

Industry Question Responses

(Questions Submitted Before 20 Feb 2026)

Section - Document	Paragraph - Clause	Table / Chart (if App)	Paragraph Verbiage	Question / Comment	Response
AF Plan	3.2			The Award Fee Plan shows Evaluation Period Fourteen as "10 AUG 23 9 FEB 34" (should be "10 AUG 33").	Award fee periods corrected on second draft of RFP
AF Plan	3.4			The document contains conflicting evaluation area weightings: Section 3.4 states: Area A: Management – 40% Area B: Quality of Technical Services – 40% Area C: Cost Control – 20% Annex 3 (Sample Computation) shows: Technical Services – 50% Cost Control – 30% Management – 20% RECOMMENDATION: Correct and standardize weightings across all sections	Award fee percentages corrected on second draft of RFP
AF Plan	3.5			Section 3.5 uses vague standards in the description column, such as: "exceeded almost all of the significant award-fee criteria" "exceeded many of the significant award-fee criteria" "exceeded some of the significant award-fee criteria" What defines "almost all" vs. "many" vs. "some"? What makes criteria "significant"? RECOMMENDATION: Change the description column to indicate the total number of points awarded from the recommended scoring system below.	Award fee updated as part of second draft. Defining language has been included.

AF Plan	3.6			Section 3.6 references "Column 1...Column 2" etc. for evaluation criteria in Annex 2, but Annex 3 shows "Evaluation Point" scores of 100, 90, 80, 60, 40. The plan never explains how Annex 2 Columns map to Annex 3 Evaluation Points. RECOMMENDATION: Separate metric criteria scoring from overall Award Fee Performance rating. Assign a point score for each metric threshold achieved. Then in evaluation, add up all points across the metrics to get a total point count which will then determine the overall Area Rating. For example, Column 5 (Excellent) = 91-100 points Column 4 (Very Good) = 76-90 points Column 3 (Good) = 51-75 points Column 2 (Satisfactory) = 50 points Column 1 (Unsatisfactory) = 0-49 points Include this in Section 3.6 and reference in Annex 2 Update Annex 2 to indicate the number of points achieved for each criterion listed in the column for that Area, for example, under Area A Quality of technical, the "# of reruns to transition a modification into the test environment" is the metric. Then assign a point value to each threshold: >3 reruns is awarded 0 points <=3 is 5 points no more than 2 is awarded 7 points no more than 1 is awarded 9 points 0 reruns is awarded 10 points.	In work as part of the final RFP, annex 2 and award fee plan overall has received significant updates since the initial posting. Recommend reviewing, and if there are still areas that are unclear, please send feedback to the PCO and contract manager.
---------	-----	--	--	--	---

AF Plan	Annex 2 Area A			Technical Services Criteria Use "Per Evaluation Period" Inconsistently Quality of Technical Services criteria state: "More than three unapproved deviations...per evaluation period" = Unsatisfactory "No more than three reruns...per evaluation period" = Satisfactory Problem: This creates a binary threshold cliff (3 vs. 4 deviations) without considering: Severity of deviation Timing (early vs. late in period) Corrective action responsiveness Impact to mission RECOMMENDATION: Add severity weighting: "Minor deviations count as 0.5, Major as 1.0, Critical as 2.0" Incorporate corrective action speed: "Deviations corrected within 5 business days count as 0.5" Add "Critical" deviation category that triggers immediate unsatisfactory regardless of count	In this context, a deviation is a failure to deploy something (hardware, software, network modifications, whatever). Deviations imply a faulted configuration control/quality assurance process. Ranking deviations, as proposed, implies it is acceptable to have a faulted deployment on an operational system for up to five days. For operational systems, all deviations should be treated as critical - as defined by the comment. The award fee plan overall has received significant updates since the initial posting. Recommend reviewing, and if there are still areas that are unclear, please send feedback to the PCO and contract manager.
---------	----------------	--	--	---	---

AF Plan	Annex 2 Area B Cost Control		Cost Control Criteria Penalize Both Over and Under-Runs Equally Annex 2 Cost Control criteria state that "Accurately execute cost type task orders with no task orders above the task order cost and no task orders below 20% of task order's cost" is Excellent performance. Problem: This treats cost overruns (bad) and significant underruns (potentially indicating poor planning or unused capacity) the same. However, underruns ≥20% may indicate: Sandbagging estimates Unused labor/resources Scope not delivered RECOMMENDATION: Separate overrun and underrun thresholds. For example: All Task orders within 90%-100% of estimated cost = 10 points No more than 1 task order over 10% of estimated cost = 5 points Any task order less than 80% of estimated cost without written explanation and reallocation plan= 0 points Update the metric for "Proactively identify cost savings" to reflect: No recommended cost saving improvements proposed = 0 points At least one recommended cost saving improvement proposed = 5 points	The Award Fee Plan (AFP) has been updated and included in the second draft of the RFP. The Government will consider the recommendation regarding cost control criteria and the treatment of cost overruns versus underruns. Any revisions to the AFP cost control metrics will be reflected in the final RFP documentation. The award fee plan overall has received significant updates since the initial posting. Recommend reviewing, and if there are still areas that are unclear, please send feedback to the PCO and contract manager.
AF Plan	General		Can you explain the rationale for using an Award fee structure for the HADES TOs since the previous contract transitioned from award fee to fixed fee? Recommend continuing with fixed fee and providing specific performance measures for CPARS evaluation. This will provide adequate performance motivation with less administrative burden for the Government and Prime contractor.	The Government has determined that a Cost Plus Award Fee (CPAF) structure is appropriate for the HADES Task Orders based on the nature of the work, performance risk, and the need for performance incentives.
DD254	General		Please confirm interest/intent for potential use of contractor SAP and associated connectivity following award.	The Government does not require or intend to utilize contractor Special Access Program (SAP) facilities or associated connectivity for HADES contract performance. All work will be performed at Government facilities or Government-approved locations as specified in the Task Order PWSs. All required facilities, infrastructure, and secure connectivity are identified in the Government Furnished Property (GFP) listing posted in the Bidders' Library. Offerors should not propose contractor SAP facilities or associated costs in their technical or cost proposals.

I	52.216-18 (a)		Such orders may be issued form 07 Feb 2027 thourgh 07 Feb 2033.	This is inconsistent with Section B Ordering periods.	The Government acknowledges the inconsistency and will correct the discrepancy in the final RFP. All sections will be aligned to ensure consistency across the solicitation documents.
F			Ordering Period	Although the ordering period is clearly defined. It does not state the TO POP limitations.	18 months, and will be updated within the contract documentation for clarity.
F				Please confirm Base period of contract as three years	Confirmed, the base period of the contract is three years with four 1-year option periods.
General	Baseline Architecture			To develop a technically sound migration strategy, offerors require insight into the current environment. Will the Government provide current architecture diagrams, hardware inventory, virtualization platforms, and ground software baselines, and any existing cloud enclaves (if any)?	Detailed architecture diagrams, hardware inventory, virtualization platforms, software baselines, and cloud enclave information contain classified and operationally sensitive details that cannot be released in an unclassified solicitation or pre-award environment. The Government Furnished Property (GFP) listing posted in the Bidders' Library provides unclassified information about available Government-provided equipment and infrastructure. Offerors are expected to possess the expertise and experience to propose migration strategies for satellite ground system enclaves based on the requirements defined in the Task Order PWSs and industry best practices. Detailed technical documentation, including classified architecture and system baselines, will be provided to the awarded contractor during the transition period under appropriate security controls. We are considering a generalized architecture overview that may be provided in the final RFP.
General	Bidder's Library			Will the Government establish a Bidder's Library with controlled access to current system documentation, including Ground System Enterprise architecture, existing on-prem hardware configurations, current SD and SAIC-operated software stacks, cyber boundary definitions, and curent ATO artifacts? If so, what is the anticipated timeline for access?	Detailed system documentation, including Ground System Enterprise architecture, hardware configurations, current software stacks, cyber boundary definitions, and ATO artifacts, contain classified and operationally sensitive information that cannot be released in a pre-award environment, including through a controlled Bidder's Library. We are considering a generalized architecture overview that may be provided in the final RFP.

General	Cloud Migration			Are specific cloud migration-focused Task Orders anticipated during the Base Ordering Period? If so, can the Government provide estimated timing and scope characteristics?	The Government has not predetermined specific cloud migration Task Orders or their timing during the Base Ordering Period.
General	Cloud Migration			To what extent is cloud migration expected to be within scope of the initial IDIQ proposal versus deferred to future Task Orders?	The Government has not predetermined specific cloud migration Task Orders or their timing during the Base Ordering Period.
General	CPARS			Will the Government rely solely on CPARS data for past performance evaluation, or are questionnaires anticipated?	Past Performance Questionnaires will be part of the process. As part of the second draft of the RFP, there has been substantial information added regarding past performance evaluation. Please review and send any additional comments or questions to the PCO and contract manager.
General	EDIS Staffing			Will the Government provide current incumbent staffing by LCAT? Will the Government provide current on-site vs remote distribution? Will the Government provide current subcontractor composition?	Notional staffing matrices are provided, and nothing further is anticipated.
General	General			- Are there specific tools, methodologies, or standards the government prefers for systems engineering in the HADES environment?	None that are mandated
General	General			- Can you provide more details on the cloud architecture that has been implemented in the GSE or status of current virtualization initiatives?	No, not at this time based on security requirements of the architecture.
General	General			Can you provide maintenance and upgrade history for the RSC facility, specifically regarding HVAC upgrades and other key infrastructure changes?	Upgrading the HVAC Systems are not in scope of the contract at this time. Scope is currently limited to maintenance and sustainment activities as described in the IDIQ PWS (subject to change).
H			Missing Special Contract Requirements	Will this be added at a TO level?	No H clauses at this time, this section for now is intentionally left blank. However, in the final RFP or if amendments to the RFP are required, there could be special H clause requirements.
I	252.204-7021			DFARS 252.204-7021 - Please confirm the required min CMMC certification level as CMMC Level 2.	Confirmed as level 2 or higher in clause 252.204-7021
I	252.204-7021			DFARS 252.204-7021 - Please confirm the required min CMMC certification level as CMMC Level 2.	Confirmed as level 2 or higher in clause 252.204-7021
I	252.204-7021			What CMMC level is required for HADES?	Confirmed as level 2 or higher in clause 252.204-7021
I	252.204-7021			Regarding Contractor Compliance with the Cybersecurity Maturity Model Certification Level Requirements, will the Government please clarify that CMMC is required for this bid? If so, will the Government confirm Level 2?	Confirmed as level 2 or higher in clause 252.204-7021

