- Appendix 22: List of Pertinent Materials

I. Business Opportunity

A. Introduction

The Los Padres National Forest is soliciting applications from qualified applicants for a concession campground special use permit to provide high quality public service in the operation and maintenance of government furnished recreation facilities located on the Forest. One permit will be issued for all recreation facilities.

Important considerations are the travel patterns, visitation numbers and occupancies, length of season, revenue, cost of operations, and ancillary income opportunities. Applicants are encouraged to research all aspects of this business opportunity that may affect their application. Providing high-quality customer service and generating revenue are critical parts of this opportunity.

This prospectus is being issued to solicit applications for a concession campground special use permit. A permit to provide high-quality public service in the operation and maintenance of Government-owned recreation facilities located on the Los Padres National Forest, will be issued. The permit will include the following developed sites:

Mandatory Sites

Monterey Ranger District

1. Arroyo Seco Recreation Area
 - a. Arroyo Seco Family and Group Campground
 - b. Arroyo Seco Day Use Area
2. Bottcher's Gap Campground*
3. Kirk Creek Campground
4. Plaskett Creek Family and Group Campground
5. Mill Creek Day Use Area
6. Pfeiffer Beach Day Use Area
7. Sand Dollar Day Use Area
8. Willow Creek Day Use Area

Santa Lucia Ranger District

1. Cerro Alto Campground
2. Davy Brown Campground
3. Figueroa Campground*
4. Nira Campground
5. Navajo Flat Campground and OHV Staging Area
6. La Panza Campground
7. Turkey Flat OHV Day Use and Staging Area

Ojai Ranger District

1. Wheeler Gorge Campground
2. Holiday Group Campground
3. Pine Mountain Campground
4. Reyes Peak Campground
5. Reyes Peak Trailhead
6. Rose Valley Campground

7. Middle Lion Campground
8. Rose Valley Upper Lake Day Use Area
9. Rose Valley Lower Lake Day Use Area

Mount Pinos Ranger District

1. McGill Campground
2. McGill Group 1 and 2 Campgrounds
3. Mount Pinos Campground
4. Reyes Creek Campground
5. Ballinger Campground
6. Campo Alto Campground
7. Chuchupate Campground

Santa Barbara Ranger District

1. Fremont Campground
2. Paradise Campground
3. Los Prietos Campground
4. Sage Hill Group Campground
5. Upper Oso Campground*
6. Upper Oso Trailhead
7. White Rock Day Use Area
8. First Crossing Day Use Area
9. Lower Oso Day Use Area
10. Aliso Trailhead
11. Falls Day Use Area
12. Live Oak Day Use Area
13. Red Rock Trailhead
14. Red Rock Day Use Area*

Optional Sites

Ojai Ranger District

1. Piedra Blanca Trailhead
2. Dough Flat Trailhead
3. Potrero Seco Campground*
4. Wheeler Gorge Visitor Center

Santa Barbara Ranger District

1. Middle Santa Ynez Campground*
2. P-Bar Campground*
3. Big Caliente Picnic Area*
4. Lower Caliente Campground*

*Recreation site requires deferred maintenance/rehabilitation work before reopening

The authorized officer for this business opportunity is the Forest Supervisor for the Los Padres National Forest.

Kimberly Winter, Forest Supervisor

Los Padres National Forest
1980 Old Mission Drive
Solvang, CA 93463

In the past, the majority of the sites included in this prospectus were managed under one forest wide permit. Over the past three years, these concessions have generated the following gross revenues (including camping fees, firewood sales, extra vehicle fees, etc.) The revenue numbers below do not include sales of Adventure Passes or revenue for the sites that have been previously operated by the Forest Service.

The current permit for this concession expires on **October 31, 2026**. Over the past three years, this concession has generated the following gross revenues:

Table 1. Three Year Average Gross Revenue

Year	Gross Revenue
2022	\$3,958,143.00
2023	\$2,411,757.00
2024	\$3,254,643.00
Three Year Average Gross Revenue	\$3,208,181.00

B. Area Description

Overview of the Los Padres National Forest

Los Padres National Forest encompasses approximately 1.75 million acres of central California's scenic Coast and Transverse Ranges. The forest stretches almost 220 miles from north to south and consists of two separate land divisions. The northern division is within Monterey County and northern San Luis Obispo County and includes the beautiful Big Sur Coast and scenic interior areas. The northern division includes all the sites on the Monterey Ranger District. The central division of the forest includes lands within San Luis Obispo, Santa Barbara, Ventura, and Kern counties and includes all the sites for the remaining four ranger districts.

Recreation sites being offered in the prospectus are campgrounds, day use/picnic areas, and trailheads. These recreation sites are distributed along State Highways and Forest development roads, both paved and dirt. The elevations for these sites range from sea level to over 8,000 feet. The major recreation activities on the forest are driving for pleasure, camping, picnicking, fishing, horse-back riding, hiking, OHV riding, viewing wildlife, hunting, and water-based recreation activities.

The major season of use is May 15 through October 31, although some facilities are operated year-round. Winter storms and landslides have been known to close road systems leading to facilities offered in this prospectus, thereby reducing public access to these sites for up to six months at a time.

Nationally designated scenic byways, recreation areas, hiking trails, Wild and Scenic rivers, OHV routes/trails, and wilderness areas attract visitors to the Los Padres National Forest. Campgrounds, day use areas, and recreation areas offered in this prospectus provide exceptional access to all that the Los Padres National Forest has to offer. A sampling of the most popular national forest recreation opportunities is highlighted below.

- Scenic byways—The Big Sur Scenic Byway is an approximately ninety-mile expanse of redwood and fog-trimmed waterfront route hugging the coast and offering magnificent ocean vistas, wildlife viewing opportunities, and access to hiking trails. The Jacinto Reyes Scenic Byway is a thirty-eight-mile segment of State Highway 33 connecting the coast to the Cuyama and San Joaquin Valleys. This byway traverses through some of the most picturesque and diverse terrain in Southern California.
- Recreation Areas—The Pine Mountain Recreation Area, at an altitude of 6,650 feet, provides cooler weather in summers and snow in the winter. It provides an array of recreation opportunities like hiking, backpacking, camping, and solitude. The Reyes Peak campground and the Reyes Peak trailhead, are both in the Pine Mountain Recreation Area. The Reyes Peak trailhead takes forest visitors into the stunning and spectacular Sespe Wilderness. The Figueroa Mountain Recreation Area located in the Santa Lucia Ranger District provides amazing views of the San Rafael Wilderness and attracts many visitors in the spring to view and experience wildflower blooms. The Lower Santa Ynez Recreation Area found in the Santa Barbara Ranger District is very popular for both day visitors and overnight campers. With its close proximity to Southern California, the Lower Santa Ynez Recreation Area attracts hundreds of forest visitors eager to cool off in the various water holes of the Santa Ynez river.
- Wild and Scenic Rivers—The Los Padres National Forest manages the three following Wild and Scenic rivers the Sespe, Sisquoc, and Big Sur; and co-manages Piru Creek with the Angeles National Forest. These four river systems combine for a total of over 90 miles of habitat that supports various threatened and endangered species such as the steelhead trout, California red-legged frog, foothill yellow-legged frog, Pacific giant salamanders, and the arroyo toad. A variety of recreation activities such as hiking/backpacking, dispersed camping, horseback riding, fishing, and water play occur along these four Wild and Scenic Rivers.
- Condor Trail—Is a developing multi-district hiking/backpacking thru-trail approximately 400 miles in length extending from Lake Piru in the south to Botcher's Gap in the north.
- Wilderness Areas—Ten congressionally designated Wilderness areas encompass 48% of the Los Padres National Forest, making up 875,000 acres and contributing to the popularity of hiking and other recreational opportunities like hunting, backpacking, and pack stock excursions.
- Popular Hiking trails—Over 1,200 miles of hiking trails exist on the Los Padres National Forest providing exceptional access to and experiences for recreational year-round activities including interpretive, river, hiking, horse, OHV, and bicycling trails. Some of the more popular trails include the Pine Ridge Trail, Santa Paula Canyon trail, the Sisquoc Loop (Sisquoc/Manzana Trails), Jesusita Trail, and the Santa Cruz National Recreation Trail.
- OHV—routes/trails like Divide Peak OHV route offers 12 miles of trails providing amazing views of the Santa Barabara coastline, the Upper Santa Ynez Valley, and the San Rafael Mountains. The Camuesa-Buckhorn OHV trail is approximately 10 miles in length offering magnificent views of the surrounding mountains and is very popular during the late summer/fall hunting season. The Mt. Pinos Ranger District has numerous off highway vehicle routes. These include a number of very popular trails and riding areas such as Ballinger Canyon and Deer Park.

For general information on the Los Padres National Forest and the sites included in the prospectus, refer to the forest website: <https://www.fs.usda.gov/r05/lospadres>.

C. Description of Developed Recreation Sites and Facilities

The description of each developed recreation site included in this prospectus is found in Appendix 20, Description of Developed Recreation Sites and Facilities. Please use descriptions in Appendix 20 together

with the maps of developed sites in Appendix 2 and Appendix 3, Inventory of Government-Furnished Property.

D. Government Furnished Property

The Forest Service will provide certain property in conjunction with the concession campground special use permit (see Appendix 3 of the prospectus). Included in this inventory are a description, the quantity, and the estimated replacement cost of the applicable property.

E. Government Furnished Supplies

The Forest Service will not furnish any supplies for day-to-day operation of the concession. Government-furnished supplies will be limited to those necessary for programmatic consistency, including:

- Forms to report use and revenue (See Appendix 5).
- Customer Service Comment Card (See Appendix 6).
- A copy of the Forest Service publications including, *Cleaning Recreation Sites*, and *In-Depth Design and Maintenance Manual for Vault Toilets*, and *Vault Toilet Pumping Contract Specifications and Guidelines for Preparing Contracts*, *Sustainable Recreation Site Design Guide*, and *Forest Service Outdoor Recreation Accessibility Guide (FSORAG)*, and *Sign Guide Installation*, and *Landscape Aesthetics*, and *The Built Environment Image Guide*, and *Multiple Property Documentation Form*, *National Recreation Context*, and *Region 5 Programmatic Agreement for Compliance with Section 106 of the National Historic Preservation Act for Management of Historic Properties by the National Forests of the Pacific Southwest Region (R5 PA)* and *The Secretary of the Interior's Standards for Treatment of Historic Properties With Guidelines for Preserving, Rehabilitating and Reconstructing Historic Buildings*, and *Land Management Plan, Part 3, Design Criteria for the Southern California National Forests* (See Appendix 22).
- Title VI signs.

F. Utilities and Waste Management

Certain utilities and infrastructure exist for the developed recreation sites identified in this prospectus. The permit holder will be responsible for securing, managing, and paying for these utilities. Applicants should contact current service providers to obtain estimated costs for the utilities. These utilities are listed below in Table 2.

Electrical and Phone Utilities

Phone service is covered by the concessionaire for the entry kiosk. The Forest Service covers the office and fire stations. Individuals living on site pay for their own phone service (Forest Service & concession employees). Propane is paid for by the concessionaire, where it is used for the water heaters in the Modern Campground showers. The operation and maintenance of the electrical and telephone utilities provided to recreation sites is the responsibility of the permit holder.

Table 2. Utilities

Service	Contact
Electrical	SCE/PGE
Telephone	AT&T
Propane	Suburban Propane, Amerigas, Delta Liquid Energy
Garbage	ORD-Harrison, SLRD/SBRD- Marborg Industries, MPRD- E&J Harrison, Price (Mountainside), Marborg, MRD-Waste Management
Liquid & Solid Waste Disposal	ORD-BPM Services Inc., SLRD-North County Septic Service, SBRD- Marborg Industries, MPRD-Santana's Pumping, MRD-Waste Management

Santa Barbara Ranger District

In the Lower Santa Ynez Recreation Area located in the Santa Barbara Ranger District, electrical and phone services are provided to the campground host sites at Fremont campground, Paradise campground, Los Prietos Campground, White Rock Day Use Area, Sage Hill Group Campground, and Aliso Trailhead. The permit holder is responsible for maintaining the phone and electrical services to and at these facilities. Recreation site garbage services and liquid and solid waste disposal are both provided by Marborg Industries.

Ojai Ranger District

Wheeler Gorge Campground located in the Ojai Ranger District consists of 68 family campsites. They include 3 double sites suitable for larger families. In addition, the campground includes two host sites; one has water, electricity, and phone and the other host site has water, electricity, septic tank (1,000 gal.), and phone. Recreation site garbage services are provided by Harrison, and liquid and solid waste disposal services are provided by BPM Services Inc.

Monterey Ranger District

Plaskett Creek Campground has phone services and electrical services which are supplied to the employee area by generator. Arroyo Seco campground has both phone and electrical service. Phone service is covered by the concessionaire for the entry kiosk. Forest Service covers the office and fire stations. Individuals living on site pay for their own phone service (Forest Service & concession employees). Recreation site garbage services and liquid and solid waste disposal are provided by Waste Management.

Santa Lucia Ranger District

At Cerro Alto Campground, the host site cabin includes both telephone and electrical service, and maintenance of these utilities is the responsibility of the permit holder. Figueroa Campground does not have phone and electrical service. Electrical power at the host site is supplied by a generator, which the permit holder must provide and maintain. Recreation site garbage services are provided by Marborg Industries, and liquid and solid waste disposal services are provided by North County Septic Service.

Mount Pinos Ranger District

Reyes Creek campground has electricity available and will require the host to be self-contained at one camp site. McGill Campground has an available camp host site at site number 9 and must be fully self-contained. Recreation site garbage services are provided by E&J Services, Price (Mountainside) Disposal, and Marborg. Liquid and Solid Waste Disposal is provided by Santana's Pumping & Plumbing.

Propane

Propane is paid for by the concessionaire where it is used for the water heaters in the Modern Campground showers. Some of the companies that service the various districts and the associated recreation sites are Suburban Propane, Ameri-gas, and Delta Liquid Energy.

Water Systems

Drinking water systems are located at 5 recreation sites presented in this prospectus. The permit holder has full responsibility for water system operation and maintenance at 3 of the sites which are listed below, and shared responsibility with the Forest Service at the 2 remaining sites. The water system description and responsibilities are listed in this section.

At each of these sites the operation and maintenance responsibilities by the permit holder include maintaining the wells, chlorinators, all water system distribution lines, hydrants, comfort stations, and host sites. The permit holder is responsible for water quality testing and meeting all required health and safety codes. Appendix 10 of the prospectus includes an attachment to the Special Use Permit Titled *Appendix F: Operation of Federally Owned Drinking Water Systems* which describes specific requirements. If a water system were to become temporarily inoperable, the concessionaire may provide potable water and portable toilets at their expense.

Table 2. Water Systems

Location	Water Systems	Storage Capacity	Details
Permit Holder Responsibility Sites			
Plaskett Creek Campground	1	20,000 gallons	Currently one of the tanks is offline, resulting in only 10,000 gallons capacity
Arroyo Seco Recreation Area	1	24,000 gallons	Modern Campground, Group Campground, Primitive Campground, and Day Use Area
Cerro Alto Campground	1	2,500 gallons	Currently water system is offline
FS/Permit Holder Shared Responsibility Sites			
Lower Santa Ynez Recreation Area	2	162,000 gallons	Santa Barbara District Ranger Station, Forest Service compound and warehouses, Forest Service barracks, Forest Service trailer park, Forest Service houses, Fremont campground, Paradise Campground, Los Prietos Campground, White Rock Day Use Area, Sage Hill Group Campground, Aliso Trailhead, First Crossing day use area, Lower Oso Day Use Area, Upper Oso Campground and Trailhead.
Wheeler Gorge Campground	1	10,000 gallons	Wheeler Gorge Campground, Forest Service fire station, and a visitor center.

The description of each of these water systems is as follows:

Monterey Ranger District

1. Plaskett Creek Campground

The water system is composed of a horizontal well, one 10,000-gallon bolted steel water storage tank, and a distribution system serving one campground area with 42 campsites, one host site, two restroom buildings, a group campground area with two campsites, and a concessionaire employee area with five sites.

Operation and maintenance of the water system will be the responsibility of the permittee. This will include all day-to-day operation and maintenance activities for the entire water system, including providing a state certified treatment/distribution operator (T1 or D1 at a minimum), all required sampling and testing, as well as permit fees. Any major water system breakdowns will be the responsibility of the concessionaire; however, Granger-Thye fee offset may be utilized to make repairs through a Granger-Thye Fee Offset Agreement.

2. Arroyo Seco Recreation Area (Day Use Area, Group, Family, and Primitive Campgrounds)

The water system supplies drinking water to an administrative office, administrative site (a trailer park with six spaces), fire station, three campground areas, and a day use area.

The system is comprised of a 65 foot well, pump house, an ozone and filtration water treatment system, two 12,000-gallon steel storage tanks, approximately 13,300 linear feet of water transmission line, 30 hose bibs, and 3 fire hydrants. Water flows by gravity from the storage tanks through the distribution system, which consists of 3 and 4-inch PVC main lines and PVC or galvanized pipe laterals to the buildings, trailer hookups, and campground hydrants.

Operation and maintenance of the water system will be the responsibility of the permittee. This will include all day-to-day operation and maintenance activities for the entire water system, including providing a state certified treatment/distribution operator (T1 or D1 at a minimum), all required sampling and testing, as well as permit fees. Any major water system breakdowns will be the responsibility of the concessionaire; however, Granger-Thye fee offset may be utilized to make repairs through a Granger-Thye Fee Offset Agreement.

For water system breakdowns occurring within the shared administrative site, repairs will be considered on an individual case by case basis and Granger-Thye fee offset may be utilized to make repairs through a Granger-Thye Fee Offset Agreement. Water system breakdowns occurring outside the recreation area boundary on the lateral line to the fire station and office will be repaired by the Forest Service.

Santa Lucia Ranger District

1. Cerro Alto Campground

Drinking water is supplied to the campground by an onsite well and storage tank. The tank at Cerro Alto is 2,500 Gallons. The tank is located behind the host cabin. It is fed through a well located in a box enclosure near the amphitheater. There is a float in the tank so that when the water gets too low, it triggers the well to pull water, which is electronically powered.

Recreation sites with shared water system responsibilities

1. Santa Barbara Ranger District-Lower Santa Ynez Recreation Area (10 Recreation Sites)

The Lower Santa Ynez water system is a public-community water system that serves both Forest Service administrative sites and 10 public recreation sites. The system is extensive and consists of two wells located in the Forest Service compound, two 50,000-gallon storage tanks, one 12,000-gallon storage tank, and a distribution system consisting of a main trunk line running parallel to Paradise Road and distribution systems for each facility and recreation site.

The Lower Santa Ynez system provides water to the Santa Barbara Ranger District, Los Prietos Ranger Station, Forest Service compound and warehouses, Forest Service barracks, Forest Service trailer park, and Forest Service houses. The water system also provides water to Fremont Campground, Paradise Campground, Los Prietos Campground, White Rock Day Use Area, Sage Hill Group Campground, Aliso Trailhead, First Crossing Day Use Area, Lower Oso Day Use Area, Upper Oso Campground and Trailhead. Due to breaks in waterlines, water is presently unavailable at First Crossing Day Use Area, Lower Oso Day Use Area, and Upper Oso Campground; Forest is completing reports required for repair to proceed.

The Forest Service will retain responsibility for the operation and maintenance of the wells, trunk line, electricity expenses, and water system outside the boundaries of the campgrounds, and all day use areas and trailheads, except those without water accessibility (eg. Falls and Red Rock Day Use Areas). The Forest Service will also maintain the chlorinator, pumps, and be responsible for water testing. The Permit Holder will be responsible for operating and maintaining the internal water system distribution lines, hydrants, comfort stations, and host sites as within the recreation site boundaries as indicated in Appendix 10. In summary the Forest Service is responsible for supplying water to the point of demarcation between the FS-operated line sections and the section of line for the sole purpose of permittee run recreation activities.

The permit holder is responsible for the water system within the recreation site boundaries and the water lines leading to the recreation sites after the point of demarcation, where joint use ends. For the water line that supplies White Rock, Paradise, Fremont, and other sites along Paradise Road west of the employee trailer park, the permittee will have responsibility for line maintenance west of the point where the lateral to the FS employee trailer park is, adjacent to the Snyder Trailhead. For the section of the system that supplies First Crossing, Lower Oso, and Upper Oso, the permittee will be responsible for maintenance of distribution lines after the small water tank that supplies those lines.

When the water system may be temporarily inoperable, the concessionaire may provide potable water and portable toilets at their expense. The Forest Service is responsible for the necessary water sampling in the recreation area.

The cost of annual operating expenses of the Lower Santa Ynez Water System outside the recreation sites will be shared equally between the Forest Service and the permit holder. The Forest Service and the permit holder will each pay 50% of the operating costs of the water supply system. The permit holder will enter into a Collection Agreement with the Forest Service and will be billed annually for the permit holder's 50% of the water system expense.

2. Ojai Ranger District-Wheeler Gorge Water System (One Recreation Site)

The water system provides drinking water to the Wheeler Gorge Campground as well as a Forest Service fire station and a visitor center.

Operation and maintenance of the water system serving Wheeler Gorge Campground will be the responsibility of the permittee. This will include all day-to-day operation and maintenance activities for the entire system, including all required sampling and testing as well as permit fees. This will include all waterlines within the campground boundary as well as the main distribution line from the well house to the storage tank and back to the campground. Water is pumped from the well up to the 10,000-gallon storage tank, then gravity-fed to the campground. In addition to serving this campground, the water system also serves a Forest Service fire station and a visitor center. A collection agreement is anticipated for the minor Forest Service share (10-15%) of total operational costs of this system. The permittee must have a state-certified water treatment operator to operate the water system.

Routine maintenance of the waterline and water system will be performed at permittee's expense. Any major water system breakdowns will be the responsibility of the permittee; however, Granger-Thye fee offset may be utilized to make repairs through a Granger-Thye Fee Offset Agreement. Water system breakdowns occurring outside the campground boundary on the two lateral lines to the fire station or visitor center will be repaired by the Forest Service. Permittee is responsible for operating the system to State and Forest Service standards.

