

SOURCES SOUGHT NOTICE

Hazardous Waste Operations Support Services U.S. Army Garrison – Aberdeen Proving Ground, Maryland

Notice ID: PANAPG-26-P-0000 033592

PSC Code: F107 – Environmental Systems Protection: Toxic and Hazardous Substance Analysis

NAICS Code: 562112 – Hazardous Waste Collection

Posting Dates: 04/16/26 to 05/01/26

The United States Army Contracting Command – Aberdeen Proving Ground (ACC-APG), Installation & Technology Division, Facilities Branch, is issuing this Sources Sought Notice to conduct market research and identify qualified Small Business concerns capable of supporting hazardous waste (HW) operations at U.S. Army Garrison Aberdeen Proving Ground (APG), Maryland. These services directly support the Directorate of Public Works (DPW).

The Government anticipates awarding a five-year Firm Fixed-Price Indefinite Delivery/Indefinite Quantity (IDIQ) contract, with an additional six-month option period. The applicable NAICS code is **562112 – Hazardous Waste Collection**, and the Product Service Code (PSC) is **F107 – Environmental Systems Protection: Toxic and Hazardous Substance Analysis**.

The Government seeks to identify small businesses with the capability, experience, and resources necessary to perform hazardous waste operations at APG. The APG HW Program is responsible for tracking, collecting, storing, and disposing of installation-generated hazardous waste. To support this mission, DPW-Environmental Division (DPW-ED) manages two hazardous waste receiving and storage facilities where waste is accepted, consolidated, and stored prior to off-site shipment and disposal.

Services will be required at the following locations:

- **APG North**
- **Edgewood Area**

This notice is issued solely for informational and planning purposes. The Government's objective is to identify qualified vendors capable of providing all labor, tools, materials, transportation, technical expertise, and incidental services necessary to support the APG HW Program. This includes oversight of hazardous waste tracking, collection, storage, and disposal operations, as well as support to the two DPW-ED hazardous waste receiving and storage facilities, in accordance with the Draft Performance Work Statement (PWS).

SCOPE OF WORK

The Contractor shall provide comprehensive support to the U.S. Army Garrison Aberdeen Proving Ground (APG) Hazardous Waste (HW) Program. Required services include:

- Operation of APG's hazardous waste storage facilities located in the **E5800 block** of the Edgewood Area and **Building 5110** in the Aberdeen Area
- Hazardous waste data entry, tracking, reporting, and cost-accounting support
- Waste sampling and analysis services

Operation of APG Hazardous Waste Storage Facilities

The Contractor shall operate APG's **less-than-90-day hazardous waste storage facility** at Building 5110 (Aberdeen Area) and the **permitted hazardous waste storage facilities** located in Buildings **E5850, E5862, E5864, and E5866** (Edgewood Area). The Contractor shall also coordinate and support special project services, such as laboratory cleanouts.

Contractor personnel shall ensure the continuous, safe, and compliant receipt, handling, and storage of hazardous and industrial wastes. All operations must comply with applicable federal, state, and local regulations, including requirements established by the U.S. Environmental Protection Agency (EPA) and the State of Maryland.

The Contractor shall perform all physical, administrative, clerical, and technical tasks necessary to manage hazardous and industrial waste inventories. These tasks include, but are not limited to:

- Inspecting and operating hazardous waste storage facilities
- Evaluating and coordinating customer waste turn-in requests and special project needs
- Handling, weighing, segregating, storing, marking, labeling, inspecting, packaging, pouring, and tracking hazardous and industrial wastes
- Providing required sampling and analytical services

Additional details and full performance requirements are provided in the **Draft Performance Work Statement (PWS)**.

PURPOSE OF THIS MARKET RESEARCH

Information received in response to this Sources Sought Notice will assist the Government in:

- Determining whether responsible and technically capable sources exist to perform hazardous waste collection, storage, consolidation, and disposal services

- Assessing the potential for adequate competition among qualified hazardous waste management firms
- Evaluating whether the requirement may be set aside for Small Business based on demonstrated capability in hazardous waste operations
- Informing future acquisition strategy decisions, particularly regarding compliance with RCRA, DOT, OSHA, and EPA hazardous waste handling requirements

If the requirement is competed on an unrestricted basis, Small Business responses may be used to establish subcontracting goals, especially for specialized hazardous waste functions such as sampling, characterization, manifesting, and operation of permitted storage facilities.

Respondents should clearly identify their business size and socioeconomic status (e.g., Small Business, 8(a), Woman-Owned, Minority-Owned, HUBZone, SDVOSB, etc.). References may be used to verify past performance on Government or commercial contracts involving hazardous waste management, environmental compliance, or operation of RCRA-regulated facilities.

