Addendum to 52.212-1, Instructions to Offerors - Commercial Products and Commercial Services

Miscellaneous text in this section has been modified to:

INSTRUCTIONS TO OFFERORS

SOLICITATION N4008526R0090
DEMOLISH VACANT BEQs BUILDINGS 532 AND 132H

GENERAL REQUIREMENTS:

TYPE OF CONTRACT/COMPETITION REQUIREMENTS:

This is a Firm Fixed Price (FFP) construction requirement and will be issued as an SDVOSB set-aside, single award, standalone contract.

POINT OF CONTACT:

Mrs. Lindsay S. Gould, Contract Specialist
Phone: (847) 688-5395 extension 210
Email: lindsay.s.gould.civ@us.navy.mil

STATEMENT OF WORK (SOW):

This solicitation incorporates the attached Request for Proposal (RFP). There are two (2) scopes of work included in this requirement. All work shall be accomplished in accordance with the RFP and this Solicitation.

PERIOD OF PERFORMANCE:

All work shall be completed and ready for use no later than 520 calendar days (inclusive of both buildings) after the date of award (this includes time for processing of base passes, submittals, reports, all work, closeout and any other work associated with this project).

NAICS AND SIZE STANDARD:

NAICS code for this solicitation is 238910, Site Preparation Contractors, with a Small Business Size Standard of \$19 Million.

LOCATION:

The work shall be performed at:
Naval Station Great Lakes, Great Lakes, IL

SITE VISIT:

The Site Visit will occur Tuesday, 10 March 2026, at 0900am CT.

Please provide to the Contract Specialist via email the number of attendees for this site visit, inclusive of subcontractors no later than Friday, 6 March 2026 by 12pm CT.

Offerors should be properly attired for conducting a site visit with appropriate safety gear for inspecting proposed areas. Due to security restrictions, photographs of work areas affected by this RFP will need prior approval and no workstations or Government personnel are to be photographed at any time.

All attendees must have a valid (non-expired) state or Government identification (e.g. Real ID Driver's License, State ID, Passport, DBIDS) or they will not be allowed in transportation.

The address to meet for the Site Visit is:
610 Farragut Avenue
Great Lakes, IL 60088.

There will be a white bus on the North side of the parking lot, away from the Visitor Center Building. Contractors will need to be escorted into the Naval Base to see the project buildings.

PRE-PROPOSAL INQUIRIES (PPIs):

Inquiries and questions on this solicitation shall be submitted in writing electronically to the Contract Specialist using the Pre-Proposal Inquiries (PPI) form provided as Attachment 4 of this solicitation. Please ensure that the PPI form is returned as an Excel spreadsheet, not as a .pdf. The Point of Contact for inquiries is Lindsay Gould at lindsay.s.gould.civ@us.navy.mil. All PPIs must be received no later than Monday 16 March 2026, by 1200pm CT. It is the offeror's responsibility to verify that PPIs were received by the Government.

LIQUIDATED DAMAGES: In accordance with FAR 52.211-12, Liquidated Damages (LDs) will be assessed per day for every calendar day of delay until the work is completed or accepted, whichever occurs first. The amounts for each CLIN are as follows.

CLIN 0001: \$1,294.33

CLIN 0002: \$1,248.41

DEPARTMENT OF LABOR (DoL) CONSTRUCTION WAGE RATE DETERMINATION(S):

In accordance with FAR 22.407 (clause 52.222-6, Construction Wage Rate Requirements), Construction Wage Rate Determinations IL20260008 dated 01/09/26, IL20260011 dated 01/02/26, and IL20260020 dated 01/02/26 are included with and incorporated into this solicitation.

SYSTEM FOR AWARD MANAGEMENT (SAM):

Offeror must be registered in the SAM database IAW FAR 52.204-7 in order to be awarded a contract.

ESTIMATED COST RANGE:

The estimated value of this project is between \$5,000,000 to \$10,000,000.

ELECTRONIC INVOICING:

The Department of Defense (DoD) Wide Area Workflow (WAWF) system shall be used for the submission of invoices in accordance with DFARS CLAUSE 252.232-7006.

BONDING & INSURANCE:

A bid guarantee is required with this proposal. Performance and Payment bonds equal to 100% of the awarded dollar value are required after award in Accordance With (IAW) FAR 52.228-15. Also, IAW 52.225-5 Insurance Work on a Government Installation, adequate proof of insurance coverage is required within 15 days after award. No work on Government Installation may be started until insurance and bonds have been approved by the Contract Specialist/Contracting Officer.