Liquid and Solid Waste Disposal

The permit holder is responsible for pumping all vault toilets and septic systems at the developed recreation sites. The current providers for the Forest's five ranger districts are the following,

Ojai Ranger District — BPM Services

Monterey Ranger District — Waste Management

Mount Pinos Ranger District — Santana's Pumping & Plumbing

Santa Barbara Ranger District — Marborg Industries

- Flush toilets at Fremont Campground are inoperative due to break in septic line; Forest is completing reports required for repair to proceed.

Santa Lucia Ranger District — North County Septic Service

II. Forest Service Concession Programs and Policies

Government-owned concessions are authorized by special use permits issued under Section 7 of the Granger-Thye (GT) Act, 16 U.S.C. 580d, and implementing regulations at 36 CFR Part 251, Subpart B.

In addition, there are certain Forest Service programs and policies that apply to campground concession. All applications must be consistent with these requirements.

A. Recreation.gov

The Los Padres National Forest participates in Recreation.gov, which provides nationwide, toll-free telephone reservations for single-family or group camping sites, rental cabins, permits, tours, tickets, and other recreational facilities. Visitors pay the camping fee at the time they make a reservation, and no fees are collected at the site (although the permit holder may allow occupancy of any site that is unreserved and charge on site for that use). Recreation.gov is part of the Recreation One-Stop Program, which is managed by the Washington Office Recreation, Heritage, and Volunteer Resources staff. The Forest

Service contacts and program managers for Recreation.gov are listed below. Applicants should not contact the Recreation.gov contractor directly.

Table 3. Rec.gov contacts

Name	Location	Contact
Griffin Schireman	Forest Service Contracting Officer's Technical Representative (COTR)	Phone: (202) 360-7234 Email: Griffin.Schireman@usda.gov

Recreation.gov is the only authorized reservation system for Forest Service-developed recreation sites, including but not limited to campgrounds, cabins, and group use areas. Applicants may recommend adding sites to or deleting sites from Recreation.gov or changing the number of sites that may be reserved, the minimum number of days per reservation, or the location of sites that may be reserved. The permit holder also may make these recommendations during the term of the permit. The authorized officer will decide whether to accept or reject the recommendations.

Under Recreation.gov, the following guidelines must be followed, unless there are compelling operational reasons:

1. For each developed recreation site included in Recreation.gov, at least 60 percent of the units must be available for reservations. The rest of the units may be occupied on a first-come, first-served basis.

Reservation windows vary by type of site and are as follows:

- Individual campsites: from 6 months to 0-4 days prior to arrival date, depending on location.
 - Group use areas: from 12 months to 0- 4 days prior to arrival date, depending on location.
2. When Recreation.gov is utilized, the permit holder is responsible for on-site administration and will be required to:
 - Obtain daily arrival reports (DARs) each morning by establishing at least one central facsimile location, email address, or other means of obtaining and distributing DARs.
 - Develop a system for posting reservations at the sites so other visitors know which units are reserved.
 - Post and hold reserved sites for 26 hours past the posted check-in time.
 - Ensure that the party with the reservation is the party using the site.
 - Resolve any disputes over the use of reserved sites by drop-in campers.
 - Verify that visitors hold a valid federal pass (listed below) before giving the discount on fees for those passes (see section II.B). Do not discount fees if a visitor cannot present a valid pass.
 - ♦ Golden Age or Golden Access Passport.
 - ♦ America the Beautiful–The National Parks and Federal Recreational Lands Senior Pass or Access Pass.
 - ♦ Other passes as required by the authorized officer and described in this prospectus, such as local area passes.
 - Develop inventory data for sites being added to Recreation.gov, and update data for sites including fees charged the public and temporary site closures. Submit data updates to Recreation.gov at least annually.

- Communicate to Recreation.gov any emergency closures or other relevant operational changes as they occur.
- Approve customer refunds as appropriate and process them through Recreation.gov. Refund policies can be found at [Recreation.gov](https://www.recreation.gov/rules-reservation-policies) (<https://www.recreation.gov/rules-reservation-policies>).

Because reservations can be made up to a year in advance for group sites and up to 6 months in advance for family sites, Recreation.gov is currently accepting reservations for the upcoming operating season. Fees received by Recreation.gov will be held by the Forest Service and distributed following issuance of a special use permit to the successful applicant. In the final year of the permit, fees will be held in the same manner until a new permit is issued. The permit holder will honor reservations made prior to issuance of the permit at the price in effect when the reservations were made. If funds are distributed prematurely for dates outside the permit term, a bill for collection will be issued to the permit holder.

B. Pass Discounts

The permit holder must provide a 50 percent discount on recreation fees charged under REA at developed recreation sites covered by this prospectus to holders of Golden Age and Golden Access Passports, as well as holders of the Interagency Senior and Access Passes.

Specifically, holders of these passes are entitled to a 50 percent discount on the fee for a single campsite occupied by the pass holders. The pass holders are not entitled to a discount on the fee for a multiple-family campsite, cabin, or group use area or any additional campsites occupied by those accompanying the pass holders. The 50 percent campsite discount does not include utility, water, or any other hookup fees.

Any loss of fee revenue from honoring the passes should be factored into applicants' bids.

The permit holder will not be required to offer discounts on camping to holders of the Annual or Volunteer Pass.

The following is a list of sites covered by this prospectus where the 50 percent discount for passes applies:

All sites listed in section I, A. where there are single family sites are eligible for the 50 percent discount.

Standard Amenity Recreation Fee Sites Under REA [Reserved]. The Forest Service is proposing a revision to FSM 2344.3 to address treatment of standard amenity recreation fee sites in the concession program. The agency reserves the right to amend a special use permit issued under this prospectus to be consistent with any change in that directive.

All sites listed in section I, A. managed as a day use facility generally charge a standard amenity fee.

C. Camp Stamps

Camp stamps must be honored at their face value and submitted to the authorized officer for reimbursement.

D. Site Closure

The Forest Service reserves the right to close all or a portion of any area in this prospectus for repair, construction, floods, snow, extreme fire danger, or other natural events; wildlife protection; or risks to

public health and safety. The Forest Service shall not be liable to the permit holder for lost revenue, operating costs, or any other losses resulting from these closures. However, for fee calculation purposes, the permit shall be placed in non-use status as provided by FSH 2709.11, section 31.23.

Site closures may apply to federally recognized tribes with at least 90 days advance notice for the site closure to be granted. State recognized tribes may also be granted site closures per Forest Supervisor approval.

E. Administrative Use

If the Forest Service requires the permit holder to provide a service for the agency, the permit holder will be compensated for that use.

F. Applicable Forest Orders

Forest Orders may be issued to address a variety of management concerns. Sample orders related to the offering are identified in Appendix 4. Additional applicable forest orders may be issued in the future.

G. Fee Receipts and Compilation of Use and Revenue Data

The permit holder must provide fee receipts to visitors that include at least the following information:

- The site number and total amount paid.
- The date of issuance and number of days paid for.
- If a pass is used, the pass number.
- The number of people in the group.
- The number of vehicles and their license plate numbers.

The permit holder must provide use and revenue data to the Forest Service (see Appendix 5 of the prospectus for a sample use report). Use reports must be completed monthly and at the end of the operating season for each developed recreation site, provided that when the holder performs GT fee offset work in lieu of paying the land use fee in cash, use reports may be submitted quarterly, rather than monthly. At a minimum, monthly and year-end use reports must include:

- The total number of units occupied based on daily counts.
- The total number of people based on daily counts.
- The percentage of occupancy by month.
- Total recreation fee revenue.
- Total fee revenue for other goods and services.
- The total number of Camp Stamps collected.
- The total number of passes used.

In addition, year-end use reports must include:

- Total fee revenue collected under the Recreation.gov.
- Total taxes paid.

- Total gross revenue.
- Total net revenue.

H. Customer Service Comment Cards

The permit holder must provide a customer service comment card to visitors at each developed recreation site (see Appendix 6 of the prospectus).

I. Performance Evaluations

At a minimum, the Forest Service will perform a year-end performance evaluation within four months of the close of the operating season (see Appendix 7 of the prospectus). An unsatisfactory rating may be cause for suspension or revocation of the special use permit. Sustained satisfactory performance is required for a permit extension.

J. Accessibility

The Architectural Barriers Act of 1968 (ABA) and Section 504 of the Rehabilitation Act of 1973 require new or altered facilities to be accessible, with few exceptions. In 2004, the Architectural and Transportation Barriers Compliance Board (Access Board) issued revised accessibility guidelines for buildings and facilities subject to the ABA and the Americans with Disabilities Act (ADA). These new guidelines are called the ADA/ABA Accessibility Guidelines. In 2006, the Forest Service issued the Forest Service Outdoor Recreation Accessibility Guidelines (FSORAG). The FSORAG addresses types of recreational facilities, including developed recreation sites that are not covered by ADA/ABA Accessibility Guidelines.

Any Government maintenance, reconditioning, renovation, or improvement (see section III.C) must meet ADA/ABA Accessibility Guidelines, where applicable, as well as the FSORAG.

The FSORAG and the ADA/ABA Accessibility Guidelines are posted on the Forest Service's [website](https://www.fs.usda.gov/recreation/programs/accessibility/) at (<https://www.fs.usda.gov/recreation/programs/accessibility/>). Questions regarding ADA/ABA Accessibility Guidelines may be referred to the [Access Board](http://www.access-board.gov) at www.access-board.gov. Questions regarding the FSORAG may be referred to the accessibility coordinator for the local National Forest.

The permit holder is responsible for ensuring effective communication with visitors with disabilities, including persons with impaired vision or hearing, so that all visitors may obtain information on accessible services, activities, and facilities.

K. Camping Unit Capacity

Number of Vehicles Per Camping Unit

A single-family camping unit may accommodate one vehicle. A “vehicle” is defined as any motorized conveyance, except that for purposes of vehicular capacity, two motorcycles are considered one vehicle. Additional vehicles may be allowed at a camping unit, if the camping unit can safely accommodate them. When extra vehicles are allowed, a pre-determined standard rate will be charged for each extra vehicle. If an extra vehicle exceeds the camping unit capacity (i.e., the extra vehicle causes a safety hazard or resource damage), the customer may be required to pay for an additional camping unit or park in an overflow parking area, if available. One towed vehicle per single camping unit will be allowed for no

extra charge if it can be parked completely on the surfaced area and does not create a safety hazard. Examples of towed vehicles include a boat trailer, or a car towed by a motor home.

Group Site Capacity

The capacity established for group sites is as follows:

Table 4. Group Site Capacity

Facility / Site Name	People	Vehicles
Arroyo Seco Group Campground (MRD)	Up to 50	10
Plaskett Creek Group Campground (MRD)	sites 1-3: Up to 40 people per site	10 each site
Sage Hill Group Campground (SBRD)	sites 1-4: up to 50 people per site; site 5 (equestrian use): up to 60 people	10 each site
Holiday Group Campground (ORD)	Up to 50	10
McGill Group Campground (MPRD)	site 1: 80 people; site 2: 60 people	10 each site

Day Use Site Capacity

Table 5. Day Use Capacity

Facility / Site Name	People (PAOT)	Max Vehicles
Monterrey Ranger District		
Mill Creek	21	6
Pfeiffer Beach	215	75
Sand Dollar	163	45
Willow Creek	28	12
Arroyo Seco	495	105
Santa Lucia Ranger District		
Turkey Flat	120	25
Santa Barbara Ranger District		
White Rock	140	25
Falls	170	29
First Crossing	475	130
Live Oak	175	59
Lower Oso	140	28
Red Rock	140	28
Ojai Ranger District		
Rose Valley Upper Lake	42	10
Rose Valley Lower Lake	35	10

L. Stay Limit

Campers at overnight sites will be limited to:

1. In a developed campground, for a period no longer than 14 consecutive days or for no more than 28 days during a calendar year; or
2. Anywhere other than a developed campground, for a period no longer than seven consecutive days or for no more than 21 days during a calendar year.

M. Fees Charged to the Public

The permit holder may charge the public fees only to the extent that the Forest Service can charge recreation fees under REA. All recreation fees must be specified per developed recreation site. The holder must honor the proposed pricing through the first full operating season. Thereafter, the holder may propose price adjustments with justification.

Permit holders may not charge for any of the following:

- Solely for parking, undesignated parking, or picnicking along roads or along the sides of trails.
- General access, unless specifically authorized by REA.
- Dispersed areas with low or no investment, unless specifically authorized by REA.
- Persons who are driving through, walking through, boating through, horseback riding through, or hiking through NFS lands without using the recreational facilities and services for which a fee is charged.
- Camping at undeveloped sites that do not provide the minimum number of facilities and services prescribed by REA.
- Use of overlooks or scenic pullouts.
- Travel by private, noncommercial vehicle over any national parkway or any road or highway in the Federal-aid System that is commonly used by the public as a means of travel between two places, either or both of which are outside an area in which recreation fees are charged.
- Travel by private, noncommercial vehicle, boat, or aircraft over any road, highway, waterway, or airway to any land in which the person traveling has a property right, if the land is in an area in which recreation fees are charged.
- Any person who has a right of access for hunting or fishing privileges under a specific provision of law or treaty.
- Any person who is engaged in the conduct of official federal, state, tribal, or local government business.
- Special attention or extra services necessary to meet the needs of the disabled.

N. Law Enforcement

Forest Service Manual (FSM) 2342.1, Exhibit 01, addresses the law enforcement authorities and responsibilities of concessionaires, state and local law enforcement agencies, and the Forest Service at concession campgrounds. See Appendix 8 of the prospectus and section O. Other Pertinent Information.

O. Other Pertinent Information

Additional Law Enforcement

Applicants are encouraged to read and understand Appendix 8 and enter into agreements with the appropriate law enforcement agency(s) for additional law enforcement support for visitor compliance at high use recreation sites (Peiffer Beach Day Use Area, Arroyo Seco Recreation Area, and the Lower Santa Ynez Recreation Area). This support would be beyond that needed for routine visitor compliance needs normally met by campground hosts and managers. The applicant must provide funding for additional law enforcement support from either the local county sheriff offices, California State Parks, California Highway Patrol, or the Forest Service. This agreement would increase law enforcement assistance to the concessionaire during holidays and other high use periods. The applicant will also work with District Recreation leadership/staff, Fire Patrols, and Forest Service Law Enforcement Officers to create an Active Management Plan with the goals of that plan to include how to best provide consistent egress and ingress at associated recreation sites, enforcing hours of operation at recreation sites, water safety best practices, fire prevention, conservation education, etc.

Employee Housing

Concessionaire employees staying at Forest Service recreation sites must be in a self-contained vehicle, such as a trailer or motorhome. No tents or vans will be permitted. Employee housing sites must be neat, clean, and well maintained and not creep into adjacent camp sites.

Other Forest Service Administrative Sites may be available through a separate lease agreement.

Table 3. Summary of Possible Employee Housing

Location	Number of Sites	Electricity	Water	Sewage	Phone	Gas	Details
Monterey Ranger District							
Arroyo Seco Recreation Area	1	yes	yes	septic	no	no	Host site is campsite 1
Botchers Gap Campground	1	no	yes	no	no	propane	
Kirk Creek Campground	1	no	yes	septic	no	propane	
Plaskett Creek Campground	1	no	yes	septic	no	propane	Host sites is site 9. Additional site(s) negotiable.
Santa Lucia Ranger District							
Cerro Alto Campground	1	yes	yes	septic	yes	propane	408 square foot cabin that is used as a host site

Mt. Pinos Ranger District							
McGill Campground	1	no	no	no	no	no	Host must be self-contained
Reyes Creek Campground	1	yes	no	no	no	no	Host must be self-contained at site #9

Resource Concerns

General

A variety of resource concerns exist at or near many of the forty-eight recreation sites listed on this prospectus. Among them are threatened, endangered, and proposed animal and plant species (TESP), Forest Service sensitive species, invasive species, and archaeological and historical sites. Please refer to Appendix 9 *Annual Operating Plan*, Section 14 under *Resource Protection Measures for sensitive species* for the best management practices and expectations for both the permit holder and the Forest Service around these issues. This section highlights where communication will be necessary prior to permit holder activities and where Forest Service management actions within these recreation sites may be anticipated.

Invasive species and noxious weeds

Invasive, non-native, and noxious weeds and pests are a resource concern of importance to the forest. The goal is to prevent the spread and proliferation of these factors that affect the native landscape of the Los Padres National Forest. One invasive species of special concern is the goldspotted oak borer (GSOB). GSOB is an invasive insect that has been found in southern California and kills oak trees by feeding on the tree's cambium layer and disrupting the tree's ability to move water and nutrients. This species has not yet been confirmed on the Los Padres National Forest, but its range has expanded to the edge of our boundary and occurrence on the forest is anticipated. Early detection and intervention will be critical to preventing future damage. The permit holder will be required to have a vegetation management plan to address noxious weeds and include guidelines for managing invasive pests such as GSOB. Please refer to Appendix 9 *Annual Operating Plan*, Section 14 under *Resource Protection Measures for sensitive species* and Section 16 under *Vegetation Management* guidelines to include in the management plan.

Archaeological and Historical Resources

General Information

Most developed recreation sites and facilities on the Los Padres National Forest contain pre-contact Native American sites or historical sites that are listed, eligible for listing, or not evaluated for the National Register of Historic places (NRHP). The LPNF has started inventorying developed recreation sites and facilities and evaluating them for listing on the NRHP. Until a site has been evaluated by Forest Heritage professionals, it is treated as eligible for the NHRP, as required by the LPNF Land Management Plan (USDA 2005: Part 3 p 13) and the *Programmatic Agreement among the U.S.D.A. Forest Service, Pacific Southwest Region (Region 5), California State Historic Preservation Officer, Nevada State Historic Preservation Officer, and the Advisory Council on Historic Preservation Regarding the Processes for Compliance with Section 106 of the National Preservation Act for Management of Historic Properties by the National Forests of the Pacific Southwest Region* (2018: 19).

Two developed recreation sites of significance are **Kirk Creek Campground**, which was constructed on a large pre-contact village site and is listed on the National Register of Historic Places. The developed recreation sites and facilities at **Arroyo Seco Recreation Area** are located on a Civilian Conservation Corps camp, and the Day Use Area is constructed on a pre-contact site. A few interpretive signs about the CCC at Arroyo Seco are located near the concrete remnants within the Recreation Area. The LPNF is drafting a management plan for both of these significant cultural resources.

Most of the developed recreation sites and facilities identified in this prospectus are over 45 years in age (see Appendix 21 *Archeological and d Historical Resource Considerations*) and may be eligible for listing on the National Register of Historic Places (NRHP) if they retain integrity of significant periods of Forest Service recreation development, notably during the Civilian Conservation Corps Era (1933-1942) or the Operation Outdoors Era (1957-1969, please refer to the *2024 Forest Service National Recreation Historic Context*). **Wheeler Gorge Campground** is one developed recreation site that was determined eligible for the NRHP. Please refer to Appendix 21 *Archeological and d Historical Resource Considerations*, for management responsibilities, notification procedures, standard practices, and list of known archeological and historical concerns.

Hazard Tree Removal

The permit holder will have to conduct pre-season inspection of the campgrounds to identify existing and potential hazards, including hazard trees. The permit holder also will be responsible for monitoring and identifying hazard trees during the operating season. After securing written approval from the authorized

officer, the permit holder's financial responsibility for removing hazard trees and associated slash will not exceed **1 percent** per year of the permit holder gross revenue. The annual operating plan will address appropriate disposal of hazard trees and slash.

Butane and Propane Installations

For safety and regulatory reasons, the permit holder is not allowed to install or store bulk butane or propane.

Recreation Sites to be repaired for future Concessionaire Management

The following recreation sites on the Santa Barbara Ranger District, Ojai Ranger District, Santa Lucia Ranger District, and Monterey Ranger District will need a significant amount of deferred maintenance and/or rehabilitation by the Forest Service to be deemed operable and then to be added to the special use permit issued for this offering.

Santa Barbara Ranger District — Upper Oso Campground will most likely be made operable in year 2 or 3 of the new concessionaire permit. The following recreation sites located in the Upper Santa Ynez Recreation Area (Middle Santa Ynez Campground, P-Bar Flat Campground, Big Caliente Picnic Area, and Lower Caliente aka Rock Camp) will undergo maintenance and could be made operable during the first years of new concessionaire management.

Ojai Ranger District — Potrero Seco Campground will be converted into a day use area after undergoing deferred maintenance and updates to serve as a day use area for the public. A seasonal gate keeps this recreation site open to the public from May 1st to December 15. This recreation site is very popular for hiking, backpacking, mountain biking, hunting, wildlife viewing, and for equestrians.

Santa Lucia Ranger District — Pino Alto Picnic area, and Figueroa Campground, were affected by recent fires. Deferred maintenance and upgrades to these two recreation sites is needed before they are operable and in need of concessionaire management.

Monterey Ranger District — Bottcher's Gap has been closed since the 2016 Soberanes Fire forcing the closure of county-maintained Palo Colorado Road, which is the only means of accessing the campground by vehicle and which remains closed at the writing of this prospectus. Damage to the campground itself was minimal and confined to a single shed, but there is also a significant amount of deferred maintenance from the last decade. Monterey County's timeline for repairing and reopening Palo Colorado Road is currently yet to be determined, and when it occurs the concessionaire would be expected to operate Bottcher's Gap Campground.

III. Special Use Permit

In exercising the rights and privileges granted by the special use permit, the permit holder must comply with all present and future federal laws and regulations and all present and future state, county, and municipal laws, regulations, and other legal requirements that apply to the permit area, to the extent they do not conflict with federal law, regulation, or policy. The Forest Service assumes no responsibility for enforcing laws, regulations, and other legal requirements that fall under the jurisdiction of other governmental entities.

A. Permit Term

The permit term will be for up to **5 years**, with an option to extend the term for up to an additional 5 years at the sole discretion of the authorized officer. The decision to extend the term will depend, in part, on sustained satisfactory performance of the permit holder. Upon expiration of the permit, continuation of the permitted activity will be at the sole discretion of the authorized officer and will be subject to a competitive offering. A new prospectus will be issued during the final year of the permit term.

