H-223-N001 INFORMATION ON EXPOSURE TO HAZARDOUS MATERIAL (NAVSEA) (JUL 2024) (Jul 2024)

Per 29 CFR 1910.1200, Hazard Communication, you, as a contractor employer with employees working at a Government facility, are hereby informed of the hazardous materials used at the Government facility which your employees may be exposed to while working here and also to suggest appropriate protective measures. Your own responsibilities as an employer, if any, are given in 29 CFR 1910.1200.

1. Hazardous materials your employees may be exposed to. Hazardous materials are materials which are cancer causing agents, toxic or highly toxic agents, reproductive toxins, irritants, corrosives, sensitizers, liver toxins, kidney toxins, agents which act on the blood forming system, and agents which damage the lungs, skins, eyes or mucous membranes. There are many potentially hazardous chemicals present at the Government facility which, unless controlled properly, could present a safety and health problem. The presence of many potentially hazardous materials may be apparent from the manufacturer's warning label on the hazardous material containers. The presence of many potentially hazardous materials may also be apparent due to their physical characteristics, such as the visual appearance of abrasive blasting dust or the distinctive smell of many solvents. These hazardous materials range in type and quantity. Typical hazardous materials include, but are not limited to:

- a. Metals, e.g., mercury, lead, chromium
- b. Paints and adhesives, e.g., varnishes and related products, sealing compounds, asphalt, deck and floor coverings, deck compounds
- c. Corrosives, e.g., acids, alkalis
- d. Compressed and liquefied gas, e.g., nitrogen, argon, oxygen, acetylene
- e. Lubricants and oils, e.g., greases, cutting oils, hydraulic oils, miscellaneous waxes and fats
- f. Fuels, e.g., liquid propellants, fuel oils, oxidizers, solid fuels
- g. Particulates, e.g., asbestos fiberglass, dust, fumes, mist

Depending on the material involved, materials such as these can present physical hazards and or health hazards.

2. Labeling of Hazardous Material. Containers of potentially hazardous chemicals bear manufacturer's labeling, which identifies the chemical and its manufacturer, and provides appropriate hazard warnings. In addition, some materials may be labeled with the National Fire Protection Association (NFPA) 704 label. This label uses a system of color coded symbols and numbers to convey the potential hazard of the material. The contractor should obtain information from NFPA concerning the interpretation of the 704 label.

3. Safety Data Sheets (SDS). The Safety Office maintains copies of manufacturers' SDS for potentially hazardous chemicals/materials that are known to be present in the Government facility. The contractor may,

upon request to the Safety Office, review SDS for any specific materials to which contractor employees may be exposed while performing work in the Government facility. This information may be reviewed in the Safety Office.

4. Appropriate Protective Measures. Exposure to potentially hazardous material may occur from inhalation, ingestion or skin contact with the material; therefore, the following precautions should be taken:

- a. Obey signs, directions and warning labels;
- b. Do not use unknown or labeled materials;
- c. Only operate equipment that you are authorized to operate, familiar with, and qualified to operate;
- d. If any health effects (skin rash, trouble breathing, etc.) occur, which you feel are caused by exposure to hazardous material, contact the Safety Office.

5. The Safety Office points of contact are as follows:

Information on the materials may be obtained from the Shipyard Safety and Health Office, Code 106.1, phone number (757-396-3702 or 757-396-7912).

Section M - Evaluation Factors for Award

FAR Clauses Incorporated by Full Text

52.212-2 Evaluation-Commercial Products and Commercial Services. (Deviation) (Tailored) (Mar 2026)

Evaluation-Commercial Products and Commercial Services (Feb 2026) (Deviation)

(a) Evaluation factors. The Government will award a contract resulting from this solicitation to the responsible Offeror whose offer conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following factors will be used to evaluate offers:

- **Technical Submission**
- **Price**
- **Past Performance**

Award(s) will be made for the technically acceptable item or combination of technically acceptable items that result in the lowest aggregate price to the Government.

Technical Acceptability: Will be determined by viewing the technical capability certification chart (per Attachment A) submitted for each item (or specification) to ensure that all of the technical requirements identified are met. Technical acceptability will be defined as follows:

Technical Ratings	
Rating	Description
Acceptable	Quote meets all of the requirements identified.
Unacceptable	Quote does not meet all of the requirements identified.

Failure to meet any technical requirement for an item (or specification) will make the quotation unacceptable for that item (or that specification).

If an item (or specification) is determined to be technically unacceptable, the quotation will be considered technically unacceptable and not eligible for award.

Price: The estimated amount for each line item will be added together to determine the total estimated price which will become the evaluated price.

Past Performance:

(1) The offeror's past performance shall be evaluated in accordance with FAR 13.106-2 or 15.305(a)(2), as applicable. This procurement is subject to Supplier Performance Risk System (SPRS), authorized by the Department of Defense for use by participating activities during the acquisition of supplies and services.

(2) The purpose of the SPRS is to provide contracting personnel with quantifiable past performance information regarding delivery and quality, as collected from existing DoD reporting systems. SPRS uses the past performance data collected to classify each supplier's performance by Federal Supply Class(es) or Service Code(s).

(3) **Quality:** The method used in SPRS to classify the quality of a supplier's past performance is a comparison of quality records among all suppliers who have provided goods or services to the Federal Government which are categorized in the same Federal Supply Class or Service Class (FSC). Based on the comparison among suppliers in a specific FSC group, suppliers are classified by SPRS into a color rating that represents the supplier's overall quality performance for that specific Federal Supply Class or Service Class. The following is a summarization of the SPRS classification colors:

1. Dark Blue: Top 5% of suppliers in FSC group*
2. Purple: Next 10% of suppliers in FSC group*
3. Green: Next 70% of suppliers in FSC group*
4. Yellow: Next 10% of suppliers in FSC group*
5. Red: Bottom 5% of suppliers in FSC group*

* If all supplier performance ratings for an entire FSC group are equal, all suppliers in that group will be classified Green.

(4) **Delivery:** Supplier delivery past performance is classified in SPRS by the supplier's percentage of on time deliveries. On time deliveries are calculated using the number of line items delivered and a weighting factor which reflects the length of time a delivery was overdue.

(5) SPRS classifications are established monthly for each supplier and can be reviewed at <https://sprs.csd.disa.mil/>. Suppliers are granted access to SPRS for their own classifications. Offerors are encouraged to review their own classifications as well as the SPRS reporting procedures and methodology detailed in the PPIRS-SR Procedures Manual and the SPRS User Guide available at <https://sprs.csd.disa.mil/>. The method to challenge a rating is also found on the identified website.

(6) Suppliers with no history in SPRS will be considered to have a neutral SPRS rating.

(b) Options: N/A

(c) **Notice of award.** A written notice of award or acceptance of an offer furnished to the successful Offeror within the time for acceptance specified in the offer, shall result in a binding contract without further action by either party. Before the offer's specified expiration time, the Government may accept an offer (or part of an offer), whether or not there are negotiations after its receipt, unless a written notice of withdrawal is received before award.

The offeror's proposed price will be evaluated on the basis of price reasonableness, in accordance with FAR 13.106-3. All prices must be considered fair and reasonable as determined by the Government. Price quote shall be held firm for sixty (30) days.