VETS 4212 REGISTRATION:

Provide proof of VETS 4212 registration with your proposal.

PROPOSAL DUE DATE & SUBMISSION INSTRUCTIONS:

Proposal is due no later than Thursday, 2 April 2026, by 1200pm CT.

Electronic (email) submission of proposal will be accepted and is preferred. The proposal must include the following elements:

PROPOSALS MUST INCLUDE:

PRICE PROPOSAL SUBMITTAL CHECKLIST INCLUDED-

TAB 1 SF 1449 (Fill in Block 17a, and fill in Blocks 30a, b, c. Enter Price on SF 1449 page 3 Total Price for all line items 0001 through 0002. Fill in Clauses 252.204-7017, 52.212-3)

TAB 1a. Attachment 8- Complete the pricing schedule for Building 532. The total price for items 2-6 shall be added to the base price total on line item 1. The total price shall also be placed on the SF 1449 line item 0001.

TAB 2 Acknowledgement of all amendments (Block 15 of SF 30) as applicable

TAB 2a. Attachment 9- Complete the pricing schedule for Building 132H. The total price for items 2-6 shall be added to the base price total on line item 1. The total price shall also be placed on the SF 1449 line item 0001.

TAB 3 One (1) executed Bid Guarantee (SF-24). Must be at least 20% of the proposed price not exceeding \$3 Million.

TAB 4 Limitations on Subcontracting Certification Form (Attachment 4)

TAB 5 Registration of VETS 4212 Federal Contractor Reporting

TECHNICAL PROPOSAL SUBMITTAL CHECKLIST INCLUDED-

TAB 1 Factor 1 - Technical Approach

TAB 2 Factor 2 - Experience Insert applicable copies of Construction and Design Experience Project Data Sheets (Attachments 5 and 6)

TAB 3 Factor 3 - Past Performance (Attachment 7)

TAB 4 Factor 4 - Safety

TAB 5 Factor 5 - Technical Solution

10. Offline_Steam Map

Electronic (email) submission of proposal is preferred. If emailed, proposals shall be sent to Lindsay Gould at: lindsay.s.gould.civ@us.navy.mil.

If you choose to provide hard copies instead of sending electronically, the package(s) containing proposal must be sealed. Offeror shall affix their name and return addresses in the upper left corner of the proposal package. The outermost wrapper of all packages should clearly identify the solicitation number N4008526R0090. Offeror shall provide two (2) hardcopies of their Proposal, including all of the above-mentioned items. Hard-copy originals, if being provided, should be sent to:

NAVAL FACILITIES ENGINEERING COMMAND MID ATLANTIC,
PWD Great Lakes
ATTN Mrs. Lindsay Gould, Contract Specialist
310 Seabee Way, Bldg. 1H
Great Lakes, IL 60088-2814

EVALUATION:

1. The Government reserves the right to eliminate from consideration for award any or all offers at any time prior to award of the contract; to negotiate with offerors in the competitive range; and to award the contract to the offeror submitting the lowest priced, technically acceptable offer.

2. As stated in the solicitation, the Government intends to evaluate proposals and award a contract without discussions with offerors (except clarifications as described in FAR 15.306(a)). The Government reserves the right to conduct discussions if the Contracting Officer later determines them to be necessary. In addition, if the Contracting Officer determines that the number of proposals that would otherwise be in the competitive range exceeds the number at which an efficient competition can be conducted, the Contracting Officer may limit the number of proposals in the competitive range to the greatest number that will permit an efficient competition among the most highly rated proposals.

EVALUATION FACTORS

1. The solicitation requires the evaluation of price and the following non-price factors:

Factor 1 - Technical Approach

Factor 2 - Experience

Factor 3 - Past Performance

Factor 4 - Safety

Factor 5 - Technical Solution

The distinction between experience and past performance is experience pertains to the types of work and volume of work completed by a contractor that are comparable to the types of work covered by this requirement, in terms of size, scope, and complexity. Past performance pertains to both the relevance of recent efforts and how well a contractor has performed on the contracts.