I	252.234-7002			Regarding the Earned Value Management System; given the scope of this solicitation and the increased cost for contractors and the Government for implementing and maintaining an Earned Value Management System (EVMS), will the Government consider removing the EVMS requirement?	HADES is and S-CAT II program. Neither FAR Part 37, DoDI 5000.74 (Defense Acquisition of Services) nor AFI 63-138 (Acquisition of Services) levy EVM requirements on service contracts. Additionally, the RDSMO program which HADES falls under is on the Acquisition Master Exempt List. Per AFI 63-101/20-101 (Integrated Life Cycle Management), this program/contract is not considered an ACAT program and is not required to follow DoDI 5000.02 guidance related to the management of acquisition programs. Since the activities are not considered as an ACAT program the EVMS applicability from Circular A-11, FAR 34.201 and DFARS 234.201 is not required. Therefore, EVMS requirements will not be included in the contract. The Government will monitor the contractor's financial performance through a periodic Funds & Labor Hour Report submitted by the prime contractor as a deliverable under a CDRL, the specific CDRL number is still to be determined. EVMS requirements will be removed from this contract in either the second draft of the RFP or in the final RFP.
I	52.216-19			Would the Government consider at least +/- 5% for order limitations given the likely variability of these TOs.	The order limits input in 52.216-19 were decided based on the most probably amounts and then given a significant margin. The government does not anticipate exceeding these limits.
I	52.219-4			Would the Government consider removal of 52.219-4 from the solicitation?	Per FAR 19.1309(b) (b)The contracting officer shall insert the clause at 52.219-4, Notice of Price Evaluation Preference for HUBZone Small Business Concerns, in solicitations and contracts for acquisitions conducted using full and open competition. It is a mandatory use clause. If during the Revolutionary FAR Overhaul, it becomes non-mandatory it may be removed.
I	Award Fee Percentages			Section I indicates the award fee percentages are TBD. When will the award fee percentages be defined for CLIN 0001 and 0005 series?	Award fee percentage for the pool is 8%
I	Contract Clauses			Section I states the contract maximum is \$300M and minimum is \$3M Can the Government provide an estimated funding profile by ordering period (Base and Options) to assist offerors in developing a realistic staffing and cost phasing approach?	At this time, no, the government is not able to provide that information.
I	General			FAR 52.216-1 states that the Government contemplates a cost plus fixed fee contract resulting for this solicitation. However Section I of the draft solicitation indicates a cost plus award fee contract. Will the Government clarify the contract type?	This will be updated in the second draft of the RFP or the final RFP.

I				Please confirm its not the government intent to use EVMS per DFAR 252.234.7002 Is appilcable. Recommend this is not in alignment with HADES objectives and can be achieved with other effective and less costly program management measures.	HADES is and S-CAT II program. Neither FAR Part 37, DoDI 5000.74 (Defense Acquisition of Services) nor AFI 63-138 (Acquisition of Services) levy EVM requirements on service contracts. Additionally, the RDSMO program which HADES falls under is on the Acquisition Master Exempt List. Per AFI 63-101/20-101 (Integrated Life Cycle Management), this program/contract is not considered an ACAT program and is not required to follow DoDI 5000.02 guidance related to the management of acquisition programs. Since the activities are not considered as an ACAT program the EVMS applicability from Circular A-11, FAR 34.201 and DFARS 234.201 is not required. Therefore, EVMS requirements will not be included in the contract. The Government will monitor the contractor's financial performance through a periodic Funds & Labor Hour Report submitted by the prime contractor as a deliverable under a CDRL, the specific CDRL number is still to be determined. EVMS requirements will be removed from this contract in either the second draft of the RFP or in the final RFP.
J	4		For modifications to existing TOs...."If proposal preparation is authorized, costs shall not be subject to award fee."	How will it be authorized? What is defined as proposal prep costs? Beyond labor, does it include travel, material, or ODCs?	Section J ordering instructions will be updated to clarify in the final RFP. The intention is to not have proposal prep for every modification, but only in certain circumstances to be clarified.
J	4		...approved by the appropriate designee...	Please define "appropriate designee".	The CO, change to CO in doc
J	Ordering Instructions			Page 2 of Section J states that if the Government does not issue a Core Sustainment and Management Task Order for an ordering period, subsequent ordering periods are null and void. Can the Government clarify whether the Core Sustainment TO will be awarded at time of IDIQ award? Can the Government clarify whether evaluation of IDIQ proposals assumes award of an initial Core Sustainment TO?	Langauge has been updated in Ordering instructions to clarify "If the Government does not issue a task order for an ordering period, all subsequent ordering periods are null and void." Core sustainment TO langauge has been removed.
K	252.204-707 (d) (2)		The following reps & certs...(CO check as appropriate)	Nothing is checked. Was that intentional or will this be included in the final RFP?	In work as part of the second draft, and will be updated in either the second draft or final RFP.
L	2.2	2.1	Staffing matrices	Would the Government consider increasing the page limit for Staffing requirements?	Page limitations shall be treated as maximums. Staffing Profiles are limited to 15 pages, per the table.
L	4			If Past Performance references are being considered for an additional Evluation Factor, please allow the 'aggregate' treatment of all references combined (vice individually) in achieving similar value, scope, and complexity similar to HADES.	Please see the updated past performance section in L&M. If there are still questions or comments, please submit the PCO and contract manager.

L	4			If Past Performance references are being considered for an additional Evaluation Factor, please allow the use of non-prime/subcontractor references where the HADES Prime or its teammates have relevant non-prime performance references.	Please see the updated past performance section in L&M. If there are still questions or comments, please submit the PCO and contract manager.
L	4			If Past Performance references are being considered for an additional Evaluation Factor, please allow the use of Teammate references where a teammate to a HADES prime is providing at least 10% of the labor effort.	Please see the updated past performance section in L&M. If there are still questions or comments, please submit the PCO and contract manager.
L	4			If Past Performance references are being considered for an additional Evaluation Factor, please confirm the highest level of classification the government could accept for classified past performance references. Many relevant National Space Domain programs are classified.	BOE's will be provided to the technical evaluation team to help determine reasonableness.
L	4			Recommend that BOEs from Cost Volume be included with the Technical Volume too, so that they can be accessible to Technical/Staffing plan evaluators to review justifications for proposed staffing levels for realism and risks of staffing profiles in alignment with the technical approach	BOE's will be provided to the technical evaluation team to help determine reasonableness.
L	4.2			Can the Government define and/or provide figure 4.1 for the stacked area chart called out as part of Subfactor 2?	Stacked area charts are removed and references to figure 4.1 and 4.2 will be removed from section L and M, as applicable.
L	4.2		The Contractor defines the CWBS, to a minimum of the third level, using the level one PWS Breakdown Structure as follows: Systems Engineering Engineering Development Integration Sustainment Cybersecurity Program Management	The identified level 1 CWBS structure does not align to the IDIQ PWS cleanly. Would the government consider using the PWS X.X level as the Level 1 CWBS? ---- This will help to ensure all PWS requirements are cleanly mapped to one BOE for each Task Order	The Government is considering this recommendation for the final RFP.
L	5.2		References Appendix A	Appendix A is not included or clearly marked. Can the Government please clarify the location and content of Appendix A?	In work as part of the final RFP or next draft

L	6	May offerors rely on a subcontractor's past performance to meet any relevancy requirements? If so, what are the expected requirements?	Regarding Past Performance - May offerors rely on a subcontractor's past performance to meet any relevancy requirements? If so, what are the expected requirements?	Yes, offerors may rely on subcontractor past performance to demonstrate relevancy, provided the subcontractor is proposed to perform critical aspects of the effort as defined in Section L, paragraph 6.1. Offerors must clearly demonstrate in Volume IV how the subcontractor's past performance is relevant to the specific work the subcontractor will perform under this IDIQ.
---	---	--	---	--

L	6			Regarding Past Performance - At this time, Section L does not clearly define the number of past performance references required or allowed, recency requirements, dollar value thresholds, and relevancy criteria weighting. Can the Government please clarify these parameters with the next draft RFP iteration? If so, what is the anticipated timeline for this past performance requirement to be clarified?	Recency Requirements: Per Section L, paragraph 6.3, relevant past or present performance must have a performance period completion within five (5) years of the RFP release date. This means contracts that were completed or are currently active anytime within the 5 years prior to RFP release are eligible. The 5-year lookback period aligns with FAR 15.305(a)(2)(iv) guidance and ensures evaluated performance reflects current capabilities while providing offerors a sufficient pool of relevant contracts to demonstrate their qualifications. Number of References: Section L, paragraph 6.3.1 currently states the prime offeror may submit a maximum of 5 recent contracts. The Government will clarify in the next iteration the specific number of references allowed for subcontractors and teaming partners (recommend 2-3 per major subcontractor). Dollar Value Thresholds: The Government will add minimum contract value thresholds in the next iteration to ensure substantive and relevant contract examples are provided. Relevancy Criteria Weighting: The Government will ensure alignment between Section L requirements and Section M evaluation criteria, clearly defining how Very Relevant, Relevant, and Somewhat Relevant ratings will be weighted in the overall past performance confidence assessment.
L	6			When will the Government provide directions on the Past Performance Volume? (Volume IV, Past Performance)	Past Performance Volume (Volume IV) instructions are already provided in the second RFP draft

L	7.2		"Offeror should instruct its subcontractors to submit their total compensation plan directly to the contracting officer."	Can the Government please provide instructions for Subcontractor's submission? Request encrypted email or password protected files directly to CO.	Subcontractor cost or pricing data supporting the prime offeror's proposal shall be submitted through the prime offeror, not directly to the Government. The prime offeror is responsible for collecting, consolidating, and submitting all subcontractor information as part of their complete proposal submission. All proposal volumes, including subcontractor supporting data, shall be submitted via the method specified in Section L 3.0 (Proposal Submission Instructions). If the Government requires direct subcontractor submissions for any reason, specific submission instructions will be provided at that time. For secure file transfer, the Government utilizes DoD SAFE (https://safe.apps.mil), which requires CAC authentication. Subcontractors without CAC access should coordinate with the prime offeror to facilitate secure submission or contact the Contracting Officer for alternative secure submission arrangements if direct submission is required.
L	7.2			Professional Employee Compensation Plan requirements refer to a major sub as having a min of 40 FTEs. Please clarify this requirement given the total FTE of all Task orders is 42.5. Recommend all subs be required to provide a PECP to ensure realistic compensation in alignment with bid rates.	Do not intend to change language. Language is in line with FAR requirements

