

**Central Arkansas Veterans Health Care System
DRAFT-SOW**

- I. Scope:** Contractor shall provide all shipping, delivery, personnel, original equipment manufacturer (OEM) authorization, tools and equipment to uninstall nine x-ray units at the Central Arkansas Veterans Health Care System (CAVHS) at North Little Rock, Arkansas. Contractor shall then install nine new brand name or equal Dentsplysirona-Dental X-Ray Units-Heliodont Plus Wall Version. And provide one day onsite training.

The Heliodont Plus Wall Version is designed to provide optimal image quality in digital radiography for patients of all shapes and sizes. It features quick and safe operation, enhancing the practice workflow. The system includes a complete wall-mounted control unit, support arm, and remote timer station with a 33' shielded connection cable. The exposure release button with coiled cable and holder is also included, ensuring secure and efficient operation. The system's modularity allows for customization to fit most practice environments, with various lengths and activation and control options available. The intuitive user display and pre-programmed settings contribute to greater clinician control for day-to-day practice workflow.

Contractor shall provide

- II.** Heliodont Plus Wall Version includes but is not limited to the following:

	Description	Part Number	QTY	UI
1	Heliodont Plus Wall Version	6256213	9	EA
2	HD Adapter Plate Kit	6242254	9	EA
3	HD rectangular Plate	100004183	9	EA
4	Installation Imaging	6149962	18	EA
5	SIDEXIS/HD+ On-Site Training 1 Day	6092873	1	EA

- III. System Requirements include but are not limited to the following:**

Power Supply: The unit can be connected to 120 V or 200 - 240 V (1-phase or 2-phase connection) with a pre-transformer required for other voltages.

Electromagnetic Compatibility (EMC): The unit must comply with EMC standards to ensure safe operation.

Installation: Proper wall attachment methods must be selected, and the permissible tensile force must equal the specified force.

Safety Measures: The unit should not be operated in the immediate vicinity of other devices to prevent potential hazards.

- IV. Specifications include but are not limited to the following:**

The Heliodent Plus Wall Version is an intraoral X-ray generator designed for optimal image quality and flexibility in dental practices. Key specifications include:

Installation Options: Wall-mounted, ceiling-suspended, or embedded on a treatment center or mobile cart.

Support Arm Lengths: Available in three lengths: 1500mm (59.06 inches), 1790mm (70.47 inches), and 2040mm (80.31 inches).

Modularity: Can be adapted to fit various room dimensions and clinical needs.

User Interface: Features an intuitive display with pre-programmed settings for ease of use.

Power Supply: Operates on DC power, with options for wall mounting and ceiling suspension.
