SOURCES SOUGHT/RFI DESCRIPTION

This is NOT a solicitation announcement. This is a Sources Sought Notice / RFI only. The purpose of this Sources Sought Notice / RFI is to gain information about potential qualified sources and their size classification relative to **NAICS 339112 (size standard of 1,000 Employees)**. Responses to this Sources Sought Notice / RFI will be used by the Government to make appropriate acquisition decisions. After review of the responses to this Sources Sought Notice / RFI, further RFIs and/or a solicitation or other announcements may be published.

The Department of Veterans Affairs (VA) is seeking sources capable of providing Omnicell Equipments and related services **OR EQUAL** for Tucson VA Healthcare System.

1. Performance Monitoring

1.1. Pharmacy Service Line staff will ensure proper testing and functionality of the new Omnicell cabinets to ensure proper working order prior to accepting receipt of the items and services.

1.1.1. The vendor shall submit a cost proposal with an associated project management plan addressing the tasks associated with the SOW, as described in the evaluation criteria section.

1.1.1.1. Subtasks not specified in the SOW will be identified and include associated costs by project task, milestones and deliverable dates.

1.1.1.2. All written deliverables must be phrased in terms and language that can be easily understood by non-technical personnel, i.e. a person without subject matter expertise.

1.1.1.3. All document deliverables, hard copy and electronic, must be in formats specified-at a minimum, the formats must be in industry accepted standards.

1.1.1.4. A kickoff meeting will be held at a location and time selected by VAMC Tucson where the vendor and its staff will be introduced.

1.1.1.5. The vendor and/or its staff must have knowledge and expertise of the environment for which the work is to be performed.

1.1.1.6. The vendor shall provide total system integration for each of procedure rooms listed above.

2. Security Requirements

2.1. The proposed project uses an existing Virtual Local Area Network (VLAN), standing HL7 interfaces and existing secure vendor remote access.

2.2. Other Pertinent Information or Special Considerations

2.2.1.This system will be located on a secure Virtual Local Area Network (VLAN). The system, while using VA IT resources for networking, does not link, nor have access to, other VA network resources.

3. Packaging, Packing and Shipping Instructions

3.1. All systems/components/software are to be shipped to their final destinations prior to installation; any associated shipping costs must be included in the contract.

4. Inspection and Acceptance Criteria.

4.1. The Program Manager, COR, and/or their representatives will test the equipment prior to acceptance. VA currently utilizes Omnicell in workflow and will run test scenarios that mirror regular workflow to ensure the installed updates/systems are working properly. The staff members are fully trained in the use and functionality of the Omnicell workflow, switching to another manufacturer would increase the costs for retraining.

5. Risk Control:

5.1. The system addition presents no additional infection, physical security, and/or information security risk.

5.2. Place of Performance

5.2.1.Government site: Southern Arizona VA Health Care System – main campus (Tucson, AZ)

6.4. System Integration:

6.4.1.All proposed equipment shall be fully compatible with the facility's existing Omnicell enterprise server environment, including OmniCenter® or other Omnicell-supported centralized platforms currently in use. The Contractor shall ensure that all components connect reliably to the enterprise server for authentication, data management, and system configuration.

6.5. Data Management and Integration

6.5.1.The systems shall support centralized management of medication inventory, access logs, transaction histories, configuration settings, and user profiles. All data shall be stored and managed through the facility's Omnicell central server, without local retention beyond temporary operational buffering.

6.5.2.The Contractor shall ensure the solution supports integration with the facility's Electronic Health Record (EHR) system and any associated interface engines required for clinical documentation, medication administration, or workflow interoperability.

6.6. Cybersecurity and Network Requirements

6.6.1.The Contractor shall ensure all communication between the devices and the centralized Omnicell server utilizes secure, encrypted protocols compliant with federal and organizational cybersecurity requirements.

6.6.2. The Contractor shall provide documentation outlining required network ports, communication protocols, and server dependencies to support secure deployment and sustainment.
