| 2.2                                                  | Personnel                              | In addition to the Employee Requirements specified in Annex 2, the Contractor shall provide personnel with the qualifications, technical knowledge, experience and skills required to efficiently provide grounds maintenance and landscaping services and as specified below:                                                                                                                 |
| 2.2.1                                                | Certification, Training, and Licensing | All Contractor personnel who apply pesticides/herbicides shall be certified by the Italian Provincial Agricultural Office (Ispettorato Provinciale dell'Agricoltura) as per local laws and regulations. Proof of certification shall be submitted per Section F.                                                                                                                               |
| 2.3                                                  | Special Requirements                   |                                                                                                                                                                                                                                                                                                                                                                                                |
| 2.3.1                                                | NAS II Airfield Escort Requirements    | Personnel assigned to work on NAS II Airfield shall be escorted by Contractor provided escort. Escort shall be fluent in English. Escort shall notify Airfield T-Line personnel both prior to commencing any work and after completing work.                                                                                                                                                   |
| 2.3.2                                                | Application of Herbicides              | The Contractor shall comply with the requirements specified in technical specification 1503020 Pest Control for any work that involves the handling or application of herbicides.                                                                                                                                                                                                              |
| 2.3.3                                                | Permits                                | The Contractor shall obtain all necessary permits required to perform the work in this contract. A copy of any applicable permit shall be submitted per Section F.                                                                                                                                                                                                                             |
| 2.3.4                                                | Vehicles on Sidewalks or Lawns         | Vehicles shall not be permitted on sidewalks or lawns without prior approval from the KO. The Contractor's request shall include the methods on how he intends to protect the lawns and sidewalks from damage. Replace or restore all lawns, plants, and property damaged by the Contractor to their original condition or better at no additional cost to the Government.                     |
| 2.3.5                                                | Equipment Restrictions                 | Use of powered equipment is prohibited in environmentally sensitive areas identified on the Grounds Inventories and Site Maps provided in J-1503050-02.<br><br>Use of grazing animals is subject to prior Government approval.                                                                                                                                                                 |
| 2.3.6                                                | Safety                                 | Grounds maintenance and landscaping equipment shall be approved for use around ammunition bunkers before commencing work as per Section F. Refer to Annex 0200000, Spec Item 2.9, Contractor Safety Program.                                                                                                                                                                                   |
| 2.3.7                                                | Work Identification                    | The Contractor shall identify and recommend non-recurring work as appropriate to the KO.                                                                                                                                                                                                                                                                                                       |
| 2.3.8                                                | Working Adjacent to Parking Areas      | Work shall be performed with care on grounds adjacent to parking areas so as to prevent damage to parked vehicles.                                                                                                                                                                                                                                                                             |
| 2.3.9                                                | Access Coordination                    | The Contractor shall coordinate all access to performance areas such as airfields and firing ranges through the KO. If required, the Contractor shall be in radio contact with the controlling authority during work performance.                                                                                                                                                              |
| 2.3.10                                               | Water Management                       | The Contractor shall conform to waste and water management measures imposed on the Navy and the Navy-imposed water conservation requirements                                                                                                                                                                                                                                                   |
| 2.3.10.1                                             | Water Conservation Plan                | The Contractor shall develop and submit a Water Conservation Plan per Section F. The plan shall be in effect year round with emphasis on the rainy season (e.g., October through April) and other times of the year during heavy rain. The plan shall be signed and dated by the Contractor's Project Manager and Quality Control Manager. At a minimum, the plan shall include the following: |