L	2(a)		"The Offeror's proposal must include all data and information requested by this ITO and must be submitted in accordance with these instructions. The offer shall be compliant with the requirements as stated in the basic contract Performance Work Statement (PWS) and Task Order (TO) PWS, and Model Contract. Non-conformance with the instructions provided in this ITO may result in an unfavorable proposal evaluation"	We need to know if or response needs to address all PWS requirements, and if not, which specific tasks need to be addressed and are they tied to specific Subfactors for evaluation? Please clarify the expected PWS elements X.X.X to be addressed and evaluated under Subfactor 1 and Subfactor 2 so compliance can clearly be determined and approaches address all aspects of interest to evaluation.	The expected PWS's to be addressed and evaluated are the three Task Order's attached to the draft RFP.
L	2.1.4		"The Bidders' Library, including some RFP attachments, such as the GFP listing, is posted on SAM.gov."	Can the Government provide an estimate for when the GFP listing will be made available on SAM.gov.?	The GFP list will be available with the final RFP, potentially with the second draft RFP.
L	2.1.4			Section L states "The Bidders' Library, including some RFP attachments, such as the GFP listing, is posted on SAM.gov." When will the GFP listing be posted to SAM.gov?	The GFP list will be available with the final RFP, potentially with the second draft RFP.
L	2.1.4			Will the Government post information regarding current business systems for EDIS to the Bidders Library?	Information on EDIS business systems will not be added to the Bidder's Library at this time.
L	2.2.1.1	Table 2.1 Page 7	II 4.0 Technical See Below 4.3 Technical Volume Narrative 45 4.3.2.1 Staffing Matrices/Labor Profile 15 4.3.2.4 Transition Plan 5 4.3.1 Vol II, Attachment 1, Cross-Reference Matrix Unlimited 4.2 Vol II, Contractor Work Breakdown Structure (CWBS) Unlimited	Please clarify page count total for Technical Volume 4.3 is 65 pages. In other words, please confirm the 45 pages are in addition to the 15 and 5 pages for Staffing Matrices/Labor Profile and Transition Plan for a total of 65 pages.	Offerors may submit up to 45 pages of technical narrative addressing Program Management and Systems Engineering responses (excluding staffing and transition content), plus an additional 15 pages for all staffing matrices, labor profiles, stacked area charts, and key personnel qualifications, plus an additional 5 pages for the transition plan. This is a total of a maximum of 65 pages for Volume II narrative content.

L	2.2.1.1			Does the 45 page Technical narrative include the 15 page staffing matrices and 5 page transition plan or is it in addition to?	Offerors may submit up to 45 pages of technical narrative addressing Program Management and Systems Engineering responses (excluding staffing and transition content), plus an additional 15 pages for all staffing matrices, labor profiles, stacked area charts, and key personnel qualifications, plus an additional 5 pages for the transition plan. This is a total of a maximum of 65 pages for Volume II narrative content.
L	2.2.1.1			Regarding Page Limits - Table 2.1 of Section L states a 45-page limit for the Technical Volume Narrative; however, it is unclear whether the "Staffing Matrices/Labor Profile" volume and "Transition Plan" volume page limits count against the overall Technical Volume Narrative's 45-page limit or if they are in addition to it. Can the Government clarify whether the Staffing Matrices and Transition Plan are included in the 45-page limit and whether resumes (if required) count toward page limits?	Offerors may submit up to 45 pages of technical narrative addressing Program Management and Systems Engineering responses (excluding staffing and transition content), plus an additional 15 pages for all staffing matrices, labor profiles, stacked area charts, and key personnel qualifications, plus an additional 5 pages for the transition plan. This is a total of a maximum of 65 pages for Volume II narrative content.
L	2.2.1.1	2.1	Technical Narrative is listed as 45 pages, Staffing 15 pages, Transition Plan 5 pages.	Can the Government please clarify if the 45 pages is inclusive of the Staffing 15pgs and Transition Plan 5pgs (totaling 45pgs)? Or is the 45pgs given to cover the Subfactors' requirements detailed in paragraphs 4.3.1-4.3.2 (Systems Engineering, Program Mgmt's Personnel Security, Emerging Req'mts, Small Business compliance demonstration)?	Offerors may submit up to 45 pages of technical narrative addressing Program Management and Systems Engineering responses (excluding staffing and transition content), plus an additional 15 pages for all staffing matrices, labor profiles, stacked area charts, and key personnel qualifications, plus an additional 5 pages for the transition plan. This is a total of a maximum of 65 pages for Volume II narrative content.
L	2.2.1.2		List of Figures and List of Tables are not listed.	Can the Government please confirm the List of Figures and List of Tables are excluded from page count in all volumes?	Offerors may submit up to 45 pages of technical narrative addressing Program Management and Systems Engineering responses (excluding staffing and transition content), plus an additional 15 pages for all staffing matrices, labor profiles, stacked area charts, and key personnel qualifications, plus an additional 5 pages for the transition plan. This is a total of a maximum of 65 pages for Volume II narrative content.

L	2.2.3.1		"text size no less than 12-point Times New Roman"	Could the Government confirm that Headers/Footers font size can be smaller than 12 point? Would the Government consider 10point font for headers/footers?	Headers and footers containing administrative information such as page numbers, volume titles, company names, proprietary markings, and similar identifying information may use 10-point Times New Roman font. This exception applies only to headers and footers and does not extend to any proposal content, including footnotes, captions, or text within tables, charts, graphs, or figures, which must comply with the font size requirements specified in Section L, paragraphs 2.2.3.1 and 2.2.3.2.
L	2.2.3.1		"...text size no less than 12-point Times New Roman."	Will the Government approve 10-point. Times New Roman is acceptable in headers/footers, captions, and classification markings?	Headers and footers containing administrative information such as page numbers, volume titles, company names, proprietary markings, and similar identifying information may use 10-point Times New Roman font. This exception applies only to headers and footers and does not extend to any proposal content, including footnotes, captions, or text within tables, charts, graphs, or figures, which must comply with the font size requirements specified in Section L, paragraphs 2.2.3.1 and 2.2.3.2.
L	2.2.3.2			Would the Government consider 8-pt font for Figure, Tables, Charts, and Graphs?	Headers and footers containing administrative information such as page numbers, volume titles, company names, proprietary markings, and similar identifying information may use 10-point Times New Roman font. This exception applies only to headers and footers and does not extend to any proposal content, including footnotes, captions, or text within tables, charts, graphs, or figures, which must comply with the font size requirements specified in Section L, paragraphs 2.2.3.1 and 2.2.3.2.
L	2.3.1			Would the Government consider allowing 5 pages for the classified Key given 4.3.1.2 requires offerors to provide applied SE experience and Section M 4.3.1.2 states we need to demonstrate experience and expertise in applying our SE approach to the Nation Space Enterprise software intensive systems which are often classified, especially for Intelligence Community programs?	Will be updated, no classified will accepted.

L	2.3.2			Shouldn't Volume IV be Volume V as Volume IV is Past Performance and Volume V is the contracts volume?	Yes, language should be updated in second draft
L	2.3.3		List of Figures and List of Tables are not listed.	Can the Government please confirm the List of Figures and List of Tables are excluded from page count in all volumes?	Yes, the Government confirms that List of Figures and List of Tables are excluded from page count limitations in all volumes. Per Section L, paragraph 2.2.1.2, page limitations shall be treated as maximums, and each page shall be counted except title pages, dividers, Tables of Contents, and other pages having no proposal content and marked as such. List of Figures and List of Tables fall into the same category as Tables of Contents as organizational aids to the evaluator and do not contain proposal content. Therefore, List of Figures and List of Tables, when clearly identified and separated from narrative content, do not count against the page limitations for their respective volumes.
L	2.3.6.1			Can the Government confirm the intent of the technical volume to be broken into separate files based upon subfactors as defined in this paragraph?	Yes, the Government confirms that the intent is for the Technical Volume to be organized into separate electronic files based on subfactors to facilitate efficient evaluation. Per Section L, paragraph 2.3.6.1, the offeror shall provide digital copies via DoD Safe and shall use separate files to permit rapid location of all portions, including subfactors, exhibits, annexes, and attachments.
L	2.3.6.1		2.3.6.1 "The Offeror shall provide digital copies of their proposal. For electronic copies, indicate on each DVD/CD the volume..." 2.4 "Proposals shall be addressed to the PCO and electronically delivered" and "If hand-delivering digital copies..."	Please confirm Offerors have the choice to deliver either electronically (via email) or hand delivering digital DVD/CD copies?	Electronic only. References to DVD/CD will be removed.
L	2.3.6.1			Will the Government confirm if physical CD/DVDs are required for submission? If so, how many copies is the Government requesting?	Electronic only. References to DVD/CD will be removed.

L	252.204-7025 / (b)(1)		The CMMC level required by this solicitation is: _____ (CO inserts)	(b)(1) CMMC level not completed by PCO. Was this intentional or will this be included in the final RFP?	Will be updated to Level 2
L	4.3.1	4.1, 4.2		Can you provide more details on the government's expectations for the staffing matrix and labor profile, particularly for time-phased labor allocations?	Please reference section L, 4.3.1.1, Staffing Matrices/Labor Profile (and corresponding section M as noted) for additional details. In particular, utilize the tables provided and descriptions therein.
L	4.3.1.1			Can the Government please provide the Section L Appendices D through H?	Appendices D-H corresponded to the TO's in the original structure of the RFP. This will be updated in the final RFP.
L	4.3.2.1			The three Task Orders seem to account for task-order specific labor. Where should bidders propose labor for IDIQ level program labor associated with the program management aspects of the HADEs program? Perhaps a Program Management or similar overarching TO would be appropriate for capturing cross-task program leadership and administrative labor? If this is the Core Sustainment and Management TO, would the Government provide a sample similar to the other 3?	The government is reviewing this question and determining if IDIQ level program labor should be proposed as part of the three TOs and subsequent TOs or if should be a stand along TO. Updated guidance will be released with the final RFP.
L	4.3.2.1.1			Regarding Staffing Matrix - Will the Government require, or accept, named personnel within the staffing matrix? Does the Government anticipate listing required Key Personnel (KP)? (a) If not, will the Government accept the offeror's identified Key Personnel? (b) If so, will the KPs be identified at the IDIQ level or TO level? Will the KP LCATs be identified in the draft RFP? Will the Government require, or accept, resumes for KPs?	See section L, section 4.3.1.1.3, updated Key Personnel. Identify the qualifications the offeror is proposing for the key personnel positions below: •Program Manager •Deputy Program Manager •Chief Engineer •Cybersecurity Lead These positions shall be filled and maintained at the qualification levels as proposed to ensure continuous and qualified management and technical execution. Resumes are not required, however if a resume is submitted, the name of the individual shall be removed.
L	4.3.2.1.2	Figure 1		Will the Government please provide "Figure 1" referenced in the requirement?	Figures 4.1 and 4.2, and references therein, shall be removed in the next draft.
L	4.3.2.1.2	Figure 2		Will the Government please provide "Figure 2" referenced in the requirement?	Figures 4.1 and 4.2, and references therein, shall be removed in the next draft.
L	4.3.2.1.2		References Figure 4.1 & Figure 4.2, but there are no figures included in file.	Could the Government please provide Figures 4.1 & 4.2?	Figures 4.1 and 4.2, and references therein, shall be removed in the next draft.