If the decision to select a permit holder is appealed, a permit will not be issued until the appeal has been resolved, unless operation is needed during the appeal, in which case a permit with a term of one year or less may be issued.

B. Permit Holder Responsibilities

This section highlights the requirements of the special use permit, which is contained in Appendix 10 of the prospectus. Applicants are responsible for familiarizing themselves with all permit requirements that govern the operation covered by this prospectus.

Responsibility for Day-to-Day Activities

As a general rule, the holder will be required to conduct the day-to-day activities authorized by the permit. Some, but not all, of these activities may be conducted by someone other than the permit holder, but only with the prior written approval of the authorized officer. The permit holder will continue to be responsible for compliance with all the terms of the permit.

Permit Holder-Furnished Supplies and Equipment

The permit holder will be required to provide all vehicles, equipment, and supplies necessary to operate the authorized developed recreation sites in accordance with the special use permit.

Holder-Furnished Vehicles

The permit holder may not use all-terrain vehicles, motorcycles, or motor bicycles including e-bikes in the campgrounds. The holder may propose use of golf carts or other similar vehicles to facilitate daily maintenance of the facilities. If authorized, carts must stay on designated roads or trails while driving between sites or loops.

Holder Maintenance, Reconditioning, or Renovation (MRR)

Maintenance, reconditioning, and renovation are defined in the permit (FS-2700-4h, clause V.D.1(d)). Holder MRR is defined as maintenance, reconditioning, or renovation that neither materially adds to the value of the property nor appreciably prolongs its life. The work serves only to keep the facility in an ordinary, efficient operating condition. From an accounting or tax perspective, it is work that may be expensed but not capitalized. In fulfilling these responsibilities, the holder must obtain any licenses and certified inspections required by regulatory agencies and follow state and local laws, regulations, and ordinances and industry standards or codes applicable to the permitted operation (FS-2700-4h, clause IV.H.1). The permit holder, at its expense, will be required to perform holder MRR under a holder MRR plan (FS-2700-4h, clause II.D and V.F).

The holder MRR plan will describe required holder MRR and its frequency. The holder MRR plan will become part of the permit holder's annual operating plan.

C. Granger-Thye Fee Offset Agreement

The federal government owns all the improvements at the developed recreation sites covered by this prospectus. Under Section 7 of the Granger-Thye (GT) Act and the terms of the permit, the permit fee may be offset in whole or in part by the value of Government maintenance, reconditioning, renovation, and improvement (MRRI) performed at the permit holder's expense. Government MRRI is defined as maintenance, reconditioning, renovation, or improvement that arrests deterioration, improves and upgrades facilities, and appreciably prolongs the life of the property. Government maintenance, reconditioning, renovation or improvement, whether performed by the holder or the Forest Service, shall be performed at the sole discretion of the authorized officer. See Appendix 14 of the prospectus and FS-2700-4h, clause V.D.1(e).

All Government MRRI shall be enumerated in an annual GT fee offset agreement signed by the holder and the Forest Service in advance of the operating season (see Appendix 11 of the prospectus and FS-2700-4h, Appendix B). Alternatively, a multi-year fee GT fee offset agreement can be prepared for consolidated fee payments. A list of sample Government MRRI projects is included in Appendix 12 of the prospectus.

Either the holder or the Forest Service may perform GT fee offset work. This determination will be made annually. When the holder performs GT fee offset work, if it includes construction that costs more than \$2,000, it is subject to the Davis-Bacon Act and the fee offset agreement must contain Davis-Bacon Act wage provisions. Additionally, indirect costs may be offset provided the holder submits either a currently approved indirect cost rate or accounting procedures and supporting documentation to determine an indirect cost rate (see Appendix 13 of the prospectus).

The holder's claims for GT fee offset must be documented using the FS-2700-4h, Appendix H, Granger-Thye Fee Offset Certification Form (see Appendix 14 of the prospectus). This form requires the holder to itemize allowable costs incurred for an approved GT fee offset project and to certify the accuracy and completeness of claims.

When the Forest Service performs GT fee offset work, the holder will deposit fee payments into a CWFS account. The Forest Service will perform GT fee offset work under a collection agreement and offset those costs against the permit holder's annual permit fee (see FS-2700-4h, clause V.D.2, and Appendix 15 of the prospectus). The Forest Service's indirect costs may be offset at the agency's approved rate. The Forest Service and the holder will agree on the work to be performed in advance of each operating season.

D. Insurance

Liability Insurance

The successful applicant must have liability insurance covering losses associated with the use and occupancy authorized by the permit arising from personal injury or death and third-party property damage in the minimum amount of **\$1,000,000** for injury or death to one person per occurrence; **\$1,000,000** for injury or death to more than one person per occurrence; and **\$25,000** for third-party property damage per occurrence, or in the minimum amount of **\$1,000,000** as a combined single limit per occurrence. Insurance policies must name the USDA Forest Service as an additional insured (see Appendix 10 of the prospectus and FS-2400-4h, clause III.K).

IV. Application

A. Instructions for Submitting Applications

Applicants must submit a written application for all developed recreation sites offered in this prospectus.

Applicants are strongly encouraged to visit the sites at least once before submitting an application (see Appendices 1 and 2, vicinity and area maps and maps of developed recreation sites).

The information in this prospectus is from generally reliable sources, but no warranty is made as to its accuracy. Each applicant is expected to make an independent assessment of the business opportunity offered in this prospectus.

All applications must be submitted to;

Table 4. Application submittals

Addressee	Title	Attention	Address
Kimberly Winter	Forest Supervisor	David Iniguez	1980 Old Mission Dr. Solvang, CA 93463

Applications must be received by close of business 4:30 pm PST on **April 24, 2026**.

Applicants must submit one hard copy and one electronic copy of their application to the Forest Service contact listed above. The electronic copy must be provided on a flash drive. The electronic copy must be prepared in a Microsoft Office program or PDF that allows for copying and pasting of text and must separately address each evaluation criterion listed in the prospectus.

Applications will not be returned to applicants.

Please ensure that all requested information is submitted. Missing or incomplete information will result in a lower rating for the corresponding evaluation criteria.

Applications must be signed. The person signing for an entity must have authority to sign for that entity. Applicants must include their address, telephone number, facsimile number, and email address.

Corporations also must include:

- Evidence of incorporation and good standing.
- If reasonably obtainable, the name and address of each shareholder owning 3 percent or more of the corporation's shares and the number and percentage of any class of voting shares that each shareholder is authorized to vote.
- The name and address of each affiliate of the corporation.
- If an affiliate is controlled by the corporation, the number of shares and the percentage of any class of voting stock of the affiliate owned, directly or indirectly, by the corporation.
- If an affiliate controls the corporation, the number of shares and the percentage of any class of voting stock of the corporation owned, directly or indirectly, by the affiliate.

Partnerships, limited liability companies (LLCs), associations, or other unincorporated entities must submit a certified copy of the partnership agreement or other documentation establishing the entity or a certificate of good standing under the laws of the state where the entity is located.

Applicants should contact David Iniguez, Assistant Recreation Program Manager at (626) 422-5070, david.iniguez@usda.gov, regarding any questions related to this prospectus. The deadline to submit questions regarding the prospectus is **March 27, 2026**.

B. General Terms, Qualifications, and Reservations

All applicants have an equal opportunity to apply. Except for members of Congress, Resident Commissioners, and current Forest Service employees, any individual or entity may apply.

The Forest Service does not guarantee a profitable operation. Rather, applicants are responsible for reviewing the prospectus and making their own determination concerning business viability.

The Forest Service will select the application that offers the best value to the Government. The Forest Service reserves the right to select the successful applicant based on a trade-off between the fee to the Government and technical merit.

The Forest Service is not obligated to accept the application with the highest return to the Government.

The Forest Service reserves the right to select the successful applicant based solely on the initial application, without oral or written discussions.

The Forest Service reserves the right to reject any or all applications and to rescind the prospectus at any time before a special use permit is issued.

Any oral statement made by a representative of the Forest Service shall not modify the requirements of this prospectus. If it is determined that an error or omission has been made or additional information is required, a written amendment will be sent to each person or entity receiving a copy of this prospectus.

If there is a conflict between the terms of the prospectus and the special use permit, the terms of the permit will control.

The Forest Service is proposing a revision to FSM 2344.3 to address how passes and passports are honored in the concession program. The agency reserves the right to amend the special use permit consistent with any change to that directive. In addition, the Forest Service reserves the right to amend the special use permit, to make it consistent with applicable laws and regulations, including REA; other Forest Service directives; or other management decisions.

The information contained in applications will be kept confidential to the extent permitted under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a).

C. Application Package Requirements

Applications must be in writing and must include or address the following:

- A proposed annual operating plan (including required and optional services).
- A business plan, business experience, references, and Small Business Development Center (SBDC) review fee, if applicable (see section IV.C.2).

- SBDC business plan review fee of **\$350** made payable to *El Camino College SBDC*
- Financial resources.
- Fees charged to the public.
- Fee to the government.
- Initial processing fee.
 - Money order, or cashier's check payable to the *USDA-Forest Service* in the amount of **\$1,600.00**.

1. Proposed Annual Operating Plan (Including Required and Optional Services)

Applicants must submit a proposed annual operating plan that addresses all required and optional services. Applicants must utilize the sample annual operating plan (see Appendix 9, Minimum Content of the Proposed Annual Operating Plan) to organize their response to this section. The successful applicant's proposed operating plan will be attached to and become a part of the special use permit.

Applicants must specify whether another party will assist with any of the operational aspects of the concession, and if so, must include the other party's name, address, telephone number, email address, and relevant experience.

Below are highlights of what needs to be addressed in the proposed annual operating plan. For more detail, see the Minimum Content of the Proposed Annual Operating Plan in Appendix 9 of the prospectus.

Operating Season

Applicants need to propose the period in which they will operate the sites listed in the prospectus. All sites must be open and operational seven days per week during the minimum operating season, unless a Forest Service closure order is in effect. See Appendix 9 for minimum operating dates.

Staffing

Applicants must address appropriate staffing to meet customer service and cleanliness standards. The holder will be responsible for furnishing all personnel for the developed recreation sites and for adequately training and supervising their activities under the terms of the permit. The holder must meet requirements of federal and state laws governing employment, wages, and worker safety. Based on past experience, recommended staffing is outlined in Appendix 9 of the prospectus. Applicants should address worker hours and schedules. Applicants also should address staff training for effective customer service, conflict resolution, area-specific emergency procedures, and dissemination of recreation and tourism information.

Supervision and Management

Applicants must designate an individual to serve as the agent of the holder for purposes of administration of the permit by the Forest Service. The designated agent must periodically review attendant performance on site and must be available to resolve repair needs within 24 hours of discovery or notification. The holder will be responsible for the conduct of its employees, including preventing conduct prohibited by 36 CFR part 261, Subpart A, and ensuring that employees are not under the influence of intoxicating beverages or narcotic drugs while on duty or representing the holder. Applicants also must include a policy for removing employees who engage in inappropriate conduct.

Uniforms and Vehicle Identification

Applicants should describe employee uniforms, insignia, name tags, and the applicants' policy for ensuring a clean, professional appearance by staff while on duty. The holder's employees may not wear any component of the Forest Service uniform. Additionally, applicants should address their policy for vehicle maintenance and appearance; types of vehicles to be used for operations (vehicles may not be driven off designated roads or trails); and signage to identify the concessionaire to the public.

2. Business Plan, Business Experience, and References

Applicants must submit a business plan utilizing the format in Appendix 16 of the prospectus. This part of the application package must be a separate document. The business plan provides a thorough analysis of an applicant's vision of the proposed business. A good business plan is essential for running a successful business, maintaining and improving the business, and raising needed capital.

Applicants must furnish a detailed description of their experience relating to operating and maintaining developed recreation sites (e.g., campgrounds, beaches, and marinas). The description must include experience in private business, public service, or any nonprofit or other related enterprises. Applicants are encouraged to contact their local SBDC if they need assistance in completing their business plans. Alternatively, applicants who have already received a review of their business plan from an SBDC or the Forest Service for the current fiscal year may submit a copy of the review report.

SBDC Review

All business plans will be independently reviewed by an SBDC. If an applicant's current fiscal year business plan has already been reviewed by an SBDC, the applicant may submit a copy of the review report.

Along with a business plan, applicants also must submit a cashier's check in the amount of **\$350.00 made payable to El Camino College SBDC**. Applicants submitting a current fiscal year review report by the Forest Service or an SBDC need not enclose payment.

Performance Evaluations

Applicants who have experience in managing Forest Service or other Government concessions must provide copies of the most recent annual written performance evaluations for each Forest Service or other concession the applicants have operated or are operating.

References

Applicants also must furnish three business references with names, addresses, telephone numbers, and email addresses in support of relevant business experience. These references will be contacted for information regarding applicants' past performance. In addition, the Forest Service may consider past performance information from other sources.

3. Financial Resources

Applicants must submit a complete set of all financial statements for the last three fiscal years that have been audited, reviewed, or compiled by a certified public accountant (CPA). For any financial statements that were only compiled by a CPA, applicants must complete FS-6500-24, Financial Statement (see Appendix 17 of the prospectus) for certification of the accuracy of the financial statements.

Applicants must complete FS-6500-24 for any of the last three fiscal years they were in business for which a financial statement was not audited, reviewed, or compiled by a CPA. An applicant who has had a

financial ability determination (FAD) conducted within the past year should include a statement to that effect along with the forest name, contact name and telephone number. Additionally, applicants must identify any pending applications or new permits obtained from the Forest Service since the FAD was completed.

In completing FS-6500-24, LLCs must list the name of the company in block 1, the names and interests of the principals in block 5, and their members should be listed in block 6. In addition, LLCs must complete the certification in Part (D)(1) of FS-6500-24.

An applicant who has not been in business for the last three fiscal years, and therefore cannot submit audited, reviewed, or compiled financial statements or an FS-6500-24, must submit three fiscal years of projected financial statements compiled by a CPA using the forecast method.

Any financial information submitted by applicants must conform to generally accepted accounting principles (GAAP) or other comprehensive bases of accounting. Any previously prepared financial documents that are submitted must be unredacted and in their original form, including footnotes.

Applicants must show at least 25 percent of the first year's operating costs in liquid assets. Liquid assets are assets that are readily converted into cash.

Applicants also must complete blocks 1 through 5 of form FS-6500-25, Request for Verification (see Appendix 18 of the prospectus) and submit the signed and dated form with the application. The Forest Service will forward the FS-6500-25 for the most qualified applicant to the Albuquerque Service Center for processing. The auditor assigned to conduct the FAD will send a copy to each financial institution with which the applicant does business. The financial institutions must complete blocks 6 through 15 of the form and mail the completed form to **USDA Forest Service, Albuquerque Service Center**, Attention: Auditor, ASC-B&F, 101 B Sun Ave NE, Albuquerque, NM 87109.

4. Fees Charged to the Public

Applicants must provide a list of all fees they propose to charge to the public for the **first three years of operation, including fees for required and optional services** (see Appendix 9, Minimum Content of the Proposed Annual Operating Plan for a list of required and optional services). Discuss any variable pricing, discounts, and passes. All proposed fees to be charged to the public also must be included in the business plan as an income item.

The Forest Service reserves the right to regulate the rates charged to the public.

5. Fee to the Government

The Government is obligated to obtain fair market value for the use of its land and improvements. The minimum fee is **\$149,822.05 per year**. The minimum fee is the concession's average gross revenue for the past three years multiplied by the current 30-year Treasury bond rate. The minimum fee will be adjusted at the end of the first five years of the permit term if the permit is extended for five years.

Minimum Fee Calculation

Table 5. Minimum Fee Calculation

Year	Gross Revenue
2022	\$3,958,143.00
2023	\$2,411,757.00

Year	Gross Revenue
2024	\$3,254,643.00
Grand Total	\$9,624,543.00
Average = Grand Total ÷ 3	$\$1,986,952.93 \div 3 = \$3,208,181.00$
Three Year Average Gross Revenue	\$3,208,181.00

Total gross revenue ÷ 3 = average gross revenue

Average gross revenue multiplied by the current 30-year Treasury bond rate = the minimum annual fee. In the following example, the 30-year Treasury bond rate is 4.67 percent.

$\$3,208,181.00 \times 0.0467 = \$149,822.05$ minimum annual fee

Applicants may propose a fee below the minimum, provided they can document why this amount represents fair market value. However, the Forest Service may reject the proposed fee if the agency determines that it does not reflect fair market value.

Applicants must propose the fee to the Government as a percentage of the concession's adjusted gross revenue. One percentage may be proposed for the entire permit term, or the percentage may vary each year. However, if a consolidated fee payment will be proposed, one percentage rate must be proposed for the entire period of consolidated payments.

Optional Consolidated Land Use Fee Payment. Applicants may propose a consolidated fee payment for up to 5 years during the initial permit term or extension of the term to finance a GT fee offset project. The consolidated land use fee payment will be determined by multiplying the average annual gross revenue of the offering for the past 3 years (adjusted, if applicable, based on expansion or contraction of the concession) by the number of years the land use fee payments will be consolidated, and multiplying the product by the percentage of gross revenue proposed by the applicant. If the Forest Service will perform the GT fee offset work using a collection agreement, the entire consolidated land use fee payment must be made when the first land use fee payment otherwise would have been due. If the holder will perform the GT fee offset work, the holder must commence that work within the first 6 months of the consolidated fee period and must complete the work within 18 months of the beginning of the consolidated fee period. The consolidated land use fee payment will not be reconciled based on actual gross revenues.

The proposed fee to the Government also must be included in the business plan as an expense item in the cash flow projections.

The fee to the Government may be offset in whole or in part by the value of Government MRRI, performed at the permit holder's expense in accordance with a GT fee offset agreement (see section III of the prospectus).

6. Application Fee

Cost Recovery

Applications submitted in response to this prospectus are subject to cost recovery pursuant to 36 CFR 251.58(c)(1)(ii) and (c)(3)(iii). Applicants must submit a processing fee of **\$1,600.00** to cover the cost of the prospectus and review of the application. Payments due the United States for this application must be paid in the form of a bank draft, money order, or cashier's check payable to the USDA-Forest Service.

Payments will be credited on the date received by the designated Forest Service collection officer or deposit location. Additionally, the selected applicant will be responsible for the costs of preparing and issuing the permit and conducting a FAD, unless the Forest Service has conducted a FAD for the applicant within the past year. If a FAD has been completed for the applicant within the last 12 months, the applicant will be responsible for the cost of adjusting it to reflect any change this selection will have on the applicant's financial ability.

D. Evaluation of Applications

A Forest Service evaluation panel will evaluate each application utilizing the **non-fixed weight** method.

The following evaluation criteria are listed in descending order of importance:

- Proposed annual operating plan (including required and optional services)
- Business plan, (business experience and references).
- Fee to Government.
- Fees charged to the public.
- Financial Resources.

The Forest Service will consider only the applicant's written application package and any past performance information obtained by the Forest Service. During the evaluation process, the evaluation panel may contact any references, including all federal, state, and local entities that have had a business relationship with the applicant. The evaluation panel also may consider past performance information from other sources.

The evaluation panel will provide a written summary of applicant ratings, including strengths and weaknesses of each applicant, to the authorized officer. The authorized officer will make the selection decision based on which applicant offers the best overall value to the federal government. The authorized officer is not required to select the applicant that proposes the highest land use fee. All applicants will be notified of the successful applicant via certified mail.

The Forest Service will conduct a FAD on the selected applicant as a prerequisite to issuing a special use permit, unless the agency has a current fiscal year FAD conducted by the Albuquerque Service Center or SBDC for another Forest Service unit.

The Forest Service reserves the right to reject any and all applications.

The Forest Service reserves the right to rescind the prospectus at any time before a special use permit is issued. If the Forest Service rescinds the prospectus, application fees will be returned.

V. Post-Selection Requirements

Once an applicant has been selected, the following information must be submitted and approved by the Forest Service prior to issuance of a special use permit:

- A final annual operating plan containing all the items included in the annual operating plan submitted in response to the prospectus.
- An annual GT fee offset agreement.

- Documentation of required liability insurance and, if applicable, property insurance.
- Documentation of bonding, if applicable.
- Required deposits and advance payments (see Appendix 10 of the prospectus and FS-2700-4h, clause V.C.1).
- Documentation that utility services have been obtained in the name of the selected applicant.
- A state business license and any other required federal, state, or local certifications or licenses.

The successful applicant will be required to submit all these items within 30 days of the date of the selection letter. If these requirements are not met within the 30-day period, a special use permit will not be issued. The applicant who receives the next-highest rating may then be selected for the special use permit, subject to the same requirements.

Burden and Non-Discrimination Statement

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond, to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0596-0082. Response to this collection of information is mandatory. The authority to collect the information is the Organic Administration Act, 16 U.S.C. 551. The time required to complete this information collection is estimated to average 10 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the State or local Agency that administers the program or contact USDA through the Telecommunications Relay Service at 711 (voice and TTY). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination Complaint](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Mail Stop 9410, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

The Privacy Act of 1974 (5 U.S.C. 552a) and the Freedom of Information Act (5 U.S.C. 552) govern the confidentiality to be provided for information received by the Forest Service.

Appendix 3: Inventory of Government-Furnished Property

The Federal Government owns the improvements within all the developed recreation sites. Included in the following inventory are the description, quantity, and the estimated replacement cost of the applicable property.

Please note that it is the policy of the Forest Service (FSM 2330.5) to provide universally designed recreation sites, facilities and constructed features through the use of designs that accommodate most people, including people with disabilities, while maintaining the setting. For example, all picnic tables, fire rings, toilets structures, etc., that are purchased or constructed, are now to be accessible, so that any person can use those facilities, wherever they are located. Replacement costs use the cost of accessible items where applicable.

The inventory listed below is from generally reliable sources, but no warranty is made as to its accuracy. A final inventory list will be attached to the permit once reviewed by the holder and forest.

Monterey Ranger District

Applicable Forest Orders

Included in this appendix are all regionwide and forest wide orders which apply to the Los Padres National Forest. They appear in order by effective date beginning with the most recent. Additional orders, individually specific to each district, are available on the forest webpage. This webpage will also provide the most up to date closures and orders.

