

Questions for Solicitation N0040626Q0033

1. Where is the installation location? **Naval Station Everett. Address: 2000 West Marine View Dr. BLDG 2125 Everett, WA 98207**
2. Are the docks already in the water? **Yes, concrete floats are in the water**
3. Who is the dock manufacturer? **Bellingham Marine**
4. Are there any CAD or engineered drawings of the docks? **Yes drawing available**
5. What is the mean high water level? **MHHW approximately 11.2 to 11.4 feet**
6. What is the water level variation? **area can exceed 10–12 feet during spring tides**
7. What is the mean low water level? **MLW approximately 2.80 feet**
8. What is the significant wave height? **heights are limited to around 1 ft**
9. What is the maximum wave height? **wave heights of 6 feet**
10. What is the maximum wind speed with vessels on the dock? **gusts exceeding 50 mph**
11. What is the maximum unoccupied wind velocity? **can exceed 70 mph during severe weather**
12. What is the maximum size and number of vessels tied to the docks? **8 vessels**
13. Have helical anchors been investigated? (cheaper than concrete and common in that area) **due to restricted access in tight locations helical anchors not being considered**
14. Is the titanium end crimps a requirement as that is a solution to a failure point on another company's product? (our product does not have that failure point.) **prefer titanium due to high strength and corrosion resistance**
15. Is stainless steel a requirement? (This is not a commonly used metal in the Puget Sound. Hot dipped galvanized has superior corrosion resistance.) **stainless steel AISI 316 or galvanized**
16. Can the material requirement become more neutral, for instance the use of verbiage like (corrosion resistant material) **material must be of corrosion resistant material due to saltwater exposure**
17. Can we have extra time to have our engineer review the design to make sure it up to US code? **This solicitation has been extended, timeline has been impacted by the urgency of the pier condition**
18. Can the requirement be changed to either no name brand or can it say Seaflex or Hazelett or equivalent? - **Brand name or equal remains. Elastic mooring system parts and its equivalents are authorized. Any quoted items need to either meet or exceed part number specifications. Specification sheet required for equivalents.**
