

Request for Information

The Naval Supply Systems Command (NAVSUP) Fleet Logistics Center Norfolk (FLCN) Mechanicsburg Contracting Office is performing market research on behalf of NAVSUP Business System Center (BSC) to identify capable industry resources that can provide software engineering/developing support in support of the NAVSUP One Touch Support (OTS) system. The purpose of this form is to allow capable contractors the opportunity to identify themselves with regard to interest and technical capability.

Background

NAVSUP BSC utilizes web-based logistical and inventory management tools, as well as provides critical “real time” worldwide supply logistics visibility. NAVSUP OTS not only improves and simplifies day-to-day supply logistics management; it also gives our warfighters in the Fleet and on the front lines a critical tool to help them prevail in combat. This effort will provide support services to continue the sustainment, maintenance, and enhancement of the NAVSUP OTS functional and technical capabilities. NAVSUP OTS is a Navy hosted web application that reduces the cost of logistics by acting as a broker between multiple IT systems that process material requisitions. The system provides the warfighter with a single point-of-entry to access a portfolio of DoD and Navy supply systems, expanding their visibility of end-to-end supply chain data. NAVSUP OTS centralizes the capability to perform supply functions against multiple systems, while providing real time supply and logistics information that supports data driven decisions.

Description of Services

See attached draft Performance Work Statement (PWS) for further details.

Current legacy software acquisition and development practices in the Department of Defense do not provide the agility to deploy new software "at the speed of operations." Support services are also required to move from legacy software development to industry best practices for rapid, secure software development, specifically using Agile Scrum practices. NAVSUP OTS Program Management Office (PMO)/Project Manager desires development of the NAVSUP OTS solution to include software development, test and evaluation, information assurance, and test support. The Contractor shall evolve NAVSUP OTS capabilities to support Government prioritized features. While forecasted features and requirements will be provided, consistent with Agile- and Sprint-based development, the features and requirements are subject to change based on Sprint planning during the period of the contract. The forecasted features may be accelerated, changed, or interchanged within the scope as determined in program increment or sprint planning.

This effort is to obtain contractor support services to provide the following:

- Agile Software Delivery Support
 - o Agile Release Teams overseen by NAVSUP Government Product Owner and Scrum Master
 - o Versatilist - Software Engineering and Developing with Functional Analysis Support
- Cybersecurity Support
- Mentoring and Knowledge Transfer Services
- Transition Support

Contractor Personnel shall be highly experienced and knowledgeable in the following areas:

- Technical knowledge in the Navy supply processes and interfaces
- Technical knowledge of the policies, standards, procedures, business practices of all DoD organizations

- Technical knowledge in Electronic Data Interchange (EDI), DLMS X12 transaction formats and Extensible Markup Language (XML).
- Technical knowledge with MS Azure DevOps (formerly known as MS Team Foundation Server), Git, Word, Excel, Powerpoint, Outlook, and MS Teams applications.
- Working knowledge and experience with being an Agile Team Member in an Agile project.
- Knowledge and experience with:
 - o Java Web Development, Java Spring Framework, JavaScript, jQuery, HTML, CSS
 - o Web Services, APIs, IBM MQ Series, Secure FTP Scripting
 - o EDI (ASC X12/DLMSO standards), XML, *JSON*
 - o Object Oriented Programming, Data Modeling, Secure Coding Practices, Web application development and environments
 - o Eclipse IDE, Oracle SQL Developer, Toad
 - o Oracle 12c (SQL, PL/SQL programming, stored procedures, views, queries schemas, etc.).
 - o Cloud Computing/Amazon AWS
 - o Software Containerization and Container Orchestration
 - o Jupiter/Advana

Required Certification:

IA Certification Level: **IAT-2**

Baseline Certification: **CompTIA Security+ CE**

Location:

The NAVSUP BSC, Mechanicsburg PA is the primary site for performance.

Schedule

12-month base period, four (4) 12-month option periods, and one (1) option period up to six-months in accordance with FAR 52.217-8. Performance is expected to begin on 22 September 2026.

