Section J-1503050
Grounds Maintenance and Landscaping

Attachment J-1503050-01 Definitions and Acronyms	
Definition/Acronym	Description
Aeration	Introduction of air into the soil by mechanical means to promote health and growth.
Appearance	Where there is a sense impression or outward aspect of an area or thing that is consistent, uniform and neat in and around the surroundings.
ATFP	Anti-Terrorism Force Protection
Artificial Turf	An artificial surface that resembles grass.
BASH	Bird/Animal Aircraft Strike Hazard
Berm	A mound or bank of earth typically used as a barrier.
Brow Ditch	A drainage ditch with sufficient slope to prevent erosion of adjacent grading.
Bruising of Lawn	An injury to grass areas resulting in discolored blades of grass, usually caused by mowing with a dull blade.
Caliper	The measurement of a tree trunk at its widest diameter, measured six inches up from the ground for trees under four-inch caliper, and twelve inches from the ground for trees over four-inch caliper. Multi-stem plants are measured at the widest point of all trunks, six inches up from the ground for trees under four inch caliper, and twelve inches from the ground for trees over four inch caliper.
Classification and Ordering of Plants	For the purposes of pruning, trimming, planting, or removal, specific plants shall be identified according to their type and application as specified in the American Horticulture Society Encyclopedia of Garden Plants (latest edition), D.K. Publishing under ISBN-0-7894-1943-2. Example: A Red Tip Photinia bush which is 15' tall will be classified as a shrub.
Clipping	Any vegetation that is left on paved surfaces, lawns, and plant beds after being cut by means of shears, mowers, etc.
De-thatch	Removal of unwanted thatch from mowed areas to promote health and growth.
Debris	Includes, but is not limited to, paper, cans, bottles, limbs and branches, pine straw and pinecones, leaves, rocks, and other similar items.
Depression	A small area that has sunken below its surroundings.
Diameter at Breast Height (DBH)	The diameter of a tree measured at 4½ feet above ground level.
Edging	Creating a uniform edged cut to promote a neat appearance and prevent ground structures from vegetation encroachment.
Fertilization	Application of natural and synthetic materials to the soil where it has become deficient in nutrients essential for proper plant growth.
Frond	A large leaf or branch of a palm tree, usually with many divisions.
Grade	To bring soil to previously established level or inclination using appropriate tools and equipment.
Ground Cover	A plant which is chosen for the special task of providing a dense low attractive cover that prevents weeds and erosion. Varieties include, but are not limited to Vinca, Hosta, Ivy, Alyssum, Ajuga, and Liriope.
Hedge	Shrubs or other plants planted closely together so as to form an unbroken line during trimming.
Irrigation	Application of water to the soil to promote health and growth.
Irrigation System	A permanent system used for applying water to lawns and plants. The irrigation system includes all pumps, controls, piping and sprinkler heads. The irrigation system starts at the valve supplying to the system.
Maximum Growth Height	That limit of dominant vegetative growth, including seed heads or pods.
Mowing	Cutting of all grasses, weeds, and other vegetation that is 1 inch or less in diameter (at ground level).

Section J-1503050
Grounds Maintenance and Landscaping

Attachment J-1503050-01 Definitions and Acronyms	
Definition/Acronym	Description
Operational Areas	Areas driven by operational requirements (e.g., ATPF, BASH, Clear Zone Management, and NAVSEA OP-5).
Parcel	A designated area of land which may be indicated on installation maps or other attachments.
Pesticide	Any substance or mixture of substances, including biological control agents, registered by EPA under FIFRA intended to destroy, repel, or mitigate pests. Includes insecticides, rodenticides, herbicides, fungicides, plant regulators, defoliants, desiccants, disinfectants, anti-fouling paints, and biocides (such as water treatment chemicals). NAVFAC pest management consultants do not approve disinfectants or biocides.
Pruning	The selective removal of unwanted growth to restore a plant or tree to its natural symmetry and appearance. Pruning involves selection and judgment and does not include the practice of cutting off all branches to an even length. This may include re-sculpting, changing the size, or any other form of work that directly affects the look and growth pattern of the plant.
Registered Pesticide	A pesticide registered by EPA for sale and use within the United States.
Rejuvenation	The severe pruning of overgrown bushes, shrubs and hedges to within a few inches of the ground or as directed by the KO to restore the plant to its natural shape.
Rut	Depressions made in soil or grass by tires of vehicles or heavy equipment.
Shrub	A woody perennial plant generally smaller than a tree, usually having many permanent stems branching from or near the ground and does not have a definite crown shape. Shrubs may be deciduous or evergreen, and in the area covered by this contract, may be very large in height and width.
Sightly	Attractive, tasteful, or pleasing to the sight and consistent with its intended purpose.
Special Event	Services that could not reasonably have been anticipated and were not contemplated at time of contract award.
Stump	The bottom portion of a tree, which remains in the ground after the tree, has been cut for removal. Usually less than five feet in height.
Swale	A low-lying or depressed area intended for drainage.
Thatch	A layer of slowly decomposing organic residues situated above the soil surface and constituting the upper stratum of the medium that supports turf grass growth. Usually associated with warm season grasses.
Tree	A perennial woody plant having a permanent self-supporting single stem or multiple stems. Ordinarily grows higher than ten feet, and usually develops branches at some distance above the ground with a definite crown shape.
Trimming	Removal of unwanted vegetation around trees, shrubs, flower and shrub beds, cultivated areas, poles, walls, valves, and other similar objects to match the height and appearance of the surrounding grass. Shrub and hedge trimming includes removal of unwanted vegetation to maintain a uniform, and well-shaped appearance, and to prevent interference with pedestrians, vehicle traffic and building encroachment.
Trunk	The main stem of a tree, usually long, large and relatively straight.
Vegetation	Plant life collectively consisting of grass, weeds, and other greenery (excluding shrubs, hedges, and trees) growing wild or cultivated on lawns, fields, and other areas.
Weed	Plant life growing where it is not wanted.
Xeriscape	A trademark for a method of landscaping that emphasizes water conservation in its use of drought-resistant plants

