CONTINUATION SHEET

1. **QUESTION:** We are looking at this project and based on the specs, we are not able to quote aluminum slats. At a 54 PSF wind rating we can quote steel or stainless steel slats. The guides have to be steel. The hood can be aluminum, steel or stainless steel. Section 08 33 24, para 2.1 says that the OH coiling doors are to be constructed of aluminum. Para 2.2.2.1 specifies a 54 PSF wind load. Aluminum doors don't meet the specified wind load.

ANSWER: Corrosion resistant material required. If required loading cannot be met with aluminum, stainless is an acceptable alternate.
