OPENING COMMENTS

Expanding the C-sUAS Market

DoW
*Domestic
Shield*

Current C-sUAS Market
Solutions focused on DoW, indexed
on Group 3+, and exquisite threats

*Reflects a market focused on our most
critical military assets, leaving a
broader landscape unaddressed*

**JIATF 401 exists to optimize and expand
this market base.**

***A sustainable industrial base requires shifting
the market approach.***

Expanding the C-sUAS Market

Data, Analysis, Requirements, and Training Division

Identify, validate, & prioritize enterprise C-sUAS capability gaps; synchronize joint C-sUAS training; and promulgate data standardization.

Science and Technology Division

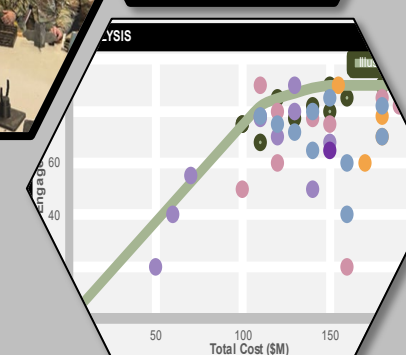

By setting clear standards, providing robust testing, and delivering transparent feedback, the JIATF-401 S&T Division enables our industry partners to innovate faster and deliver validated, effective C-UAS capabilities to the front lines.

Lessons for Industry

Multi-Domain Operations Division

Response Division

Industry Day

5 March 2026

Multi-Domain Operations (MDO) & J3 Ops Division

Mission – JIATF 401 synchronizes C-sUAS efforts across the DoW to rapidly deliver joint capabilities at scale to defend the homeland, protect US and allied forces, defend critical infrastructure, and assist federal agencies.

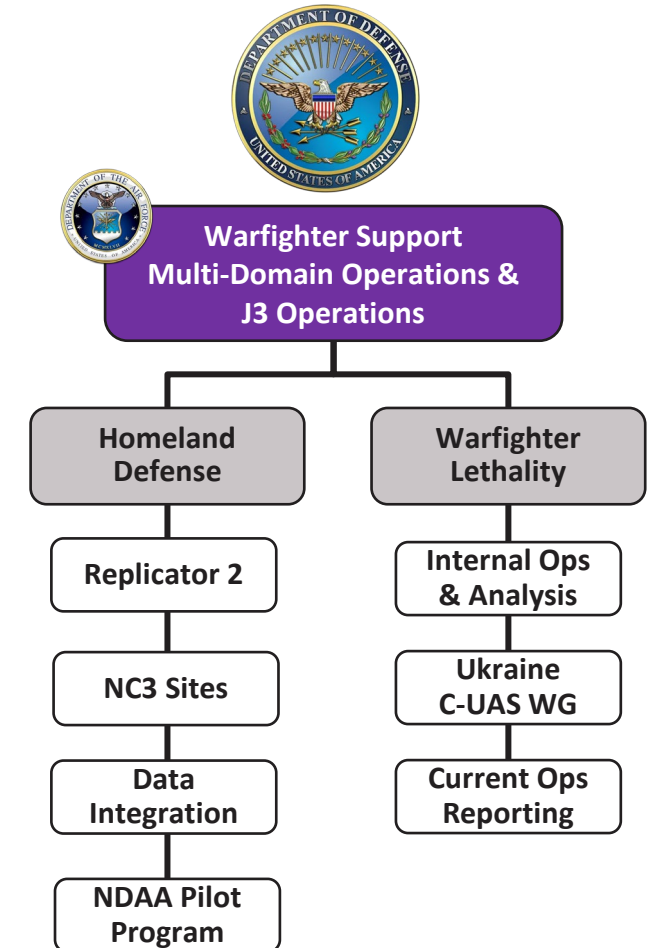

Division Mission Statement: *MDO is a hybrid division designed to provide the JIATF-401 Director with two critical capabilities: fused operational awareness and centralized management of enduring, high-priority programs.*

Main Efforts

Current Operations: This branch's primary function is **synchronizing strategic/enduring special projects**. Additionally, it serves as the central hub for information, tracking, **and aligning cross-cutting activities** internal to the JIATF. It acts as the initial point of contact (the "front door") for the JIATF, directing RFIs and external queries to the correct SMEs. Furthermore, the team monitors current UAS events as reported by GCCs to understand and **anticipate** AOR trends and activities.

