

DEPARTMENT OF INTERIOR

STATEMENT OF WORK

CONSTRUCTION SERVICES MULTIPLE AWARD TASK ORDER CONTRACT (MATOC)

1. GENERAL

The Department of the Interior (DOI) requires multiple-award Indefinite-Delivery, Indefinite-Quantity (IDIQ) contracts to execute a broad range of construction, repair, renovation, and modernization projects across DOI bureaus and facilities. Task orders (TOs) will be competed among awardees to ensure fair opportunity and timely delivery of projects of varying scope and complexity. This acquisition will result in multiple contract awards divided across seven (7) zones.

1.1 Definitions:

Construction is defined as, but not limited to, constructing (giving form by combining the parts), altering, repairing, adding to, subtracting from, improving, restoring, moving, wrecking or demolishing any building (where further work will result in the construction, alteration, or repair of a public building or public work at that location is contemplated), highway, road, excavation or other structure, project, or improvement attached to real estate.

Contracting Officer (CO) is defined as a person with the authority to enter into, administer, and/or terminate contracts and make related determinations and findings on behalf of the United States of America.

COR is the Contracting Officer's Representative who is explicitly designated in writing by the CO. This appointment requires the COR to act on behalf of the Contracting Officer on all matters of contract administration, including monitoring contractor performance, review and approval of contract submittals, and certification of payroll documents and invoices. The COR is responsible for the overall operation of the project work

Contractor is the business entity that is contractually responsible to the Government for accomplishment of the project work. The term 'Contractor' herein, includes the prime contractor and all subordinate contractors employed on their behalf, and are subject to the same guidelines for this contract.

DOI means Department of the Interior

Government means Owner, Contracting Officer, and Contracting Officer's Representative

Local Authority Having Jurisdiction is the duly adopted local code authority, agency, or serving utility governing or serving the location of the project; such as utility companies, city and county electrical/plumbing/fire system inspectors, environmental permitting entities, and water resource departments/ boards

MATOC means multiple-award task order contract

Schedule is the chronological layout of the work to be prepared on commercially available scheduling software including distinct work tasks, start/stop task dates and durations, critical path milestones, and overall project beginning and end dates.

2. SCOPE

2.1 Description of Work:

This document contains the requirements for construction services supporting Department of the Interior (DOI) infrastructure projects under the IDIQ MATOC. Task orders may include new construction, repair, renovation, alteration, and maintenance across a variety of facility types and site conditions. Work will typically involve multiple trades and disciplines.

All work to be performed under the awarded MATOC contracts will be in accordance with individual task order requirements, including specifications and drawings provided for each project. It is anticipated that multiple contract awards will be made as a result of this solicitation.

The contract will be for 5 years and has an additional 5-year option period.

The Government intends to select a total of approximately ten (10) contractors for each zone.

Contractors may compete for award of an IDIQ in any or all zones and in any or all listed work categories. For each zone in which the contractor seeks award, the contractor shall maintain an established, staffed business office physically located within that zone for the duration of the MATOC. If an offeror is selected for award, the offeror may not receive an award for each work category and each zone they have selected. However, if an offeror is selected for award for multiple work categories, that offeror would receive one (1) contract award incorporating all the Zones and work categories they have been selected to receive an award for. The government also reserves the right to award no contracts at all, depending on the quality of the proposal(s) submitted and the availability of funds.

2.2 Typical Facilities and Infrastructure:

Projects may involve, but are not limited to:

- **Buildings and Structures:** Administrative offices, visitor centers, museums, schools, hospitals, detention centers, storage and maintenance facilities.

- **Transportation and Access:** Roads, bridges, sidewalks, paved trails, parking areas.
- **Water Management:** Levees, impoundments, drainage systems, culverts, pump stations, water control structures.
- **Marine and Waterfront:** Piers, docks, seawalls, bulkheads, boat ramps.
- **Recreational and Public Use Areas:** Campgrounds, picnic areas, boardwalks, observation decks, gazebos.
- **Utilities and Systems:** Electrical, mechanical, plumbing, HVAC, fire protection, and security systems.
- **Environmental and Hazard Remediation:** Asbestos, lead-based paint, mold, and other hazardous materials.
- **Historic Preservation:** Restoration of historic masonry, monuments, fountains, and cultural landscapes.