L	4.3.2.2			Personnel Security requirement instructions do not align to the Sec M 4.3.2.2 evaluation criteria. Recommend Section L 4.3.2.2 be amended to reflect the criteria in Sec M.	The government considers these sections are aligned. However, after this second draft of the RFP is released, and there are still questions or concerns please submit to the PCO and contract manager.
L	4.3.2.4			Regarding Transition - CLIN 0008 has been identified as Firm Fixed Price for Transition. Will the Government clarify whether transition applies only to the initial IDIQ contract award or to each TO? Will the transition include data migration, knowledge transfer, staffing ramp, and hardware turnover? What is the expected transition period duration?	Per Section M, paragraph 4.3.1.4, the Government will evaluate whether "The Offeror demonstrates an effective approach to assume contract responsibilities at the end of the transition period." Offerors shall address transition requirements in their Technical Volume per Section L, paragraph 4.3.1.4, providing a transition plan (5-page limit) that describes their approach, including risks and risk mitigation plans, to accomplish an effective transition and assume full responsibility within the 90-day period. The approach should encompass the overall IDIQ as well as the initial Task Orders.
L	4.3.2.5			Section L states a 25% Small Business requirement. Can the Government clarify if the 25% requirement is an aggregate Small Business target only or if it will be further allocated across socioeconomic categories (e.g., WOSB, 8(a), HUBZone, SDVOSB, etc.)?	The 25% is an aggregate small business target for evaluation purposes, but offerors must still establish and commit to individual socioeconomic category goals within their Small Business Subcontracting Plan as required by FAR 52.219-9. However, due to current uncertainty and pending clarifications from the SBA, offerors should expect to see updated and clarified guidance in the final RFP.
L	4.3.2.6			Will the 25% SB participation requirement be evaluated/enforced at the IDIQ contract level or at each individual Task Order level?	Per Section M, paragraph 4.3.1.5, "The percentage requirement will be assessed at the overall contract level." Additionally, Section L, paragraph 4.3.1.5 states: "The percentage shall be calculated on an annual basis by dividing total small business expenditures by total labor costs/prices on all TOs on just those labor CLINs."
L	5.1.1		table 5.1	In Attachment CP5 to Volume III: Prime/SubContractor Labor Hour Basis of Estimate (BOE) by TO/CLIN/CWBS, Version 1: Pricing applied - For Version 1 of the BOE, is the Government requesting that all labor costs, including fee, are shown, or would the Government like this pricing shown without fee?	Version 1 of Attachment CP5 should present the complete pricing picture that ties directly to the Cost Element Summaries (Section L, paragraph 5.3.2, Tables 5.3 and 5.4) and enables the Government to trace labor hours and associated costs from the CWBS through to the total proposed price. Version 2 (Pricing Redacted) should show the same structure but with all dollar values and rates removed, showing only labor hours, labor categories, and task descriptions to facilitate technical evaluation without cost/price visibility.

L	5.2.1	5.2.1 Time-Phased, Person-Loading Graph. The Offeror shall provide a time-phased, person-loading bar graph – one for each Cost Plus Award Fee (CPAF) CLIN. The vertical axis shall be in hours. The horizontal axis shall be in quarters. The bars will be layered – bottom for prime hours and each stack on top will be for each non-prime with at least 10% of the proposed dollars for each TO.	Can the Government provide more explanation on the statement "each stack on top will be for each non-prime with at least 10%". Specifically, where to the hours go if a non-prime is below 10%. E.g. if one of our subs is at 8%, they won't be in the layer so should their hours be associated with the prime at that time?	Yes, if a subcontractor represents less than 10% of the Task Order dollars, their hours should be included in an aggregated layer, NOT attributed to the prime contractor's layer. The intent of Section L, paragraph 5.2.1 is to provide the Government visibility into the distribution of labor across the prime and major subcontractors while maintaining graph readability. The "at least 10%" threshold identifies which subcontractors are significant enough to warrant individual visibility in the stacked bar graph.
L	5.2.1	The bars will be layered – bottom for prime hours and each stack on top will be for each non-prime with at least 10% of the proposed dollars for each TO.	Please confirm that non-prime with less than 10% of the proposed dollars for each TO will be classified under the Prime bar	Yes
L	5.2.2		Paragraph 5.2.2 also calls for only non-prime companies greater than 10%, therefore, if we have companies less than 10% then the totals won't equal 100%, is that correct?	Yes, if a subcontractor represents less than 10% of the Task Order dollars, their hours should be included in an aggregated layer, NOT attributed to the prime contractor's layer. The intent of Section L, paragraph 5.2.1 is to provide the Government visibility into the distribution of labor across the prime and major subcontractors while maintaining graph readability. The "at least 10%" threshold identifies which subcontractors are significant enough to warrant individual visibility in the stacked bar graph.

L	5.2.2		Table 5.2, The Offeror shall complete Table 5.2 below for each TO, listing all companies – prime, subcontractors, and team members – who will be involved with the performance and management of the contract within the five TOs. (Prime Plus Non-Prime Companies greater than 10% of total proposed dollars for each TO).	Please clarify if non-prime companies with less than 10% of the total proposed dollars for each TO should be listed in Table 5.	Yes, if a subcontractor represents less than 10% of the Task Order dollars, their hours should be included in an aggregated layer, NOT attributed to the prime contractor's layer. The intent of Section L, paragraph 5.2.1 is to provide the Government visibility into the distribution of labor across the prime and major subcontractors while maintaining graph readability. The "at least 10%" threshold identifies which subcontractors are significant enough to warrant individual visibility in the stacked bar graph.
L	5.2.2			Should the five TOs be three TOs as defined elsewhere in the RFP?	Section 5.2.2 has been updated, the Government is utilizing the three TO's tied to the draft RFP.
L	5.2.2		The Offeror shall complete Table 5.2 below for each TO, listing all companies – prime, subcontractors, and team members – who will be involved with the performance and management of the contract within the five TOs.	The instructions mention five TOs. Please confirm that it should be three TOs	Section 5.2.2 has been updated, the Government is utilizing the three TO's tied to the draft RFP.
L	5.2.2		The Offeror shall complete Table 5.2 below for each TO, listing all companies – prime, subcontractors, and team members – who will be involved with the performance and management of the contract within the five TOs.	There are only three TOs included with the Draft RFP. Will the Government update this instruction to reference three Task Orders rather than five?	Section 5.2.2 has been updated, the Government is utilizing the three TO's tied to the draft RFP.
L	5.3.1		References Appendix A	Appendix A is not included or clearly marked. Can the Government please clarify the location and content of Appendix A?	In work as part of the final RFP

L	5.3.1		The Offeror shall complete and submit Section L Appendix A below, in calculating the Offeror's TPP. The Offeror shall comply with the parameters in Appendix A and this paragraph in submitting the proposal amounts. Base Fee: No base fee is allowed.	Can the Government please provide Appendix A?	In work as part of the final RFP
L	5.3.1		Base Fee: No base fee is allowed	Per DFARS 216.405-2(2), Award-fee payments other than payments resulting from the evaluation at the end of an award-fee period are prohibited. (This prohibition does not apply to base-fee payments.) It is our interpretation that the RFP section L.5.3.1 restriction on base fee would not allow the prime contractor to be paid any portion of fee for 6 months or longer and would cause undue financial hardship on a business. May offerors propose base fee plus award fee? This structure would allow businesses to collect a nominal fee during the period of performance while still complying with the DFARS regulation.	The Government does not intend to amend Section L 5.3.1 to allow base fee at this time, but will take it under consideration.
L	5.3.1		The Offeror shall comply with the parameters in Appendix A and this paragraph in submitting the proposal amounts.	Section 5.4.4 includes instructions for Appendix B and C but does not include instructions for Appendix A. Will the Government provide specific instructions for Appendix A (Total Proposed Price)?	Yes, the Government will provide specific instructions for Appendix A (Total Proposed Price) in the final RFP . Section L, paragraph 5.3.1 references Appendix A for calculating the Offeror's Total Proposed Price (TPP), but detailed completion instructions were inadvertently omitted. All Task Orders and CLINs - List each TO (Transition, Ground Control, JAGUAR, Ground Support) with all associated CLINs (base period and all options)
L	5.3.2		Printed copies shall be submitted in Section 2 to the Cost/Price Volume.	Will the Government confirm that no printed material will be required?	Updated in second draft. No printed material is required.
L	5.3.2		Cost Element Summaries are not required for Firm-Fixed Price (FFP) CLINs	Where should the FFP transition pricing be detailed within the cost exhibits?	The Government will clarify FFP CLIN documentation requirements, including transition pricing, in the final RFP

L	5.4.4		The Offeror shall complete Section L Appendix B and Appendix C with the Offeror's proposed labor categories and the corresponding CPAF/FFP rates for each offeror's accounting year following the instructions outlined within this section.	Are the LCATs provided in Appendix B for contract performance only, to exclude transition (FFP)?	No, the labor categories (LCATs) provided in Section L Appendix B are for all contract performance, including transition. All labor categories anticipated for use anywhere in the contract—including transition, all Task Orders, base periods, options, and future TOs—should be included in Appendix B with both CPAF and FFP rates. Do not create separate rate structures or labor category lists for transition versus ongoing performance.
L	5.4.4		The Offeror shall complete Section L Appendix B and Appendix C with the Offeror's proposed labor categories and the corresponding CPAF/FFP rates for each offeror's accounting year following the instructions outlined within this section.	Can the Government provide templates for Appendix B and Appendix C?	The Government anticipates releasing Appendix B and C templates with the final RFP. Offerors are encouraged to wait for the official templates before finalizing these appendices to ensure compliance with Government formatting requirements.
L	5.4.4		The Offeror shall comply with the parameters in Appendix A and this paragraph in submitting the proposal amounts.	Section 5.4.4 includes instructions for Appendix B and C but does not include instructions for Appendix A. Will the Government provide specific instructions for Appendix A (Total Proposed Price)? Note: This appears to be a mirror question	Yes, the Government will provide specific instructions for Appendix A (Total Proposed Price) in the final RFP .
L	5.4.4.1		For the Award Fee Table, identify the Offeror's proposed Award Fee percent for each Basic IDIQ CLIN identified in Column (A).	Are these instructions to include the award fee percentage in Column G?	The Government will clarify this structure in the Appendix C template to be released with the final RFP. No, the award fee percentage is NOT included in Column G of the Labor Rate Cost Element Summary Tables (Appendix C).
L	5.4.4.2		For the Award Fee Table, identify the Offeror's proposed Award Fee percent for each Basic IDIQ CLIN identified in Column (A).	Are these instructions to include the award fee percentage in Column K?	No, there is no Column K in the Appendix C Labor Rate Cost Element Summary Tables as currently described in Section L 5.4.4.2.

