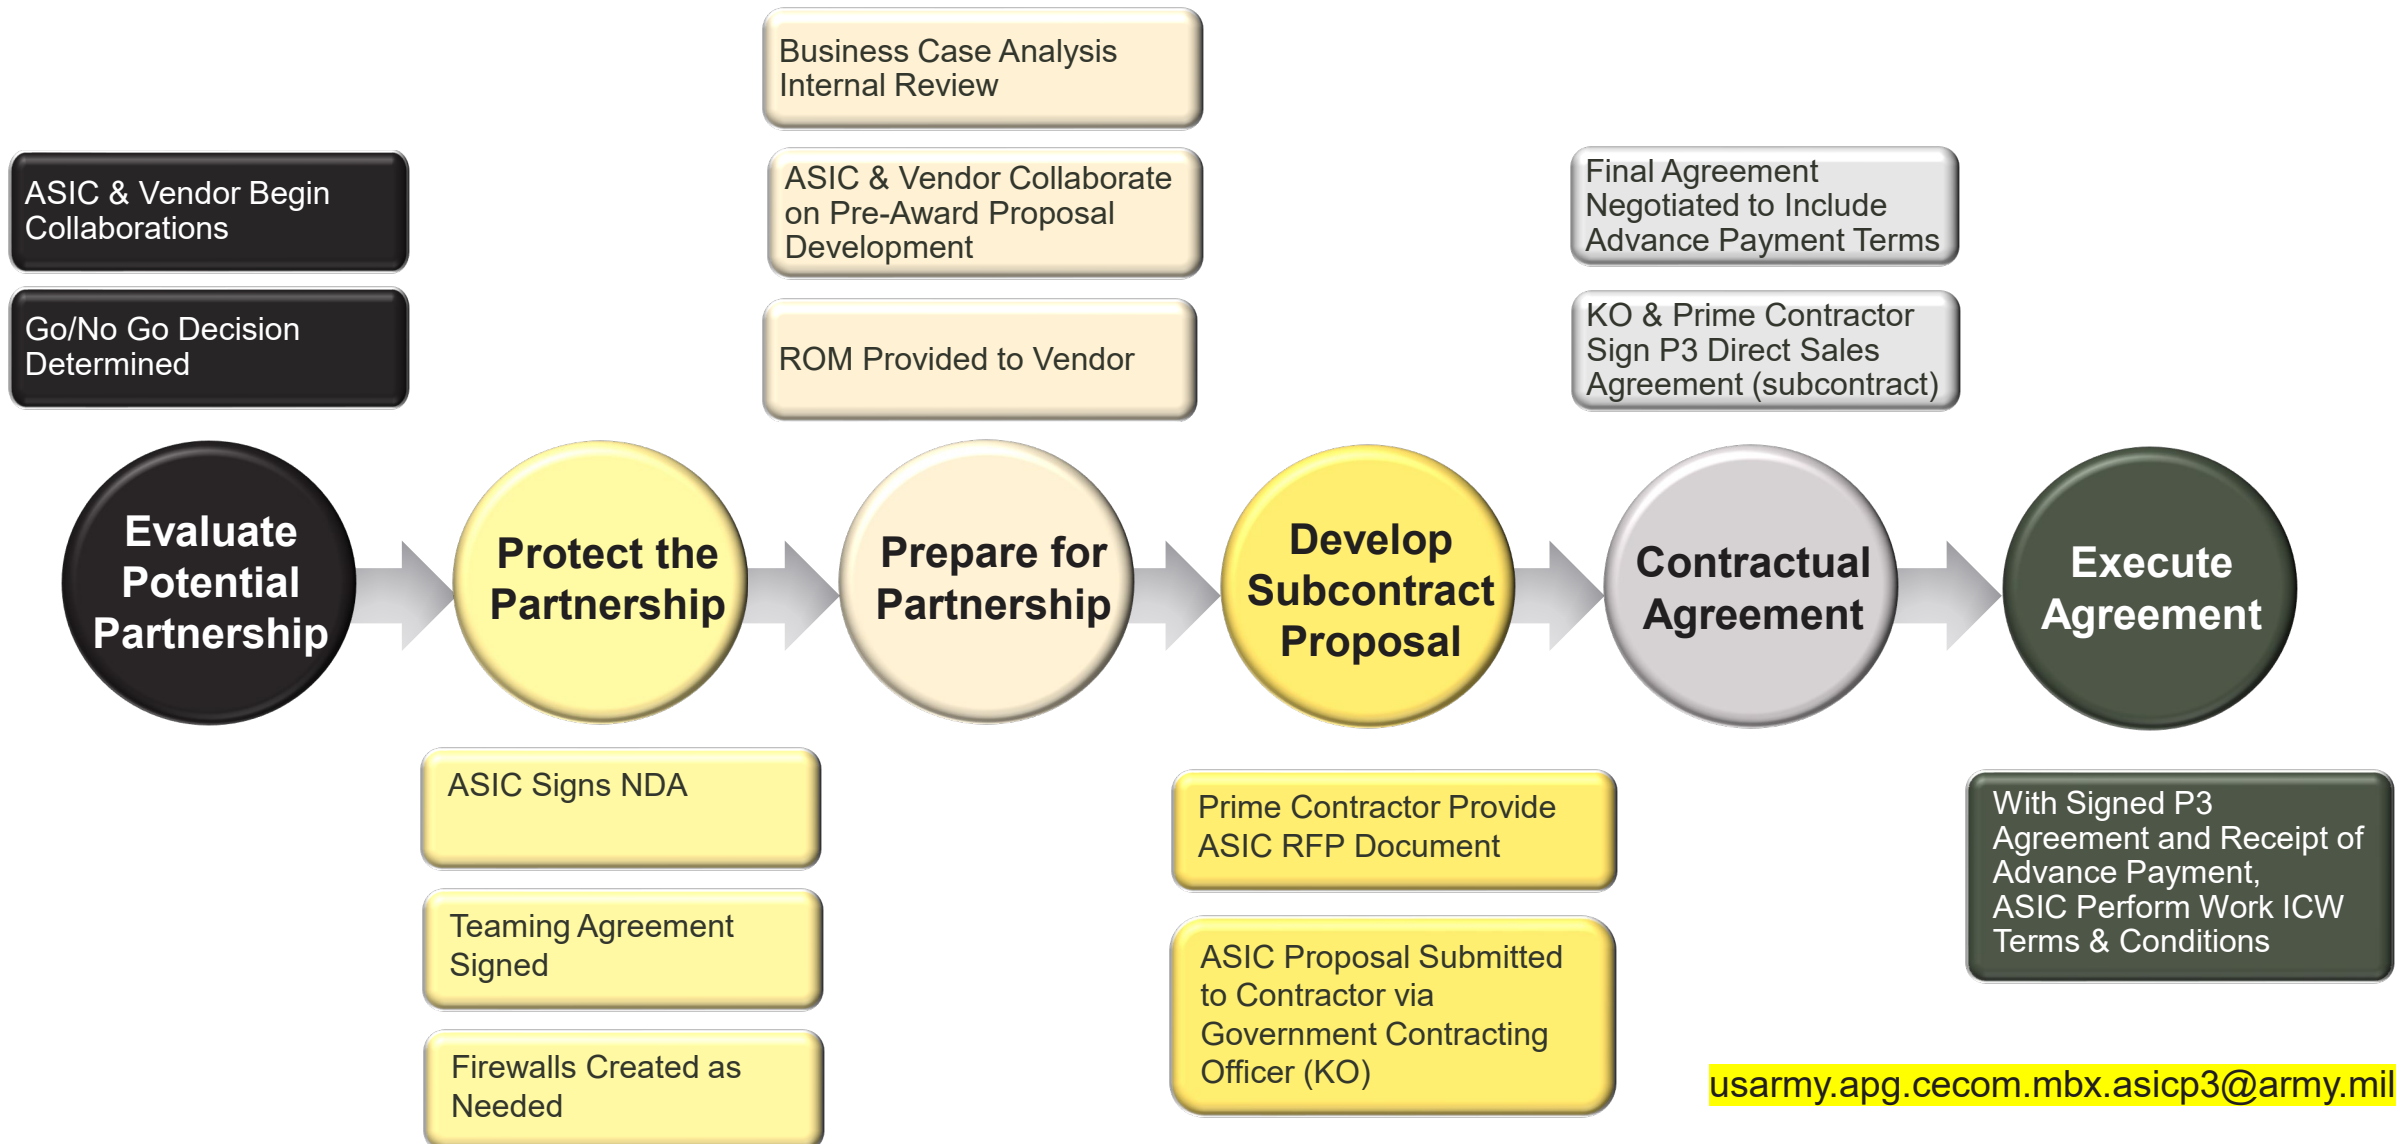

Support to Operational Readiness

ASIC P3 PROCESS

ASIC P3 COMMON QUESTIONS

**Q: ASIC P3 process only addresses direct sales P3s.
Does that mean ASIC is not interested in workshare or lease type of P3s?**

A: That is a misconception. While the process accommodates direct sales, ASIC is actively interested in and encourages both workshare and lease-based partnership models. Our goal is to establish flexible, long-term partnerships that best serve the warfighter.

We welcome partners to propose specific workshare approaches to be included in teaming agreements. We recommend coordinating with acquiring offices, especially during the RRI phase, to structure acquisitions for workshare. In this model, ASIC is compensated directly by the acquiring office.

While the simple lease of ASIC facilities is permitted, we prioritize partnerships that combine a facility lease with the utilization of our talented workforce. This collaborative approach better serves our DoW customers.

ABERDEEN PROVING GROUND ADVANCED PLANNING BRIEFING TO INDUSTRY

Integrated Logistics Support Center
Mr. Abel Salgado, Deputy Executive Director

22 APRIL 2026

ILSC STRATEGIC INITIATIVES / FUTURE CONCEPTS

Integration with all 6 PAE

Sustainment Enablers

Increased reliance on

- COTS / hybrid technologies
- Software-defined systems
- Networked, distributed architectures

