

PURCHASE DESCRIPTION

26-A5-003 T-Tap Adaptors

1.0 General. The Air National Guard (ANG) has a requirement for a small adapter when added to the Passive Attenuation Communications Earphone (PACE) System will provide multiple platform communication for 3D Audio Helmets. This T-TAP adaptor allows pilots to benefit from the spatially-separated audio while retaining the passive hearing protection afforded by PACE. The T-TAP adaptor is designed to ensure that a single helmet/earphone combination can be used across multiple platforms, reducing logistics and overall cost.

2.0 Scope.

PROVIDE:

The ANG with 518 PACE T-Tap Adaptors, PFG-PACE-1003T to multiple locations.

To be considered equal, units require:

1. Adapters shall integrate with the Passive Attenuation Communications Earphone (PACE) with or without Terma 3D Audio (3DAS) earphones.
2. When installed the adapter can achieve required audio quality when using 3DA earphones in aircraft not equipped with the 3D Audio System (3DAS).
3. Adapters shall provide interface with various helmet/aircraft communication systems without requiring major rewiring or replacement of existing cords with helmets or headsets. Ensure that a single cable can be used across multiple platforms.
4. Adapter installation shall provide for constant communication signal to the aircrew members throughout aircraft operations. Shall have ability to provide Left and Right Channel Support of 3-D audio system and provide entire time connected audio to aircraft communication signal.
5. To meet size limitations, adaptor shall not exceed 1 ¾ inch width, 1 inch depth and 2 inch length
6. The adapter shall be tested and approved by the ANG/AFRC Test Center at Davis-Monthan AFB, Arizona.