Interested firms should submit a **capabilities statement**—not to exceed **10 pages**, formatted on **8.5 x 11-inch pages** with **12-point font or larger**—that demonstrates their ability to perform the hazardous waste services described in this notice. Bullet format is preferred. Capabilities should address experience with hazardous waste storage operations, waste segregation, sampling and analysis, manifesting, transportation, and compliance with federal and state environmental regulations.

No phone calls or email inquiries regarding the status of any future solicitation will be accepted prior to its official release.

Points of Contact

Technical Point of Contact: [Name] Email: **kenneth.g.menzies.civ@army.mil**

Contracting Officer: Amy M. Bowen Email: **amy.m.bowen.civ@army.mil**

Contract Specialist: Scott E. Nunley Email: **scott.e.nunley.civ@army.mil**

Submission Instructions: All capabilities statements shall be submitted **via email** to the Contract Specialist, Contracting Officer, and Technical Point of Contact listed above. Please include **Notice ID: PANAPG-26-P-0000 033592** in the subject line and on the capabilities statement itself. All submissions are to be submitted prior to **16:00 01 May 2026**. Submissions after that date and time will not be accepted.

Contractor Questionnaire

Please complete the following questionnaire. If a question does not apply, enter **N/A**.

1. Company Information

Provide a brief summary of your company and its core competencies related to hazardous waste collection, storage, disposal, environmental services, or related infrastructure support. Identify your primary NAICS code and confirm whether you qualify under **NAICS 562112 – Hazardous Waste Collection** or any other relevant NAICS codes.

Include the following information:

- Company Name
- Address
- Point of Contact
- Phone Number
- Fax Number (if applicable)
- Email Address
- CAGE Code
- DUNS/UEI Number
- Small Business Regional Office Address (if applicable)
- Business Size/Status (8(a), Small Business, HUBZone, WOSB, SDVOSB, etc.)

2. Government Contracting Capability

Describe your company's capability and experience performing U.S. Government contracts, including:

- Ability to meet delivery schedules and performance timelines
- Reporting, documentation, and record-keeping practices
- Quality assurance and quality control procedures
- Experience working on secure or controlled-access military installations

3. Technical Capability

Provide detailed information regarding your technical ability to perform hazardous waste operations, including:

- Experience conducting hazardous waste collection, storage, consolidation, and disposal
- Types of hazardous, universal, and special waste streams your company is qualified to manage
- Description of Treatment, Storage, and Disposal (TSD) facilities used (owned or subcontracted)
- Applicable permits (EPA ID, state transporter permits, RCRA Part B, etc.)
- Laboratory analysis or waste characterization capabilities

4. Personnel & Training

Describe your staffing approach and qualifications of key personnel, including:

- Certifications such as HAZWOPER 40-hour, CDL with hazmat endorsement, or other relevant credentials
- Experience of Site Chemists, Team Leaders, and hazardous waste technicians
- Training programs used to maintain compliance and technical proficiency

5. Past Performance

Provide up to **three** relevant projects completed within the last five years. For each project, include:

- Customer/Agency
- Contract Value
- Scope of Work
- Performance Highlights

6. Capacity & Coverage

Describe your company's operational capacity, including:

- Ability to support both **APG North** and **Edgewood** locations
- Response times and surge capability
- Annual waste volume capacity and throughput

7. Additional Information

Include any additional details that may assist the Government in evaluating your capabilities:

- Recommended NAICS code changes
- Potential subcontracting or teaming arrangements
- Unique capabilities, innovations, or value-added services

Technical Scenario Questions

8. PPE Assignment Approach

Describe your approach to determining and assigning appropriate Personal Protective Equipment (PPE). Include examples of the PPE your technicians would use for **routine container handling** versus **sampling a container with unknown liquids**.

9. Waste Turn-In Evaluation

A research laboratory submits a waste turn-in request for a 5-gallon container labeled “**Solvent Waste**”, but the profile is incomplete. Explain what additional information and parameters the **Site Chemist** would require before accepting the waste into the facility.

10. Waste Segregation Principles

The PWS requires the storage of multiple hazardous waste streams. Describe the key principles your team uses to **segregate incompatible wastes** within storage bays to ensure safety and compliance with **RCRA** requirements.

11. Regulatory Inspection Response

A regulatory inspector arrives for an unannounced inspection. Describe the process your **Contract Team Leader** would follow and identify the key documents they would have readily available to demonstrate compliance.

DISCLAIMER

This Sources Sought Notice is for **informational purposes only**. It is **not** a Request for Proposal (RFP), **does not** constitute a solicitation, and **shall not** be construed as a commitment by the Government. Responses are **not** offers and the Government is under no obligation to award a contract based on this announcement. No funds are available to reimburse respondents for preparation of submissions. Participation is strictly voluntary. Respondents will not be notified of the results of this market research.

All information submitted in response to this Sources Sought that is marked or identified as corporate or proprietary will be safeguarded and will not be disclosed outside the Government.