2. Basis of Evaluation and Submittal Requirements for Each Factor.

(a) Price: CLIN 0001- The Contractor shall furnish all labor, tools, transportation, supervision, materials, inspections, equipment, and safety compliance necessary to perform all work required to completely demolish and remove Building 532, a vacant 3-story student barrack building with a partial basement onboard Naval Station Great Lakes in Great Lakes, IL.

(b) Price: CLIN 0002- The Contractor shall furnish all labor, tools, transportation, supervision, materials, inspections, equipment, and safety compliance necessary to perform all work required to completely demolish and remove Building 132H, a vacant 4-story student barrack onboard Naval Station Great Lakes in Great Lakes, IL.

(1) Solicitation Submittal Requirements: Please provide pricing for CLINs 0001 and 0002 of the SF-1442, Registration of VETS 4212 Federal Contractor Reporting, Bid Bond of at least 20% of the proposed price not exceeding \$3 Million, Limitations on Subcontracting Certification Form, Completed CPARS Evaluation or Past Performance Questionnaire (PPQ) if CPARS not completed, and any Amendments issued after the Solicitation that are signed by the appropriate representative.

(2) Basis of Evaluation: The Government will evaluate price based on the total price. Total price consists of the basic requirements and all line items (see Section B of the solicitation). Analysis will be performed by one or more of the following techniques to ensure a fair and reasonable price:

- (i) Comparison of proposed prices received in response to the RFP.
- (ii) Comparison of proposed prices with the IGCE.
- (iii) Comparison of proposed prices with available historical information.
- (iv) Comparison of market survey results.

(b) Technical Factors:

(1) Factor 1, Technical Approach:

(i) Solicitation Submittal Requirements:

The composition and management of the firms proposed as the design-build (DB) team for this contract will be evaluated in this factor.

The Offeror shall submit the following information:

- (1) Provide a narrative describing the proposed primary construction firms and primary design firms for this contract and the rationale for proposing this arrangement. Provide the role, responsibilities, and contractual relationships between the various firms (see FAR Subpart 9.6). The narrative shall also include a simple organizational chart that clearly identifies the lines of authority between the entities. If the experience of an entity is being claimed in Factor 2, that entity must be named in the above narrative and organizational chart.

The technical approach narrative shall be limited to one (1) double-sided page (or two (2) single-sided pages) including the organizational chart. The information requested in item #2 below is not included in this page limitation.

- (2) In addition to the narrative, the Offeror shall submit a signed copy of a joint venture agreement, partnership agreement, teaming agreement, approved mentor protege agreement (MPA), or letter of commitment for each member of the Offeror's team identified above (e.g., joint venture member, partner, team member, subcontractor, parent company, subsidiary, or other affiliated company, etc.).

(ii) Basis of Evaluation:

The assessment of the Offeror's technical approach will be used as a means to evaluate the organizational structure and teaming relationships proposed by the Offeror. This factor will be rated on an Acceptable or Unacceptable basis.

(2) **Factor 2, Experience:**

(i) Solicitation Submittal Requirements:

The Offeror shall submit the following information:

(1) Construction Experience:

Submit a minimum of one (1) and maximum of five (5) relevant construction projects for the Offeror that best demonstrates your experience on relevant projects that are similar in size, scope, and complexity to the RFP. For purposes of this evaluation, a relevant project is further defined as a full structural demolition of a multi-story building of comparable size (minimum of 90,000 square feet), scope and complexity to this RFP. Key Factors include:

- Building Type & Size: Experience demolishing multi-story (minimum 3-stories) barracks, dormitory, hotel, hospital, and/or apartment buildings with a total building square footage with a minimum of 90,000 square feet.
- Complexity: Projects involving large-scale demolition, phased takedown strategies, hazardous material abatement, and full site restoration.
- Experience on a demolition project exceeding \$2 million.
- Regulatory Compliance: Experience obtaining and adhering to environmental permits, safety regulations, and proper disposal of demolition debris per federal and state guidelines.
- Occupied Site Considerations: Demonstrated ability to perform demolition on active installations or business district, ensuring minimal disruptions to surrounding facilities.

Note: Offerors are not required to demonstrate all key elements within a single project. The Government will evaluate the Offeror's experience based on the collective demonstration of the key elements across the submitted projects. Failure to demonstrate every key element in each project will not, by itself, render the Offeror unacceptable.

Projects submitted for the Offeror shall be completed within the past five (5) years of the date of issuance of this RFP.