L	5.4.6		For TOs that propose travel costs, the Offeror shall identify need for, location, and duration of proposed travel as well as the number of trips and personnel by labor category.	Travel costs can vary significantly based on assumptions and incumbent knowledge. To ensure price comparability across offerors, will the Government provide plug numbers/values?	The Government will provide standardized values for travel costs. However, Offerors are expected to understand travel requirements based on their understanding of the contract requirements, their proposed technical approach, and reasonable assumptions about travel needs to perform the work described in the Task Order PWSs.
L	5.4.7		For TOs that propose ODCs, the Offeror shall provide a Table with each ODC item, explain the ODC item, need, basis of estimate, estimating rationale, and calculations resulting in the proposed amount.	Similar to travel costs, ODC can vary significantly based on assumptions and incumbent knowledge. To ensure price comparability across offerors, will the Government provide plug numbers/values?	The Government expects offerors to exercise professional judgment in estimating ODC costs based on their proposed technical solution, GFP availability, and documented assumptions. Standardized plug numbers would undermine the competitive process, prevent evaluation of cost-effective innovations, and artificially constrain technical approaches.
L	52.216-1			FAR 52.216-1 states that the Government contemplates a cost plus fixed fee contract resulting for this solicitation. However Section I of the draft solicitation indicates a cost plus award fee contract. Will the Government clarify the contract type?	The Government confirms that the contract type for this acquisition is Cost Plus Award Fee (CPAF), not Cost Plus Fixed Fee (CPFF).

L	7.1.2		Offerors shall complete pricing information in Appendix A-C of Section L.	Appendix B, C instructions are included in the dRFP but do not see Appendix A. Please verify that Appendix A will be included in the Final RFP.	Yes, the Government confirms that Appendix A (Total Proposed Price) will be included in the Final RFP.
L	7.1.6.3			Will the Government please confirm that a Small Business Offeror is not required to submit a Small Business Subcontracting Plan.	Yes, the Government confirms that a Small Business Offeror is NOT required to submit a Small Business Subcontracting Plan. Per FAR 19.702(a), small business concerns are exempt from the requirement to submit a small business subcontracting plan
L	7.1.6.5			Instructions require inclusion of ACAs with the proposal Volume V, Contract Documentation; Please confirm this to be a draft of the ACA offerors intend to present and negotiate with incumbent SSC/SYD89/SD contractors following award.	Yes, that is correct.

L	7.2.a			The solicitation requires offerors to "Provide the corresponding unburdened salary and quantified fringe benefits (e.g., a compensation, in addition to an employee's regular wage and salary that includes vacation, sick leave, holidays, employee insurance) for each labor category." Is a fringe pool breakdown by cost element along with the calculation of the fringe benefit rate sufficient?	No, a fringe pool breakdown with the fringe benefit rate calculation alone is not sufficient to meet the Professional Employee Compensation Plan requirements in Section L 7.2. What Section L 7.2 Requires: The Professional Employee Compensation Plan must provide: "The planned compensation for all professional employee labor categories proposed to perform the effort... Provide the corresponding unburdened salary and quantified fringe benefits (e.g., a compensation, in addition to an employee's regular wage and salary that includes vacation, sick leave, holidays, employee insurance) for each labor category." "Quantified fringe benefits" means the Government needs to see the actual dollar value or specific benefit details for each component, not just a pooled percentage rate.
L	7.2.b			Does the Government define "recent" surveys and studies as data from the past 12, 24, or 36 months?	The Government defines "recent" surveys and studies as data published or collected within the past 24 months (2 years) from the date of proposal submission.
L	7.3.5		"...completed OCI Mitigation plan Checklist (Appendix I)..."	Appendix I is not included. Can the Government please provide Appendix I - OCI Mitigation Plan Checklist?	Yes, the Government will provide Appendix I (OCI Mitigation Plan Checklist) in the final RFP.
L	7.3.5			In regards to Potential Organizational Conflict of Interest (OCI) - Section L 7.3.5 states that the most current version of SMC's OCI Mitigation Plan Checklist is provided as an attachment to this solicitation. When will the Government provide Appendix I OCI Mitigation Plan Checklist?	Yes, the Government will provide Appendix I (OCI Mitigation Plan Checklist) in the final RFP.

L	7.3.5			Regarding the AAFARS OCI clause compliance - Will the AAFARS compliance clauses be updated from AAFARS 5352.209-9001, OCI, Alt III, IV, & VI (Oct. 2010) to the currently applicable clauses at AAFRS 5352.209.9000, OCI, Alt. III, IV, & VI (July 2023)? Please confirm which Alt sections will apply to the OCI Plan.	Yes, the Government confirms that the OCI clauses will be updated to the current DAFFARS clauses dated July 2023
L	7.3.5		The Offeror shall submit an OCI Mitigation Plan in compliance with AFFARS 5352.209-9001 ALT III,VI, &VI (Oct 2010), AFFARS 5352.209-9001 (Oct 2010) as well as the completed OCI Mitigation plan Checklist (Appendix I); the plan shall address OCI for the prime contractor and subcontractor EDIS providers	We did not see an OCI Checklist, Appendix I released in the dRFP. Will this be provided in the final RFP?	Yes, the Government will provide Appendix I (OCI Mitigation Plan Checklist) in the final RFP.
M	1.1			Recommend the following language be included to provide clarity on the Governments intent in making an award on a best value basis focused on highest technical quality rated proposals and discouraging bid behaviors that would reward lowest probable cost/price that does not align with that technical quality: "The Government's objective is to obtain the highest technical quality proposal that meets or exceeds the requirements, at a fair and reasonable price. Proposals which are unrealistic in terms of technical, schedule, commitments, and/or unrealistically low cost may be deemed reflective of an inherent lack of technical competence, or indicative of a failure to comprehend the complexity and risks of the proposed work, and may be grounds for rejection of the proposal."	We are considering your recommendation for the final RFP.

M	1.3		"If the Government enters into discussions, the Government reserves the right to not go into discussion on the scenario response to the Subfactor 2 Program Management, Section 4.3.2.3 - Emerging Requirements Criteria."	Neither Section M 4.3.2.3 nor Section L 4.3.2.3 provide instructions or evaluation criteria for a scenario response. Would the Government please provide clarity for this?	No scenario response is in the next draft, and language has been updated in Sections L and M.
M	4.3			Can the Government please provide a mapping of the PWS elements to Subfactor 1 and Subfactor 2?	No. We expect to see that as part of your technical proposal. We are considering this for the final RFP, but we cannot guarantee it will be included later.
M	7		Section is about the Contract Documentation, but the paragraph states "the proposal documentation contained in Volume IV of Section L will..." Section L states Volume IV will be Past Performance.	Can the Government confirm that the Contract Documentation Volume is volume V?	Yes, language should be updated in second draft
M	7			Shouldn't Volume IV be Volume V as Volume IV is Past Performance and Volume V is the contracts volume?	Yes, language should be updated in second draft

M	4.3.1.1			The following language references "Section L, Appendices D through H." These are probably meant to refer to the three Task Orders. Please clarify, <i>4.3.1 Subfactor 1, Systems Engineering Criteria</i> <i>4.3.1.1 The Offeror demonstrates the ability to apply their system engineering approach for the HADES environment as described in the Section J Attachment 1, section 1.3.1. during execution of the attached 3 TO PWSs as identified in Section L, Appendices D through H.</i>	This is a clear typographical error. "Section L, Appendices D through H" should be "Section J, Attachments 2, 3, and 4." and should be reflected in the final RFP
M	4.3.1.4 under Subfactor 1 New Criterion			The PWS objectives to "Accelerate mission design and ground integration, launch and on-orbit operations, ground system tests, and rapid fielding" imply a need to propose approaches to improve current EDIS environment and operations. However, there is no mechanism for the government to evaluate an offeror's capabilities to deliver feasible/affordable plans aligned to achieving stated goals. Even on limited budgets, when new funding comes available, the government needs a contractor capable of implementing pragmatic modernization activities. Consider adding a new criterion evaluating offeror's notional modernization roadmap for HADES that can demonstrate offeror's proposed approach, activities and capability to bring relevant, mission-driven, incremental improvements in a cost effective and phased manner.	At this time, we will not be adding an additional criterion for evaluations.
M	4.3.1.1			BLANK - No Question Available	
M	4.3.1.1		References Section L Appendices D through H, but does not include/identify them.	Can the Government provide the Appendices or clarify the files intended for Appendices D-H?	This is a clear typographical error. "Section L, Appendices D through H" should be "Section J, Attachments 2, 3, and 4." and should be reflected in the final RFP
M	4.3.1.1		The Offeror demonstrates the ability to apply their system engineering approach for the HADES environment as described in the Section J Attachment 1, section 1.3.1. during execution of the attached 3 TO PWSs as identified in Section L, Appendices D through H.	Should "... as described in the Section J Attachment 1, section 1.3.1..." say "... as described in the Section J Attachment 1, section 2 ..."? "1.3.1" references Air Force Computer System compliance and "2" references the Basic Services of the PWS. Additionally, Section L, Appendices D through H are not currently defined in Section L. It is assumed Appendices D through H are referencing the PWSs of the initial TOs.	This is a clear typographical error. "Section L, Appendices D through H" should be "Section J, Attachments 2, 3, and 4." and should be reflected in the final RFP