Table 1. Applicable Forest Orders.

Effective Date	Order #	Description
August 13, 2025	05-07-53-25-18	Santa Lucia Ranger District and Mt. Pinos Ranger District Gifford Fire Closure Order
August 7, 2025	05-07-53-25-13	Santa Lucia Ranger District Gifford Fire Closure Order

Evaluation and Appraisal Overall Rating:**Above Expectations** ☐**Meets Expectations** ☐**Below Expectations** ☐**Unacceptable** ☐**Note:**

1. If any Critical Element is rated “Below Expectations” the best possible overall rating is Below Expectations.
2. If any Critical Element is rated “Unacceptable” the best possible overall rating is Unacceptable.
3. If one to three other elements are rated “Unacceptable” the best possible overall rating is Below Expectations.
4. If three or more Critical Elements are rated “Below Expectations” or over four other elements are rated “Unacceptable” the best possible rating is Unacceptable.

Below Expectations: The permit holder is given notice regarding which element(s) justify the rating, and if performance in this element(s) is not improved prior to the next rating period, the Below Expectations rating shall be reduced to an Unacceptable rating.

Unacceptable: The permit holder is issued written notice of the Opportunity to Take Corrective Action as stipulated in Section V (C) of the Special-Use Permit. This is the required first step in suspension and/or revocation of use over all or portions of the permit area. In some instances, such as a lack of adequate insurance, safety issues, etc., suspension or revocation may take place immediately.

Signatures:

Forest Representative	Date

The permit holder's signature denotes that the Forest Service representative has discussed this evaluation/appraisal with the permit holder or his/her representative. A signature does not necessarily constitute agreement or acceptance of the rating.

Law Enforcement at Concession Campgrounds

Forest Service Manual 2342.1 lists the Federal laws and regulations that allow occupancy and use of National Forest System lands by entities other than the FS. Clarification of this policy is provided below.

2342.1 - Exhibit 01

ROLES AND RESPONSIBILITIES

1. **Concessionaires.** In responding to violations of Federal, State, and local laws, ordinances, and regulations, concessionaires have the same authority as a private citizen. Concessionaires generally cannot enforce Federal, State, or local laws or regulations, including 36 CFR part 261, Prohibitions on National Forest System lands. Concessionaires should be knowledgeable of applicable Federal, State, and local laws and regulations, including 36 CFR part 261, and should report violations of these laws and regulations to the appropriate law enforcement authorities.

Concessionaires may enhance public safety at concession campgrounds in a number of ways. For example, they may hire a private security firm, hire off-duty State or local law enforcement personnel, or enter into a cooperative agreement with the county for additional patrols.

Under the terms of the campground concession permit, the authorized officer may allow or require a concessionaire to establish certain restrictions on conduct or rules of use. For instance, the concessionaire may establish a rule of use that limits the number of vehicles per campground site, establishes a limit on the length of stay, or prohibits washing food at a water hydrant. The rules of use may be incorporated into the concessionaire's operating plan, and the concessionaire may be held accountable for ensuring compliance under the terms of the special use permit.

Conduct that violates rules of use may also violate Federal, State, or local laws. When such conduct occurs, the concessionaire should report those violations to the appropriate law enforcement authority. For example, violation of a rule of use may constitute a disturbance of the peace in violation of State law or disorderly conduct in violation of Forest Service regulations at 36 CFR 261.4

To minimize confusion between criminally enforceable Federal, State, and local laws and concessionaire-established rules of use, each should be separately posted within the campground.

2. **State and Local Law Enforcement Agencies.** Generally, State and local law enforcement agencies have authority to enforce applicable State and local laws, ordinances, and regulations on National Forest System lands. Under 16 U.S.C. 480, States retain their civil and criminal jurisdiction over persons on the National Forests. Thus, crimes involving persons and their property are generally the primary responsibility of State and local law enforcement authorities.

Where a concessionaire has established rules of use, there is no authority for a State or local law enforcement agency to take enforcement action, unless the conduct giving rise to the violation of a rule of use also constitutes a violation of State or local law.

There is no authority for the Forest Service to allow State and local law enforcement personnel to enforce Federal laws and regulations, including 36 CFR part 261. Some conduct may be prosecuted under Federal or State law because the conduct violates both Federal and State law. However, State and local law enforcement officers may enforce only State and local law.

3. **Forest Service.** The Forest Service retains all its authorities and responsibilities for enforcing Federal laws and regulations relating to administration of National Forest System lands. The role and responsibilities of the Forest Service do not change simply because the Forest Service has issued a special use permit to a concessionaire. Forest Service personnel should continue to enforce all Federal laws and regulations relating to administration of National Forest System lands within concessionaire-operated campgrounds.

Forest Service personnel should not assume, however, that all laws and regulations applicable to facilities operated by the Forest Service are also applicable to sites operated by concessionaires. For example, as a matter of policy the Forest Service does not interpret failure to pay a camping fee charged by a concessionaire to be a violation of 36 CFR 261.15 because the camping fee charged by the concessionaire is not an admission or recreation use fee for a “site, facility,... or service furnished by the United States.” The agency construes “furnished by the United States” to mean “owned and operated” by the United States.” Therefore, the Forest Service would not cite someone for failure to pay a camping fee at a concession campground because the site is operated by a concessionaire, rather than the Forest Service, and the concessionaire, rather than the Forest Service, retains the campground fees.

The regulations at 36 CFR part 261, subpart A, apply at both Forest Service and concessionaire-operated campgrounds. In contrast, orders issued under 36 CFR part 261, subpart B, may or may not apply at concession campgrounds. A subpart B order must clearly state the area to which it applies. 36 CFR 261.50(c)(1). If the order is forest- wide, it applies to all campgrounds, including concession campgrounds, within the forest. Operating plans for concession campground permits should be consistent with any orders that apply. A concessionaire may not allow an activity prohibited by an order. However, a concessionaire’s rule of use may be stricter than an order.

The Regional Forester or Forest Supervisor may exempt concession campgrounds from an order and may want to exempt them to place more responsibility for the site on the concessionaire. Rules of use rather than the order would then govern. This approach is consistent with one of the purposes of the campground concession program, which is to reduce expenditure of limited Forest Service resources in administering developed recreation sites.

When issuing a subpart B order, the Regional Forester or Forest Supervisor should consider whether the order should apply at concession campgrounds.

2342.1 - Exhibit 01--Continued

If concession campgrounds are exempted from a subpart B order, the rules of use established by concessionaires may differ from the restrictions contained in the order that applies elsewhere. For example, the restriction established by an order on the number of vehicles allowed per campsite at a Forest Service-operated campground may differ from the same type of restriction adopted as a rule of use at a concession campground. Forest Service personnel should ensure that they enforce only those subpart B orders that apply to concession campgrounds.

36 CFR part 261, subpart C, regulations should be handled the same way as subpart B orders. Subpart C regulations are issued by the Chief or Regional Forester to prohibit acts or omissions in all or any part of an area over which the Chief or Regional Forester has jurisdiction.

Forest Service law enforcement personnel should cooperate with State and local law enforcement agencies to the extent authorized by Forest Service policy (FSM 5360) and State and Federal law, such as 16 U.S.C. 559g(c), which authorizes acceptance of a law enforcement designation from States, and 16 U.S.C. 553, which authorizes the Forest Service to aid in the enforcement of State laws in certain respects.

Prospectuses and permits for concession campgrounds should clearly describe the respective responsibilities of Forest Service law enforcement personnel, State and local law enforcement authorities, and concessionaires.

SUMMARY

Crimes involving persons and property are generally violations of State law. State and local law enforcement authorities have jurisdiction to enforce State laws at concession campgrounds. Forest Service personnel have the responsibility to enforce Federal laws and regulations relating to the administration of National Forest System lands.

Concessionaires may establish and enforce rules of use that are subordinate to Federal, State, and local laws and regulations. Rules of use are not enforceable by Federal, State, or local law enforcement authorities unless violations or rules of use constitute violations of Federal, State, or local laws.

Concessionaires should contact Federal, State, and local law enforcement authorities to address criminal violations under their respective jurisdictions. Concessionaires may also consider hiring a private security firm or contracting with off-duty State or local law enforcement personnel to address day-to-day public safety concerns at concession campgrounds.

Campground concession prospectuses and permits should clearly describe the respective responsibilities of Forest Service law enforcement personnel, local law enforcement authorities, and concessionaires. In order to minimize visitor confusion between criminally enforceable Federal, State, and local laws and concessionaire-established rules of use, each should be separately posted within a campground.

Minimum Content of the Proposed Annual Operating Plan

This appendix enumerates the minimum that must be included in the applicant’s proposed annual operating plan regarding the annual operating season, staffing, and operation and maintenance of the concession opportunity.

The applicant’s proposed annual operating plan must be consistent with the campground concession prospectus (prospectus) and campground concession permit (permit). The applicant’s proposed operating plan may not contain any language that shifts, or could be interpreted as shifting, responsibility to the Forest Service for all or part of the applicant’s responsibilities under the permit, including but not limited to the applicant’s responsibilities for public health and safety such as inspecting, identifying, and felling of hazard trees in the permit area.

The Forest Service will evaluate the applicant’s proposed annual operating plan based on the criteria specified in the prospectus. The selected applicant’s proposed annual operating plan will be submitted to the authorized officer for review and approval.

Table 1. Minimum Operating Season by Site.....	1
Table 2. Recommended Site Managers by Location	Error! Bookmark not defined.

1. Annual Operating Season

The annual operating season is the period each year that the campgrounds are open to the public. The minimum annual operating season is May 1st to October 30th, unless otherwise specified. Applicants may propose a longer annual operating season. All campsites in the concession opportunity must be open seven days per week, including holidays, during the minimum annual operating season.

The proposed annual operating plan must specify the dates of the beginning and end of the annual operating season, as well as the dates of the beginning and end of pre-season and post-season operations.

Table 1. Minimum Operating Season by Site

Site Name	Minimum Operating Season
Mount Pinos Ranger District	
McGill Campground	May 01- October 30
McGill Group Campgrounds 1 and 2	May 01 – October 30
Mt. Pinos Campground	May 01 – October 30
Reyes Creek Campground	Year-round
Ballinger Campground	Year-round
Campo Alto Campground	May 01 – October 30
Chuchupate Campground	May 01 – October 30
Monterey Ranger District	
Kirk Creek Campground	Year-round
Plaskett Creek Campground	Year-round
Arroyo Seco Campground	Year-round
Bottcher's Gap Campground	Year-round
Pfeiffer Beach Day Use Area	Year-round
Sand Dollar Day Use Area	Year-round
Willow Creek Day Use Area	Year-round
Mill Creek Day Use Area	Year-round
Santa Lucia Ranger District	
Cerro Alto Campground	Year-round
Figueroa Mountain Campground	Year-round
Nira Campground	Year-round
Davy Brown Campground	Year-round
Navajo Flat Campground and OHV Staging Area	Year-round
La Panza Campground	Year-round
Turkey Flat OHV Staging Day Use Area	Year-round
Ojai Ranger District	
Wheeler Gorge Campground	Year-round
Holiday Group Campground	Year-round

Appendix 9: Minimum Content of the Proposed Annual Operating Plan

Site Name	Minimum Operating Season
Rose Valley Campground	Year-round

<i>Big Caliente Picnic Area***</i>	<i>N/A</i>
<i>Lower Caliente Campground***</i>	<i>N/A</i>

Italicized listing are optional sites

*** Rec site requires deferred maintenance/rehab before opening

2. Staffing

The Proposed annual operating plan must provide for sufficient staffing to meet the requirements for operating and maintaining the concession opportunity as described in the campground concession prospectus (prospectus) and provided for in the campground concession permit (permit). The proposed annual operating plan must provide for the applicant to furnish and train all personnel and supervise their activities under the permit.

The proposed annual operating plan must require the applicant to comply with applicable state and federal laws and regulations governing employment, wages, and worker safety, equal opportunity, civil rights, workers compensation, and employment of people with disabilities and noncitizens.

2a. Supervision and Management

The proposed annual operating plan must designate a representative who will serve as the liaison between the applicant and the Forest Service and have full authority to act on the terms of the permit.

There may be more than one designee, each of whom has the authority to act on one or more permit terms (i.e., one person may deal with operations issues, one may deal with maintenance issues, and another may deal with financial issues). The designees' names and job titles must be included in the application.

The proposed annual operating plan must provide sufficient on-site supervisory staff to provide direction and oversight of hosts and other field personnel during the operating season.

2b. Personnel

In addition to the requirements outlined in the supervision and management section, the proposed annual operating plan should provide for site managers "hosts" to be located at the sites listed below. A history of operations experience indicates that having personnel stationed at these sites is useful given the complexity of operations at these sites.

Table 2. Recommended number of hosts by location

District / Area	Site Name	Recommended Number of Hosts	Recommended Day Use Attendant (Peak Season)
Monterey RD	Plaskett Creek CG	3	3
Monterey RD	Arroyo Seco CG	2	6
Monterey RD	Kirk Creek CG	2	2
Monterey RD	Pfeiffer Beach	2	5
Monterey RD	Sand Dollar Beach	1	1
Santa Barbara RD	Fremont CG, Sage Hill CG	1-2	
Santa Barbara RD	Paradise CG	1-2	
Santa Barbara RD	Los Prietos CG, Upper Oso CG	1-2	
Santa Barbara RD	White Rock		1
Santa Barbara RD	First Crossing Kiosk and DUA, Falls DUA, Red Rock TH		8
Santa Lucia RD	Figueroa Mountain CG, Davy Brown, Nira Campgrounds	2-3	
Santa Lucia RD	La Panza, Navajo Flat, Turkey Flat	1-2	
Santa Lucia RD	Cerro Alto CG	1-2	
Ojai RD	Wheeler Gorge CG	2	
Ojai RD	Pine Mountain (No Hookups)	1	

District / Area	Site Name	Recommended Number of Hosts	Recommended Day Use Attendant (Peak Season)
Mt Pinos RD	Reyes Creek CG	1	
Mt Pinos RD	Ballinger CG	1	
Mt Pinos RD	McGill CG, Mt Pinos CG	1	

The proposed annual operating plan must include staffing hours, schedules, and personnel locations for operations and maintenance. The proposed annual operating plan should include job descriptions and level of authority for all employee positions.

2c. Employee Training

The proposed annual operating plan must describe the training program for the applicant's employees. In addition, the Forest Service would like to review all training materials from the recreation site operator in order to ensure recreation management objectives will be met.

2d. Employee Conduct

The proposed annual operating plan must specify that the applicant will be responsible for the conduct of the applicant's employees, including ensuring that they conduct themselves professionally at all times, and their compliance with all applicable federal, state, and local laws. Federal prohibitions include but are not limited to:

- Engaging in conduct prohibited by Forest Service regulations at 36 CFR Part 261, Subpart A; and
- Being under the influence of intoxicating beverages or narcotic drugs while on duty.
- 261.1b Penalty-Unless otherwise provided by law, the punishment for violation of any prohibition in or order issued under this part shall be imprisonment of not more than six months or a fine in accordance with the applicable provisions of [18 U.S.C. 3571](#) or both.

2e. Uniforms and Motor Vehicle Identification and Use

The proposed annual operating plan must include a description of the components of the uniform for the applicant's employees. The proposed annual operating plan must provide for the applicant's employees to have a professional uniform including a name tag identifying them as the applicant's employees, and the uniform must be clean and presentable when worn. The proposed annual operating plan must provide for the applicant's employee uniforms to be readily identifiable to the public. The proposed annual operating plan must provide that the applicant's employees may not wear any component of the Forest Service uniform, including Forest Service volunteer uniform components.

The proposed annual operating plan should provide for the applicant's motor vehicles to be clean, quiet, and well-maintained and for the applicant's name to be professionally displayed on each side of vehicles used at the campgrounds. Motor vehicle use is allowed on National Forest System roads and National Forest System trails only if they are designated for that purpose or if motor vehicle use of those roads and trails is expressly authorized by the permit.

3. Customer Service

The proposed annual operating plan must address development and implementation of a customer service program that responds to customers' requests in a helpful, timely, courteous, and professional manner. A secure and routinely monitored email and phone number shall be provided to ensure excellent customer service especially during weekends and also during evening/night hours. The proposed annual operating plan must provide Use Reports to the Forest Service for ongoing monitoring of the sites. A sample Use Report is included in Appendix 5.

The proposed annual operating plan must provide for making customer service comment cards available to the public. A sample comment card is included in FS-2700-34, Appendix 6.

The Forest Service reserves the right to conduct random use counts and surveys in the permit area regarding the service they are receiving. These surveys may be used for ongoing monitoring, as well as the holder's annual performance evaluation (FS-2700-34, Appendix 7).

Passes

While the forest cannot require concessionaires to honor regional and national passes (America the Beautiful) concessionaires have the option to honor such passes at their discretion. The acceptance of these passes is a substantial benefit to the visitors. If a prospective bidder voluntarily offers to accept these passes, any loss of fee revenue should be factored into the applicant's bid. Holders may also choose to become vendors of certain passes, which they will need to reach out and work directly with the forest for more information and processes.

Fee Free Days

The permit holder is not required to honor the following fee free days, however honoring these free days is a substantial benefit to the public. Below is a list of these scheduled fee free days.

Fee Free Days — Martin Luther King Jr. Day (January), Presidents Day (February), Memorial Day (May), National Get Outdoors Day (June), Independence Day (July 4th), Constitution Day and National Public Lands Day (September), Theodore Roosevelt's Birthday (October), and Veterans Day (November 11th).

4. Pre-Season Operations

The proposed annual operating plan must require the applicant to conduct the following pre-season inspections and maintenance before the annual operating season begins.

4a. Annual Pre-Season Safety and Facility Inspections

The Forest Service has no duty to inspect the permit area or operations of the selected applicant for hazardous conditions or compliance with health and safety requirements or to correct hazards identified in the permit area. The proposed annual operating plan must provide that the applicant is solely responsible for performing and documenting an annual pre-season safety and facility inspection of the permit area,

including inspection of hazard trees; correcting any safety and maintenance deficiencies identified during the inspection, including identifying and felling of hazard trees, before the operating season begins; and documenting any corrective actions taken. For purposes of this operating plan, “hazard tree” is defined as a standing tree that presents a visible hazard to people or property due to conditions such as deterioration of or damage to the root system, trunk, stem, or limbs or the direction or lean of the tree. The proposed annual operating plan must provide that the applicant is solely responsible for eliminating or mitigating high-risk conditions as soon as practicable and for closing affected areas until the high-risk conditions are eliminated or mitigated.

4b. Pre-Season Requirements for Water Systems

The proposed annual operating plan must provide for compliance with all existing and future applicable federal, state, and local public health and safety requirements for operation of the water systems, including any required certifications.

The proposed annual operating plan must provide for properly activating the water systems before opening the campgrounds. The proposed annual operating plan must provide for the applicant to affect all repair of water system components necessitated by vandalism or improper operation or maintenance, such as damage to valves, water lines, and other system components due to insufficient draining at shutdown that resulted in water being left in the system and freezing over the winter.

The proposed operating plan must include procedures for ensuring the safety of the water system prior to the operating season, including but not limited to:

- Cleaning the insides of the well and storage tank, where applicable.
- Thoroughly flushing the entire system to remove any foreign matter.
- Distributing throughout the system a chlorine solution that tests at a level of more than 10 ppm at the most distant hydrant and allowing the chlorine solution to sit for at least 24 hours to sanitize the system.
- Obtaining satisfactory bacteriological test results from a state-certified laboratory.
- Have a certified backflow tester inspect and test all backflow preventer valves, including double check valve assemblies and reduced pressure zone valves on an annual basis. Repair or replace if non-functional.
- Exercise all valves on an annual basis. Clean out valve boxes of excess dirt or debris at the same time.

4c. Pre-Season Holder Maintenance, Reconditioning, and Renovation (MRR)

The proposed operating plan must provide for a thorough cleaning of all campground facilities prior to the operating season. Tasks must include but are not limited to:

- Cleaning and sanitizing toilet facilities and checking toilet vault levels.
- Clearing campsites of any debris and overgrown vegetation.
- Removing any litter from fire rings and the campgrounds generally.

- Emptying trash receptacles.
- Removing any graffiti from facilities and repairing any vandalized facilities.

5. Operational Requirements and Holder MRR During the Operating Season

The proposed annual operating plan must address the following operational requirements and holder MRR during the operating season.

5a. Operational and Maintenance Requirements for Water Systems

The proposed annual operating plan must provide for compliance with form FS-2700-4h, Appendix F, Operation of Federally Owned Drinking Water Systems, and all existing and future applicable federal, state, and local requirements for operation and maintenance of the water systems during the operating season, including routine, repeat, and special purpose bacteriological testing and any required notifications and retesting if results are unsatisfactory. Per current Forest Service water testing requirements, bacteriological water samples must be taken monthly, and a nitrate and nitrite test for each potable water system source is required once per year. The state may require annual or scheduled nitrate and nitrite testing. The proposed annual operating plan must provide for the applicant to send all water samples for each water system to a state-certified laboratory and to send all test results for each water system to the state department of public health as frequently as required by the state and to the Forest Service monthly.

The proposed annual operating plan must provide for all personnel operating and testing water systems to be certified as required by applicable federal, state, and local law.

The proposed annual operating plan must provide for the applicant to maintain a log of operation and maintenance of all water systems that at a minimum includes:

- Visually inspect all gauges and meters for leaks and proper function on a monthly basis. If necessary, repair or replace gauges and meters with the same size and type.
- Visual inspect the well head and piping on a weekly basis. Check and record observations and correct problems for the following: damage, leaks, openings, contaminants, electrical hazards etc. Check the pump operation and check the controls on a weekly basis.
- Operate, inspect and maintain the water treatment equipment according to the manufacturer's recommendations. Refer to the manufacturer's operation, installation and maintenance manuals and literature. Flush out approximately 250 gallons from the contact tank on a monthly basis by opening the drain valve.
- Maintenance and testing of backflow prevention devices - Visually inspect all air gaps at locations identified in the Cross-Connection Survey Summary Form, including the screening on pipe ends on a quarterly basis. Remove and visually inspect all vacuum breakers on hose bibs on a monthly basis. Clean out any debris. Replace if missing or non-functional.