A project is defined as a construction project performed under a single task order or contract. For multiple award and indefinite delivery/indefinite quantity type contracts, the contract as a whole shall not be submitted as a project; rather Offerors shall submit the work performed under a task order as a project.

The attached Construction & Design Experience Project Data Sheet (Attachment 5/6) is MANDATORY and SHALL be used to submit project information. If the same project is being used to demonstrate construction and design experience, submit separate Project Data Sheets for construction and design. Except as specifically requested, the Government will not consider information submitted in addition to this form. Individual blocks on this form may be expanded; however, total length for each project data sheet shall not exceed one (1) double-sided page (or two (2) single-sided pages).

For all submitted projects, the description of the project shall clearly describe the scope of work performed and the relevancy to the project requirements of this RFP (i.e., unique features, area, construction methods). In addition, the description should also address any sustainable features for the project, including specific descriptions of those features. Provide applicable documentation on projects that were validated and/or certified through U.S. Green Building Council (USGBC) or the equivalent organization or process.

If the Offeror is a Joint Venture (JV), relevant project experience should be submitted for projects completed by the Joint Venture entity. If the Joint Venture does not have shared experience, projects may be submitted for the Joint Venture members. Offerors who fail to submit experience for all Joint Venture members may be rated lower. Offerors are still limited to a total of five (5) projects combined.

If an Offeror is utilizing experience information of affiliates/subsidiaries/parent/LLC/LTD member companies (name is not exactly as stated on the SF1442), the proposal shall clearly demonstrate that the affiliate/subsidiary/parent firm will have meaningful involvement in the performance of the contract.

(2) Design Experience

Submit a minimum of one (1) and maximum of five (5) relevant design projects for the design team that best demonstrates design experience on relevant projects that are similar in size, scope, and complexity to the RFP. For purposes of this evaluation, a relevant project is further defined as:

- Structural engineering assessments for sequencing the demolition of large barrack-style buildings
- Planning for hazardous material abatement and disposal

- Site reuse and restoration strategies post-demolition, including grading and preparation for future development

Projects submitted shall be completed within the past five (5) years of the date of issuance of this RFP. For design-build projects, the design portion of the contract shall have been completed within the past five (5) years of the date of issuance of this RFP.

A project is defined as a complete design effort performed under a single task order or contract/subcontract. For multiple award and indefinite delivery/indefinite quantity type contracts, the contract as a whole shall not be submitted as a project; rather Offerors shall submit the work performed under a task order as a project.

The attached Construction & Design Experience Project Data Sheet (Attachment 5/6) is MANDATORY and SHALL be used to submit project information. If the same project is being used to demonstrate construction and design experience, submit separate Project Data Sheets for construction and design. Except as specifically requested, the Government will not consider information submitted in addition to this form. Individual blocks on this form may be expanded; however, total length for each project data sheet shall not exceed one (1) double-sided page (or two (2) single-sided pages).

For all submitted projects, the description of the project shall clearly describe the scope of work performed and the relevancy to the project requirements of this RFP (i.e., unique features, area, construction methods). In addition, the description should also address any sustainable features for the project, including specific descriptions of those features - Demonstrating recycling efforts, waste diversion strategies, and sustainable demolition practices.

If an Offeror is utilizing experience information of affiliates/subsidiaries/parent/LLC/LTD member companies (name is not exactly as stated on the award document), the proposal shall clearly demonstrate that the affiliate/subsidiary/parent firm will have meaningful involvement in the performance of the contract.

The Offeror may utilize experience of a design subcontractor to demonstrate design experience under this evaluation factor. The Offer must provide a supporting joint venture agreement, partnership agreement, teaming agreement, or letter of commitment and an explanation of the meaningful involvement for the design subcontractor. Offerors proposing multiple design firms should submit relevant project experience for all design firms. Failure to do so may result in a lower rating. Offerors are still limited to a total of five (5) projects combined.

(ii) Basis of Evaluation:

The basis of evaluation will include the Offeror's demonstrated experience and depth of experience in performing relevant construction and design projects as defined in the solicitation submittal requirements. The assessment of the Offeror's relevant experience will be used as a means of evaluating the capability of the Offeror to successfully meet the requirements of the RFP. The Government will only review five projects for construction and five for design. Any projects submitted in excess of the five (5) for Construction Experience and five (5) for Design Experience will not be considered.

Relevant projects where the Offeror and the proposed design firm(s) have previously worked together may be considered more favorably than those that have not worked together.

