

COST AND SOFTWARE DATA REPORTING PLAN	OMB No. 0704-0671
The public reporting burden for this collection of information is estimated to average 57 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Department of Defense, Executive Services Directorate (0704-0671). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE ABOVE ORGANIZATION.

COST AND SOFTWARE DATA REPORTING PLAN	
15. REMARKS	
A. In addition to the direction provided in the associated CSDR Data Item Descriptions (DIDs) and the CSDR Manual (DoDM 5000.04), the following instructions, requirements, and considerations found on this page/worksheet shall be utilized when collecting data and preparing CSDR submissions. This CSDR Contract plan is intended to capture costs associated with the contract number(s) listed in block 9.b, irrespective of contract type (e.g., firm-fixed price, cost-plus fixed fee) or CLIN structure, including Over and Above, Advance Procurement, Long Lead Materials, Multiyear Procurement, Inter-Division or Inter-Company Work Orders (IWOs), Foreign Military Sales (FMS), Warranty, etc.	
B. CSDR PLAN REMARKS & PREPARATION INSTRUCTIONS	
1. Costs reported against this CSDR plan shall be cumulative in nature (i.e., each submission shall report any and all costs incurred on and prior to the submission's "AS OF DATE" (block 14.e)).	
i. The contractor may extend any WBS element in accordance with guidelines included in MIL-STD-881F (or latest version). Any changes to WBS, Order/Lot, End Item, and/or Period of Performance must be reported to the government prior to submission or immediately, with revised CSDR Plan, must be approved by the CSDR Plan approval authority.	
ii. WBS Element Names (block 11.c) Ending with "1...n (Contractor Shall Specify)". The contractor shall extend and specify (i.e., include additional WBS elements determined by the contractor) in order to provide additional insight into the contractor's technical approach or design. The additional WBS elements shall be developed in accordance with the WBS guidelines included in MIL-STD-881F (or latest version).	
C. SUBMISSION EVENTS & DATES	
1. Deliverable Preparation Instructions by AS OF and DUE Dates: All CSDR deliverable "AS OF DATE[S]" and "DUE DATE[S]" listed in blocks 14.e and 14.f are identified for planning purposes only. Submission dates are subject to change and are determined in accordance with the event drivers as identified below:	
i. All "DUE DATE" requirements are equal to the "AS OF DATE" plus 60 calendar days. If the calculated "DUE DATE" does not fall on a regular business day, the "DUE DATE" will be the next regular business day on the contractor's accounting calendar.	
ii. "Final" Submission Events must meet both of the following two conditions: Condition 1: The final end item(s) has been delivered and accepted by the government (e.g., as evidenced by a completed DD-250) or higher tier contractor in the case of a subcontractor, and Condition 2: 95% or more of all ATD costs associated with the Subtotal, G&A and FCCOM have been incurred relative to all costs the reporting entity expects to incur for each and every Order/Lot (defined in Item 4 of Data Group B) associated with the contract Subtotal, G&A, FCCOM and UB.	
iii. If the Contract period of performance is extended by more than six months, or if the scope of work is modified to include work not otherwise covered by the CSDR Plan, the government may modify the CSDR Plan to require additional submission events and add additional WBS elements in order to ensure the accurate and complete collection of cost data associated with the modified contract.	
D. COST & HOUR REPORT (FLEXFILE)	
1. The checkpoints for EAC/FAC in column 12e at the WBS level shall be reported as "Forecast at Completion" (FAC). The Forecast At Completion (FAC) required here is not subject to the standards established in ANSI/EIA-748 guideline #27 (Estimate at Complete); therefore, the FAC does not need to be, but may be, derived from Industry Earned Value Management (EVM) processes.	
2. WBS Definitions & Remarks (Data Group C) must match the technical content, cost content, and work content of each end item (see Block 17) for all WBS elements for each Cost and Hour (FlexFile) submission. The WBS Definitions & Remarks shall contain a disclosure statement detailing any differences between the CSDR reporting methodology and the reporting entity's Cost Accounting Standards. WBS Definitions & Remarks shall include a section detailing how parts are procured under this contract and any limitations of the parts procurement cost data or allocation of cost data for the WBS element.	
3. The reporting entity must maintain and update WBS Definitions & Remarks throughout the life of the contract, IAW DI-FNCL-82162, if changes to the WBS occur, the reporting entity shall annotate and track changes by adding the "As of Date" of the submitted FlexFile report and indicate the changes to the WBS Definitions.	
4. End Items: Block 17 of this CSDR Plan is meant to capture the discrete hardware end items that are DD-250'ed, ordered, procured, or exercised (as applicable) on the contract. If an End Item is DD-250'ed, ordered, procured, or exercised (as applicable) on the contract but is not listed in block 17, the contractor shall submit the dollars and hours in the Cost and Hour Report (FlexFile) and the quantity information in the Quantity Report tagged using the name of the End Item utilized on the contract. The CSDR Plan will be updated to include the appropriate End Item name in block 17, after report submission, if required.	
5. Order/Lot: Block 16 Orders/Lots is meant to capture the discrete Delivery Orders/Task Orders exercised on the contract. If a Delivery Order/Task Order is exercised on the contract and the CSDR plan has not been updated, it is the Reporting Entity's responsibility to still submit the dollars and hours in the FlexFile tagged to the appropriate Delivery Orders/Task Orders. The CSDR plan will be revised accordingly to include all exercised Delivery Orders/Task Orders.	
E. CONTRACTOR BUSINESS DATA REPORT (1921-3)	

1. The Contractor Business Data Report is prepared by and for the business entity (e.g., business unit, segment, or site) responsible for submitting the Forward Pricing Rate Proposal (FPRP) representing the basis for Forward Pricing Rate Agreement (FPRA) negotiations with the government. 2. Reports are submitted annually at the end of the contractor's fiscal year. 3. Data for Future Years should be reflective of the number of years contained in the most current document, i.e., the FPRP or the FPRA.If the document applies to more than three future years, attach additional future year sheets as required. In the absence of these documents, estimates should be provided for three future years. F. MAINTENANCE & REPAIR PARTS DATA REPORT 1. Indicate in the Repair remarks whether the reported repair costs include the cost of the labor hours reported in the Maintenance data, if applicable. 2. Maintenance Event and/or Repair Parts data should indicate if the source system(s) used to populate the report's cost/hours differs from the system(s) used to populate the FlexFile. 3. Provide a general remark describing the logic of work order/maintenance event numbering, if applicable. Ex: The first X letters/numbers are the DoDAAC of the originating site, the last X digits represent the sequence of the work order, children work orders contain the parent numbering plus additional digits at the end, etc. 4. Maintenance Event and/or Repair Parts data should include a remark indicating if costs and/or hours are based on actuals for each event or if they are based on averages/established metrics.
