

SINGLE SOURCE JUSTIFICATION (UNDER SAT)

JOINT ADMINISTRATIVE OPERATIONS Acquisitions Operations

Pursuant to FAR subpart 13.106-1(b)(1)(i) and (ii), for purchases not exceeding the Simplified Acquisition Threshold (SAT), Contracting Officers may solicit from only one source if the circumstances deem only one source is reasonably available (e.g., urgency, exclusive licensing agreements, brand name, or industrial mobilization).

Instructions: The information in the text boxes are provided as sample language or to indicate a needed fill-in. Sample language should be removed from the final document. All text boxes require information and shall not be left blank.

1. Description of Need

FWS has a need for standardized oil and gas data to assist with the management of its refuges. S&P Global, formerly IHS Markit Inc, compiles Oil and Gas data from many different sources and creates a uniform geospatial product that would be unnecessarily cumbersome and expensive for the USFWS to compile on its own. This data is delivered through the Enerdeq Web Platform, which is proprietary to S&P Global. The data offered through this subscription is assisting FWS in meeting the administration's priorities for energy dominance.

2. Market Research Conducted

S&P Global is the sole proprietor of the Enerdeq system. No other source is available which offers the additional web platform. This is a yearly purchase that has been occurring in FWS since August 2014.

3. Other Capable Sources

S&P Global compiles Oil and Gas data used in the Enerdeq system from a variety of different sources including government and private sector sources. The data gathered by S&P Global is not standardized or in a very useable format by service personnel in its initial form. S&P Global standardizes the data so that it is easily used by Service personnel.

4. Barriers to Competition

S&P Global is the sole proprietor of the Enerdeq system which is used to access their Oil and Gas data. The vendor must be available to the Enerdeq system to be compatible.

5. Contractor's Qualifications

S&P Global is a leader in the oil and gas market providing wide variety of services to its clients. The oil/gas dataset purchased by FWS has gone through rigorous QA/QC and standardization process that the Service does not have expertise and especially time to do on its own. IHS also ensures the latest information is in the database, which FWS could not possibly maintain on our own.

6. Determination of Fair and Reasonable Cost

Price is determined to be fair and reasonable based on similar previous awards.

7. Recommendation and Certification by Program Office

Based on the above justification, I recommend this acquisition to be conducted using sole source acquisition procedures. I hereby certify that this justification is accurate and complete to the best of my knowledge and belief.
