

SALIENT CHARACTERISTICS FOR 5' PERFORMANCE LOCKER

GENERAL SPECIFICATIONS/CHARACTERISTICS

The 5' Performance Locker is a standard QUADCON shipping container, custom-fabricated to anchor a functional training rig. It is designed to create a multi-modality training center for up to 30 people.

Construction:

Features superior weatherproofing with a hot-dip galvanized and powder-coated finish for durability.

Stability:

The locker has an ultra-stable, patented freestanding design with adjustable footpads. The structure utilizes side-mounted brackets and heavy-duty 7-gauge, 3x3 steel tubing. It should not be placed on a grade exceeding 1" over 5'.

Storage:

The unit includes integrated and lockable storage.

Standard Rig Components:

- Stainless Steel "ACE" Pull-up Bar
- 5 Pull-up Stations
- 1 Dip Bar
- 2 sets of J-Cups
- 2 Squat Racks
- 1 Battling Rope Hook
- 1 Wall Ball Target
- 1 12' Rope Tower

EQUIPMENT PACKAGE

Heavy Version (3000 lbs): Includes all items from the Light package (container, rig, attachments, integrated storage), plus a comprehensive set of additional equipment, including:

Strength:

Medicine Balls, Kettlebells, Olympic Bars, Bumper Plates, an Adjustable Bench, and a Hex Bar.

Conditioning & Agility:

Battling Rope, Agility Cones, Jump Ropes, and a Drag Sled.

Recovery:

Mobility Bands, Lacrosse Balls, and a Foam Roller/Stick.