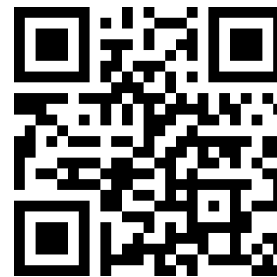

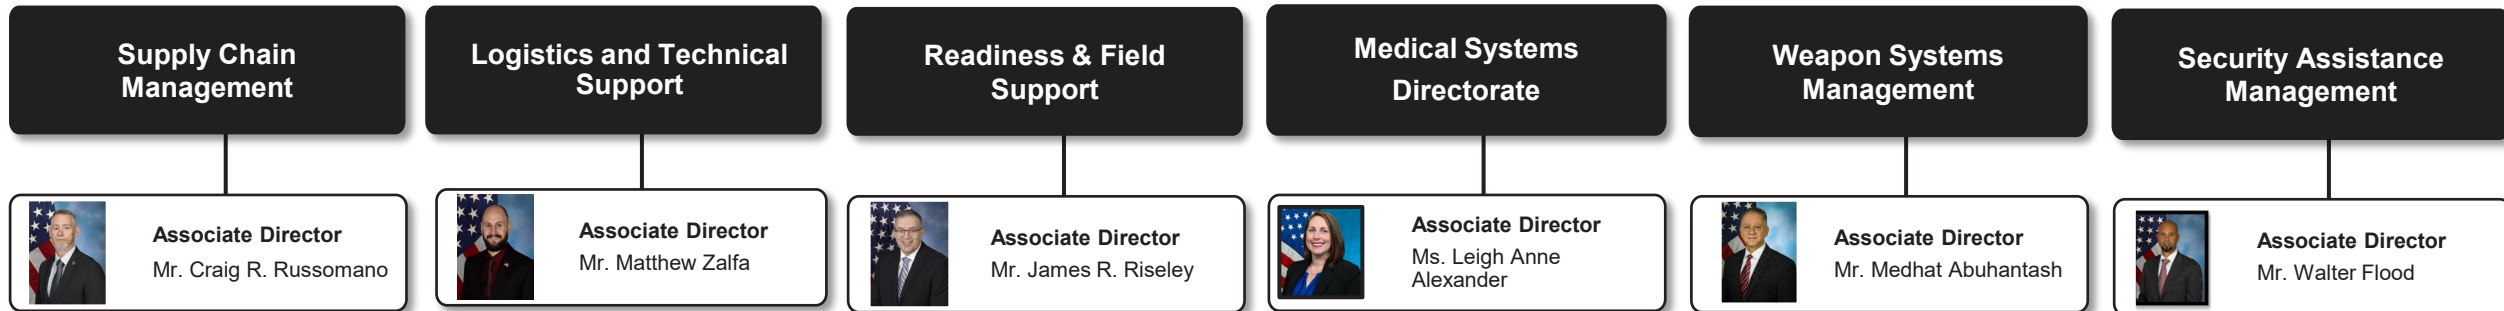

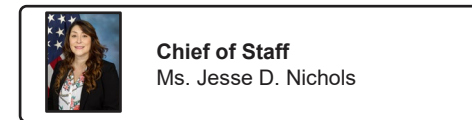

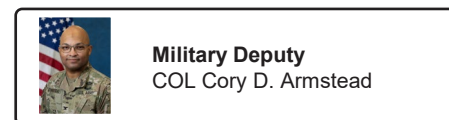

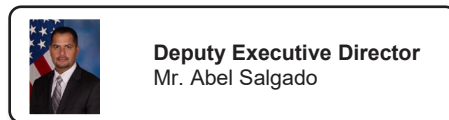

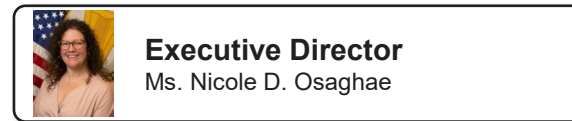

Gap: Sustainment is not fully integrated early in acquisition

Operational Impacts

- Reduced readiness in LSCO
- Limited repair capability at echelon
- Incomplete logistics data (NSN, MARC, tech manuals)
- Increased contractor reliance in contested environments

WHO WE ARE

Vendor Capabilities and Engagement Request Form

ILSC STRATEGIC INITIATIVES / FUTURE CONCEPTS

Electronic Supply Chain Risk Management (eSCRM)

- Enables users to plan, identify, assess, mitigate and monitor supply chain risks
- CECOM to develop eSCRM as an enterprise-wide tool for SCRM management

Artificial Intelligence Assisted Maintenance (AIAM)

- A CECOM logistics application for Soldiers that modernizes equipment sustainment, utilizes AI for expert troubleshooting and digitized technical data
- Soldier-centric design for all environments, onboard AI-driven guidance, reduces diagnostic times and enhances readiness
- Features AI-agnostic architecture, no hallucinations, and vantage integration

Publishing, Authoring, and Review Assistant (PARA)

