1. What is the total number of registered and anticipated active users for the Learning Management System (LMS)?

We are in need of 3,000 student seats annually.

There needs to be an access point for students to be able to register for courses, generate a certificate of completion, as well as monitor metrics.

2. Will your training team be responsible for the day-to-day management of the LMS after implementation?

The training team would manage the day-to-day activities after the initial implementation of the SaaS.