Section C – 1503050  
Grounds Maintenance and Landscaping

| 1503050 - Grounds Maintenance and Landscaping |                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 3.1.6                                                | Vegetation Control | The Contractor shall perform vegetation control to ensure areas are free of undesired vegetation.                                                  | The Contractor shall remove unwanted vegetation from fence lines, fence fabric, brick walls, sidewalks, curbs, gutters, aggregate areas, and paved surfaces including parking lots, terraces, porch areas, external stairs, outdoor sport courts and sport fields.                                                                                                                                                                                                                                                                                                                                                                                     | <p>Areas are free of all vegetation consistent with the specified Service Level and Contractor's Work Schedule.</p> <p>Vegetation growth is controlled to levels and within times specified in the Pest Group Requirements in Section J.</p>                                            |
| 3.1.7                                                | Debris Removal     | The Contractor shall remove debris to ensure a clean and neat appearance.                                                                          | <p>The Contractor shall remove and appropriately dispose of all debris including seasonal debris, e.g., fruit, seed pods, dry brush throughout improved grounds areas.</p> <p>Fallen leaves and other seasonal debris shall be removed as necessary to present an overall neat appearance. Increased attention shall be provided seasonally to ensure no build-up of natural debris.</p> <p>The Contractor shall develop and submit a schedule for debris removal per Section F.</p> <p>Informational Notes: The Government has found that on previous contracts a frequency of up to twice weekly has maintained services at an acceptable level.</p> | <p>Debris is removed as necessary to present an overall neat appearance.</p> <p>Areas are maintained clear of debris per the Contractor's schedule.</p>                                                                                                                                 |
| 3.2                                                  | Operational Areas  | The Contractor shall maintain operational areas to ensure grounds present a sightly appearance and do not interfere with operational requirements. | <p>Prior to mowing or trimming, the Contractor shall remove and appropriately dispose of all debris that interferes with the mowing or trimming operation.</p> <p>All debris shall be removed and disposed of properly and within one (1) working day.</p> <p>Operational areas are provided in J-1503050-02 Grounds Inventories and Site Maps.</p>                                                                                                                                                                                                                                                                                                    | <p>Operational areas present a sightly appearance and do not interfere with operational requirements.</p> <p>Vegetation within and adjacent to objects such as: fence lines, fence fabric, and brick walls is trimmed to match the height and appearance of surrounding vegetation.</p> |

Section C – 1503050  
Grounds Maintenance and Landscaping

| <b>1503050 – Grounds Maintenance and Landscaping</b> |                                        |                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 3.2.7                                                | Tree Control             | The Contractor shall provide tree control to prevent encroachment on roads, buildings, ammunition storage firebreaks, and structures.                  | <p>The Contractor shall provide tree control in operational areas to prevent interference with pedestrian and vehicular traffic, encroachment on roads, buildings, ammunition storage firebreaks, and structures.</p> <p>The Contractor shall remove and properly dispose of all tree trimmings.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Trees do not encroach on roads, buildings, ammunition storage firebreaks, and structures.                                                                                                                   |
| 3.3                                                  | Storm Drainage Systems   | The Contractor shall remove obstructions and control trees and vegetation in storm drainage systems to ensure unrestricted flow of storm water runoff. | <p>Drainage systems include curb gutters, curb inlets, brow ditches, drainage channels, swales, catch basins, yard drains, culverts, and other devices used to direct the flow of runoff.</p> <p>The Contractor shall clean and remove debris from drainage systems that would inhibit drainage.</p> <p>Aboveground storm drainage systems shall be maintained clear of obstructions, debris, vegetation, and anything else which may restrict runoff flow. Vegetation height shall not to exceed eight (8) inches / 20 cm.</p> <p>Drain covers and grates of underground systems shall be maintained clear of obstructions, however, covers and grates shall not be removed for cleaning drainage systems. The KO shall be notified within 24 hours, in writing, of obstructions in subsurface drain lines beyond Contractor responsibility. Missing or damaged yard drain covers and grates shall be reported immediately to the KO.</p> | No evidence of obstructions in the visible area of the drainage systems.                                                                                                                                    |
| 3.4                                                  | Outdoor Waste Collection | The Contractor shall provide outdoor waste collection to                                                                                               | The Contractor shall collect waste from the outdoor waste and recycling containers located throughout the                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Waste containers and collection sites are free of waste, cleaned and sanitized.                                                                                                                             |

| <b>Spec Item</b>                                     | <b>Title</b>       | <b>Performance Objective</b>                                                                                                                                                                                                                                                                                                  | <b>Related Information</b>                                                                                                                                                               | <b>Performance Standard</b>                                                                             |
| 4                                                    | Non-Recurring Work | Non-Recurring work may be ordered utilizing DoD FEDMALL in accordance with Section H or on a task order in accordance with the PROCEDURES FOR ISSUING ORDERS clause in Section G. The order will specify the exact locations and types of work to be accomplished. The period of performance will be specified in each order. | Refer to Non-Recurring Work ELINs for task listings, descriptions, and related requirements. All periods of performance are measured from issue date of order to acceptance of the work. | Performance standards for non-recurring work will be the same as those in Spec Item 3 where applicable. |