M	4.3.1.1		The Offeror demonstrates the ability to apply their system engineering approach for the HADES environment as described in the Section J Attachment 1, section 1.3.1. during execution of the attached 3 TO PWSs as identified in Section L, Appendices D through H.	The current criterion " The Offeror demonstrates the ability to apply their system engineering approach..." lacks evaluation of the actual approach to be used and its feasibility in achieving alignment with actual HADES objectives to: "accelerate mission design and ground integration, launch and on-orbit operations, ground system tests, and rapid fielding to provide reliable, low-cost access to space in support of the warfighter." Recommend the following modification to support these objectives: "The Offeror demonstrates a comprehensive and feasible approach to achieve the HADES goals in the HADES environment."	Accpeted recommendation: "The Offeror demonstrates a comprehensive and feasible approach to achieve the HADES goals in the HADES environment."
M	4.3.1.2		The Offeror demonstrates experience and expertise applying their systems engineering approach to National Space enterprise software intensive systems and low-cost Research and Development systems in both cloud and local implementations. The identified experience and expertise illustrate cost/schedule/performance trade-offs, a focus on system up-time, cost reduction, and rapid response to requirements.	A focus exclusively on experience in supporting "software intensive systems" misses the mission critical sustainment aspects of HADES where offerors' relevant system engineering experience supports similar high availability and reduced MTBF sustainment objectives of HADES. Likewise, a competitive restriction to only National Space and R&D programs misses the opportunity for HADES to leverage Offeror's beneficial experience supporting other DoD or Intel engineering and sustainment programs that produce similar or better sustainment results.	Removed "National Space Enterprise" but retain software intensive systems. Updated M4.3.1.2 to reflect in final RFP.
M	4.3.2		Subfactor 2, Program Management Criteria	Is Subfactor 2 technically acceptable or assessed using Table 4.1? The language in 4.1 makes it seem as though SF2 is color rated but the language in 4.3.2 states "technically acceptable"?	Subfactor 2 shall be color rated as subfactor one, and so we will update the language to fit. - Subfactor 2 shall be technically acceptable (per the verbage), and subfactor 2 will be color evaluated in the same manner as subfactor 1. Section 4.3.2.4 Transition and 4.3.2.5 Small business are evalutated as either being met or not met, and the entire subfactor 4.3.2 will be color rated.

M	4.3.2			We recommend SF2 be assessed color ratings and a risk score same as SF1	Subfactor 2 shall be color rated as subfactor one, and so we will update the language to fit. - Subfactor 2 shall be technically acceptable (per the verbage), and subfactor 2 will be color evaluated in the same manner as subfactor 1. Section 4.3.2.4 Transition and 4.3.2.5 Small business are evalutated as either being met or not met, and the entire subfactor 4.3.2 will be color rated.
M	4.3.2.1			We recommend Staffing/Labor Profile be assessed color ratings and a risk score same as SF1	Yes, this is the Governments intention.
M	4.3.2.2	M 4.3.2.2 Personnel Security Requirements – The Offeror provides a viable plan to recruit and retain employees that can obtain and maintain applicable clearances	L 4.3.2.2 Personnel Security Requirements: The Offeror shall describe its approach to meet personnel security requirements. This technical effort will be performed at the Unclassified or CUI level, Secret, and at the TS/SCI level. (Sec. M. 4.3.2.2)	Sec M 4.3.2.2 evaulation criteria for recruiting and retention do not align with Sec L instructions for this same section. Recommend Section L 4.3.2.2 be amended to reflect the criteria in Sec M.	The government views these sections as being aligned. However, if after the second draft is released, please provide questions and comments to the PCO and contract manager.

M	4.3.2.2		Personnel Security Requirements – The Offeror provides a viable plan to recruit and retain employees that can obtain and maintain applicable clearances.	We recommend Personnel Security Requirements be assessed technically acceptable/unacceptable	The Government appreciates the recommendation, but Personnel Security Requirements will be assessed given assessment criteria provided.
M	4.3.2.3		4.3.2.3 Emerging Requirements. The Offeror demonstrates the ability to apply their management processes and labor/skill mix to respond to emerging requirements. The Offeror demonstrates experience and expertise applying their management process to address emerging requirements.	We recommend Emerging Requirements be assessed color ratings and a risk score same as SF1	The Government appreciates the recommendation, but Personnel Emerging Requirements will be assessed given assessment criteria provided.
M	4.3.2.4		"This criterion is either met or not met."	This language implies Pass/Fail evaluation criteria and is not in alignment with the Color and Risk ratings. If the Offeror proposes a Transition Plan that exceeds the requirement, a Pass/Fail rating would reduce the value to the Government versus evaluated with the Color and Risk criterion?	The Government appreciates the recommendation, but Transition Plan Requirements will be assessed given assessment criteria provided.
M	4.3.2.4			We recommend Transition be assessed technically acceptable/unacceptable	Transition is either acceptable (met) or unacceptable (not met).
M	4.3.3 New Subfactor - Sustainment Effectiveness			Sustainment is the primary contract focus, yet the current Section M has no dedicated sustainment criteria. Recommend the addition of a Sustainment Effectiveness Subfactor that evaluates the Offeror's Sustainment Effectiveness Approach to include Performance Management, and alignment with HADES goals.	The Government acknowledges that sustainment and operations represent a significant portion of the HADES contract work, as reflected in the Task Order PWSs and the HADES IDIQ PWS Section 3.5 (Sustainment). The Government will <u>consider</u> enhancing the evaluation criteria to more explicitly address sustainment effectiveness in the final RFP.

M	5.4.1			Can the Government please provide Attachment 3 rate tables as called out in paragraph 5.4.1?	The Government will correct Section M 5.4.1 in the next RFP amendment to read: "5.4.1 Reasonableness (Applies to all CLINs and Appendix B Rates)"
M		5.2		CLINS, Contract types, and number of options do not align with Section B and F of model contract. Recommend these be reconciled	In work as part of the second draft and Final RFP.
M		5.2		Recommend Plug \$ figures be provided for CR CLINs Travel and ODCs for TEP evaluation purposes to eliminate any ambiguity in Travel and ODC volume assumptions and pricing across bidders	The Government will provide standardized values for travel costs. However, Offerors are expected to understand travel requirements based on their understanding of the contract requirements, their proposed technical approach, and reasonable assumptions about travel needs to perform the work described in the Task Order PWSs. The Government expects offerors to exercise professional judgment in estimating ODC costs based on their proposed technical solution, GFP availability, and documented assumptions. Standardized plug numbers would undermine the competitive process, prevent evaluation of cost-effective innovations, and artificially constrain technical approaches.
M		5.2		Shouldn't all the 0001, 1001, 2001, 3001, 4001 Contract types be CPAF instead of CR?	Yes, you are correct. All Mission Support CLINs (0001, 1001, 2001, 3001, 4001, 5001, 6001 series across all Task Orders) should be designated as CPAF (Cost Plus Award Fee), not CR (Cost Reimbursable). This aligns with Section L 5.3.1, which requires offerors to propose award fee percentages with no base fee, and Section M 5.4.2, which applies cost realism evaluation to "Cost-Reimbursable/Cost Plus Award Fee Task Order CLINs." Corrected contract types in Table 5.2: Mission Support CLINs (X001 series): CPAF Travel CLINs (X002 series): CR (correct as shown) ODC CLINs (X003 series): CR (correct as shown) Transition CLIN (0008): FFP (correct as shown) The Government will correct Section M, Table 5.2 in the next RFP amendment.

M		5.2		Table 5.2 doesn't appear to align with the CLINS in Section B? Table 5.2 has 03, Jaguar TOs in the middle of Ground Support?	In work to update and ensure alignment as part of the second draft of the RFP
M		5.2		We recommend that the Transition cost be evaluated for reasonableness outside of the TEP.	The Government will not exclude Transition (CLIN 0008) from the Total Evaluated Price (TEP). Transition is a required contract cost, and consistent with standard evaluation practices, all contract costs will be included in the TEP used for best value determination. The current evaluation structure appropriately addresses potential concerns: Transition cost will be evaluated separately for reasonableness (Section M 5.4.1), is displayed distinctly in Table 5.2 for clear visibility, and is subject to unbalanced pricing evaluation (Section M 5.4.3) to identify any artificial cost manipulation. The Source Selection Authority retains discretion to consider the relative significance of one-time transition cost versus ongoing performance costs in the best value decision without requiring artificial exclusion from TEP.
M		5.2		We recommend Travel (x002), and ODC (x003) CLINS be plug values	The Government will provide standardized values for travel costs. However, Offerors are expected to understand travel requirements based on their understanding of the contract requirements, their proposed technical approach, and reasonable assumptions about travel needs to perform the work described in the Task Order PWSs. The Government expects offerors to exercise professional judgment in estimating ODC costs based on their proposed technical solution, GFP availability, and documented assumptions. Standardized plug numbers would undermine the competitive process, prevent evaluation of cost-effective innovations, and artificially constrain technical approaches.
M		5.2	No specific text - this is a recommendation to the Program Management Criteria.	Critical elements of the scope as defined in the Performance Work Statements are part of Program Management evaluated criteria (staff/labor profile, personnel security requirements, transition, and small business). However, there are other critical elements of program management that do not appear to be part of the overall program management evaluation.	The Government appreciates the recommendation, and while it may not show in the next draft it is being considered for the final RFP.

PWS	4.1			We need to know if or response needs to address all PWS requirements, and if not, which specific tasks need to be addressed and are they tied to specific Subfactors for evaluation? Please clarify the expected PWS elements X.X.X to be addressed and evaluated under Subfactor 1 and Subfactor 2 so compliance can clearly be determined and approaches address all aspects of interest to evaluation.	The expected PWS's to be addressed and evaluated are the three Task Order's attached to the draft RFP. All PWS requirements must be met for your proposal to be considered acceptable. The evaluation criteria assess your capability and approach to meeting those requirements, not compliance on a line-by-line basis. Your Technical Volume should demonstrate understanding of PWS requirements and describe your methodology for successful execution, organized according to the subfactors and criteria in Section M 4.3.
PWS	General			Will the Government provide labor categories for Support Services (Basic IDIQ PWS 2.2) requirements as the notional staffing plans provided for the three task orders do not include Labor Categories for these efforts? (regarding Section 2.2 Support Services, All Notional Staffing Plan Files)	No, we will not provide these.
PWS	Notional Staffing Plan		Table	Ground Control Staffing plan calls for a "Drafter". What are the skillsets the Government requires for the drafter? Is this a person the Government see as primarily responsible for schematics/technical writing/configuration management?	Here, a drafter was utilized primarily for VISIO and CAD drawings. Technical writing has been utilized as a separate staff member, as are the configuration management staff. Again, the notional staffing plans are provided to assist, but
PWS	Notional Staffing Plan		Table	Notional staffing plans provided with the draft RFP for the three TOs (Jaguar, Support, Control) list suggested FTEs and skill sets. Is the Government open to staffing plans that differ from the notional staffing TO plans (increased or decreased) as required by the TO Objectives and complexity?	Yes, we would certainly be open to variations on the notional staffing plans. These are provided to assist, but not as a hard measure.
PWS, GC	2.3			Please provide the expected CONOPs for execution of the Ground Ctrl and Ground Support TOs when Ground Control omits entire IDIQ sections (2.3, 2.5, and 2.6)?	For the GC TO, SDG should add in 2.3, 2.5 and 2.6 as applicable to the Ground Control TO as well.
PWS, GC	2.5			Please provide the expected CONOPs for execution of the Ground Ctrl and Ground Support TOs when Ground Control omits entire IDIQ sections (2.3, 2.5, and 2.6)?	For the GC TO, SDG should add in 2.3, 2.5 and 2.6 as applicable to the Ground Control TO as well.
PWS, GC	2.6			Ground Control OMITs Section 2.6, COMSEC and Cybersecurity. Is this correct, there are no COMSEC and Cyber security support requirements for this TO?	applicability of 2.6 should be added into the TO