- Visual Studio Code Extension for all LCMC technical writers that eliminates the need for above baseline software, utilizes AI for TM authoring, and supports all phases of the TM development process
- User script panel, onboard AI assistant, flattens learning curve
- Live DTD Validation, SABR checks, live preview rendering

PARTNERING WITH TOBYHANNA ARMY DEPOT

Directorate of Production Management

APRIL 2026

Controlled by: TYAD
Controlled by: ELTY-MM
CUI Category: OPSEC
Limited Dissemination: FEDCON
POC: CHRISTOPHER LUPOLE, P3 LEAD

WHAT IS A PUBLIC-PRIVATE PARTNERSHIP WITH TYAD?

Department of War, Public-Private Partnering (PPP or P3) for Product Support Guidebook defines P3's as...

“voluntary, non-contractual collaborations between DoD and non-federal entities (NFEs) through which both parties' leverage expertise, resources and incentives of the other to achieve mutually agreed goals.”

*Partnering is a **Cooperative** Effort **Not a Competitive** Engagement*

Core Concept:

Form a strategic alliance between a private defense industry partner and the organic Depot.

WHEN IS PARTNERING THE BEST SOLUTION?

Typical Scenario: A private defense partner holds either a Department of War (DoW) contract, subcontract, or is pursuing an award.

