

- **For pricing accuracy and technical compliance, could you please confirm whether the requirement is for: A 100-ton all terrain crane only, A Broderson carry deck crane only, or Both crane types to support the lift plan?**
 - *Any crane that can operate within the building, within our height restrictions, and safely lift the requirements listed in the statement of work will suffice.*
- **Is the contractor required to furnish certified riggers and/or a signalman for this requirement, or will the Government provide rigging personnel?**
 - *The minimum number of personnel is listed in the Statement of Work (SOW). They are to be provided by the contractor.*
- **Is a carry deck or any additional support equipment required beyond the 100-Ton All Terrain Crane with certified operator?**
 - *Answer: Regarding any additional support equipment, contractor's should identify in the bid any support equipment the contractor deems necessary in order to safely lift the items in the statement of work. No additional support equipment was expected to be required.*
- **Are there any specific crew composition requirements that must be included in the contractor's pricing?**
 - *If they are not in the SOW then no other requirement needs to be included.*