Appendix 9: Minimum Content of the Proposed Annual Operating Plan

- Have a certified backflow tester inspect and test all backflow preventer valves, including double check valve assemblies and reduced pressure zone valves on an annual basis. Repair or replace if non-functional.
- Check the pressure gauges at pump station and at pressure reducing valves, recording system pressure on weekly basis.
- Dates, times, and results of all testing, inspections, cleaning, repairs, operational adjustments, and maintenance, including maintenance of the distribution system.
- For chlorinated systems, chlorine residual testing documentation, including the testing method, location, date, and time; chlorine amounts and levels; and flushing.
- Bacteriological monitoring: Sample as per the approved Sample Siting Plan on a monthly basis
- Inspection and maintenance schedules for the water system are as follows. Record the date, any operations, observations and repairs in the operations/maintenance log for any of the below listed activities.
- Visually inspect the underground disposal system for leaks, damage and/or evidence of liquid surfacing on a monthly basis. Inspect the interior of clarifier tank compartments and check sludge levels on a quarterly basis. Do not enter the tank unless qualified under OSHA standards.
- Water storage tanks - Visually inspect the tanks for leaks and/or damage on a monthly basis. Do not enter the tank unless qualified under OSHA standards. Flush storage tanks on a quarterly
- Inspecting/exercising of water main valves - Visually inspect all valves for leaks on a monthly basis. If necessary, repair or replace valve with the same size and type. Exercise all valves on a quarterly basis. Clean out valve boxes of excess dirt or debris at the same time.
- Maintain a water system file at a designated location on-site that is available for county health departments, DEH or USDA-FS, LPNF inspection. An operation/maintenance log will be utilized to record systematically the significant activities of the system.

The proposed annual operating plan must provide for the applicant to make the log available to the Forest Service upon request.

The proposed annual operating plan must provide for the applicant to perform routine sanitary surveys of water systems to ensure their integrity.

The proposed annual operating plan must provide for the applicant to be responsible for all costs associated with testing and monitoring the water systems.

The proposed annual operating plan must provide for the applicant to make any repairs of the water systems necessitated by vandalism, natural events, or improper operation or maintenance.

5b. Holder MRR During the Operating Season

The proposed annual operating plan must specify the types and frequency and provide for documentation of holder MRR. Holder MRR is not subject to Granger-Thye (GT) fee offset. Only Government maintenance, reconditioning, renovation, and improvement is subject to GT fee offset under a GT fee

offset agreement. A sample Holder MRR Plan is provided in Appendix 9 of the Sample Minimum Content of the Proposed Annual Operating Plan.

5c. Standards for Facility Cleaning and Holder MRR

The proposed annual operating plan must include standards and timeframes for cleaning campground facilities and holder MRR that at a minimum address the following.

5c1. All Facilities

- Removal of graffiti and repair of vandalized facilities.
- Cleaning and maintenance of facilities.
- Visitor and vehicle capacity.
- Conducting and documenting annual pre-season and end-of-season safety and facility inspections and correcting identified deficiencies identified during pre-season inspections before the operating season begins and correcting deficiencies identified during the end-of-season inspection before the next operating season begins.
- Eliminating or mitigating any high-risk conditions identified during the operating season as soon as practicable or closing affected areas.
- Ensuring electrical systems meet applicable state and local requirements.
- Cutting grass and trimming overhanging brush around picnic tables, bulletin boards, water hydrants, barriers, signs, buildings, parking areas, paths, campsites, and other facilities.

5c2. Toilet Facilities

- Cleaning frequency and procedures, including:
 - Procedures for keeping toilet facilities free of objectionable odor.
 - Requiring Forest Service approval for any deodorants, disinfectants, and fly strips provided by the applicant.
 - Removal of any exposed human waste immediately upon discovery or notification.
 - Keeping the outside step and exterior of toilet buildings, including the roof, free of dirt and debris.
 - Keeping walkways and trails free of obstructions and excess vegetation.
- Maintenance frequency and procedures, including:
 - Painting the interior of at least 20% of the toilet facilities each year in a color approved by the Forest Service.
 - Completely pumping toilet vaults when they become 75% full and at the end of each operating season and completely pumping toilet vaults that are more than 50% full at the end of the final operating season under the permit.
- Pumping septic tanks for flush toilets on a schedule agreed to with the Forest Service.

- Meeting applicable federal, state, and local requirements for all other types of sewage treatment systems.
- Transporting all sewage from the campgrounds to a sanitary landfill, sewage lagoon, or treatment plant approved by the Forest Service.

5c3. Picnic Tables

- Mowing grass and trimming vegetation around the picnic area.
- Maintaining sufficient vegetation, gravel, or other material approved by the Forest Service around picnic tables to prevent mud and erosion.
- Maintaining a level surface for picnic tables.

5c4. Fire Rings and Grills

- Keeping fire rings free of litter and level.
- Maintaining sufficient concrete, gravel, or other material approved by the Forest Service around fire rings to prevent mud and erosion.
- Clearing all combustible materials and vegetation within a distance of at least 3 feet from fire rings.
- Removing ashes, charcoal, and unburned wood from fire rings and grills when the debris level is less than 4 inches from the top of the ring or grill.
- Disposing of ashes, charcoal, and unburned wood off National Forest System lands and in accordance with applicable state and local law.
- Not placing hot ashes, charcoal, and unburned firewood in dumpsters or trash receptacles.
- Removing any fire rings, fire pits, and other modifications that were not installed or approved by the Forest Service, including any ashes, charcoal, and unburned wood, and scattering the rocks and spreading soil over the areas.

5c5. Grounds

- Keeping the campgrounds free of litter and domestic animal waste.
- If pack-in, pack-out requirements apply, prominently displaying those requirements; providing trash bags to customers; and removing any trash within 24 hours of discovery or notification.
- Preventing or correcting loss of vegetation and erosion caused by recreational use in accordance with the approved vegetation management plan.
- Removing any nails, ropes, and wire from trees.
- Mowing grass and trimming vegetation.

5c6. Roads and Trails

- Maintaining walkways and paths, including clearing debris and trimming overhanging vegetation and maintaining proper drainage to minimize water damage.
- Treating and maintaining roads in the permit area to control dust.
- Cleaning and maintaining ditches and culverts in the permit area to allow proper drainage.

5c7. Barriers

- Trimming vegetation around barriers to keep them visible.

5c8. Water Hydrants

- Ensuring that water hydrants meet federal and state standards.
- Replacing the gravel sump when sour-smelling, filled with dirt, or excess water does not properly drain.
- Posting water hydrants with a sign prohibiting dish washing, bathing, hand washing, and fish cleaning from the hydrants.

5c9. Trash Receptacles

- Specifying the type, size, number, and locations of trash receptacles.
- Emptying trash before it exceeds the capacity of the receptacle.
- Keeping areas where trash receptacles are located clean and free of objectionable odors.
- Disposing of all trash from National Forest System lands in accordance with applicable state and local law.

5c10. Campsite Markers

- Ensuring that campsite markers are well-maintained, neatly arranged, and meet Forest Service sign standards.

5c11. Bulletin Boards, Signs, and Fee Stations

- Ensuring that information boards look professional and uncluttered and contain appropriate and current information in multiple languages, as needed.
- Ensuring that signs, bulletin boards, and fee stations are well-maintained and meet Forest Service sign standards.

5c12. Fee Enforcement

- Providing for enforcement of camping and other use fees.

6. Mid-Season Safety and Facility Inspections

The Forest Service has no duty to inspect the permit area or operations of the selected applicant for hazardous conditions or compliance with health and safety requirements or to correct hazards identified in the permit area. The proposed annual operating plan must provide that the applicant is solely responsible for performing mid-season safety and maintenance inspections of the permit area, including inspection of hazard trees, at a minimum prior to July 4th and the Labor Day weekend, and documenting any deficiencies identified during mid-season inspections. The proposed annual operating plan must provide that the applicant is solely responsible for correcting any safety and maintenance deficiencies identified during mid-season inspections, including identifying and felling hazard trees, as soon as practicable and documenting any corrective actions taken. The proposed annual operating plan must provide that the applicant is solely responsible for eliminating or mitigating high-risk conditions as soon as practicable and for closing affected areas until the high-risk conditions are eliminated or mitigated.

7. Signs and Posters

The proposed annual operating plan must provide for the applicant to supply all signs and posters and for all signs and posters to be approved by the Forest Service. The Forest Service can furnish information on companies that sell Forest Service-approved signs. The proposed annual operating plan may provide for the applicant to enter into a collection agreement with the Forest Service for the purchase of Unicorn P Code signs if the applicant is not able to purchase them.

7a. Identification of Concession Operation

The proposed annual operating plan must provide for posting a sign on the entrance board for each campground stating that the campground is operated under a permit issued by the Forest Service and including the name of the concessioner and the concessioner's contact information.

7b. Title VI Compliance

The proposed annual operating plan must provide for posting signage with Forest Service-approved wording documenting compliance with Title VI of the Civil Rights Act of 1964, such as USDA's And Justice for All poster.

The proposed annual operating plan must provide for the Unicorn P23-43 Welcome to Your National Forests poster or a Forest Service-approved equivalent to be posted on entrance boards to inform the public of applicable prohibitions in Forest Service regulations at 36 CFR Part 261, Subpart A.

7c. Signs and On-Site Advertising

The proposed annual operating plan must provide for the location, design, size, color, and content of any additional signs or advertising posted on National Forest System lands to be approved by the Forest Service.

8. Advertising

The proposed annual operating plan must provide information on how the applicant is going to advertise the permit area to the public.

8a. Accurate Representation

The proposed annual operating plan must provide that the applicant may not misrepresent in any way, either orally, online, or in print, any aspect of the authorized use and occupancy, including services provided by the applicant, the status of the permit, or the permit area. The proposed annual operating plan must provide for all forms of the applicant's advertising to state that the permit area is located in the [name] National Forest or Grassland.

8b. Equal Opportunity

The proposed annual operating plan must provide for all forms of advertising to state that the applicant is an equal opportunity provider.

9. Fire Prevention and Suppression Plan

The proposed annual operating plan must include a proposed fire prevention and suppression plan that addresses at a minimum and are consistent with CAL Fire Defensive Space standards (Refer to CAL Fire form LE-100A):

- Procedures for preventing and suppressing wildfires and structural fires.
- Reporting procedures and emergency response for fires.
- Training and experience required for employees for fire prevention and suppression.
- Fire prevention and suppression tools and equipment that will be maintained on-site.
- Visitor and employee safety, including but not limited to an emergency evacuation plan and communication plan.

10. Road and Trail Maintenance

At a minimum, the proposed annual operating plan must provide for the applicant to maintain vehicular and pedestrian access to the campgrounds in a safe and passable condition and in accordance with Forest Service standards, including but not limited to mowing along road shoulders and around parking barriers for visibility; brushing to facilitate vehicular access; and cleaning culverts at the beginning of each operating season and following large storms.

11. Emergency Response

The proposed annual operating plan must address how the applicant will respond to medical, law enforcement, facility, fire, flood, and other types of emergencies that might occur in and around the campgrounds.

12. Law Enforcement, Campground Security, and Rules of Use

12a. Law Enforcement

Forest Service, state, and local law enforcement and the selected applicant each have enforcement roles at campground concessions. Form FS-2700-34, Appendix 8, addresses enforcement authorities and responsibilities at campground concessions (FSM 2342.1, exhibit 01).

12b. Campground Security

The proposed annual operating plan must address campground security, including but not limited to rules of use the applicant will post and enforce at the campgrounds.

The proposed annual operating plan must provide for the applicant to report vandalism, destruction of federal or personal property, and criminal violations within 24 hours of discovery or notification to local law enforcement and the Forest Service.

The proposed annual operating plan must address measures that will be taken to prevent vehicle parking from causing resource damage and blocking traffic.

12c. Rules of Use

The proposed annual operating plan must include, but is not limited to, rules of use addressing the following:

- Leashing of dogs.
- Exceeding the stay limit.
- Failure to pay camping and other use fees.
- Excessive noise.
- Improper disposal of wastewater and sewage.
- Parking or camping in undesignated sites.
- Use of motor vehicles off designated routes and at an excessive speed.
- Overnight camping in parking areas.
- Discharge of firearms in the permit area.
- Vandalism, particularly of toilet facilities and trees.
- Improper use of hydrants, e.g., for fish cleaning.
- Illegal campfires.
- Applicable noise restrictions.

13. Communications Systems

The proposed annual operating plan must provide for complete, timely, and accurate communications (e.g., via two-way radios and cellular telephones) among all employees, the Forest Service, Recreation.gov., and emergency response agencies.

The proposed annual operating plan must identify the applicant's on-site representative and how that person will communicate with the Forest Service on-site.

The proposed annual operating plan may not provide for use of Forest Service radio frequencies and equipment.

14. Bears, and Other Wildlife

The proposed annual operating plan must address facilitation of safe human-wildlife interactions, including but not limited to posting the following precautions and guidelines:

Bear Activity

- A. Do not feed bears or other wildlife.
- B. Report bear activity within 24 hours to the state department of fish and wildlife.
- C. Post messages relating to bear activity on signboards.
- D. Use approved wildlife-proof trash containers, as needed.
- E. Keep all food in secure containers.
- F. Properly dispose of all trash and wastewater containing food as soon as possible.

The proposed annual operating plan must provide for posting information about bear activity in the campgrounds on signboards.

Goldspotted Oak Borer (GSOB)

The proposed annual operating plan should address GSOB procedures that include a plan to address the following,

Pest Prevention Training Requirements

- Campground and day-use management staff are required to participate in one pest prevention / management training each year. The course will focus on pest identification, and monitoring subject matter to help avoid the introduction and or spread of pests such as the Goldspotted Oak borer, which is introduced and transported via infected firewood.

Local Wood Source Policy

- Forest Service policy, grounded in the Forest Service Manual (FSM) 2900 on Invasive Species Management, emphasizes and promotes the use of local firewood to prevent the introduction and spread of invasive insects and pathogens. The policy directs employees to prevent invasive species establishment or spread during management activities on National Forest System lands.

This is reinforced by broad public education initiatives, such as the "Don't Move Firewood" campaign, which promote the practice of "Buy It Where You Burn It" and highlight the high risk of moving invasive pests long distances in contaminated firewood.

Firewood Management and Invasive Species Prevention

To prevent the introduction and spread of invasive insects and pathogens, such as the Goldspotted Oak Borer, by strictly managing oak firewood within the campground. Permit Holder shall implement and enforce the following protocols for campers' firewood.

Protocol for Uncertified Oak Firewood:

Incoming Firewood Inspection: Upon visitor check-in, concessionaire staff must inquire about the origin of any oak firewood and request a local receipt or bill of sale from a certified vendor.

Firewood Confiscation:

If a visitor possesses oak firewood without a valid local receipt or bill of sale, the concessionaire must confiscate the wood. Confiscated wood must not be returned to the visitor or used within the campground.

Quarantine Procedure:

Place all confiscated oak firewood in large, high-grade plastic bags (40-gallon or larger, 1.5 MIL or higher thickness).

Ensure the bags are securely tied or sealed to prevent insect escape.

Immediately transport the sealed bags to a designated, secure storage location.

Secure Disposal:

Dispose of the sealed firewood bags in a locked dumpster or other approved, secure, pest-proof container not accessible to the public.

Concessionaires must coordinate with the Forest Service representative for final disposal instructions, such as transporting the sealed material to an off-site biomass or composting facility. Chipping to a particle size of less than 1 inch is also an approved method for killing most wood-boring insects, where applicable.

Visitor Communication and Education:

Concessionaires will communicate "Don't Move Firewood" messaging to all visitors through campground information, website updates, and during the check-in process. Staff will educate campers on the importance of buying local, certified heat-treated firewood or gathering dead and down wood on-site where permitted.

Compliance and Enforcement:

The permit holder must include in their Annual operating plan management protocols to address failure to adhere to these firewood management policies. The Forest Service reserves the right to audit the concessionaire's firewood management practices and issue corrective actions as necessary.

Resource Protection Measures for Sensitive Species

Below are some resource protection measures and information on specific threatened, endangered, sensitive, proposed, candidate, Forest Service sensitive, and invasive animal and plant species concerns currently affecting the integrity of natural resources on the Los Padres National Forest.

Resource Protection Measures (RPMs)

Resource Protection Guidelines

- RPG-1: All new concessionaire employees will receive a Forest Service developed natural resource guide that details the natural resource concerns on the sites that they will work on. Included in that guide will be all the natural resource RPMs and identification of species of interest.
- RPG-2: Discourage forest visitors from clearing vegetation, creating new trails, driving off of designated roads, or trampling adjacent wildlife habitat, especially within riparian areas. Re-direct visitors to existing riparian access points. Coordinate with the forest at persistent problem areas especially where erosion control structures (culverts, drainage ditches) require maintenance.

Invasive species

- INV-1: Control of existing Cape Ivy and Tree-of-Heaven populations to prevent further spread at all relevant sites. Coordinate with LPNF Natural Resources staff to determine which areas need treatment. Please note that if herbicide application is needed, the permit holder will be required to obtain a California herbicide license.

Endangered Species

- TES-1: There are several wildlife species such as the California red-legged frog, and southwestern pond turtle found at recreation sites across the LPNF that are either protected under the Endangered Species Act or considered Forest sensitive species. Protection measures may be necessary within the permit areas during the term of the permit and would typically be installed by Forest Service staff. Possible protection measures may include fencing and signing these areas. The permit holder will be required to cooperate with the Forest Service if protection measures are necessary.

Areas with riparian and aquatic species concerns

- RIP-1: Notify USFS Permit Administrator prior to any work (ex. moving sand, soil, stones, use of heavy machinery, and ground disturbing work) in riparian areas. This restriction applies to the following seasons to species detailed below.
 - California red-legged frog breeding season: December 1st – May 31st
 - Arroyo toad breeding season: March 1st – July 31st
- RIP-2: Notify USFS Permit Administrator prior to any work (ex. moving sand, soil, stones, use of heavy machinery, and ground disturbing work) in riparian areas.

CA Spotted Owl (CSO)

- CSO-1: Notify USFS Permit Administrator prior to activities that could produce loud noises (i.e. loud heavy equipment usage) during breeding season (February 1st - August 15th) at sites within Protected Activity Centers.

Breeding birds (BIRD)

- BIRD-1: Notify USFS Permit Administrator prior to heavy equipment usage, large tree removal, or extensive vegetation removal during breeding season (March 15 – July 31).

Monarch Butterfly (MON)

Some concessionaire-managed sites on the Monterey Ranger District contain sensitive overwintering habitat for monarch butterflies. The following restrictions apply:

- MON-1: If possible, no tree trimming or removal will during monarch overwintering season (October 1 - February 28). Any such treatments may only occur outside the core zone as identified by a consulted Forest Service biologist.
- MON-2: Tree trimming and reduction of ladder fuels may be conducted outside overwintering season, however branches and foliage more than 10ft above the ground should be maintained.
- MON-3: Do not remove live trees more than 8” in diameter.

Smith’s Blue Butterfly (SBB)

- SBB-1: Concessionaire staff will avoid the removal of the host plants, seaciff wild buckwheat (*Eriogonum parvifolium*) and seaside buckwheat (*Eriogonum latifolium*). More detailed guidance will be included in the resource protection guide (RPG-1).

See the table below for which measures are likely to be required at each site.

*Optional bid items										

15. Rodent Control

The proposed annual operating plan must address rodent control if it is identified as a concern in the prospectus and must provide for posting information about the prevalence of and precautions for Hantavirus and plague in the campgrounds on signboards.

16. Vegetation Management

16a. Vegetation Management Plan

The proposed annual operating plan must include a proposed vegetation management plan specifying the methods, frequency, and types of vegetation management to be conducted by the applicant to meet operation and maintenance requirements in the proposed annual operating plan.

16b. Use of Pesticides

The proposed vegetation management plan must provide for use of pesticides in accordance with the terms of the permit, including but not limited to submission of a Pesticide-Use Proposal for concurrence by the Forest Service.

16c. Management of Noxious Weeds

The proposed vegetation management plan must provide for preventing the infestation and spread of noxious weeds in the permit area, including the ability to identify common noxious weeds in the permit area; performing timely treatment by mechanical or chemical means in accordance with a Pesticide-Use Proposal; and performing timely and effective revegetation of disturbed areas where noxious weeds may grow. The proposed vegetation management plan may provide for use of a collection agreement with the Forest Service for noxious weed treatments.

The proposed annual operating plan must include, but is not limited to, management plans addressing the following:

- Cape Ivy
- Tree of Heaven
- Perennial Pepperwood

- Purple Loosestrife
- Salt Cedar
- Giant Cane
- Spotted Knapweed
- Diffuse Knapweed
- Yellow Star Thistle
- Tecolote
- Spanish broom

16d. Felling of Hazard Trees

The proposed annual operating plan must provide for the applicant to submit a request to the authorized officer to remove any hazard trees identified by the holder as soon as practicable after identification. The proposed annual operating plan must provide for the authorized officer to respond to the request in writing as soon as practicable.

Consistent with the prospectus, the proposed annual operating plan must provide that:

- The applicant's annual responsibility for the costs of felling hazard trees in the permit area is limited to 1% of the applicant's annual adjusted gross revenue.
- The Forest Service is responsible for paying the annual costs of felling hazard trees in the permit area only to the extent the annual costs exceed 1% of the applicant's annual adjusted gross revenue.
- The Forest Service's responsibility for the annual costs of felling hazard trees in the permit area that exceed 1% of the holder's annual adjusted gross revenue in no way affects the applicant's sole responsibility for inspection, identification, and felling of hazard trees in the permit area.
- Only the annual costs of felling hazard trees in the permit area that exceed 1% of the applicant's annual adjusted gross revenue are eligible for GT fee offset.
- The extent to which the annual costs of felling hazard trees that exceed 1% of the applicant's annual adjusted gross revenue are eligible for GT fee offset must be identified in the GT fee offset agreement.

The proposed annual operating plan must provide for the applicant to notify the authorized officer when approved cutting, destruction, or trimming of hazard trees and other types of vegetation has been completed.