This partner then identifies TYAD as a viable “subcontractor”/partner to:

- ✓ Fill gaps in technical capabilities or services
- ✓ Augment existing skillsets
- ✓ Increase production or repair capacity
- ✓ Jointly develop a stronger, more competitive proposal for a government solicitation
- ✓ Leverage existing facilities, test equipment, or other identified infrastructure

Goal: Combine the best commercial innovation and organic government sustainment/maintenance expertise to deliver unmatched value to our Warfighters.

BENEFITS FOR OUR PRIVATE PARTNERS

- Avoid Major Capital Investment: Gain immediate access to TYAD's state-of-the-art facilities, infrastructure, and multi-million-dollar test equipment without the high cost of ownership.
- Access a Unique, Skilled Workforce: Leverage a stable, security-cleared federal workforce with diverse C5ISR, electronics, cyber security, and depot-level experience.

Gain the *TYAD Advantage*: People, *Performance*, **Partnership**

- Enhance Credibility & Market Insight: Boost your competitive position by partnering with designate Center of Industrial Technical Excellence Depot and gain valuable insight into long-term DoW priorities.
- Fulfill Government Requirements: Satisfy solicitation requirements that specify the use of the organic industrial base (OIB) and key statutory obligations (10 USC 2466, 50/50 Rule).

BENEFITS FOR OUR WARFIGHTER

- Access Commercial Innovation: The Depot, through protected measures, gains access to the private partner's latest technologies, IP, and innovative processes to modernize organic support
- Strengthen the OIB: P3's help maintain critical workforce skillsets and technical capabilities, ensuring readiness as mandated by law.
- Improve Supply Chain Responsiveness: Collaboration leads to more efficient supply chains, reduced repair times, and effective delivery of critical assets to the Warfighter
- Optimize Solutions: Synergizing expertise can lead to comprehensive and cost-effective sustainment solutions that neither party could achieve alone.

STRATEGIC & LEGAL LANDSCAPE

Understanding these statutes is key to understanding why these partnerships are so valuable....

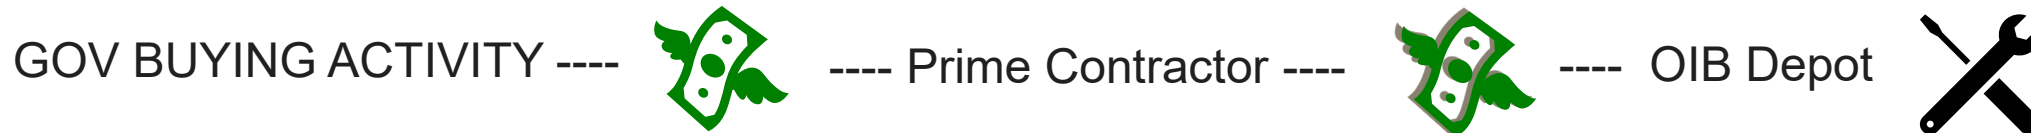

<u>U.S. Code</u>	<u>Common Name</u>	<u>Significance for Partnering</u>
10 U.S.C. § 2474	Centers of Industrial and Technical Excellence (CITE)	This is the foundational partnering statute. It requires the designation of depots like TYAD as "Centers of Excellence" and explicitly authorizes them to enter into "public-private cooperative arrangements" to perform work and utilize facilities. It is the primary authority for Direct Sales and Workshare agreements.
10 U.S.C. § 2563	Sale of Articles & Services	A broad and flexible authority that allows depots to sell services—such as engineering, testing, manufacturing, and repair—directly to a private company, particularly when the work supports a DoW contract.
10 U.S.C. § 2464	Core Logistics Capabilities	The foundational <i>reason</i> for partnering. It mandates that the DoD must maintain a government-owned "core" logistics capability to meet strategic needs. Partnering is a primary method for ensuring these core skills and facilities remain viable and technologically current.
10 U.S.C. § 2466	The "50/50 Rule"	A major <i>driver</i> for partnering. This law limits the percentage of depot maintenance funds that can be spent on private-sector-only contracts. This creates a powerful incentive for private firms to partner with a depot to perform work within the government's 50% share, making their proposals more attractive

CORE PARTNERING MODELS

Direct Sale

How It Works – Private Partner has a Government prime contract. The Private Partner then issues a subcontract to the organic depot (i.e., TYAD) for specific products and/or services.