Division Teams: Responsible for integration and planning. It manages a portfolio of the Director's items of interest and enduring programs—complex initiatives that cut across multiple divisions

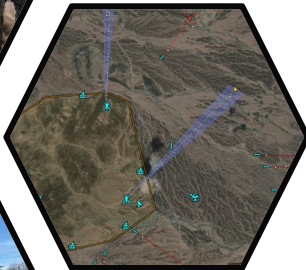

- 1. Program Management (Domestic Shield/NC3 Sites):** Tackles the warfighter priority of countering the threat posed by small unmanned aircraft systems (C-sUAS) to our most critical installations and force concentrations. Deliver advanced capability to protect 130i critical assets across the DoW.
- 2. Integration (Data):** Facilitate the integration of C-UAS capabilities into ongoing operations, ensuring interoperability. Provide operational feedback to inform the development and refinement of C-UAS systems and tactics. Liaise with interagency partners to coordinate efforts in defending critical assets from sUAS threats.
- 3. Future Operations (Directed Energy Pilot Program):** Lead the development of future C-UAS operational concepts and strategies that align with the task force's vision of being innovative and threat-adaptive. Identify gaps in current capabilities and propose solutions to enhance the effectiveness of C-UAS operations.
- 4. Ukraine C-UAS Lead for OSW-P:** Leads the U.S. prioritized focus on understanding and adapting Ukraine's "system of systems" architecture while fast-tracking the acquisition of specific, high-impact technologies.

Future threat informed capabilities accelerated at the speed of relevance to the most critical sites.

DART Division

Data, Analysis, Requirements, & Training (DART) Division

Identifying, validating, & prioritizing C-sUAS capability gaps; synchronizing joint C-sUAS training; and promulgating data standardization.

Purpose

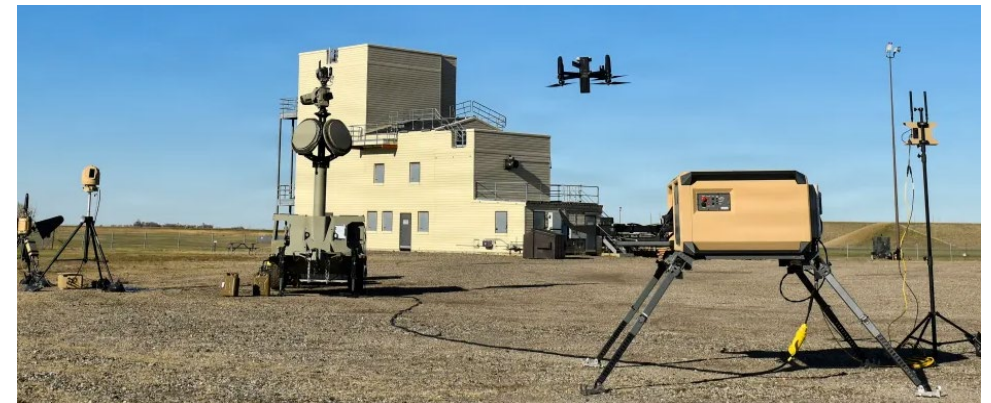

- Data Synchronization
- Enterprise Gap Analysis
- Requirements Validation
- Training Synchronization

Key JIATF 401 Documents

- Characteristics of Need Document (CND)
- Capability Characteristics Document (CCD)

Key Considerations

- Modular Open Systems Approach (MOSA)
- Intrinsic "Blue" Deconfliction
- Flexibility and Expeditionary
- Decision Support at the Tactical Edge
- Drive Down the Cost-Exchange Ratio

S&T Test Event Schedule

MARCH		
9-11	PM GBAD/PEO Land Systems (USMC)	Yuma Proving Ground, AZ
16-18	IQT UAS and C-sUAS Demo Day (IQT)	Summit Point, WV
23 MAR-12 APR	Arctic Edge DH (N/NC)	Fort Greenley, AK
30 MAR-3 APR	Drone Smoke (AFCENT)	Shaw Air Force Base, SC
APRIL		
11-13	ISOF Lethality Last Line of Defense C-UAS Test (SOCOM)	Nevada
20 APR-16 MAY	Fire/DIU Low-Cost Sense Off (DIU)	Yuma Proving Ground, AZ
MAY		
4-15	OUSW R&E T-REX L-SHORAD (TRL 4-6) (OSW(R&E))	Camp Atterbury, IN
4-18	Fly Trap 5.0 (Fires PAE)	Lithuania
TBD	C5ISR Warden C-UAS Live-Fire Event (C5ISR)	Fort AP Hill, VA
JUNE		
3-6	Virginia Tech Test Demo (VT)	Blacksburg, VA
TBD	DIU LCD (DIU)	TBD
TBD	Blacksands (SOCOM)	Israel
TBD	Drone Dominance UAS Gauntlet 2.1 (TRMC)	TBD
JULY		
20-29	Project Convergence Capstone 6 (PC-C6) (Futures CC)	National Training Center, CA
AUGUST		
TBD	Falcon Peak 26.2 (JIATF 401)	TBD
TBD	Drone Dominance UAS Gauntlet 2.2 (TRMC)	TBD
TBD AUG/SEP	R&E Crimson Dragon (CUXS; Counter Swarm) (OSW(R&E))	Point Magu, CA