16e. Disposal of Trees that Do Not Meet Utilization Standards

The proposed vegetation management plan must provide for the applicant to:

- Cut all stumps from hazard tree removal flush with the ground to reduce tripping hazards;
- Buck slash and logs; and
- Stack slash and logs for customer use, remove them from the campground, or scatter.

The proposed vegetation management plan must provide for the applicant to remove any slash or logs that are a barrier to use of a campsite or constitute a safety hazard. The proposed annual operating plan may provide for slash and logs 6 inches or less in diameter to be bucked for free firewood and for slash and logs greater than 6 inches in diameter to remain on-site as woody material for wildlife.

16f. Disposal of Trees that Meet Utilization Standards

The proposed vegetation management plan must provide for the Forest Service to determine the method of disposal of trees felled in the permit area that meet utilization standards. The proposed annual operating plan must provide for disposal to be by sale or without charge per 36 CFR Part 223, as may be most advantageous to the United States.

The proposed annual operating plan must provide that if sale to the applicant is deemed appropriate for disposal by the authorized officer, in consultation with the local timber management staff, any such timber sale contract between the Forest Service and the applicant will not be interpreted to override or modify the Damage to United States Property clause, clause III.G, and the Indemnification of the United States Clause, clause III.J, in the permit or in any way affect the Forest Service's ability to recover as an additional insured under the insurance obtained by the applicant under the Insurance Clause, clause III.K, in the permit for any injury, loss, or damage arising from the applicant's use and occupancy, including cutting, destruction, or trimming of vegetation in the permit area.

17. Use of Fee Sites by Non-Paying Visitors and Management of Non-Paying Customers

The Los Padres National Forest has both Adventure Pass and fee free sites that our public stake holders access. The frequent visitation of both Adventure Pass sites and fee free sites, that are adjacent to permit holder sites, will require careful planning and coordination between Forest Service and permit holder staff for successful recreation site management.

The proposed annual operating plan must provide a management plan for the use of toilet facilities, picnic tables, and trash disposal in the recreation sites by non-paying visitors. The proposed annual operating plan may provide for charging non-paying visitors a fee for use of amenities. The proposed operating plan must address how non-paying customers will be managed.

18. Optional Programs

18a. Interpretive Programs

If interpretive programs are offered, the proposed annual operating plan must provide that any proposed interpretive programs meet applicable accessibility requirements.

The proposed annual operating plan must specify any charges for interpretive services.

The proposed annual operating plan must include an interpretive services plan for any interpretive services proposed by the applicant. The interpretive services plan must include:

- The location, type (e.g., campfire programs, guided walks, brochures, children's activities, or displays), and frequency of interpretive services.
- The topics (e.g., natural and cultural resources, fisheries and wildlife, fire management, and water resources) and a synopsis of the subject matter of the contents of the interpretive program.
- A description of the presenters, including any contractors such as museums, historical societies, and interpretive associations, and their qualifications.

18b. Recycling Program

If a recycling program is offered, the proposed annual operating plan must provide for recycling of all standard recyclable materials and must include a description of proposed recycling services for each campground. The proposed annual operating plan must provide for the applicant to conduct and cover the costs of the recycling program, including emptying materials from the recycling receptacles and transporting them from the campgrounds to an appropriate recycling facility, and for recycling receptacles provided by the applicant to be subject to Forest Service approval. The proposed annual operating plan may provide that any proceeds from the sale of recycled materials may be retained by the applicant and will not be counted as income for land use fee calculation purposes.

19. Optional Services

The proposed annual operating plan must describe any additional services to be provided, such as:

- The sale of firewood, camping or fishing supplies, and food items, e.g., ice, soda, and bottled water.
- Rental of bikes and fishing equipment.
- Guided interpretive tours.

20. Performance Evaluations

The proposed annual operating plan must provide for the Forest Service, to the extent deemed feasible and appropriate by the Forest Service, to conduct a performance evaluation during the applicant's annual operating season and, to the extent deemed feasible and appropriate by the Forest Service, to conduct a follow-up performance evaluation before the end of the holder's annual operating season to determine whether any noncompliance identified during the mid-season performance evaluation has been corrected.

21. Post-Season Operations

The proposed annual operating plan must address the following requirements for post-season operations.

21a. Post-Season Requirements for Water Systems

The proposed annual operating plan must provide for properly shutting down the water systems during the winter season, including:

- Draining all pumps, holding tanks, water lines, hydrants, and faucets, ideally by pressurizing them with an air compressor.
- Securing hand pumps so that water is not available to the public.

21b. Utilities

The proposed annual operating plan must provide for utility services to be shut down and final meter readings to be made at the end of the operating season. The proposed annual operating plan must provide for garbage dumpsters to be secured to prevent overflow from off-season visitors.

21c. Post-Season Safety and Facility Inspection

The Forest Service has no duty to inspect the permit area or operations of the selected applicant for hazardous conditions or compliance with health and safety requirements or to correct hazards identified in the permit area. The proposed annual operating plan must provide that the applicant is solely responsible for conducting and documenting an annual post-season safety and facility inspection of the campgrounds, including inspection of hazard trees, and preparing and submitting a report of the inspection to the Forest Service. The proposed annual operating plan must provide that the applicant is solely responsible for correcting any safety and holder MRR deficiencies identified during the inspection, including identifying and felling hazard trees, before the next operating season begins. The proposed annual operating plan must provide that the applicant is solely responsible for eliminating or mitigating high-risk conditions as soon as practicable but no later than before the next operating season begins.

SAMPLE HOLDER MRR PLAN

Applicants should include their proposed holder maintenance, reconditioning and renovation plan in their operating plan of their application package. Following this type of holder maintenance schedule should prove useful to the holder in order to meet performance evaluation criteria and minimum standards. NOTE: The holder maintenance tasks listed below is an all-inclusive list of the tasks needed to maintain and recondition a recreation site. These maintenance requirements will be included in the Annual Operating Plan. Standards for these requirements will be provided by the FS.

ALL DEVELOPED SITES

Maintenance Item	Frequency	Remarks
Pick up litter within site boundaries	Daily	Remove all litter observed on the grounds. Particular attention shall be given to the removal of all observed glass, bottles, cans and similar objects that might cause injury to site visitors. Do not perform litter removal in an occupied campsite. Pick up litter in and around streams running through or adjacent to sites.
Paint entrance signs, shields and frames	Prior to July 1st, annually	Forest Service approved materials; frames may have to be watersealed instead of painted.
Remove graffiti	As needed	Remove graffiti within 48 hours of discovery or notification.
All ground steel/concrete firepits will be maintained in good condition	Prior to opening, annually	Concrete firepits will have smooth finish with minor surface exfoliation or cracking evident. Internal grill will be securely fastened.
Patch rodent and bird holes in wood restrooms, repair/replace screens	As needed, prior to opening, annually	Forest Service approved materials and standards.

Appendix 9: Minimum Content of the Proposed Annual Operating Plan

Maintenance Item	Frequency	Remarks
Maintain all posters in like-new condition on bulletin boards	Prior to opening and as needed during season	Posters will not be curled, 'dog-eared', rippled or faded; temporary or press-on signs will be in good condition and professional in appearance; permittee will be responsible for providing posters; Forest Service will provide source; posters will be uniformly spaced on the bulletin boards, not grouped in one corner.

Maintenance Item	Frequency	Remarks
Return all displaced picnic tables to appropriate locations at all locations, anchor if necessary	Prior to July 1, and within 1 week of observed	After securing approval by authorized FS personnel, picnic tables will be cabled or chained in place by the leg or brace. Cables or chains will be of sufficient size to require a bolt cutter or similar tool for cutting. The cable or chain will be connected to a buried anchor that may be concrete, block or steel post or like material. No wood anchors shall be used. Anchors will be placed so they are not a tripping hazard or otherwise cause injury; tables will have all 4 legs in contact with the ground; no legs will be propped up with rocks or other objects.
Raise picnic tables that have sunken into ground due to snow load	Prior to opening, annually	All tables seating should be at appropriate height.
All campsite markers will be straight with numbers clearly visible from roadway	Prior to July 1, annually; within 1 week of observance	Forest Service standards; Carsonite-type posts with reflectorized letters or numbers, or equivalent; posts and lettering will be in good physical condition.

Appendix 9: Minimum Content of the Proposed Annual Operating Plan

Maintenance Item	Frequency	Remarks
Replace all metal signs (particularly, 'No Parking') when they fade	Prior to opening, annually; within 1 week of observance	All metal signs shall be legible and clearly visible at all times. The signs will be replaced when sunlight or other environmental factors has caused the numbers or letterings to appear weathered, discolored or bleached.
Maintain recycling programs for aluminum, plastic and glass in each designated facility for entire use season	From opening date	Forest Service standards; recycling facility area will be clearly identified with an upright sign and each bin or can will be clearly marked for recycling; bins and cans will be emptied before overflowing; facilities will be located in high traffic pattern areas to encourage use.
Wash all non-contract garbage cans	Prior to opening and as needed	Forest Service standards.
Remove hazard trees	Prior to opening and as needed during season	Forest Service standards and guidelines as defined in the Inyo NF Hazard Reduction Policy, which will be made a part of the operation plan.

Maintenance Item	Frequency	Remarks
Rake around fireplaces and pedestal barbecues	Prior to opening	Rake needles away from all fire units for 5 feet in all directions.
Clean out inlets, outlets and inside of culvert pipes	At end of season, and prior to opening, if needed	Forest Service standards; material removed will be placed in an area outside the stream environment zone.

Appendix 9: Minimum Content of the Proposed Annual Operating Plan

Maintenance Item	Frequency	Remarks
Sweep all areas of roads, parking lots and paved camp spurs	Prior to opening; remove all cones, branches and debris during season	Forest Service standards; material will not be piled; material will be scattered; cones and limbs will be kept off roadways and walkways for public safety.
Cut back all vegetation sufficient to permit visibility to vehicles on roadway and allow vehicles use of the entire road	Prior to opening and as needed during season	All shrubs, limbs and brush will be trimmed back to a distance no less than six inches (6') from the edge of all roadways and spurs.
Maintain all restroom doors in operating condition	Paint 1/2 of all restroom doors at each facility each year, on a rotating basis; repair or replace parts as needed	Interior and exterior of entry door; Forest Service standards and approved materials; surfaces to be painted shall be free of dust, dirt, scale or any other substance which may interfere with the adhesion of the specified coat; this may require sanding and smoothing; Forest Service approved paint at full strength; must be able to close and lock doors at all times; facilities shall not be out of service longer than 5 days.
Maintain restroom skylights and Plexiglas roofs	Prior to opening; throughout season	Remove any pine needles, debris, rocks or light blocking material; care must be taken to avoid scratching surface when material is removed; paint overspray shall be removed.
Maintain restroom roofs	Prior to opening; as needed during season	Make sure pine needles are removed before season starts, and buildups do not occur during season. To prevent structural damage; buildings must be leak proof at all times.
Replace burned-out lights at all facilities and restrooms	Within 2 days of burning out	Replacement lights will be within fixture tolerances and Forest Service standards.
Pump toilet vaults when $\frac{3}{4}$ full	As needed, end of season	Vaults may need to be pumped at end and beginning of season due to accumulation of water from snowmelt

Appendix 9: Minimum Content of the Proposed Annual Operating Plan

Maintenance Item	Frequency	Remarks
Paint interior and exterior of restroom buildings, touch up paint when necessary	Rotating basis. Each building painted once every 3 years	Interior and Exterior; Forest Service standards and approved materials; surfaces to be painted shall be free of dust, dirt, scale or any other substance which may interfere with the adhesion of the specified coat; this may require sanding and smoothing; Forest Service approved paint at full strength.
Paint trash bins, food lockers, recycling centers, and gates	As needed	Forest Service Standards and approved materials; surfaces to be painted shall be free of dust, dirt, scale or any other substance which may interfere with the adhesion of the specified coat; this may require sanding and smoothing; Forest Service approved paint at full strength.
Paint roadway signs and arrows	Prior to July 1, annually	All symbols shall be in conformance with the 'Standard Alphabets for Highway Signs and Pavement Markings' available from the Federal Highway Administration (ref. Manual on Uniform Traffic Control Devices). Arrows shall be 12' wide at the base; the wings shall extend 10' from the outside edge of the base at a point 24' up from the bottom of the base; and the arrow portion shall extend 24' from the point where the wings start. A high pressure air hose shall be used to clean the pavement immediately prior to painting. Approved white traffic paint shall be used to paint signs and arrows.
Paint wood picnic tables	Rotating basis. Each table painted once every 3 years	Forest Service Standards and approved materials; surfaces to be painted shall be free of dust, dirt, scale or any other substance which may interfere with the adhesion of the specified coat; this may require sanding and smoothing; Forest Service approved paint at full strength.
Visually inspect and maintain water systems	Monthly	Inspect water system including well head, transmission system, storage tanks, hose bibs and valves Record observations and correct

Appendix 9: Minimum Content of the Proposed Annual Operating Plan

Maintenance Item	Frequency	Remarks
		problems as found. Remove debris; replace valves and repair leaks and or damage as needed.
Conduct annual and monthly water quality tests.	Monthly, Annually	Bacteriological monitoring will be conducted as required by county, state and federal laws.

FS-2700-4h (09/2020)
OMB No. 0596-0082

**U.S. DEPARTMENT OF AGRICULTURE
FOREST SERVICE**

**SPECIAL USE PERMIT FOR
CAMPGROUND AND RELATED GRANGER-THYE CONCESSIONS**

**AUTHORITY:
Section 7 of the Granger-Thye Act, 16 U.S.C. 580d**

#HOLDER_NAME#, #HOLDER_ADD_LINE_1#, #HOLDER_ADD_LINE_2#, #HOLDER_ADD_LINE_3#,
#HOLDER_CITY#, #HOLDER_STATE# #HOLDER_ZIP#

#HOLDER_NAME# (the holder) is hereby authorized to use and occupy National Forest System (NFS) lands in
the National Forest, subject to the terms of this special use permit (permit).

#PURPOSE#

<u>FACILITY</u>	<u>LEGAL DESCRIPTION</u>	<u>ACRES</u>	<u>DISTRICTS</u>

This permit covers #USE_ACRES# acres or #USE_MILES# miles, which are described above, are shown on the
map attached to this permit (hereinafter the "permit area").

This permit is issued for the purpose of operating and maintaining a Forest Service developed recreation site or
sites as provided herein and in the attached appendices. The following are attached to and incorporated into this
permit:

**<USER NOTES FOR APPENDICES>
<Add any other appendices and delete Appendix G, if inapplicable.>**

APPENDIX A: Annual Operating Plan
APPENDIX B: Annual Granger-Thye Fee Offset Agreement
APPENDIX C: Holder Maintenance and Reconditioning Plan
APPENDIX D: Developed Recreation Site Maps
APPENDIX E: Facility and Improvement Inventory
APPENDIX F: List of Federally Owned Improvements Covered by Property Insurance
APPENDIX G: Operation of Federally Owned Drinking Water Systems
APPENDIX H: Granger-Thye Fee Offset Claim

I. GENERAL TERMS

A. AUTHORITY. This permit is issued under Section 7 of the Granger-Thye Act, 16 U.S.C. 580d, and 36 CFR
Part 251, Subpart B, as amended, and is subject to their provisions.

- B. AUTHORIZED OFFICER.** The authorized officer is the Forest or Grassland Supervisor, a District Ranger, or the Station, Institute, or Area Director with delegated authority pursuant to Forest Service Manual 2700.
- C. TERM.** This permit shall expire at midnight on #EXPIRATION_DATE#, provided that the permit term may be extended up to 5 years by amendment at the sole discretion of the authorized officer based on sustained satisfactory performance or administrative need. Expiration of this permit shall not require notice, a decision document, or any environmental analysis or other documentation.
- D. CONTINUATION OF USE AND OCCUPANCY.** This permit is not renewable. After it expires, continuation of the use and occupancy authorized by this permit is at the sole discretion of the authorized officer. After expiration, issuance of a new permit for the use and occupancy authorized by this permit shall be subject to competition.
- E. AMENDMENT.** This permit may be amended in whole or in part by the Forest Service when at the discretion of the authorized officer such action is deemed necessary or desirable to incorporate new terms that may be required by law, regulation, directive, the applicable land management plan, or projects and activities implementing the land management plan pursuant to 36 CFR Part 218.
- F. COMPLIANCE WITH LAWS, REGULATIONS, AND OTHER LEGAL REQUIREMENTS.** In exercising the rights and privileges granted by this permit, the holder shall comply with all present and future federal laws and regulations and all present and future state, county, and municipal laws, regulations, and other legal requirements that apply to the permit area, to the extent they do not conflict with federal law, regulation, or policy. The Forest Service assumes no responsibility for enforcing laws, regulations, and other legal requirements that fall under the jurisdiction of other governmental entities.
- G. NON-EXCLUSIVE USE.** The use and occupancy authorized by this permit is not exclusive. The Forest Service reserves the right of access to the permit area, including a continuing right of physical entry to the permit area and the authorized facilities and improvements for inspection, monitoring, or any other purpose consistent with any right or obligation of the United States under any law or regulation. The Forest Service reserves the right to allow others to use the permit area in any way that is not inconsistent with the holder's rights and privileges under this permit, after consultation with all parties involved. Except for any restrictions that the holder and the authorized officer agree are necessary to protect the installation and operation of authorized improvements, the permit area shall remain open to the public for all lawful purposes. To facilitate public use of this area, all existing roads shall remain open to the public, except for roads that may be closed by joint agreement of the holder and the authorized officer.
- H. ASSIGNABILITY.** This permit is not assignable or transferable.
- I. CHANGE IN CONTROL OF THE BUSINESS ENTITY**
1. **Notification.** The holder shall notify the authorized officer when a change in control of the business entity that holds this permit is planned.
 - (a) In the case of a corporation, control is an interest, beneficial or otherwise, of sufficient outstanding voting securities or capital of the business so as to permit the exercise of managerial authority over the actions and operations of the corporation or election of a majority of the board of directors of the corporation.
 - (b) In the case of a partnership, limited partnership, joint venture, or individual entrepreneurship, control is a beneficial ownership of or interest in the entity or its capital so as to permit the exercise of managerial authority over the actions and operations of the entity.
 - (c) In other circumstances, control is any arrangement under which a third party has the ability to exercise management authority over the actions or operations of the business.
 2. **Effect of Change in Control.** Any change in control of the business entity as defined in clause I.H.1 shall cause this permit to terminate upon issuance of a new permit to another party for the use and occupancy authorized by this permit. The party who acquires control of the business entity must submit an application for a permit for the type of use and occupancy authorized by this permit. Issuance of a new permit to the party acquiring control shall be at the sole discretion of the authorized officer. The authorized officer shall determine

that the applicant meets requirements under federal regulations. If a new permit is issued to the party acquiring control, the term shall be for no more than the balance of the term of this permit. Once the permit issued to the party acquiring control expires, issuance of a new permit for the type of use and occupancy authorized by this permit shall be subject to competition.

J. LIMITATIONS. Nothing in this permit gives or implies permission to build or maintain any structure or facility or to conduct any activity, unless specifically provided for in this permit. Any use not specifically identified in this permit must be proposed in accordance with 36 CFR 251.54. Approval of such a proposed use through issuance of a new permit is at the sole discretion of the authorized officer.

II. OPERATIONS, MAINTENANCE, AND RECONDITIONING

A. ANNUAL OPERATING PLAN

1. The holder or the holder's designated representative shall prepare and annually revise by an annual operating plan. The annual operating plan shall be prepared in consultation with the authorized officer or the authorized officer's designated representative and shall cover all operations authorized by this permit, regardless of season. The annual operating plan shall be submitted by the holder and approved in writing by the authorized officer or the authorized officer's designated representative prior to the operating season and shall be attached to this permit as an appendix. Any operating plan revisions shall be submitted by the holder and approved in writing by the authorized officer or the authorized officer's designated representative before they are implemented.

2. The annual operating plan shall specify the operational requirements governing the sites covered by this permit. At a minimum, the annual operating plan shall enumerate the minimum operating seasons and how the holder will provide services to the public; protect public health and safety and the environment; and repair, maintain, or enhance the function of the improvements covered by this permit. The annual operating plan shall contain standards and sufficient detail to enable the Forest Service to monitor operations for compliance.

3. The holder shall perform a condition survey of the water system each year before it is opened. The holder shall prepare a brief written report that notes all deficiencies that may render compliance with Appendix G of this permit (Operation of Federally Owned Drinking Water Systems) and other applicable regulatory requirements infeasible. The condition survey report shall also include a detailed description of all water system deficiencies and/or repair work which the holder has identified as requiring corrective action in order for the system to be in compliance with Appendix G of this permit and applicable Federal and State safe drinking water regulation. If repair work is necessary, a repair plan shall be attached to the condition survey report. The repair plan shall identify all water system components requiring repair, estimated costs for repair and the approximate time schedule to complete the repair. The report shall be sent to the authorized officer at least two weeks prior to opening the system for the season. All deficiencies shall be corrected to the satisfaction of the Forest Service prior to opening the system. Corrections and the date they were made shall be recorded in the condition survey. If the system operates throughout the year, the condition survey shall be submitted to the Forest Service by January 15 each year.

B. MINIMUM USE AND OCCUPANCY. Use and occupancy of the permit area shall be exercised at least days each year, unless otherwise authorized in writing under additional terms of this permit.

C. GRANGER-THYE (GT) FEE OFFSET AGREEMENT. Government maintenance and reconditioning projects shall be performed in accordance with an annual GT fee offset agreement as provided in clause V.D.2 of this permit.

D. HOLDER MAINTENANCE, RECONDITIONING, AND RENOVATION

1. The holder at its expense shall perform holder maintenance, reconditioning, and renovation as defined in clause V.D.1(d) of this permit under a holder maintenance, reconditioning, or renovation plan approved by the Forest Service. The holder maintenance, reconditioning, and renovation plan shall describe required holder maintenance, reconditioning, and renovation responsibilities and their frequency. The work performed under this plan shall not be subject to fee offset under clauses V.D.2 and V.E.1.

