

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)?

☐ Yes

☒ No

Contracting Activity: AFTC/PZI (Holloman)

Project/Program Name: STK Software Renewal 2026

Purchase Request / Local ID Number: F2ETG16096A101

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

The Arnold Engineering Development Complex (AEDC) at Holloman Air Force Base requires the renewal of a commercial software maintenance license for Ansys STK Premium (Air). [REDACTED]

The proposed action is for a firm-fixed-price (FFP) purchase order with a period of performance consisting of a base year and two (2) one-year option periods. The total estimated value of this requirement, including all options, is [REDACTED]. A detailed Statement of Work is attached.

Section C: Justification for Soliciting from a Single Source or Brand Name

The authority for this sole-source action is FAR 8.405-6(a)(1)(i)(B) - Only One Source is Capable, as the required Systems Tool Kit (STK) software is a unique and highly specialized commercial product. The STK software provides the 746th Test Squadron with a unique modeling environment essential for mission success, delivering verified results for [REDACTED]

[REDACTED] concluded no other vendor can provide. Furthermore, the software manufacturer, Ansys Government Initiatives (AGI), has confirmed in writing that their STK product line is solely manufactured, owned, and supported by their company, with no authorized distributors or resellers for this specific product. A change to any other software would cause unacceptable costs and mission disruption, as it would require the procurement of new software and significant government labor hours for research, training, and re-accreditation, estimated to cost approximately [REDACTED]. Therefore, procuring from the original manufacturer is the most cost-effective and technically acceptable course of action to meet the Government's needs.

Section D: Efforts to Obtain Competition

Efforts were made to identify all potential sources for this requirement. Market research confirmed that STK was created specifically to assist the Department of Defense with specialized modeling and analysis, and no other vendors offer a comparable capability. The specific actions taken to seek competition include: internet searches, inquiries within the technical user community, a review of the GSA Advantage!® portal, and analysis of historical government procurement data on SAM.gov. These efforts confirmed that Ansys Government Initiatives (AGI) is the only identifiable source. A direct inquiry was made to AGI, and they provided a formal letter, attached to this justification, confirming they have no authorized resellers or distributors for this proprietary software. Based on these actions, it is determined that no reasonable expectation of competition exists for this requirement.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

While the testing of new defense technologies often necessitates unique and innovative software products, the 746th Test Squadron is committed to fostering competition for future requirements. To preclude future sole-source awards for this or similar capabilities, the technical team will conduct ongoing market surveillance by monitoring industry developments, attending relevant technical conferences, and engaging with other DoD user communities to identify and assess emerging technologies and alternative software solutions. Additionally, prior to exercising option years and any subsequent renewals, the

Single Source Justification (Simplified Acquisition)

Government will re-evaluate the minimum technical requirements to determine if they can be revised to permit competition without compromising mission effectiveness. Should a viable alternative emerge that meets the Government's minimum technical requirements, a competitive acquisition strategy will be pursued for any future procurement.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