2.3 Work Category Descriptions:

Work categories are divided into the following three (3) areas:

1) Civil and Landscape

Includes heavy civil and site work, water-related structures, and exterior improvements. Typical work may include:

- Bridges, dams, levees, riprap, and other water control structures.
- Earthwork, grading, clearing, grubbing, and drainage improvements.
- Underground utilities, culverts, stormwater management, and erosion control.
- Roads, parking areas, sidewalks, paved trails, and guardrails.
- Campgrounds, picnic areas, cultural landscapes, gardens, and irrigation systems.
- Marine construction: bulkheads, piers, seawalls, boat docks, and launching ramps.
- Timber structures: boardwalks, observation decks, kiosks, pole sheds.
- Landscape rehabilitation, revegetation, and soil remediation.
- Hazardous material remediation (asbestos, lead-based paint, mold) typically associated with site work.
- Fire alarm systems and water/wastewater infrastructure.

2) Mechanical and Electrical

Includes building systems and utilities. Typical work may include:

- Heating, ventilation, and air conditioning (HVAC) systems.
- Plumbing systems, water and wastewater distribution and treatment.
- Electrical wiring, lighting, and power systems.
- Fire suppression systems and fire alarm systems.
- Security systems and general facility alarms.
- Electrical and fire code upgrades.

3) Building

Includes construction, repair, and renovation of buildings and structures not covered under Civil and Landscape. Typical work may include:

- New building construction and structural improvements.
- Building renovations, alterations, and expansions.
- Roofing systems: shingle, metal, membrane, and built-up roofs.
- Exterior finishes: siding, stucco, sheet metal.
- Interior finishes: flooring (tile, wood, vinyl, carpet), painting, and wall coverings.
- Openings: doors, windows, entrances, replacements or reconfigurations.
- Historic preservation and restoration: masonry, monuments, fountains, graffiti removal.
- Hazardous material remediation as part of building renovation or demolition.

***Please note, the number of work categories a vendor can cover will not be an evaluation factor and will in no way effect your proposal. There will be NO preference given to vendors who select more work categories than a vendor who only selects one or two.*

2.4 Business Office Requirement by Zone:

2.4.1 Requirement:

For each geographic zone in which the Contractor seeks award under this MATOC, the Contractor shall maintain an established, staffed business office physically located within that zone for the duration of the contract.

2.4.2 Definitions:

- Business Office: A physical, commercial location owned or leased by the Contractor that is used for conducting business operations related to this MATOC.
- Staffed: The office must have at least one employee or representative of the Contractor regularly present during normal business hours (Monday–Friday, excluding federal holidays).
- Physically Located Within the Zone: The office must have a street address within the boundaries of the zone as defined in this solicitation. Virtual offices, P.O. boxes, or mail forwarding services do not meet this requirement.

2.4.3 Timing of Compliance:

- Contractors shall have the required business office at the time of proposal submission.

2.4.4 Verification:

- The Government reserves the right to verify the existence and staffing of the business office at any time during the contract period. Verification may include site visits, requests for lease agreements, utility bills, or other documentation.

2.4.5 Non-Compliance:

- Failure to maintain the required business office within the zone may result in:
 - Suspension of task order eligibility for that zone;
 - Contractor will be Off-ramped from the MATOC. (see section 2.8 On-ramping/Off-ramping)

2.5 Zone Descriptions:

- **Zone 1:**
 - California, Idaho, Oregon, Washington, Nevada, American Samoa, Northern Mariana Islands
- **Zone 2:**
 - Arizona, New Mexico, Oklahoma, Texas
- **Zone 3:**
 - Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, Wisconsin
- **Zone 4:**
 - Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Puerto Rico, Virgin Islands
- **Zone 5:**
 - Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia
- **Zone 6:**
 - Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah, Wyoming
- **Zone 7:**
 - Alaska, Hawaii, Guam

2.6 Contractor Responsibilities:

Awards will be made to responsible contractors whose proposal conforms to the solicitation requirements and provides the best value to the Government. Proposals shall represent the offerors best efforts and most complete responses to the solicitation.

