

HYDROGEN AND NITROGEN 12 PACK CART SPECIFICATIONS

INTRODUCTION/BACKGROUND

This is for the procurement for the rental and fills of Hydrogen and Nitrogen 12 packs as used in C/C: J3P64B3 Metal Spray shop. All vendors must abide by all security requirements as addressed in the Security Requirements for All Contracts Performed At Corpus Christi Army Depot included in this Solicitation.

SCOPE

The rental and fills of (25) Hydrogen 12 pack carts and (45) Nitrogen 12 pack carts annually is required to support the metal spray process of all T700, 715-55, UH60 and AH64 aircraft parts.

PERIOD OF PERFORMANCE

This action is for a new Firm Fixed-Price (FFP) base year + (4) option periods. The Contractor shall be able to provide first delivery of 12pks within two (2) weeks of contract award.

PLACE OF PERFORMANCE

CCAD Metal Spray (J3P64B3)

WORK REQUIREMENTS

The contract shall be an annual rental of equipment along with the gases as needed to fill the carts:

- a) Quantity is 25, 12 Pack Carts annually of Industrial Grade Hydrogen
- b) Quantity is 45, 12 Pack Carts annually of Industrial Grade Nitrogen
- c) Monthly Pack/Cart rental (12 months)

Empty Hydrogen and Nitrogen carts will be replaced with filled carts on an as needed basis.

The Contractor shall supply the Government POC a delivery ticket stating the quantity of 12pks that was delivered at the end of each delivery day.
