

Statement of Work

Exercise Drone Support

1. DESCRIPTION OF SERVICES.

1.1. SCOPE. This Statement of Work (SOW) defines the effort required by the Contractor to supply service/training opportunities for military exercise operations and procedures outlined below. The 23d FG will be responsible for activities during an exercise in mid-April during regular operating hours. Actual date and location of execution will be relayed to the contract awardee's primary POC via encrypted email.

1.2. LOCATION. Services will be conducted in South Georgia, United States over land in a designated Military Operating Area (MOA). Mission planning will be conducted near the associated MOA in a secure military facility. Launch & recovery operations will be conducted at the discretion of the selected vendor.

1.3. BACKGROUND. 23d FG is requesting an agency to conduct fixed wing, multi-drone operations in support of a Training Exercise. The 23d FG requests these aircraft operations to complete the following training objective: Low & slow fixed wing UAS threat detection and targeting. Aircraft will operate as red forces, but no live fire (Kinetic) will be conducted on the drones (DRY Non-Kinetic operations). Visual Identification (VID) conducted during Defensive Counter-Air (DCA) operations is an objective. Activities will be conducted over dry land.

2. GENERAL REQUIREMENTS.

2.1. DRONE SERVICE. This contract specifically entails the service of operating drone-like aircraft. The contractor will ensure that any Aircraft Systems are not specifically procured for this contract and are already owned by the working contractor.

2.2. OPERATING HOURS. All flying operations shall be accomplished in May 2026 for four (4) consecutive days. Flying will be conducted for 4 hours each day. Exact dates and times will be provided to contractor upon award.

2.3. EQUIPMENT. The contractor will provide up to 2ea Group 3 manned aircraft (pilot onboard) and equipment to effectively maintain and operate for training operations. 3.3.1 Manned aircraft will need to be Low Observable (LO) Group 3 Equivalent aircraft less than 20 feet in dimension: LO equates to minimized Radar Cross Section (RCS), making

CUI

them difficult to detect and track. Aircraft must be able to mimic Group 3 drone maneuvers.

2.3.1 Manned UASs will need to be Low Observable (LO) Group 3 Equivalent aircraft less than 20' in dimensions: LO equates to minimized Radar Cross Section (RCS), making them difficult to detect and track. Aircraft must be able to mimic Group 3 drone maneuvers.

2.3.2 Manned aircraft must have paint that reduces radar signature.

3. SPECIFIC TASKS. The contractor must provide the following:

3.1. The contractor's duties shall conduct full-spectrum operation of up to 2ea Group 3 manned (pilot on board) aircraft during the exercise window.

3.1.1. Launch & Recovery operations of up to 2ea Group 3 manned aircraft will be coordinated by the contractor.

3.2. The contractor shall participate in any requested mission planning with the affiliated MGFs.

3.3. The contractor shall operate in the designated air spaces

3.4. The contractor shall control manned Group 3 aircraft in a manner emulating adversary unmanned aircraft systems.

3.5. Operating altitude is required between 2,000 to 18,000 feet.

3.6. Operating speed shall be as low as 80 knots, and as high as 160 knots

3.7. The contractor shall maintain continuous communication with a designated planning cell POC during exercise activities.

3.8. The contractor must have the ability to reach designated MOAs from their departure/landing location.

3.9. As applicable, must receive FAA approval prior to exercise operations.

Appendix A

Unmanned Aircraft Categorization Chart

Category	MGTW (lbs.)	Normal Operating Altitude (ft)	Speed (KIAS)
Group 1	0 - 20	< 1200 AGL	100
Group 2	21 - 55	< 3500 AGL	< 250
Group 3	< 1320	< 18,000 MSL	
Group 4	> 1320		> 18,000 MSL
Group 5		Any Speed	

Legend

AGL	above ground level	lbs	pounds
ft	feet	MGTW	maximum gross takeoff weight
KIAS	knots indicated airspeed	MSL	mean sea level