Attachment J-1503050-04 Pest Group Sheets						
Pest Group Number	Pest Group Name	General Requirements				
023	Aquatic Plant Control	Control aquatic weeds in ditches, ponds, lakes, and other aquatic sites.				
024	Industrial, Sidewalk, Substation, Vault, and Right-Of-Way Weed Control	Provide bare ground weed control in cracks in sidewalks and paved surfaces, at fence line locations, in transformer vaults, around fire hydrants, and other designated locations.				
025	Turf and Ornamental Bed Weed Control	Control weeds in turf areas and in ornamental plant beds.				
PERFORMANCE STANDARDS						
Pest Group Number	Pest Group Name	Time Period to Respond	Time Period to Obtain Control	Time Period to Maintain Control	Level of Control	Notes See Below
023	Aquatic Plant Control	7 days	21 days	60 days	100% control	2, 3, 4
024	Industrial, Sidewalk, Substation, Vault, and Right-Of-Way Weed Control	5 days	14 days	As specified in the SLS	Consult PMC	3
025	Turf and Ornamental Bed Weed Control	7 days	21 days	As specified in the SLS	More than 4 weed plants per ornamental bed or 1600 ft ² of turf are grounds for retreatment of that area at the Contractor's expense.	1, 2, 3
NOTES: - Report conditions conducive to pest infestation to the KO and PAR within one working day following survey. - Post/Notify as required by applicable state/local regulations. - Misapplication to target areas, or drift, runoff or other off-target effects that kill or damage any vegetation shall result in the Contractor replacing that vegetation at no charge to the Government. - Permits may be required to perform this work (i.e., NPDES permit, FWS permit). The Contractor shall obtain all permits and provide a copy to the KO prior to commencing control.

Planned Pest Use Sheets

User Guide for Planned Pesticide Use Sheet

This is the User Guide for completing the Planned Pesticide Use Sheet that contains:

- (1) Instructions for completing the Planned Pesticide Use Sheet
- (2) List of Acceptable Terms
- (3) Planned Pesticide Use Sheet Blank Form

The Planned Pesticide Use Sheet shall be included as part of the Contractor's Work Plan (CWP) for Pest Control. One "Planned Pesticide Use Sheet" shall be filled out for each pesticide to be used. These forms shall be filled out on the on-line pest management reporting system. The regional NAVFAC Pest Management Consultant should be contacted to obtain an account and instructions to use the system. A new Planned Pesticide Use Sheet shall be filled out whenever pesticides used to control a pest are added or changed.

The List of Acceptable Terms shall be used to complete the Planned Pesticide Use Sheet (see Step 3A). Completed Planned Pesticide Use Sheets shall be attached to the CWP.

Instructions for Completing the Planned Pesticide Use Sheet

The following is a list of instructions for filling out each line of information required on the Planned Pesticide Use Sheet:

1. INSTALLATION, UIC - Insert the name and Unit Identification Code for the installation. The UIC is a five-digit number preceded by an "N" for Navy installations and an "M" for Marine Corps installations. The UIC is available from the KO.
2. OBJECTIVE:
 - A. TARGET PEST - The name of the pest or pests identified for control. Select the proper pest or pest category from the List of Acceptable Terms.
 - B. PURPOSE - Explain the major reason(s) for controlling the target pest(s). Refer to the List of Acceptable Terms.
3. PESTICIDE:
 - A. TRADE NAME – Insert the manufacturer's name given to the product, e.g., TermidorTM and MaxforceTM are both trade names for fipronil.
 - B. EPA REGISTRATION NUMBER – Insert the number usually found on the front of the label and on the container.
 - C. FORMULATION – Insert the form that the pesticide is in when ready for use. Refer to the List of Acceptable Terms.
 - D. CONCENTRATION OF ACTIVE INGREDIENT - Insert the percent active ingredient of the pesticide before it is mixed with a diluent. This information should be on the front of the label.
4. APPLICATION:
 - A. SITE – Identify the specific site where the pesticide will be applied. Refer to the List of Acceptable Terms.
5. SENSITIVE AREAS – Identify areas to be avoided or where special caution should be taken. Refer to the "Caution and Warning" statements on the label.
6. REMARKS – Include any additional pertinent information. If a general pest category has been listed under Target Pest, the specific pests should be listed here.