Task Orders from this MATOC contract are for the execution of a broad range of new construction, alteration and repair, renovations, rehabilitation, and demolition. Work to be performed under these MATOCs will be within the North American Industry Classification System, 236220.

These requirements supplement the project-specific “Work Statement” requirements issued with individual project Task Orders.

Contractors shall provide all management, supervision, field-engineering, quality-control, labor, equipment, materials and supplies necessary to perform a broad range of maintenance, renovation, rehabilitation and new construction work on DOI infrastructure, including design and engineering services incidental to the construction services. Design, engineering, architectural or surveying services shall be performed by a professionally licensed party, licensed in the state or territory where the work is being performed.

After award contract holders shall have one email address dedicated to their MATOC award to receive correspondence (i.e. contract number@contractor.com).

Contractor shall participate and support site visits, working meetings, conference calls, and other activities as necessary to accomplish the work in a timely and efficient manner. Contractor shall be responsible for hosting project conference calls and/or virtual meetings and providing meeting minutes.

2.7 Ordering Procedures:

Actual project work will be accomplished through individual Task Order solicitations. There is no guarantee of award of any work. However, future solicitations for project work under this MATOC will be limited to the pool(s) of contractors successfully pre-qualified under this MATOC. Task orders issued under the MATOC will conform to FAR 16.505 Ordering. Each awardee will be provided with a fair opportunity for consideration unless an exception at FAR 16.505(b) applies. IDIQ-holders will be solicited for specific task orders based on zones and work categories, whether they have adequate bonding capacity, and whether they are otherwise eligible for consideration.

Additionally, within each pool (zone and work category), a separate pool of Indian Small Business Economic Enterprises (ISBEs) will be identified if two or more ISBEs are present in the general pool. These sub-pools of ISBEE vendors, where they exist, will be used to create a set-aside for every task order solicited by Indian Affairs (including Bureau of Indian Affairs, Bureau of Indian Education, the Office of the Secretary, and all other Indian Affairs organizations) and may be used to create ISBEE set-asides for task orders solicited by other DOI ordering offices.

2.8 On-ramping/Off-ramping:

The Government reserves the option to have an open season annually to on-ramp contractors to the MATOC. During the annual on-ramping phase, a notice will be posted to SAM.gov allowing new contractors the option to submit a proposal to receive an award for a newly awarded MATOC contract. The MATOC period of performance, if an on-ramped contractor receives an award, will be for the amount of time left on the 10-year period from when the original MATOC was awarded. An on-ramped contractor will not receive the full 5 year plus 5 option year period of performance. This open season will only be used to evaluate new responsible contractors who successfully submit a proposal.

During the period the Government reserves the right to increase or decrease the number of contract awards for each zone.

Contractors who receive awards for the MATOC will be evaluated on a yearly basis. The Government reserves the right to off-ramp a contractor during this time, or whenever the following situations arise:

- The contractor is no longer a small business under NAICS code 236220
- The contractor has been non-responsive to solicitations issued or consistently declines to compete for projects
- The contractor has documented performance issues or less than satisfactory CPARS ratings.
- The contractor no longer maintains an established, staffed business office physically located within the zone(s) they received an award for.

3. CODE COMPLIANCE

DOI is required to comply with the most current federal and national codes. Contractors may be required to also comply with local, state, tribal building codes and standards as outlined in the task order. Contractors shall comply with all agency safety checklists (a copy is included with the task order solicitations). The basic contract and sample project proposals shall be based on the codes and standards listed below. However, for task orders, contractors shall apply the most current version of the code as published 60 days prior to the solicitation closeout date.

