These units of blood are required to be retyped by the FDA, CMS, and Joint Commission before transfusion. After transfusion of blood, BFSU is required to send all patient samples and corresponding blood unit segments to a qualified high complexity laboratory for post transfusion workup and antibody ID, if necessary.
2. **SCOPE:** BFSU requires the retyping of approximately 300 units of blood as required by regulation prior to transfusion. BFSU also requires all patients who receive a unit of blood to have a post transfusion workup, which consists of ABO/Rh, Antibody Screen and Post-Transfusion Crossmatch testing.
3. **APPLICABLE DOCUMENTS:** The performing Laboratory shall have a current CLIA certificate authorizing high complexity testing.