PWS, GC	2.6			Please provide the expected CONOPs for execution of the Ground Ctrl and Ground Support TOs when Ground Control omits entire IDIQ sections (2.3, 2.5, and 2.6)?	For the GC TO, SDG should add in 2.3, 2.5 and 2.6 as applicable to the Ground Control TO as well.
PWS, GC	1.2.3			Please clarify required security clearances (by position if necessary) for this TO.	All engineering personnel should have TS//SCI clearances with the ability to obtain compartments as necessary. Secret is allowable for <i>some</i> portions of the GC PWS, but TS// is recommended
PWS, GC	2.2.3.4			What is the Government's Configuration Management tool? Is the contractor providing the resources to manage that tool?	CM Tool is managed via TEAMS planning tool. Contractor will provide resources to manage and improve this tool
PWS, GC	2.2.8.4 - 2.2.8.6			Who is responsible for deploying these to the mission? Please provide the relevant ICDs used by mission partners to develop MUS.	The HADES contractor will deploy MUS. Depending on the task order, the HADES contractor may or may not develop MUS.
PWS, GC	2.2.9.14			Notional staffing doesn't show Hardware Engineers as an LCAT. Is the LCAT incorrect?	projecting .25 FTE of Hardware engineer, will be updated for final RFP
PWS, GC	2.2.9.23		Provide on-site hardware support, troubleshooting and maintenance during normal business days and hours (M-F, 8-5) and on-call support during non-business hours with a 3-hour threshold.	Will the government provide metrics, e.g. the volume of events occurring during non-business hours? The volume of calls during business hours? [also Gnd Spt TO, 2.2.10]	Non-business hour calls are estimated at 1-2 per week. Business hour calls are estimated at 3 per week.
PWS, GC	General			Cloud architecture support is not explicitly covered in the IDIQ baseline PWS which makes anything in the TOs for cloud support not within scope of the contract. This creates an execution risk for other TOs that might need to leverage the cloud implementations.	The engineering contractor is expected to work with the government specified infrastructure - whether that is local hardware or a remote cloud. All government specified infrastructure is considered to be in scope.
PWS, GC	General			Please provide all architecture, roadmap, CONOPS, TTPs, ICDs, and HW/SW Configuration Item baseline artifacts for the Ground Control Task Order so bidders may understand the current state of operations and maturity necessary to achieve HADES objectives for this TO.	These artifacts will be available to the successful bidder. The ground system is currently flying six missions. Threshold availability is 95%, with a goal of 98%.

PWS, GC	General			Please provide any current IMS artifacts and improvement roadmaps for existing task orders.	Current IMS and improvement roadmaps will be made available to the successful bidder, but cannot be provided in an RFP due to security requirements.
PWS, GC	General			What are the current missions and MMSOC baselines being used under this TO?	Information will be provided to the successful bidder, but cannot be provided in an RFP due to security requirements.
PWS, GS	1.2.3			Please clarify required security clearances (by position if necessary) for this TO.	All engineering personnel should have TS//SCI clearances with the ability to obtain compartments as necessary
PWS, GS	2.2.9.31			Please provide the hardware and software inventory and deployment configuration for the RVDS as part of the GFE and Bidders library.	GFP list will be made available in the bidders library in the second draft RFP or the Final.
PWS, GS	2.2.9.31			What specific RVDS-related training and manufacturer reach-back support will be required?	The contractor is expected to demonstrate proficiency in the complete lifecycle deployment of Thinklogical products, including system design, physical installation, software configuration, and integration within the RSC. The contractor will be expected to reach back to the manufacturer for replacement of parts with manufacturer defect, for replacement of equipment during warranty periods and for engineering support where required.

PWS, GS	2.2.9.34		Ensure any changes to the baseline for the purpose of restoring mission service are presented to and approved by the Government prior to implementation.	The table in section 2.2.9.34 references section 2.2.10.6 from Section J - Attachment 1 Basic IDIQ Performance Work Statement. There is no section 2.2.10.6 in Section J - Attachment 1. Will the Government clarify the correct reference?	This shall be corrected in the final RFP. Removed as part of review process, please disregard
PWS, GS	2.3.4			Grnd Spt TO omits subsection 2.3.4.8 while adopting 2.3.4.1-7 and 2.3.4.9. Please clarify this is correct and basis for doing so.	Thank you for pointing out the typographical error. Subsection 2.3.4.8 should be included but, uptime and backup requirements are not placed upon Ground Support Systems directly. Instead, these requirements are determined by the mission systems they connect to.
PWS, GS	General			Please provide all architecture, roadmap, CONOPS, TTPs, ICDs, and HW/SW Configuration Item baseline artifacts for the Ground Support TAsk Order so bidders may understand the current state of operations and maturity necessary to achieve HADES objectives for this TO.	Information will be provided to the successful bidder, but cannot be provided in an RFP due to security requirements.

PWS, GS	General			Please provide any current IMS artifacts and improvement roadmaps for existing task orders.	Current IMS and improvement roadmaps are available to the successful bidder. A notional schedule may be provided with the final RFP.
PWS, GS	General			What are the current missions and MMSOC baselines being used under this TO?	Information will be provided to the successful bidder, but cannot be provided in an RFP due to security requirements.
PWS, IDIQ	2.5			Industry Day indicated the use of ACME as a target common ground environment platform. It appears support for ACME has been removed and no replacement has been identified. Please confirm the desire to create a new, cloud-based common ground system environment and what specific scope/requirements in the PWS are related to the design, development, and deployment of a new cloud-based common ground system environment.	Primary focus of the IDIQ is to maintain the existing infrastructure. Addition/deletion of missions is covered in task orders (as funding and need necessitate). If a new common ground system environment is to be created, that work will be specified as a future task order. Part of the bid evaluation criteria is an assessment of bidder staffing flexibility.
PWS, IDIQ	2.2.1			Should "will" be "with" in the intent paragraph?	The intent paragraph will be updated in final RFP.

PWS, IDIQ	2.2.10			For the concept development requirements in Section 2.2.10, what specific deliverables are expected beyond the weekly status reports?	CDRL deliverables will be explicitly given within each TO
PWS, IDIQ	2.2.3.3		The contractor shall maintain current and accurate operational procedures, technical data, test plans, test reports, training materials, and other documents required to conduct activities assigned under this contract utilizing a Government-approved configuration management tool and process.	Can the Government please provide the name of the current Government approved CM tool?	EDIS Configuration Management CR Kanban Board Planner.
PWS, IDIQ	2.2.8.2		The contractor shall use an appropriate configuration management tool and process to track and implement changes.	Can the Government please provide the name of the current Government approved CM tool?	EDIS Configuration Management CR Kanban Board Planner.

PWS, IDIQ	2.2.9		2.2.9. Procurement, Logistics, and Lifecycle Management	Ground Control adds 11 unique sub-requirements (2.2.9.8-.30) including quarterly GFP reports, RDSMO integration, EDIS 2020 continuity, 2hr/3hr response SLAs. Jaguar/Ground Support adopt IDIQ baseline with different property management clauses No IDIQ baseline for: Technology refresh cadence, spares inventory levels, property system of record This creates a few risks: 1. Property accountability conflicts: Ground Control uses one system, Jaguar/Ground Support use AFEMS 2. Lifecycle planning gaps: IDIQ doesn't mandate lifecycle sustainment plans, so Jaguar/non-Ground-Control TOs may not plan for EOL, there is no standard property system across TOs creating audit complexity and added cost. Recommendation: IDIQ PWS 2.2.9 should specify: "Contractor shall use [AFEMS/CSWS DE/other] as the Government property system of record unless TO specifies alternative."	The Government acknowledges the observation regarding property management requirements and will review the PWS structure for consistency and clarity prior to final RFP release. The Government will consider clarifications to the IDIQ PWS and Task Order PWSs regarding:
PWS, IDIQ	2.2.9.13			Please confirm contractor is required to provide warehousing facilities for materials and equipment, what that material might be, and the volume of such material, and any operational and security requirements for such warehouse	The contractor is not required to provide warehousing facilities for materials and equipment. The Government will provide Government Furnished Property (GFP) and facilities necessary for contract performance at the primary performance location (Kirtland AFB, NM) and other identified locations per the Task Order PWSs. Operational and Security requirements are based on specific TO's, and should be treated (for bidding) at the TS level. Regarding facilities, previous contractors have used existing base buildings. Volume consistent with appropriate sparing and temporary storage awaiting disposal. This requirement will be reviewed and edited for the final

PWS, IDIQ	2.2.9.29-2.2.9.30		"The Contractor shall gain and maintain access to CSWS Data Exchange..."	Can the Government provide the current health, operational status, and hosting location of the CSWS Data Exchange (CSWS DE/D375), including any known access limitations, performance issues, or upcoming changes that could impact Contractor ability to maintain required connectivity via AF Portal CAC/PKI authentication and associated CSWS DE access documentation (DD 2875, sponsor letter, NDA)?	CSWS Data Exchange (CSWS DE/D375) access is required per HADES IDIQ PWS, Section J, Attachment 1, paragraph 2.2.9.29. Access requires a valid CAC/PKI, DD Form 2875, Government sponsor letter, and non-disclosure statement via AF Portal. The Government will sponsor contractor access requests during transition. Offerors should plan for standard DoD system access timelines (typically 2-4 weeks) when developing transition plans. Current system status and technical interface details will be provided to the awarded contractor during transition.
PWS, IDIQ	2.3.1			How are assets tracked today? What is the existing change management process?	Asset tracking and change management processes for the HADES environment are defined in the HADES IDIQ PWS and Task Order PWSs . The Government Furnished Property (GFP) will be posted by the final RFP Bidders' Library on SAM.gov provides details on existing Government-provided assets. Current asset tracking utilizes Air Force Enterprise Equipment Management System (AFEMS) and other DoD property management systems as specified in the applicable PWS requirements. Change management processes and procedures will be discussed during the transition period with the incumbent contractor and Government personnel. Offerors should propose asset tracking and change management approaches that comply with PWS requirements and align with their proposed configuration management methodology (evaluated under Section M 4.3.2.3).