2017 National Fire Protection Association (except as noted below)
- 2025 NFPA 12 Standard on Carbon Dioxide Extinguishing Systems
- 2025 NFPA 13 Standard for the Installation of Sprinkler Systems
- 2025 NFPA 72 National Fire Alarm and Signaling Code
- 2024 NFPA 101 Life Safety Code
- 2026 NFPA 70 National Electrical Code NEC
Architectural Barriers Act (ABA)
2024 International Building Code
2021 International Plumbing Code
2021 Residential code for one- and two-family dwellings
2024 ICC Performance Code for Buildings
2021 Mechanical Code
2024 International Energy Conservation Code
2021 International Existing Building Code
Standard Specifications for the Construction of Roads and Bridges on Federal Highway Projects(FP-24)
2024 ICC Building Codes

4. SITE VISITS

- 4.1 Regardless of any verbal discussion during site visits, the written terms of this Contract and the Task Order solicitation remain in effect unless amended in writing by the Contracting Officer.
- 4.2 If the Contractor elects not to pursue the project, the Contractor shall so notify the CO within 7 business days following a site visit.

5. PLACE, DELIVERY AND PERIOD OF PERFORMANCE

- 5.1 Individual Task Order solicitations will be firm-fixed price. Task Order solicitation periods will vary widely depending on the Government agency's fiscal and programmatic needs; anywhere from 7 to 30 calendar days typically.

6. DELIVERABLES

- 6.1 Initial Project Schedule within 15 days of notice to proceed (NTP) being issued.
- 6.2 Contractor shall prepare and document all project meetings and submit them to the COR within 5-days.
- 6.3 Product submittals
- 6.4 Final Product Operations and Maintenance Manuals (O&M) and Warranty Information (including Point of Contact for warranty needs)
- 6.5 Completed construction in accordance with the statement of work and/or design specifications documents.
- 6.6 Closeout Items
- 6.7 Other documents and/or materials as specified in the Task Order

7. INSPECTION AND ACCEPTANCE

- 7.1 The work shall be completed in accordance with applicable federal, state and local codes as outlined above, and any other applicable disciplines of the International Code Council, as well as with accepted general industry and or manufacturer standards.
- 7.2 The work shall be accepted when all the work is completed as described in the task order and in accordance with any contract documents. Work will be inspected to assure compliance with the contract documents, but quality control and adherence to all contract requirements is the responsibility of the contractor, as further described in FAR 52.246-12, "Inspection of Construction".

8. GOVERNMENT FURNISHED MATERIALS

- 8.1 The DOI will make available any historical related documents as available and applicable.
- 8.2 The DOI may provide government furnished items as specified under individual task orders.

9. PROJECT LOCATION AND ACCESS

- 9.1 Unless defined differently at the Task Order Request for Proposal or approved by the Contracting Officer, the workweek is Monday through Friday during the project sites normal business hours, except federal holidays.
- 9.2 Contractor shall notify the COR a minimum of seven (7) days prior to arrival on-site and/or needing access to any of the buildings.
- 9.3 Exact project locations will be indicated in the Task Order Request for Proposals.
- 9.4 Some projects may be located in remote areas where construction materials and supplies are limited in quantity and variety, and where opportunities to use local labor may be limited in quantity and specialty.
- 9.5 Access: The Contractor shall identify suitable access routes to the work site(s) that are agreeable to the Government.
 - 9.5.1 Identify and comply with any associated use requirements and restrictions.
Site access may be difficult in some instances.
 - 9.5.2 Any roads, parking lots, trails, and walkways subject to interference by the work shall be kept open in a manner that provides for safe public use.
 - 9.5.3 Contractor shall not exceed road or bridge load rating to complete work.

10. CONTRACTING OFFICER'S REPRESENTATIVE (COR)

The Contracting Officer's Representative (COR) will be designated at the time of award. The COR may be changed at any time by the Government without prior notice to the Contractor by issuance of an updated COR designation letter.

The responsibilities and limitations of the COR are as follows:

- 1) The COR is responsible for the technical aspects of the project and serves as technical liaison with the Contractor. The COR is also responsible for the final inspection and acceptance of all reports and such other responsibilities as may be specified in the contract. Further details will be provided to the contractor when the COR designation letter is presented with task order awards.
- 2) The COR is not authorized to make any commitments or authorize any changes which affect the contract price, statement of work or period of performance. Any contractor request for changes shall be sent to the Contracting Officer (CO) directly. No such changes shall be made without the expressed prior authorization of the CO. The CO may designate assistant or alternate COR(s) in writing and transmitting a copy of such designation to the Contractor.
