

Question and Answers 01

N00173-26-Q-0003

Q1. Are the samples export controlled?

A1. Yes, the provided material and samples should not be shipped outside the United States.

Q2. Should the work be performed under the vendor's 10 CFR Part 50 quality accreditation?

A2. Not required.

Q3. Does NRL have a defined plan for the fatigue crack growth testing? The machined samples appear to be an atypical size that would require a specialized test frame.

A3. No fatigue crack growth testing is required, only machining of the geometry according to the provided drawing.