Request for Statements of Capability (SOC)

Interested parties who believe they have the capability to perform as a prime contractor in support of this effort must submit a Statement of Technical Capabilities (SOC) that includes the following information:

General Information - Company Name, Mailing Address, Point of Contact - Telephone Numbers and Email Addresses, Commercial and Government Entity (CAGE) Code, and Unique Entity Identification (UEI), Business Size – Small or Other Than Small. The RFI response shall not exceed 10 pages, excluding cover page on 8-1/2"x11", and Times New Roman 12 font.

Technical Capabilities - The SOC must address technical experience and demonstrate the ability to provide the required services, as mentioned in the "Description of Services" section and requirements in the attached PWS. Include experience-specific work previously performed relevant to this effort to include responses to the following questions:

1. Describe your experience with supporting Navy supply processes and interfaces (examples include past work performed, or current company capability).
2. Describe your knowledge and experience with being an Agile Team Member

and/or a Versatelist in an Agile project, adhering to Scrum best practices as defined in the current Scrum Guide.

3. Describe any experience or awarded contracts working with NAVSUP BSC. For the awarded contracts, provide the contract number, period of performance, and a point of contact with name, telephone number, and email address.
4. Provide suggested Government Wide Acquisition Contract (GWAC) or Indefinite Delivery Indefinite Quantity (IDIQs) contract vehicles that can be utilized for ordering. Include contract name and number.
5. What is your ability to staff the required resources in Mechanicsburg, PA by 22 September 2026?
6. Provide suggested labor categories and estimated fully burdened labor rates that we could expect to see for the required support in support of our budget development.
7. Provide a suggested NAICS code based on the attached Performance Work Statement (PWS).
8. Describe your knowledge and experience integrating, maintaining and sustaining OTS system components to ensure compliance with Military Standard Systems (MILS) requirements.
9. Describe your knowledge and experience integrating, maintaining and sustaining OTS system components to ensure compliance with Defense Logistics Management Standard (DLMS) requirements.
10. Describe your knowledge and experience integrating, maintaining and sustaining OTS system components to ensure compliance with Risk Management Framework (RMF) and Security Technical Implementation Guide (STIG) requirements.
11. Describe your knowledge and experience integrating, maintaining and sustaining OTS internal and external system data sources as it relates to Technical Screening Data, Stock Check, Requisition Input/MILSTRIP/DLMS Submission, Requisition Status, Shipment Status, Backorder/PIR, and Serial Number Tracking.
12. Describe your knowledge and experience configuring and extending the OTS Data Manager Framework (DMF) to access remote data sources and aggregate the results from multiple data sources into a single data product where necessary.
13. Describe your knowledge and experience evaluating corrective measures to resolve OTS software and performance issues within the existing OTS design architecture.
14. Describe your knowledge and experience mentoring teams transitioning from traditional/waterfall based development processes to Agile/Scrum development processes.

Small Business Consideration:

Small Business firms with the capability to perform this requirement are encouraged to participate. Provide your socio-economic status. If you are interested only in subcontracting opportunities, please indicate clearly in your submission.

Additional Information

Oral communications are not acceptable in response to this notice. The SOC will be evaluated solely for the purpose of determining the respondent's ability to meet the Government's requirements and schedule as described above. A determination not to compete this proposed effort on a full and open competition basis is based upon responses to this notice and is solely within the discretion of the Government. The Government will use the SOC to help determine the interest and ability of qualified sources in the marketplace. This announcement is for information and planning purposes only. It does not constitute a Request for Quote (RFQ) or a Request for Proposal (RFP) and is not to be construed as a commitment by the Government. The Government will not pay any cost associated with the submittal of information solicited herein. The SOC and all related communications that contain proprietary information should be marked as such.

Responses must be submitted to the NAVSUP Fleet Logistics Center (FLC) Norfolk-Regional Directorate; point of contact is Contract Specialist Denise Lee. RFI responses are to be submitted by 10:00 AM Eastern Standard Time, Wednesday, March 11, 2026, to Denise Lee at denise.l.lee24.civ@us.navy.mil. We will continue to accept information beyond this date until the solicitation is issued, if one should be issued.

Disclaimer and Notes:

NAVSUP FLC Norfolk will not be obligated to pursue any particular acquisition alternative as a result of this RFI. Responses to the RFI will not be returned. Not responding to this RFI does not preclude participation in any future solicitation, if one is issued.
