

Advanced Operations, Engineering, and Architecture Information Technology (IT) Support Services

This is a notice of intent to award a noncompetitive contract action. The National Oceanic and Atmospheric Administration (NOAA), Acquisition and Grants Office (AGO), Western Acquisition Division (WAD) and the NOAA Office of the Chief Information Officer (OCIO) intends to award a noncompetitive contract action for Advanced Operations, Engineering, and Architecture Information Technology (IT) Support Services.

(1) **Point of Contact:**

Contract Specialist: Anthony Eubanks

Email: anthony.eubanks@noaa.gov

Contracting Officer: Remo Dela Cruz

Email: remo.dela-cruz@noaa.gov

(2) **Contracting Office Address:** 325 Broadway, Boulder, CO 80305

(3) **Set-aside:** Not applicable. The Government does not intend to set-aside this procurement for a small business program.

(4) **North American Industry Classification System Code:** 541519 – Other Computer Related Services

(5) **Product Service Code:** R425 – Support - Professional: Engineering/Technical

(6) **Intended Source:** ANG Signal, LLC, UEI: LSE2QCQLHJV5

(7) **Description:**

The Government requires a one-year extension to bridge contract 1305M325P0085 for continued support for the advanced operations, engineering, and architectural Information Technology (IT) Support Services of the N-Wave program and associated portfolio of network services. A one-year extension to the bridge contract is necessary in order to permit the continuation of critical IT services and prevent a gap in coverage while the follow-on requirement is being solicited and awarded competitively. The N-Wave program plays a fundamental role in supporting NOAA's operational mission by ensuring secure, high-speed network connectivity for critical data transmission and remote collaboration among researchers, agencies, and external partners. This acquisition is essential for ensuring uninterrupted IT operations and maintaining key network services, including cloud networking, enterprise managed local area network (LAN), enterprise wireless, enterprise firewall, and enterprise remote access virtual private network (VPN). These services directly support NOAA's ability to conduct scientific research, weather forecasting, and environmental monitoring, ensuring that critical data and real-time information remain accessible to mission stakeholders. The services required under this acquisition are anticipated to be performed at multiple NOAA sites and facilities primarily within the continental U.S.

The anticipated period of performance for the bride contract extension is 3 April 2026 to 2 April 2027.

NOAA intends to award a contract modification under existing contract 1305M325P0085 to ANG Signal, LLC under the authority of 41 U.S.C. 1901, using simplified procedures up to \$9 million as implemented by FAR 12.102, prior to the current contract expiration date of 2 April 2026.

As the incumbent contractor, only ANG Signal, LLC possesses the immediate resources, knowledge, and infrastructure to ensure complete continuity of operations. Only ANG Signal, LLC is in a unique position to provide the critical IT services at the level of quality required without causing unacceptable delays and disruption of services to the N-Wave program. The scope of work is not changing and the contractor will continue working without interruption with established staff through the bridge contract extension period of performance. As a result, ANG Signal, LLC is in the best position to continue providing IT services without delay to the N-Wave program to support critical IT infrastructure across NOAA and the Department of Commerce while efforts to award the fully competed follow-on requirement is underway.

This notice of intent is not a request for competitive proposals. However, any firm that believes it can meet this requirement may provide written notification to the Contracting Officer. Firms who believe they can meet this requirement are required to submit in writing an affirmative response demonstrating a comprehensive understanding of the requirements. All written responses must include proof of possessing permits and a written narrative statement of capability, including detailed technical information demonstrating their ability to meet the requirement. A determination by the Government not to compete this requirement based upon responses to this notice is solely within its discretion. Affirmative written responses must be received no later than the due date and time of this notice. Information received will normally be considered solely for the purpose of determining whether to conduct a competitive procurement.