PWS, IDIQ	2.3.1.3			Please provide a copy of the current SEMP baseline document as part of the bidder library.	The Government will not provide the current Systems Engineering Management Plan (SEMP) in the Bidders' Library. The HADES IDIQ PWS and Task Order PWSs define the systems engineering requirements offerors must meet. Section M 4.3.2.1 evaluates each offeror's ability to apply their own SE approach, not adaptation of the current contractor's methodology. The Government seeks innovative SE solutions based on each offeror's experience and best practices. The current SEMP and operational documents will be provided to the awarded contractor during the transition period to facilitate effective transition and continuity of operations. Offerors should propose SE approaches based on PWS requirements and their own proven methodologies.
PWS, IDIQ	2.3.3			Is there already an integrated Test environment that mirrors Production, within which all stakeholders (e.g. mission partners, contractor, etc.) perform their integration testing?	No, there is not currently a dedicated test environment that fully mirrors the production HADES environment. Due to fiscal constraints, development and testing activities are performed in shared development environments.
PWS, IDIQ	2.3.4.1			What level of support for HVAC, Construction, and other trade labor will come from base engineering contractors? From HADES? How will this be initiated for base engineering labor?	Kirtland AFB facilities to include HVAC, electrical requirements from building to base wide infrastructure, and plumbing to base wide infrastructure are base contractor responsibilities. Scope is currently limited to maintenance and sustainment activities as described in the IDIQ PWS (subject to change). Bidder is presumed to be familiar with working with Air Base Wing Mission partners such as base civil engineering, etc.
PWS, IDIQ	2.5.1			What CI/CD tooling and automation is in-place today? How frequent are deployments of contractor and/or mission partner code?	There is no CI/CD tooling or automation. Currently, there are two missions which deploy mission partner code. This code appears at irregular intervals but about twice per year.
PWS, IDIQ	2.6.2			How many enclaves and at what classification are being supported today?	No answer to release at this time due to potential security concerns.
PWS, IDIQ	2.6.3			How many enclaves and at what classification are being supported today?	No answer to release at this time due to potential security concerns.
PWS, IDIQ	Appendix B			Please provide the relevant CDRLs to inform offerors' approaches and staffing levels.	The CDRL list will be updated and posted with the final RFP

PWS, IDIQ	General		All three TOS reference 2.2 and 2.4, which provides the necessary services and facility maintenance to support all TOs. Please define the CONOP for execution necessary to bid and differentiate the appropriate level of effort and division of responsibilities between TOs for 2.2 and 2.4 related scope? Separate TOs across these two PWS elements create risk of different configuration baselines for each TO and complicates time-charging between TOs when it comes to execution; it also makes creation of efficiencies and resource optimization more difficult across TOs. For Example: Facility Services (Section 2.4) have Ambiguous Responsibility Boundaries across TOs. All TOs adopt Section 2.4 (Power, HVAC, Facility, Network, Space) BUT: Multiple TOs operating in same RSC facility (Kirtland AFB) Jaguar: Specific to PTC 2/3/4 Ground Support: Entire RSC multi-mission environment Ground Control: Hybrid on-prem/cloud (unclear if includes RSC physical plant) Performance Risk Examples: - Overlapping facility responsibility across multiple TOs can make time reporting difficult and potentially non-compliant, e.g. Am I working on Ground Control or Ground Support TO) -Undefined boundaries: Network Infrastructure 2.4.4 – where does one TO's network end and another's begin? -HVAC failure scenario: Cost allocation conflict across shared infrastructure costs (e.g., UPS for entire building) split how between TOs? -Inefficient operations: Multiple separate preventive maintenance schedules for same building Recommendation: Have one "Sustainment" TO for 2.2, 2.3, 2.4, 2.5, and 2.6. Identify a CONOP whereby all missions "buy" their relevant sustainment services on the Sustainment TO following successful launch and LEO check-out. In this manner are used only for all the non-recurring onboarding efforts for Mission unique RSC modifications and MUS Integration needed prior to Launch. "Mission On-Boarding" TOs have a finite life and schedule to complete on-boarding. Then the mission transitions to the Sustainment TO for ongoing operations and feeding support.	The Government acknowledges the concern regarding overlapping facility and sustainment responsibilities across Task Orders; however, the current Task Order structure will not be restructured at this time. We will consider for the final RFP.
PWS, IDIQ	General		Based upon the dynamic and expansive nature of the needs relevant to the objectives of this IDIQ and the potential impact of the baseline requirements being too narrowly or broadly defined, has the Government determined how the risk of any scope conflicts will be addressed and considered adding scope to sufficiently cover emerging requirements that may not currently be explicitly included within IDIQ PWS?	The IDIQ PWS establishes baseline scope for all Task Orders, intentionally broad to accommodate dynamic HADES mission requirements. Emerging requirements within established scope are addressed through PWS Section 2.5 without contract modifications; the contractor's ability to respond is evaluated under Section M 4.3.1.3.

PWS, IDIQ	General			What roles and responsibilities will The Aerospace Corporation have in GSE&I, TR, and TS efforts on a day-to-day basis as mentioned in the IDIQ PWS?	The Aerospace Corporation serves as the Government's technical advisor and provides independent technical oversight for the HADES program. The Aerospace Corporation's roles include reviewing contractor technical submissions, identifying and recommending risks and mitigations, serving as Government-designated witness for technical reviews and testing activities, and providing technical assessments to support Government decision-making. The contractor shall coordinate with The Aerospace Corporation as directed by the Contracting Officer's Representative (COR) and provide requested technical data and access for oversight activities. Day-to-day operational responsibilities and specific coordination requirements will be defined during contract execution.
PWS, IDIQ	General			Will the 4-6 anticipated Task Orders mentioned in Section 1.2 of the IDIQ PWS include the three currently mapped TOs, or are these additional ones?	The currently mapped TOs are included. We are expecting approximately 7 task orders (subject to change) at any given time. However, the timing of whether or not those task orders will start at the beginning of the contract or live until
PWS, IDIQ				Regarding badge flipping of potential incumbents for work on HADES, please describe the process to be used to rebadge and enable system access under the new contract.	Personnel badging and system access procedures follow standard Air Force and Kirtland AFB processes. The awarded contractor is responsible for initiating badge requests and system access requests for their personnel through the appropriate Government sponsoring offices. The Government will facilitate the badging and access request process during the transition period. Specific procedures, timelines, and required documentation (e.g., DD Form 2875 for system access) will be provided to the awarded contractor during transition. Personnel transitioning from the incumbent contractor must complete all standard re-badging and access request procedures under the new contract sponsorship.

PWS, Jag	2			Please provide more details on the OCONUS remote support capability requirements?	The contractor's remote support duties shall include, but are not limited to, software updates, software troubleshooting, and the maintenance of software/network configurations. For any actions requiring physical intervention (e.g., component replacement, hardware reset), the contractor is responsible for guiding on-site OCONUS personnel through any required physical actions and subsequent testing.
PWS, Jag	5.1			Can the Government provide offerors with greater understanding of expectations for the monitoring of system availability requirements, to include confirmation as to whether the USG anticipates the use of existing USG-furnished tools and/or reporting systems? If such tools and reporting systems are not furnished by the USG, does the Government intend to require operational tools be deployed on day one of the contract?	The successful bidder shall inherit the existing system, which includes commercial and USG-furnished tools for monitoring system availability. Upon award, the successful bidder is responsible for the complete configuration management of this system. This responsibility includes the option to either continue using the existing tools (e.g. via license renewal) or to replace them with new products that meet system requirements.
PWS, Jag	5.2			Can the Government provide offerors with greater understanding of expectations for the monitoring of system availability requirements, to include confirmation as to whether the USG anticipates the use of existing USG-furnished tools and/or reporting systems? If such tools and reporting systems are not furnished by the USG, does the Government intend to require operational tools be deployed on day one of the contract?	The successful bidder shall inherit the existing system, which includes commercial and USG-furnished tools for monitoring system availability. Upon award, the successful bidder is responsible for the complete configuration management of this system. This responsibility includes the option to either continue using the existing tools (e.g. via license renewal) or to replace them with new products that meet system requirements.
PWS, Jag	5.3			Can the Government provide offerors with greater understanding of expectations for the monitoring of system availability requirements, to include confirmation as to whether the USG anticipates the use of existing USG-furnished tools and/or reporting systems? If such tools and reporting systems are not furnished by the USG, does the Government intend to require operational tools be deployed on day one of the contract?	The successful bidder shall inherit the existing system, which includes commercial and USG-furnished tools for monitoring system availability. Upon award, the successful bidder is responsible for the complete configuration management of this system. This responsibility includes the option to either continue using the existing tools (e.g. via license renewal) or to replace them with new products that meet system requirements.

PWS, Jag	5.4			Can the Government provide offerors with greater understanding of expectations for the monitoring of system availability requirements, to include confirmation as to whether the USG anticipates the use of existing USG-furnished tools and/or reporting systems? If such tools and reporting systems are not furnished by the USG, does the Government intend to require operational tools be deployed on day one of the contract?	The successful bidder shall inherit the existing system, which includes commercial and USG-furnished tools for monitoring system availability. Upon award, the successful bidder is responsible for the complete configuration management of this system. This responsibility includes the option to either continue using the existing tools (e.g. via license renewal) or to replace them with new products that meet system requirements.
PWS, Jag	General			Please provide all architecture, roadmap, CONOPS, TTPs, ICDs, and HW/SW Configuration Item baseline artifacts for the Jaguar program so bidders may understand the current state of operations and maturity necessary to achieve HADES objectives for this TO.	These artifacts will be available to the successful bidder.
PWS, Jag	General			Please provide any current IMS artifacts and improvement roadmaps for existing task orders.	Current IMS and improvement roadmaps will be available to the successful bidder.
SF33			Missing DPAS Rating	Missing DPAS Rating. Ask customer to insert or will each TO have it's unique DPAS rating?	The Defense Priorities and Allocations System (DPAS) rating, if applicable, will be included in the final RFP. If a DPAS rating applies, it will be identified in Section I (Contract Clauses) of the solicitation and will apply to the IDIQ contract and all Task Orders issued under the IDIQ unless otherwise specified in individual Task Order awards.