Workshare Agreement

How It Works – Government customer issues two separate contracts: one directly to the private partner and a Project Order directly to the organic depot.

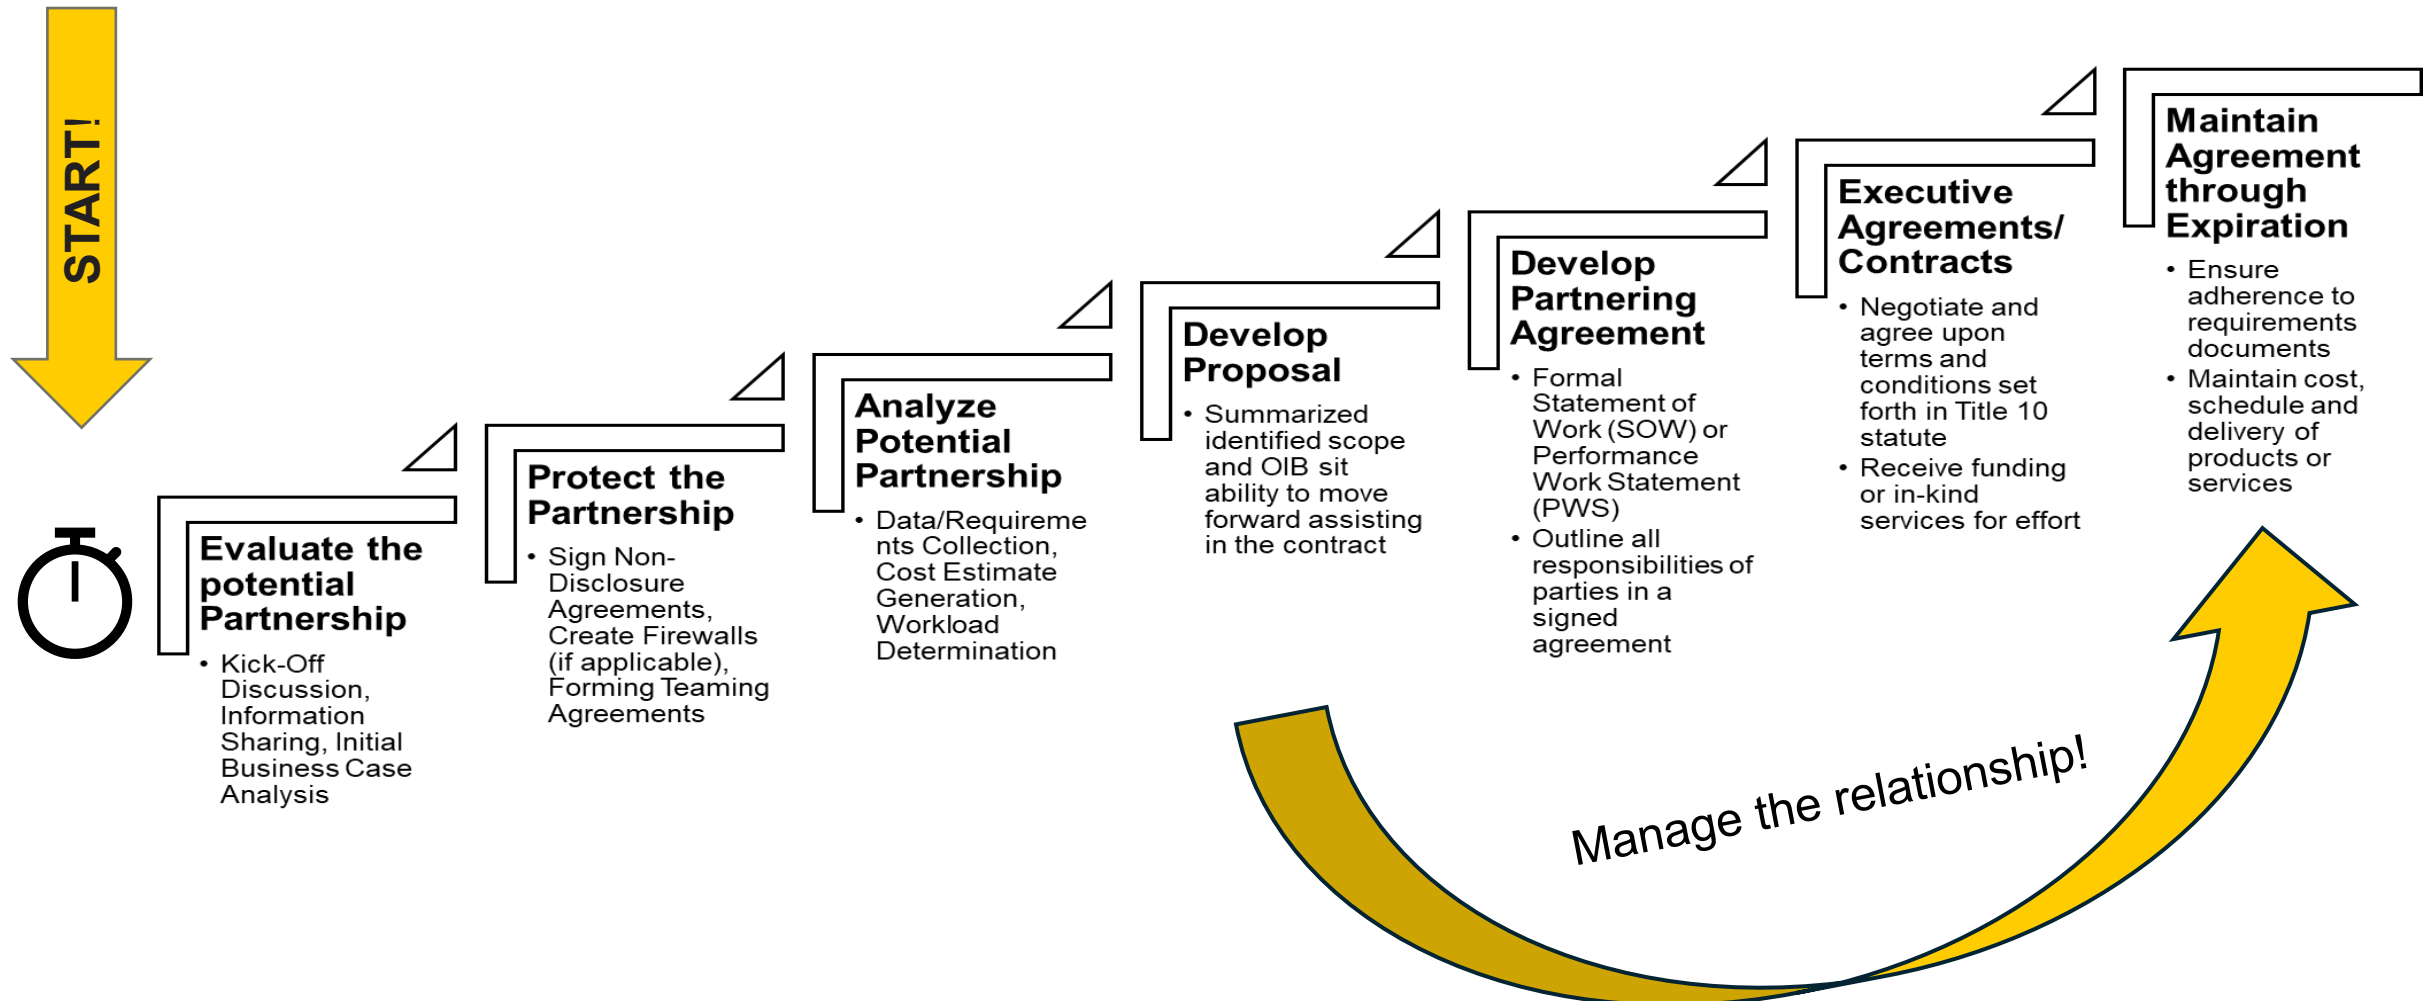

OTHER AGREEMENT TYPES

<u>Agreement Type</u>	<u>How It Works</u>	<u>Key Characteristics</u>
Facilities Use Agreement (FUA)	A private entity pays to use unique depot facilities, equipment, or services for a specific purpose that benefits the government.	This is a "pay-for-use" rental agreement. The work does not have to be on a DoD system but must provide some benefit to the DoD.
Enhanced Use Lease (EUL)	A long-term lease (up to 100 years) where a private developer leases underutilized real property (land or buildings) on a military installation for commercial purposes.	Focuses on real estate development, not depot workload. The Army receives cash or in-kind consideration for the lease.
CRADA (Cooperative Research & Development Agreement)	A formal agreement for the government and a private partner to collaborate on research and development. No funds are exchanged.	Purely for R&D. Each party funds its own participation. No goods or services are being procured.

