Description of the item or service required:

Markforged X7 Field Edition and PC:
Rugged, field-deployable industrial 3D printer and PC solution for tactical response to supply challenges in remote locations.

The requested material or service represents the minimum requirements of the government (select Y/N):

Select One: Yes

Specific characteristics of the material or service that limit the availability to a sole source or brand name. For example, the material/service must be compatible in all aspects (form, fit and function) with existing systems presently installed/performing. (unique features, function of the item, etc.). Describe in detail why only this suggested source can furnish the requirements to the exclusion of other sources. Choose the appropriate box(s) below and describe the equipment/function you have now and how the new item/service must coordinate, connect, or interface with the existing system.

This requirement is for additive manufacturing (3D Printer and parts) and is currently the only authorized additive manufacturer to be installed for the submarine forces at this time PER NAVSEA LTR PMS394/0031 and Engineering Change Proposal PMS392 for testing capability. The use of any other 3D printing and parts require the approval of Ship Alteration (SHIPALT) from NAVSEA until formal alteration, logistics and installation documentation and support is available at this time there are no other authorized AMs. The use of any other AMs poses a safety and health risk without prior approval. Printing Process: 3rd Generation Continuous Fiber Reinforcement (CFR) System, Continuous Carbon Fiber, Fiber Glass and Kevlar Reinforcement, Fused Filament Fabrication, Reinforced precision machined gantry, material sensors, laser assist calibration, standard mains 100-240 VAC, Z Layer Resolution: 50 μ m - 250 μ m, Printing Media: composite base filaments, continuous fibers, onyx, onyx FR, Onyx ESD, Nylon, Precise PLA, Smooth TPU95A, Carbon Fiber, Carbon Fiber FR, Fiberglass, Aramid Fiber (Kevlar®), HSHF Fiberglass, Internal Part Geometry: Closed cell infill with continuous fiber reinforcement, Print Bed: Removable/Replaceable Precision Ground Composite, Precision laser monitor/scanner, Physical Dimensions/Weight: Width 584 mm, Depth 483 mm, Height 914 mm, Weight 48 kg /106 lbs, Build Volume: Width 330 mm, Depth 270 mm, Height 200 mm, Software Options: Eiger Cloud, Offline Eiger, Inspection, Simulation, Fleet, Basic, Essential, Advanced, On-Prem

☐ A patent, copyright or proprietary data limits competition. The proprietary data is *(If applicable, include patent/copyright drawing numbers, technical manual (TM) numbers, etc)*

☐ These are “direct replacements” parts/components for existing equipment as specified below. *(NOTE: Identify main unit or existing equipment and why no other parts will work.)*