2. The holder shall maintain all equipment and other facilities on site in good repair and free of leakage of lubricants, fuel, coolants, and hydraulic fluid. The holder shall properly dispose of all hazardous waste-contaminated soil, vegetation, debris; vehicle oil filters (drained of free-flowing oil); oily rags; and waste oil in accordance with local, State, and Federal regulations off of NFS lands and shall transport such substances, or arrange to have such substances transported in accordance with State and Federal regulations.

E. ALTERATION OF FEDERALLY OWNED IMPROVEMENTS. If during the term of this permit any federally owned improvements are altered in any way, the material, equipment, fixtures or other appurtenances that are affixed to or made a part of those improvements in connection with the alteration shall become the property of the United States, regardless of whether the work is performed by the holder or any other party. The holder shall not be entitled to any compensation for that property, other than to the extent it qualifies for fee offset under clause V.E.

F. RESPONSIBILITY FOR DAY-TO-DAY ACTIVITIES. As a general rule, the holder shall conduct the day-to-day activities authorized by this permit. Some but not all of these activities may be conducted by a party other than the holder, but only with prior written approval of the authorized officer. The holder shall continue to be responsible for compliance with all the terms of this permit.

G. MONITORING BY THE FOREST SERVICE. The Forest Service shall monitor the holder's operations and reserves the right to inspect the permit area and authorized facilities and improvements at any time for compliance with the terms of this permit. The holder shall comply with inspection requirements deemed appropriate by the authorized officer. The holder's obligations under this permit are not contingent upon any duty of the Forest Service to inspect the permit area or authorized facilities or improvements. A failure by the Forest Service or other governmental officials to inspect is not a justification for noncompliance with any of the terms of this permit.

H. CUTTING, DISPOSAL, AND PLANTING OF VEGETATION. This permit does not authorize the cutting of trees, brush, shrubs, and other plants ("vegetation"). Vegetation may be cut, destroyed, or trimmed only after the authorized officer or the authorized officer's designated agent has approved in writing and marked or otherwise identified what may be cut, destroyed, or trimmed. The holder shall notify the authorized officer when approved cutting, destruction, or trimming of vegetation has been completed. The Forest Service shall determine in advance of felling the method of disposal of trees felled in the permit area that meet utilization standards. Disposal may be by sale or without charge per 36 CFR Part 223, as may be most advantageous to the United States. Debris from felling that does not meet utilization standards shall also be disposed of according to methods determined by the Forest Service. If sale to the holder is deemed appropriate for disposal by the authorized officer, in consultation with the local timber management staff, any such timber sale contract between the Forest Service and the holder shall not be interpreted to override or modify the Damage to United States Property Clause, clause III.G, or the Indemnification of the United States Clause, clause III.J, in this permit or in any way affect the Forest Service's ability to recover as an additional insured under the insurance obtained by the holder under the Insurance Clause, clause III.K, in this permit for any injury, loss, or damage arising from the holder's use and occupancy, including cutting, destruction, or trimming of vegetation in the permit area. Planting of vegetation in the permit area must have prior written approval from the authorized officer.

I. SIGNS. Signs or other advertising posted on NFS lands shall be subject to prior written approval of the authorized officer as to location, design, size, color, and content. Erected signs shall be maintained to standards determined by the Forest Service.

J. NONDISCRIMINATION

1. The holder and its employees shall not discriminate against any person on the basis of race, color, sex (in educational and training programs), national origin, age, or disability or by curtailing or refusing to furnish accommodations, facilities, services, or use privileges offered to the public generally. In addition, the holder and its employees shall comply with the provisions of Title VI of the Civil Rights Act of 1964 as amended, Section 504 of the Rehabilitation Act of 1973, as amended, Title IX of the Education Amendments of 1972, as amended, and the Age Discrimination Act of 1975, as amended.

2. The holder shall include and require compliance with the above nondiscrimination provisions in any third-party agreement made with respect to the operations authorized under this permit.

3. The Forest Service shall furnish signs setting forth this policy of nondiscrimination. These signs shall be conspicuously displayed at the public entrance to the permit area and at other exterior or interior locations, as directed by the Forest Service.

4. The Forest Service shall have the right to enforce the foregoing nondiscrimination provisions by suit for specific performance or by any other available remedy under the laws of the United States or the State in which the violation occurs.

K. EQUAL ACCESS TO FEDERAL PROGRAMS. In addition to the above nondiscrimination policy, the holder agrees to ensure that its programs and activities are open to the general public on an equal basis and without regard to any non-merit factor.

L. RESERVATION SERVICES. Recreation.gov is the only authorized reservation service to be utilized by the holder. No other reservation service of any kind may be used by the holder. Operational procedures for use of Recreation.gov will be developed and placed in the annual operating plan.

M. SANITATION. The operation and maintenance of all sanitation and food service systems and facilities shall comply with applicable standards set by state and local health departments.

N. REFUSE DISPOSAL. The holder shall comply with all applicable federal, state, and local requirements related to disposal of any refuse resulting from the use and occupancy authorized by this permit.

O. ADVERTISING. The holder shall not misrepresent in any way, either orally; in online or print circulars, brochures, advertising, and other media; or on its website, signs, or letterheads, any aspect of the use authorized by this permit, including services provided by the holder, the status of this permit, or the permit area. All the holder's online or print circulars, brochures, advertising, and other media regarding use of the permit area shall state that the permit area is located in the [name] National Forest or Grassland.

P. REGULATING SERVICES AND RATES. The Forest Service reserves the right to regulate the adequacy, type, and price of services provided to the public and to require that these services conform to satisfactory standards. The holder may be required to furnish a schedule of prices for sales and services authorized by this permit. Such prices and services may be regulated by the Forest Service, provided that the holder shall not be required to charge prices significantly different from those charged by comparable or competing businesses.

Q. SALE OF ALCOHOLIC BEVERAGES. The sale of alcoholic beverages is prohibited in the permit area.

R. GAMBLING. Gambling or gambling devices is prohibited on NFS lands, regardless of whether gambling or gambling devices are lawful under state or local law.

S. FIREWORKS. The sale of fireworks is prohibited in the permit area. Possession or use of fireworks in the permit area is also prohibited without prior written approval from the authorized officer.

T. DISORDERLY CONDUCT. Disorderly or otherwise objectionable conduct by the holder or those occupying the permit area with the holder's permission shall upon proof thereof be cause for revocation of this permit.

<USER NOTES FOR CLAUSE II.U>

<Include following clause II.U where the holder is the same as the holder in the previous permit for the campground concession. Delete the remaining clause II.U.>

U. USE OF SITE OR FACILITY NAME. Any new use by the holder of the name of a site or facility enumerated in the permit area description on the first page of this permit (hereinafter "the property") to identify goods and services provided under this permit requires prior written approval from the authorized officer. New uses of the property may be approved only if they are conducted in connection with the use and occupancy authorized by this permit and in a manner consistent with the Forest Service's mission, as determined by the Forest Service. Existing uses of the property may continue during the term of this permit without written approval from the authorized officer. Upon termination or revocation of this permit without issuance of a new permit to the holder, any permission granted by the authorized officer for new uses of the property terminates, the holder shall discontinue all new and existing uses of the property, and the holder relinquishes all rights arising from the

holder's use of the property and waives any claim of rights arising from holder's use of the property against the Forest Service and any subsequent holder's use of the property.

<Include the following clause II.U in permits where the holder is different from the holder in the previous permit for the campground concession. Delete the preceding clause II.U.>

U. USE OF SITE OR FACILITY NAME. Any use by the holder of the name of a site or facility enumerated in the permit area description on the first page of this permit (hereinafter "the property") to identify goods and services provided under this permit requires prior written approval from the authorized officer. Uses of the property may be approved only if they are conducted in connection with the use and occupancy authorized by this permit and in a manner consistent with the Forest Service's mission, as determined by the Forest Service. The holder acknowledges that the property is owned solely by the Forest Service, the holder's use of the property shall inure to the exclusive benefit of the Forest Service, and the holder shall not acquire any rights in the property through the holder's use of it. Upon termination or revocation of this permit without issuance of a new permit to the holder, any permission granted by the authorized officer for use of the property terminates, the holder shall discontinue all use of the property, and the holder relinquishes all rights arising from the holder's use of the property and waives any claim of rights arising from holder's use of the property against the Forest Service and any subsequent holder's use of the property.

III. RIGHTS AND LIABILITIES

A. LEGAL EFFECT OF THE PERMIT. This permit, which is revocable and terminable, is not a contract or a lease, but rather a federal license. The benefits and requirements conferred by this authorization are reviewable solely under the procedures set forth in 36 CFR Part 214 and 5 U.S.C. 704. This permit does not constitute a contract for purposes of the Contract Disputes Act, 41 U.S.C. 601. The permit is not real property, does not convey any interest in real property, and may not be used as collateral for a loan.

B. VALID EXISTING RIGHTS. This permit is subject to all valid existing rights. Valid existing rights include those derived from mining and mineral leasing laws of the United States. The United States is not liable to the holder for the exercise of any such right or claim.

C. ABSENCE OF THIRD-PARTY BENEFICIARY RIGHTS. The parties to this permit do not intend to confer any rights on any third party as a beneficiary under this permit, including any party who has responsibility for any day-to-day activities authorized by this permit, if approved by the authorized officer under clause II.F.

<USER NOTES FOR CLAUSE III.D>

<Include clause III.D in special use authorizations when they will involve the use of water and the water development and use will occur on NFS lands. Consult FSH 2709.11, section 52.4, clauses D-24 through D-27, for alternate circumstances and choose the appropriate clauses in consultation with the local Forest Service Water Rights Program Manager. Select or fill in the appropriate use in brackets, and delete the bracketed language as appropriate.>

D. WATER FACILITIES AND WATER RIGHTS

1. **Water Facilities.** No ditch, reservoir, well, spring, seepage, or other facility to pump, divert, store, or convey water (hereinafter "water facilities") for which the point of diversion, storage, or withdrawal is on NFS lands may be initiated, developed, certified, or adjudicated by the holder unless expressly authorized in this permit. The authorization of any water facilities in the permit area is granted to allow use of water only in connection with the [recreation residence, resort, marina, or specify use] authorized by this permit. If the use of any water facilities in connection with this [recreation residence, resort, marina, or specify use] ceases, the authorization to use any associated water facilities terminates. The United States may place conditions on installation, operation, maintenance, and removal of water facilities that are necessary to protect public property, public safety, and natural resources on NFS lands in compliance with applicable law. Any change in a water facility, including a change in the ownership or beneficial use of water or location of use of water from a water facility, that is not expressly authorized in this permit shall result in termination of the authorization for that water facility.

2. **Water Rights.** This permit does not confer any water rights on the holder. The term "water rights" includes all authorizations, such as certificates, reservations, decrees, or permits, for water use issued under state law. Any

necessary water rights must be acquired and maintained by the holder in accordance with State law and the terms of this permit. After this permit is issued, all water rights obtained by the holder for facilities that divert or pump water from sources located on NFS lands for use on NFS lands, whether authorized or unauthorized, are for the benefit of the United States and shall be acquired in the name of the United States. Any expenses for acquiring and maintaining water rights shall be the responsibility of the holder and not the responsibility of the United States. The United States reserves the right to take all actions necessary to maintain and protect any right to divert and use water on site.

WATER RIGHTS HELD IN THE NAME OF THE UNITED STATES (if none, so state)

State ID #	Owner	Purpose of Use	Decree, License, or Certificate #	Point of Diversion	Point of Use

<USER NOTES FOR CLAUSE III.D.3>

<Add clause III.D.3 when water rights required for the use to be authorized have already been obtained in accordance with State law in the name of the holder; acquisition of those water rights did not violate the terms of the permit; and the water development and use will occur on NFS lands. Otherwise delete this clause. Select or fill in the appropriate use in brackets and delete the bracketed language as appropriate.

When clause III.D.3 is included in a permit, the notary clause must be added to the permit after the signature block. Additionally, when the authorized officer is exercising the power of attorney under clause III.D.3(c) to effectuate transfer of water rights to a succeeding permit holder or the United States, the permit and the deed transferring title must be provided to the state engineer's office and the appropriate county recorder's office.>

3. Water Rights Acquired in the Name of the Holder

(a) Identification of Water Rights

WATER RIGHTS HELD IN THE NAME OF THE HOLDER (if none, so state)

State ID #	Owner	Purpose of Use	Decree, License, or Certificate #	Point of Diversion	Point of Use

(b) Termination or Revocation. Upon termination or revocation of this permit, the holder shall transfer the water rights enumerated in clause III.D.3(a) to any succeeding permit holder, for use only in connection with the [recreation residence, resort, marina, or specify other use] authorized by this permit. If that use is not reauthorized, the holder shall promptly petition in accordance with State law to remove from NFS lands the point of diversion and water use associated with the water rights enumerated in clause III.D.3(a) or shall transfer these water rights to the United States.

(c) Documentation of Transfer. The holder and the holder's heirs and assignees shall execute and properly file any document necessary to transfer ownership of the water rights enumerated in clause III.D.3(a) to a succeeding permit holder or the United States. By executing this permit, the holder hereby grants limited power of attorney to

the authorized officer to execute any document on behalf of the holder as may be necessary to transfer the water rights enumerated in clause III.D.3(a) to a succeeding permit holder or the United States.

Holder's initials and date: _____

(d) Waiver. The holder waives any claims against the United States for compensation for any water rights subject to clause III.D.3 that are transferred, removed, or relinquished as a result of revocation or termination of this permit or for compensation in connection with imposition of any conditions on installation, operation, maintenance, and removal of water facilities associated with water rights enumerated in clause III.D.3(a).

E. NO WARRANTY OF ACCESS, SITE SUITABILITY, OR SERVICES. This permit authorizes the use and occupancy of NFS lands by the holder for the purposes identified in this permit. The Forest Service does not make any express or implied warranty of access to the permit area, of the suitability of the permit area for the authorized uses, or for the furnishing of road or trail maintenance, water, fire protection services, search and rescue services, or any other services by a government agency, utility, association, or individual.

F. RISK OF LOSS. The holder assumes all risk of loss to the authorized improvements and all risk of loss of use and occupancy of the permit area, in whole or in part, due to public health and safety or environmental hazards. Loss to the authorized improvements and of use and occupancy of the permit area may result from but is not limited to theft, vandalism, fire and any fire-fighting activities (including prescribed burns), environmental contamination, avalanches, rising waters, winds, falling limbs or trees, and other forces of nature. If any authorized improvements in the permit area are destroyed or substantially damaged, the authorized officer shall conduct an analysis to determine whether the improvements can be safely occupied in the future and whether rebuilding should be allowed. If rebuilding is not allowed, this permit shall terminate. If the authorized officer determines that the permit area cannot be safely occupied due to a public health or safety or environmental hazard, this permit shall terminate. Termination under this clause shall not give rise to any claim for damages, including lost profits and the value of the improvements, by the holder against the Forest Service.

G. DAMAGE TO UNITED STATES PROPERTY. The holder has an affirmative duty to protect from damage the land, property, and other interests of the United States that are associated with the use and occupancy authorized by this permit. Damage includes but is not limited to destruction of or damage to NFS lands, fire suppression costs, and destruction of or damage to federally owned improvements.

1. The holder shall be liable for all injury, loss, or damage, including fire suppression costs, prevention and control of the spread of invasive species, and the costs of rehabilitation or restoration of natural resources, resulting from the holder's use and occupancy of the permit area. Compensation shall include but not be limited to the value of resources damaged or destroyed, the costs of restoration, cleanup, or other mitigation, fire suppression or other types of abatement costs, and all associated administrative, legal (including attorney's fees), and other costs. Such costs may be deducted from a performance bond required under clause III.L.

2. The holder shall be liable for damage to all roads and trails of the United States caused by use of the holder or the holder's heirs, assignees, agents, employees, or contractors to the same extent as provided under clause III.G.1, except that liability shall not include reasonable and ordinary wear and tear.

H. HEALTH AND SAFETY. The holder shall take all measures necessary to protect the health and safety of all persons affected by the use and occupancy authorized by this permit. The holder shall promptly abate as completely as possible and in compliance with all applicable laws and regulations any physical or mechanical procedure, activity, event, or condition existing or occurring in connection with the authorized use and occupancy during the term of this permit that causes or threatens to cause a hazard to the health or safety of the public or the holder's employees, agents, or contractors. The holder shall as soon as practicable notify the authorized officer of all serious accidents that occur in connection with these procedures, activities, events, or conditions. The Forest Service has no duty under the terms of this permit to inspect the permit area or operations of the holder for hazardous conditions or compliance with health and safety standards.

I. ENVIRONMENTAL PROTECTION

1. Compliance with Environmental Laws. The holder shall in connection with the use and occupancy authorized by this permit comply with all applicable federal, state, and local environmental laws and regulations, including but

not limited to those established pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended, 42 U.S.C. 9601 *et seq.*, the Resource Conservation and Recovery Act, as amended, 42 U.S.C. 6901 *et seq.*, the Federal Water Pollution Control Act, as amended, 33 U.S.C. 1251 *et seq.*, the Oil Pollution Act, as amended, 33 U.S.C. 2701 *et seq.*, the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.*, the Toxic Substances Control Act, as amended, 15 U.S.C. 2601 *et seq.*, the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, 7 U.S.C. 136 *et seq.*, and the Safe Drinking Water Act, as amended, 42 U.S.C. 300f *et seq.*

2. Definition of Hazardous Material. For purposes of clause III.I and section V, "hazardous material" shall mean (a) any hazardous substance under section 101(14) of CERCLA, 42 U.S.C. 9601(14); (b) any pollutant or contaminant under section 101(33) of CERCLA, 42 U.S.C. 9601(33); (c) any petroleum product or its derivative, including fuel oil, and waste oils; and (d) any hazardous substance, extremely hazardous substance, toxic substance, hazardous waste, ignitable, reactive or corrosive materials, pollutant, contaminant, element, compound, mixture, solution or substance that may pose a present or potential hazard to human health or the environment under any applicable environmental laws.

3. Oil Discharges and Release of Hazardous Materials. The holder shall immediately notify all appropriate response authorities, including the National Response Center and the authorized officer or the authorized officer's designated representative, of any oil discharge or of the release of a hazardous material in the permit area in an amount greater than or equal to its reportable quantity, in accordance with 33 CFR Part 153 and 40 CFR Part 302. For the purposes of this requirement, "oil" is as defined by section 311(a)(1) of the Clean Water Act, 33 U.S.C. 1321(a)(1). The holder shall immediately notify the authorized officer or the authorized officer's designated representative of any release or threatened release of any hazardous material in or near the permit area which may be harmful to public health or welfare or which may adversely affect natural resources on federal lands.

4. Remediation of Release of Hazardous Materials. The holder shall remediate any release, threat of release, or discharge of hazardous materials that occurs in connection with the holder's activities in the permit area, including activities conducted by the holder's agents, employees, or contractors and regardless of whether those activities are authorized under this permit. The holder shall perform remediation in accordance with applicable law immediately upon discovery of the release, threat of release, or discharge of hazardous materials. The holder shall perform the remediation to the satisfaction of the authorized officer and at no expense to the United States. Upon revocation or termination of this permit, the holder shall deliver the site to the Forest Service in compliance with all applicable laws and regulations and free and clear of contamination.

J. INDEMNIFICATION OF THE UNITED STATES. The holder shall indemnify, defend, and hold harmless the United States for any costs, damages, claims, liabilities, and judgments arising from past, present, and future acts or omissions of the holder in connection with the use and occupancy authorized by this permit. This indemnification and hold harmless provision includes but is not limited to acts and omissions of the holder or the holder's heirs, assignees, agents, employees, or contractors in connection with the use and occupancy authorized by this permit which result in: (1) violations of any laws and regulations which are now or which may in the future become applicable; (2) judgments, claims, demands, penalties, or fees assessed against the United States; (3) costs, expenses, and damages incurred by the United States; or (4) the release or threatened release of any solid waste, hazardous waste, hazardous material, pollutant, contaminant, oil in any form, or petroleum product into the environment. The authorized officer may prescribe terms that allow the holder to replace, repair, restore, or otherwise undertake necessary curative actions to mitigate damages in combination with or as an alternative to monetary indemnification.

K. INSURANCE. The holder shall furnish proof of insurance, such as a certificate of insurance, to the authorized officer prior to issuance of this permit and each year thereafter that this permit is in effect. The Forest Service reserves the right to review the insurance policy and require any changes needed to ensure adequate coverage of the United States in connection with the authorized use and occupancy. The holder shall send an authenticated copy of any insurance policy obtained pursuant to this clause to the Forest Service immediately upon issuance of the policy. Any insurance policy obtained by the holder pursuant to this clause shall include the United States as an additional insured in an endorsement to the policy, and the additional insured provision shall provide for insurance coverage for the United States as required under this clause and to the extent of the full limits of insurance available to the holder. The holder shall give 30 days prior written notice to the Forest Service of cancellation of or any modification to the insurance policy. The certificate of insurance, the authenticated copy of the insurance policy, and written notice of cancellation or modification of an insurance policy should be sent to

the authorized officer. Minimum amounts of coverage and other insurance requirements are subject to change at the sole discretion of the authorized officer on the anniversary date of this permit.

1. **Liability.** The holder shall have in force liability insurance covering losses associated with the use and occupancy authorized by this permit arising from personal injury or death and third-party property damage in the minimum amount of \$#AMOUNT# as a combined single limit per occurrence.

<USER NOTES FOR CLAUSE III.K.2>

<Include clause III.K.2 if the authorized officer intends to repair, rebuild, restore, or replace any authorized improvements that become damaged or destroyed, and require sufficient property insurance to cover the cost of repairing, rebuilding, restoring, or replacing those improvements. Otherwise, omit clause III.K.2, and re-designate clause III.K.3 as clause III.K.2.>

2. **Property.** The holder shall have in force property insurance at a minimum for each of the authorized federally owned improvements listed in Appendix F of this permit, [] in the minimum amount per occurrence listed for each of those improvements in Appendix F, for a total minimum amount per occurrence of \$#AMOUNT#.

