

AFWERX PRIME INNOVATIVE CAPABILITIES OPENING (ICO)
Call 0002

Questions and Answers

Updated 17 April 2026

1. Is AFWERX Prime primarily seeking hardware-focused electrification solutions, or are software-based simulation, optimization, and AI-driven validation platforms also within scope?

Primarily hardware-focused electrification solutions.

2. Would solutions focused on system-level optimization, predictive modeling, and intelligent training environments for electrified aircraft be considered relevant to this call?

Yes. However, this Call emphasizes solutions that are sufficiently mature to support credible demonstration and the generation of quantitative performance data within the period of performance.

3. Is there openness to early-stage or emerging technology providers participating through pilot or prototype-focused submissions?

Concepts that rely primarily on early-stage research without a clear and executable path to demonstration may be less competitive.

4. Can you clarify if the deadline for the AFWERX Prime ICO Call 0002 - Electrification of Fixed Wing Aircraft call is Apr 20, 2026 at 11:59 PM EDT, not 4/18 (per 11.b in the call)?

Yes, the deadline is 20 April 2026. 11.b has been corrected to reflect the correct deadline.