7-STEP PATH TO A SUCCESSFUL PARTNERSHIP

ASIC P3 COMMON QUESTIONS

**Q: ASIC P3 processes reference go/no-go decision and Business case analysis.
What are they?
Will that hinder timeless for partnership to respond to request for proposals?**

A: ASIC's Go/No-Go decision and Business Case Analysis (BCA) are internal evaluation steps to ensure potential partnerships align with its mission and provide value to the Army.

Go/no-go decision is a quick check to see if the opportunity fits ASIC's mission, core skills, and available resources.

The BCA is a detailed analysis of the financial/non-financial impacts and risks to confirm the partnership benefits the Army.

These steps are part of ASIC's internal due diligence and are not intended to delay a partner's response time for Requests for Proposals (RFPs).

ASIC P3 COMMON QUESTIONS

**Q: ASIC P3 process only addresses direct sales P3s.
Does that mean ASIC is not interested in workshare or lease type of P3s?**

A: That is a misconception. While the process accommodates direct sales, ASIC is actively interested in and encourages both workshare and lease-based partnership models. Our goal is to establish flexible, long-term partnerships that best serve the warfighter.

We welcome partners to propose specific workshare approaches to be included in teaming agreements. We recommend coordinating with acquiring offices, especially during the RRI phase, to structure acquisitions for workshare. In this model, ASIC is compensated directly by the acquiring office.

While the simple lease of ASIC facilities is permitted, we prioritize partnerships that combine a facility lease with the utilization of our talented workforce. This collaborative approach better serves our DoW customers.

ASIC P3 COMMON QUESTIONS

Q: With the direct sales P3 model, ASIC will be a subcontractor to the industry partner, which would serve as the prime contractor. Is the advance payment requirement negotiable?

A: No, the advance payment requirement is not negotiable.

This policy is in accordance with Department of War (DoW) and Army regulations. ASIC assigns its existing organic federal government employees to direct sales P3 efforts, and advance payments must be received prior to any work being performed by ASIC personnel.

Advance payment can cover the total subcontract amount or be made in incremental payments.

If incremental payments are chosen, both parties must agree on the schedule and amounts for all payments. Each subsequent payment must be received before further work proceeds.

Additional advance payments are required before any new work begins. Failure to receive timely and sufficient advance payments will result in an excusable delay and may lead to a work stoppage.

This ensures that work can proceed without interruption and aligns with established governmental financial policies.

ASIC P3 COMMON QUESTIONS

Q: With a signed teaming agreement, would ASIC commit to work exclusively with the industry partner? Would ASIC commit to submitting proposal for every opportunity identified by the industry partner? How would ASIC protect proprietary/contract sensitive information?

A: As a federal government organization, ASIC operates under specific guidelines regarding teaming agreements. Here is a breakdown of our policies on exclusivity, proposal commitment, and information protection.

Exclusivity:

No. ASIC cannot commit to working exclusively with any single industry partner. For any given opportunity, we may team with multiple partners. In such cases, we maintain fairness by submitting the same labor rates for the same skill categories to all partners involved.

Proposal Commitment:

No. ASIC cannot guarantee submission for every opportunity a partner identifies. However, we will always do our best to collaborate effectively and support timely proposal submissions for the opportunities we do commit to.

Information Protection:

Through formal, legally-binding agreements. For every opportunity ASIC agrees to pursue with a partner, all involved ASIC personnel are required to sign a Non-Disclosure Agreement (NDA) and a Conflict of Interest statement. This ensures that your sensitive information is protected and that our involvement is impartial.