Relevant projects that demonstrate design-build experience may be considered more favorably than those that do not have design-build experience.

Relevant projects that demonstrate DoD or Government experience may be considered more favorably than those that do not have DoD or Government experience.

(3) Factor 3, Past Performance:

(i) Solicitation Submittal Requirements:

For purposes of this evaluation, a relevant project is further defined as:

- Building Type & Size: Experience demolishing multi-story (minimum 3-stories) barracks, dormitory, hotel, hospital, and/or apartment buildings with a total building square footage with a minimum of 90,000 square feet.
- Complexity: Projects involving large-scale demolition, phased takedown strategies, hazardous material abatement, and full site restoration.
- Experience on a demolition project exceeding \$2 million.
- Regulatory Compliance: Experience obtaining and adhering to environmental permits, safety regulations, and proper disposal of demolition debris per federal and state guidelines.
- Occupied Site Considerations: Demonstrated ability to perform demolition on active installations or business district, ensuring minimal disruptions to surrounding facilities.

Note: Offerors are not required to demonstrate all key elements within a single project. The Government will evaluate the Offeror's past performance based on the collective demonstration of the key elements across the submitted projects. Failure to demonstrate every key element in each project will not, by itself, render the Offeror unacceptable.

For this solicitation, a recent project shall be completed within the past five (5) years of the date of issuance of this RFP.

If a completed Contractor Performance Assessment Reporting System (CPARS) evaluation is available, it shall be submitted with the proposal for each project included in Factor 2 for construction experience. If a completed AE Contractor Performance Assessment Reporting System (CPARS) evaluation is available, it shall be submitted with the proposal for each project included in Factor 2 for design experience. If there is not a completed CPARS evaluation then submit Past Performance Questionnaires (Attachment B) for each project included in Factor 2 for both Construction Experience and Design Experience. The Offeror should provide completed Past Performance Questionnaires (PPQ) in the proposal. Offerors shall not incorporate by reference into their proposal PPQs previously submitted for other RFPs. However, this does not preclude the Government from utilizing previously submitted PPQ information in the past performance evaluation. If the Offeror is unable to obtain a completed PPQ from a client for a project(s) before proposal closing date, the Offeror shall complete and submit with the proposal the first page of the PPQ, which will provide contract and client information for the respective project(s). The Government may make reasonable attempts to contact the client noted for that project(s) to obtain the PPQ information. However, Offerors should follow-up with clients/references to help ensure timely submittal of questionnaires. If the client requests, questionnaires may be submitted directly to the Government's point of contact, Contract Specialist Lindsay Gould at lindsay.s.gould.civ@us.navy.mil.

Offerors may provide any information on problems encountered and the corrective actions taken on projects submitted under Factor 2 - Experience. Offerors may also address any adverse past performance issues. Explanations shall not exceed two (2) double-sided pages (or four (4) single-sided pages) in total.

The Government reserves the right to contact references for verification or additional information. The Government's inability to contact any of the Offeror's references or the references unwillingness to provide the information requested may affect the Government's evaluation of this factor.

Performance award or additional information submitted will not be considered.

(ii) Basis of Evaluation:

This evaluation will consider how well the Offeror's team performed on relevant projects submitted under Factor 2 - Experience and may also consider past performance on other projects currently documented in known sources."

The Government will consider the recency and relevance of the information, the source of the information, context of the data, and general trends in the Contractor's performance. This evaluation is separate and distinct from the Contracting Officer's responsibility determination. The assessment of the Offeror's team's past performance will be used as a means of evaluating the Offeror's team's probability to successfully meet the requirements of the RFP.

Offerors lacking relevant past performance history will receive a NEUTRAL Confidence rating.

(4) **Factor 4, Safety:**

Solicitation Submittal Requirements:

The Offeror shall submit the following information: The Days Away from Work, Restricted Duty, or Job Transfer (DART) Rate; and Total Case Rate (TCR) for the specified five (5) Calendar Years (CY), as well as a safety narrative, as described below. For a partnership or joint venture, the Offeror shall submit separate DART and TCR rates for the specified five (5) CY for each contractor who is part of the partnership/joint venture; however, only one safety narrative is required. Any fatalities experienced within this 5-year timeframe must be explained in detail, to include root cause and corrective actions.

