

Amendment 0010- Pre-Award Inquiry Responses

REFERENCE			QUESTION	GOVERNMENT RESPONSE
Page Number	Paragraph Number	Section		
5	C 1402000	3.1.1	Can the government please provide the Square foot of the roof for Building 170 & 623?	Refer to revised 1402000 C Unaccompanied Housing, Spec Item 3.1.1.
7	C 1402000	3.3	Can the government please provide the number and square footage of the laundry Rooms in Building 170 & 623?	Refer to revised J-1402000-03 Locations and Description of Unaccompanied Housing Facilities provided with Amendment 0010.
6	C 1402000	3.2	Can the government please provide the Square Foot for each Common Area of Each BOQ?	Refer to revised attachment J-142000-03, Location and Description of Unaccompanied Housing Facilities
		J-1502000-07.c - Aviation Fuel Systems Equipment Description	Can the government please clarify if the Fuel system maintenance shall consist solely of visual inspection? The Contractor is aware that full maintenance of the fuel system has been awarded under a separate contract.	The solicitation does not limit fuel system work to visual inspection. Maintenance requirements for aviation fuel system are defined in section C 1502000 and include the tasks, standards, and frequencies identified in the applicable spec items. The Government does not confirm or rely on statements regarding other contracts.
		J-1502000-07.a POL Fuel Depot Equipment Description	The Contractor is aware that full maintenance of the fuel system has been awarded under a separate contract; however, can the government please clarify if the Fuel system maintenance shall consist solely of visual inspection?	The solicitation does not limit fuel system work to visual inspection. Maintenance requirements for POL Fuel Depot Equipment are defined in section C 1502000 and include the tasks, standards, and frequencies identified in the applicable spec items. The Government does not confirm or rely on statements regarding other contracts.
		J-1502000-07.d Vehicle Fueling Station Equipment Description	Can the government please clarify if the Fuel system maintenance shall consist solely of visual inspection? The Contractor is aware that full maintenance of the fuel system has been awarded under a separate contract.	The solicitation does not limit fuel system work to visual inspection. Maintenance requirements for vehicle fueling station equipment are defined in section C 1502000 and include the tasks, standards, and frequencies identified in the applicable spec items. The Government does not confirm or rely on statements regarding other contracts.
	C-1606001		Section C refers to J-1606001-03-Water Systems Descriptions and Inventories (Excel) but no such attachment file can be found. Can the govt please provide the referenced attachmenet?	Refer to revised Attachment J-1606001-03 and Excel file J-1606001-03 Water System Description and Inventory provided with Amendment 0009.

	C-1606001-3.3-Well Development and Water Treatment and Distribution System Support		Regarding the last two paragraphs under the 'Related Information' field, this specification does not provide enough information to facilitate fair and reasonable price competition. The Contractor shall provide support for at least one well development effort annually. Each well development effort will require up to one week of support services. Informational Note: In addition to the once per year well development support, the Contractor can expect to support up to X projects across the water system annually. Can the govt please provide more detailed scope and/or give estimated quantities to narrow the potential price range and make the competition more fair and reasonable?	Refer to revised 1606001 C Water (Overseas), Spec Item 3.3 Well Development and Water Treatment and Distribution System Support.
	C-1606001-Water-3.1.3-Fire Water Pump Stations J-1606001-03-Water System Inventory J-1606001-05-Fire Main Systems		In reference to C-1606001-Water-3.1.3-Fire Water Pump Stations, we are unable to find pump station inventory. - Can the Government please provide J-03 inventory?	Refer to revised Attachment J-1606001-03 and Excel file J-1606001-03 Water System Description and Inventory provided with Amendment 0009.
16	Tab J	2	The RFP states, "2. In addition, prior to submitting a proposal, all offerors shall initiate registration on the "White List" with the Prefect (Prefetto) where their company is legally registered. The offeror shall submit proof with its proposal that it has initiated or accomplished the "White List" registration procedures. For non-Italian offerors who do not have a registered office in Italy, the offeror shall initiate registration on the "White List" with the Prefect (Prefetto) where the work will be performed." Question: For Offerors submitting as a non-EU entity, that fall under the VAT exemption regime in accordance with art. 72 Decree 633/1972, there is no obligation to register for VAT purposes in Italy (either directly or through a tax representative). Registration on the 'White List' is not required for the above-mentioned entities in the absence of an obligation to appoint a fiscal representative in Italy, the latter being a prerequisite for White List registration. Per local law, in this specific case, it is sufficient for the Prime Contractor to submit only the anti-mafia self-certification. We request the government revise the RFP to strike this requirement.	The antimafia screening procedures under Italian law apply to this solicitation/contract. Please propose in accordance with the language as expressed in Section L.5- Evaluation Factors for Award, Volume I- Price Proposal, Tab J of the solicitation.

40	Annex 1502000 Facility Investment	Spec. Item 3.6.11	As required by the current in-force standard UNI 11560:2022, in order to assume management of lifeline systems, each system must be accompanied by (at a minimum): • O&M manuals; • Design and installation documentation; • Declaration of conformity with applicable technical standards; • Technical data sheets for the components installed; • Identification plate for the anchoring system; • Register of inspections and periodic checks. The Contractor will require this documentation to assume technical responsibility and ensure the suitability for use. Will the Government provide this documentation?	The Contractor is responsible for inspecting and certifying all identified lifeline systems and ensuring compliance with applicable standards, regardless of the availability of legacy documentation. The Government will provide available existing records to the extent such documentation exists; however, the PWS does not guarantee the availability or completeness for O&M manuals, design documentation, declarations of conformity, technical data sheets, identification plates, or inspection registers for all existing systems at contract start.