NOTE: DART and TCR shall not be submitted for subcontractors

1. DART Rate: Submit five (5) previous complete calendar years' [CY2025, 2024, 2023, 2022, and 2021] worth of data (not an overall average). If the Offeror has no DART rate, for any year, affirmatively state so and explain why.

a. DART cases include injuries or illnesses resulting in death, days away from work, and/or restricted work or transfer to another job days beyond the day of injury/illness.

b. Calculation of DART rate: Multiply the total number of DART cases by 200,000, and then divide by the number of employee labor hours worked

2. TCR Rate: Submit five (5) previous complete calendar years' [CY2025, 2024, 2023, 2022, and 2021] worth of data (not an overall average). If the Offeror has no TCR rate, for any year, affirmatively state so and explain why.

a. TCR cases include injuries or illnesses resulting in death, days away from work, restricted work or transfer to another job days beyond the day of injury/illness, medical treatment beyond first aid, or loss of consciousness.

b. Calculation of TCR rate: Multiply the total number of TCR incidents by 200,000, and then divide by the number of employee labor hours worked

3. Technical Approach to Safety: Submit a narrative that addresses the following:

a. Describe the Offeror's approach to implementing and executing a Safety Management System (SMS) including Management/Leadership involvement, Employee involvement, Hazard prevention, Hazard control, Worksite analysis, and Safety and health training, to include the standard(s) used to benchmark the SMS.

b. Describe the evaluation process used to select potential subcontractors.

c. Describe the processes of how the Offeror will oversee safety compliance of subcontractors at all levels throughout performance of the contract (to include the Offeror's own in-house workforce).

d. The Technical Approach to Safety narrative shall be limited to two (2) single-sided pages or one (1) double-sided page.

4. The Government reserves the right to review other available sources (public/Government internal) of information. These may include but are not limited to OSHA data, NAVFAC's Contractor Incident Reporting System (CIRS), Contractor Performance Assessment Reporting System (CPARS), Electronic Contract Management System (eCMS), etc.

Basis of Evaluation:

The Government is seeking to determine that the Offeror has consistently demonstrated a commitment to safety and that the Offeror plans to properly manage and implement safety procedures for itself and its subcontractors. To meet the minimum requirements, the Offeror must demonstrate the following:

1. DART rates at or below 2.99

2. TCR Rates at or below 4.49

NOTE: If the Offeror's rates exceed the established levels above for any of the five years, it will result in a deficiency.

3. Technical Approach to Safety

a. Offeror describes a viable SMS that addresses elements; such as Management/Leadership involvement, Employee involvement, Hazard prevention, Hazard control, Worksite analysis, and Safety and health training, to include the standard(s) used to benchmark the SMS.

b. Offeror describes a methodical process of evaluating subcontractor's safety performance in their selection process.

c. Offeror describes a logical management plan to hold both themselves and their subcontractors accountable for adhering to the safety requirements of the contract.

4. The Government reserves the right to review other available sources (public/Government internal) of information. These may include but are not limited to OSHA data, NAVFAC's Contractor Incident Reporting System (CIRS), Contractor Performance Assessment Reporting System (CPARS), Electronic Contract Management System (eCMS), etc.

(5) Factor 5, Technical Solution:

(i) Solicitation Submittal Requirements:

Provide a narrative describing the technical solution to the project that meets the requirements of the RFP. Include the following:

- Demolition Plan: A phased approach to structural takedown, outlining equipment selection, sequencing, and debris handling.
- Site Preparation & Protection: Methods for securing the site, preventing dust and debris dispersion, and ensuring protection of adjacent occupied structures, roads, and utilities.
- Schedule and Phasing: A detailed timeline covering permitting, mobilization, demolition activities, and site restoration.
- Environmental and Safety Considerations: Compliance with EPA, OSHA, and local regulations, addressing fall protection, air quality control, noise mitigation, and worker/public safety.
- Utility Coordination: Process for safely disconnecting and capping utilities before demolition.

Narrative shall not exceed two (2) double-sided pages (or four (4) single-sided pages). Up to three (3) conceptual drawings may be provided to supplement the narrative (i.e., floor plan, exterior elevation, and site plan).

(ii) Basis of Evaluation:

The Government will evaluate the narrative and conceptual drawings (if included) considering the extent to which the Offeror demonstrates a clear understanding of the architectural and engineering requirements of the project. The Government will evaluate the Offeror's technical solution to determine adherence to the technical requirements of the RFP.