[] [] The types of loss to be covered by clause III.K.2 shall include but not be limited to damage to the federally owned improvements listed in Appendix F. The United States shall be named as an additional insured under the property insurance. At the sole discretion of the authorized officer, the Forest Service may require the holder to use all proceeds from property damage insurance policies to repair, rebuild, restore, or replace damaged federally owned property covered by the policy, or may obtain payment of those proceeds from the holder or the insurance company.

3. **Hazardous Materials.** Depending on the holder's operations, the Forest Service may require the holder to demonstrate the availability of funds to address any release or threatened release of hazardous materials that may occur in connection with the holder's use and occupancy. Any requirements imposed would be established on a case-by-case basis by the authorized officer based on the degree of environmental risk from the holder's operations. The use and storage of normal campground maintenance items in nominal amounts would generally not trigger financial assurance requirements.

L. BONDING. The authorized officer may require the holder to furnish a bond or other security for any of the obligations imposed by the terms of this permit or any applicable law, regulation, or order.

<USER NOTES FOR CLAUSES III.L.1 THROUGH III.L.3>

<Delete clauses IV.L.1 through IV.L.3 when a bond is not required.>

1. As a further guarantee of compliance with the terms of this permit, the holder agrees to deliver and maintain a surety bond or other acceptable security, such as cash deposited and maintained in a federal depository or negotiable securities of the United States, in the amount of \$#AMOUNT# for [specify obligations covered, e.g., to secure the holder's obligation to restore the permit area after construction or upon revocation or termination of the permit without issuance of a new permit]. The authorized officer may periodically evaluate the adequacy of the bond or other security and increase or decrease the amount as appropriate. If the bond or other security becomes unsatisfactory to the authorized officer, the holder shall within 30 days of demand furnish a new bond or other security issued by a surety that is solvent and satisfactory to the authorized officer. The bond shall provide that at the Forest Service's sole discretion the surety shall pay the United States for any loss covered by the bond or, in the event of complete default under the permit, shall pay a third party to operate the concession for the balance of the permit term, without prejudice to any other rights and remedies of the United States. The bond shall also provide that selection of a third party to operate the site is subject to Forest Service approval.

2. The bond shall be released or other security returned 30 days after (a) the authorized officer certifies that the obligations covered by the bond or other security are met and (b) the holder establishes to the satisfaction of the authorized officer that all claims for labor and material for the secured obligations have been paid or released.

3. The holder may be required to obtain additional bonding or security prior to undertaking additional construction or alteration not covered by the bond or other security or when the authorized improvements are to be removed and the permit area restored.

IV. RESOURCE PROTECTION

A. WATER SYSTEMS

1. The holder, as the water supplier and operator of the drinking water system, shall operate the system in compliance with Forest Service Manual (FSM) Chapter 7420, applicable federal, state, and local drinking water laws and all regulations applicable to public and nonpublic drinking water systems. This includes, but is not limited to, renovation, operating and maintaining the system and conducting drinking water testing, maintaining records to demonstrate compliance, and taking the appropriate corrective and follow-up actions in accordance with Appendix G of this permit (Operation of Federally Owned Drinking Water Systems) and federal, state, and any other applicable requirements. The holder shall be able to demonstrate compliance with Appendix G of this permit (Operation of Federally Owned Drinking Water Systems) and all other applicable requirements by maintaining all necessary records. For the purposes of this authorization, public water systems are as defined in the Safe Drinking Water Act, 42 U.S.C. 300f *et seq.*, as amended, and in the National Primary Drinking Water Regulations, 40 CFR Part 141, or by state regulations if more stringent. Requirements under FSM 7420 applicable to the holder are set forth in this section and Appendix G to the permit entitled "Operation of Federally Owned Drinking Water Systems."

2. For federally owned systems, the holder shall notify and consult with the Forest Service within 24 hours or on the next business day after notification by the laboratory of a sample that tests positive for microbiological contamination. The holder shall provide a copy of positive lab test to the Forest Service within one week of receiving the lab result. The holder shall notify the State drinking water program and Forest Service within 48 hours of any failure to comply with a federal or state drinking water requirement and make a written record that the notification occurred and place it in the system's record file. The holder shall notify and consult with the Forest Service within 48 hours of notification of a maximum contaminant level violation or an acute violation. The holder shall respond to the microbial contamination event as specified in Appendix G of this permit (Operation of Federally Owned Drinking Water Systems) and applicable regulations.

3. The holder shall retain all records as required by applicable laws and regulations. The holder agrees to make the records available upon request to the Forest Service and to any other regulatory agency authorized to review Forest Service activities. Copies of microbiological test results for federally owned water systems shall be forwarded monthly to the Forest Service by the 15th of the month following the sampling date. Copies of all other drinking water sample results shall be forwarded to the Forest Service at the end of the operating season. If the operating season is longer than six months in length, copies of sample results must be provided to the Forest Service every six months. The holder shall clearly identify all sample results that violate FSM requirements or state, federal, and local requirements when the copies are submitted. Sample results that violate any of these requirements must have the results of required follow up samples attached. Copies of sample results that violate state requirements must have documentation attached to demonstrate that the state was informed of the violation within 48 hours of the lab notifying the holder of the results. The holder shall surrender all records for a federally owned system to the Forest Service upon permit termination or revocation.

4. For federally owned systems, the holder shall provide the name of the water system operator in writing to the Forest Service and notify the authorized officer within 72 hours of a change in personnel. Operators shall be certified to operate drinking water systems for all water systems classified as community or non-transient, non-community or when otherwise required by the state in which the system is located. Records to demonstrate operator certification shall be kept by the holder and made available to Forest Service upon request.

B. VANDALISM. The holder shall take reasonable measures to prevent and discourage vandalism and disorderly conduct and when necessary shall contact the appropriate law enforcement officer.

C. PESTICIDE USE

1. Authorized Officer Concurrence. Pesticides may not be used outside of buildings in the permit area to control pests, including undesirable woody and herbaceous vegetation (including aquatic plants), insects, birds, rodents, or fish without prior written concurrence of the authorized officer. Only those products registered or otherwise authorized by the U.S. Environmental Protection Agency and appropriate State authority for the specific purpose planned shall be authorized for use within areas on NFS lands.

2. Pesticide-Use Proposal. Requests for concurrence of any planned uses of pesticides shall be provided in advance using the Pesticide-Use Proposal (form FS-2100-2). Annually the holder shall, on the due date established by the authorized officer, submit requests for any new, or continued, pesticide usage. The Pesticide-Use Proposal shall cover a 12-month period of planned use. The Pesticide-Use Proposal shall be submitted at least 60 days in advance of pesticide application. Information essential for review shall be provided in the form specified. Exceptions to this schedule may be allowed, subject to emergency request and approval, only when unexpected outbreaks of pests require control measures which were not anticipated at the time a Pesticide-Use Proposal was submitted.

3. Safety Plan. Before applying pesticides in the permit area, the holder shall submit to the authorized officer a safety plan that includes, at a minimum, a precise statement of the treatment objectives; a description of the equipment, materials, and supplies to be used, including pesticide formulation, quantities, and application methods; a description of the lines of responsibility for project planning, project monitoring, and after-action review; a description of any necessary interagency coordination; a copy of the current Pesticide-Use Proposal for the permit; a description of the process by which treatment effectiveness will be determined; and a spill plan, communications plan, security plan, and when required by applicable local requirements, a provision for prior notification to sensitive individuals.

4. Reporting. By September 30th annually, the holder shall submit to the authorized officer a written report of each pesticide application project completed during the previous 12-month period. The report shall contain information pertaining to the pesticide application projects as requested by the authorized officer.

5. Labeling, Laws, and Regulations. Label instructions and all applicable laws and regulations shall be strictly followed in the application of pesticides and disposal of excess materials and containers. No pesticide waste, excess materials, or containers shall be disposed of in any area administered by the Forest Service.

D. ARCHAEOLOGICAL AND PALEONTOLOGICAL DISCOVERIES. The holder shall immediately notify the authorized officer of any antiquities or other objects of historic or scientific interest, including but not limited to historic or prehistoric ruins, fossils, or artifacts discovered in connection with the use and occupancy authorized under this permit. The holder shall leave these discoveries intact and in place until otherwise directed by the authorized officer.

E. NATIVE AMERICAN GRAVES PROTECTION AND REPATRIATION (NAGPRA). In accordance with 25 U.S.C. 3002 (d) and 43 CFR 10.4, if the holder inadvertently discovers human remains, funerary objects, sacred objects, or objects of cultural patrimony on NFS lands, the holder shall immediately cease work in the area of the discovery and shall leave these discoveries intact and in place. The holder shall follow the applicable NAGPRA protocols for the undertaking provided in the NAGPRA plan of action or the NAGPRA comprehensive agreement; if there are no such agreed-upon protocols, the holder shall as soon as practicable notify the authorized officer of the discovery and shall follow up with written confirmation of the discovery. The activity that resulted in the inadvertent discovery may not resume until 30 days after the authorized officer certifies receipt of the written confirmation, if resumption of the activity is otherwise lawful, or at any time if a NAGPRA plan of action has been executed by the Forest Service following tribal consultation and any preconditions have been met.

F. PROTECTION OF THREATENED AND ENDANGERED SPECIES, SENSITIVE SPECIES, AND SPECIES OF CONSERVATION CONCERN AND THEIR HABITAT

1. Threatened and Endangered Species and Their Habitat. The location of sites within the permit area needing special measures for protection of plants or animals listed as threatened or endangered under the Endangered Species Act (ESA), 16 U.S.C. 531 *et seq.*, as amended, or within designated critical habitat shall be shown on a map in an appendix to this permit and may be shown on the ground. The holder shall take any protective and mitigation measures specified by the authorized officer as necessary and appropriate to avoid or reduce effects on listed species or designated critical habitat affected by the authorized use and occupancy. Discovery by the holder or the Forest Service of other sites within the permit area containing threatened or endangered species of designated critical habitat not shown on the map in the appendix shall be promptly reported to the other party and shall be added to the map.

2. Sensitive Species and Species of Conservation Concern and Their Habitat. The location of sites within the permit area needing special measures for protection of plants or animals designated by the Regional Forester as

sensitive species or as species of conservation concern pursuant to FSM 2670 shall be shown on a map in an appendix to this permit and may be shown on the ground. The holder shall take any protective and mitigation measures specified by the authorized officer as necessary and appropriate to avoid or reduce effects on sensitive species or species of conservation concern or their habitat affected by the authorized use and occupancy. Discovery by the holder or the Forest Service of other sites within the permit area containing sensitive species or species of conservation concern or their habitat not shown on the map in the appendix shall be promptly reported to the other party and shall be added to the map.

G. CONSENT TO STORE HAZARDOUS MATERIALS. The holder shall not store any hazardous materials at the site without prior written approval from the authorized officer. This approval shall not be unreasonably withheld. If the authorized officer provides approval, this permit shall include or, in the case of approval provided after this permit is issued, shall be amended to include specific terms addressing the storage of hazardous materials, including the specific type of materials to be stored, the volume, the type of storage, and a spill or release prevention and control plan. Such terms shall be proposed by the holder and are subject to approval by the authorized officer.

<USER NOTES FOR CLAUSE IV.G.1 THROUGH IV.G.3>

<Add clauses IV.G.1 through IV.G.3 when consenting to store hazardous materials. Otherwise, omit them.>

1. If the holder receives consent to store hazardous materials, the holder shall identify to the Forest Service any hazardous material to be stored at the site. This identifying information shall be consistent with column (1) of the table of hazardous materials and special provisions given at 49 CFR 172.101 whenever the hazardous material appears in that table. For hazard communication purposes, the holder shall maintain Material Safety Data Sheets for any stored hazardous chemicals, consistent with 29 CFR 1910.1200(c) and (g). In addition, all hazardous materials stored by the holder shall be used, labeled, stored, transported, and disposed of in accordance with all applicable Federal, State, and local laws and regulations. Any hazardous material transportation and disposal manifests shall clearly identify the holder as the generator of the hazardous waste.
2. If hazardous materials are used or stored at the site, the authorized officer may require the holder to deliver and maintain a surety bond in accordance with clause III.L.
3. The holder shall not release any hazardous materials onto land or into rivers, streams, impoundments, or into natural or artificial channels leading thereto. All prudent and safe attempts must be made to contain any release of these materials. The authorized officer in charge may specify specific conditions that must be met, including conditions more stringent than Federal, State, and local regulations, to prevent releases and protect natural resources.
4. If the holder uses or stores hazardous materials at the site, upon revocation or termination of this permit the holder shall provide the Forest Service with a report certified by a professional or professionals acceptable to the Forest Service that the permit area is uncontaminated by the presence of hazardous materials and that there has not been a release or discharge of hazardous materials upon the permit area, into surface water at or near the permit area, or into groundwater below the permit area during the term of the permit. If a release or discharge has occurred, the professional or professionals shall document and certify that the release or discharge has been fully remediated and that the permit area is in compliance with all applicable federal, state, and local laws and regulations.

H. WATER WELLS AND ASSOCIATED PIPELINES

1. Other Jurisdictional Requirements. Clause III.D governs water rights and water facilities. The holder shall obtain all required state and local water permits, licenses, registrations, certificates, or rights and shall provide a copy of them to the authorized officer. For new wells, this information shall be provided prior to disturbing NFS lands for the purpose of water use or development.
2. Well Construction or Development. For new or reconstruction of existing wells, the holder shall prepare a well construction and development plan and submit it to the authorized officer for approval. The well development and construction plan must have prior written approval from the authorized officer before well construction or development is initiated. The holder shall follow applicable federal, state, and local standards for design, construction, and development of new wells or reconstruction of existing wells. If such standards do not exist, the

holder shall follow applicable standards issued by the American Society for Testing and Materials (ASTM), American Water Works Association (AWWA), or National Ground Water Association (NGWA). The construction and development plan must identify all potential sources for any proposed water injection during well construction or development. Only non-chlorinated, potable water may be injected during construction or development of wells to be used for monitoring or water withdrawal. Copies of all documentation for drilling, constructing, or developing wells, including all drilling, boring, and well construction logs, shall be provided to the authorized officer within 60 days of completion of work.

3. **Well Decommissioning.** The holder shall properly decommission and abandon all wells that are no longer needed or maintained in accordance with applicable federal, state, and local standards for water well abandonment. If such standards do not exist, the holder shall follow applicable standards issued by the ASTM, AWWA, or NGWA. At least 30 days prior to initiation of well decommissioning, the holder shall submit a well decommissioning plan to the authorized officer. The well decommissioning plan shall have written approval from the authorized officer before well decommissioning is initiated. All documentation of well decommissioning shall be provided to the authorized officer within 60 days of completion of the work.

V. LAND USE FEES AND DEBT COLLECTION

A. LAND USE FEES. The holder shall pay to the USDA, Forest Service, an annual land use fee for the term of this permit based on the market value of the use and occupancy authorized by this permit of percent of adjusted gross revenue as defined in clause V.B. The minimum annual land use fee for the authorized use and occupancy shall be . If the percentage of gross revenue in a given year is less than the minimum annual land use fee, the holder shall pay the minimum annual land use fee. The holder shall pay the land use fee in advance of the authorized use and occupancy, as provided in clause V.C. Payments due before commercial operations commence pursuant to clause V.C.1 are not refundable, except to the extent they are subject to fee offset under clause V.D. The Forest Service may adjust the minimum land use fee every five years from the due date of the first annual payment to make the annual land use fee commensurate with the market value of the authorized use and occupancy.

B. DEFINITIONS

1. **Adjusted Gross Revenue.** Gross revenue plus applicable revenue additions, minus applicable revenue exclusions.

2. **Gross Revenue.** The total amount of receipts from the sale of goods or services provided by the holder or third party under the permit.

3. **Revenue Additions.** The following are added to gross revenue:

- (a) The value of goods and services that are donated or bartered; and
- (b) The value of gratuities, which are goods, services, or privileges that are not available to the general public.

4. **Revenue Exclusions.** The following are excluded from gross revenue:

- (a) Amounts paid or payable to a state licensing authority.
- (b) Revenue from the sale of operating equipment and from capitalized or other assets used in authorized operations.
- (c) Refunds of use fees provided to the public by the holder.

C. PAYMENT SCHEDULE

1. **Initial Payment.** An initial cash payment representing the portion of the estimated annual land use fee for one month of revenue during the operating season (but not less than \$1,500, unless the total land use fee is less than

\$1,500) shall be paid in advance of use each year, or the equivalent of that initial cash payment in GT fee offset work shall be performed, beginning when the permit term commences or beginning when use commences each year thereafter. Any initial cash payment is not refundable, except to the extent that all or part of it may be offset by the cost of work performed pursuant to a GT fee offset agreement as provided in clause V.D.

<USER NOTES FOR CLAUSE V.C.2>

<Include the following clause V.C.2 where the estimated annual land use fee is less than \$10,000, and delete the remaining clause V.C.2. Revise the payment due dates if the operating season does not run from mid-May to mid-September. However, payments must be made at least quarterly. Each payment is due in advance of use.>

- ☐ 2. Subsequent Payments. The holder shall report sales, calculate fees due, and make payment in two installments, on , and on .

<Include the following clause V.C.2 where the estimated annual land use fee is more than \$10,000, and delete the remaining clause V.C.2.>

- ☐ 2. Subsequent Payments. The holder shall report sales, calculate fees due, and make payment each month.

☐ **D. GT FEE OFFSET**. Pursuant to 16 U.S.C. 580d, the Forest Service may offset all or part of the land use fee by the amount paid by the holder for maintenance, renovation, reconditioning, and improvement deemed to be the Government's responsibility, as defined below, of federally owned improvements and their associated land.

1. Definitions

(a) Maintenance. Actions taken to keep fixed assets in an acceptable condition, including preventive maintenance, normal repairs, replacement of parts and structural components, and other activities needed to preserve a fixed asset so that it continues to provide acceptable service and achieves its expected life, and work needed to comply with laws, regulations, codes, and other legal requirements as long as the original intent or purpose of the fixed asset is not changed, but not including activities aimed at expanding the capacity of an asset or otherwise upgrading it to serve needs different from or significantly greater than those originally intended, such as construction of new facilities.

(b) Improvement. Advancing a fixed asset to a better quality or state or adding a new fixed asset to the authorized improvements under the permit, including replacement, such as, substitution of a fixed asset or any of its components with one having essentially the same capacity and purpose. Improvement is always the responsibility of the Government rather than the holder.

(c) Reconditioning or Renovation. A type of maintenance, other than construction of new facilities, that rehabilitates an existing fixed asset or any of its components to restore the functionality or life of the asset.

(d) Holder Maintenance, Reconditioning, or Renovation. Maintenance, reconditioning, or renovation (MRR) that neither materially adds to the value of the property nor appreciably prolongs its life and that serves only to keep the facility in an ordinary, efficient operating condition, such as, from an accounting or tax perspective, work that may be expensed, but not capitalized, including but not limited to interior decorating, interior painting, vandalism repair, repair of broken windows, light bulb replacement, cleaning, unplugging drains, drive belt replacement, preventive maintenance, lubrication of motors, greasing, servicing, inspecting, oiling, adjusting, tightening, aligning, watering, weeding, sweeping, waxing, refinishing picnic tables, routine housekeeping, and general snow removal.

(e) Government Maintenance, Reconditioning, Renovation, or Improvement. Maintenance reconditioning, renovation, or improvement (MRR) that arrests deterioration, improves and upgrades facilities, and appreciably prolongs the life of the property, including but not limited to installing a new roof, new floor, or new siding; rebuilding boilers; replacing pipes, pumps, and motors; repairing or maintaining the paths, lands, walks, walls, or landscaping adjacent to other federally owned structures; replacing vault toilets with flush facilities, paving interior

roads, upgrading facilities, and installing utilities; and performing exterior painting and refinishing (other than repair of unsightly visual marks caused by everyday use) and that is performed at the sole discretion of the authorized officer.

2. GT Fee Offset Agreement. Before issuance of this permit and before each operating season thereafter, the Forest Service and the holder shall annually enter into a written GT fee offset agreement that specifies the Government maintenance, reconditioning, renovation and improvement (MRRI) to be used to offset the land use fee. The agreement shall enumerate the portion of the land use fee to be offset by the cost of work performed by the holder and the schedule for completion of offset work; which projects are to be used for offset that year; standards for completion of the projects; and examples of allowable costs.

<USER NOTES FOR OPTIONAL CLAUSES V.E AND V.F>

<Include the following optional clauses V.E and V.F when the holder performs the work under a GT fee offset agreement. Delete the remaining optional clauses V.E and V.F. The holder may request an amendment to the permit per FSM 2714 that provides for the Forest Service or a Forest Service contractor to perform the work under a GT fee offset agreement. If the amendment is approved, use form FS-2700-23, and replace clauses V.E and V.F with clause A-21 from FSH 2709.11, chapter 50, section 52.1. If optional clauses V.E and V.F are not included, re-letter the remaining clauses in section V.>

E. HOLDER-PERFORMED FEE OFFSET WORK

1. Work in Lieu of Cash Payments. Notwithstanding clauses V.A and V.C, the cost of work performed by the holder pursuant to a GT fee offset agreement as provided in clause V.D.2 may be credited in lieu of cash payments against the annual land use fee, provided that the work has been accomplished in accordance with the GT fee offset agreement and has been accepted as completed by the Forest Service before the end of the holder's fiscal year. In the absence of an approved GT fee offset agreement, payment shall be made in accordance with clauses V.A and V.C.

2. Documentation of Expenses. Prior to reimbursement or credit for GT fee offset work, the holder shall submit sufficient documentation to allow the authorized officer to determine that the costs claimed are allocable to the GT fee offset agreement, actual, reasonable, and not unallowable.

3. Final Payment. The Forest Service shall reconcile annually the actual land use fee against land use fees paid and credit given by the Forest Service for GT fee offset work. The holder shall pay any additional land use fees owed for the past year's operations within 30 days of billing.

4. Overpayment. Overpayment of the land use fee will be reimbursed by the Forest Service only if paid pursuant to clause V.A. Credit for offset work pursuant to clause V.D.2 is limited to the amount of the annual land use fee; expenses will not be reimbursed if they are greater than the annual land use fee.

F. HOLDER MAINTENANCE, RECONDITIONING, AND RENOVATION (MRR) PLAN. The holder at its expense shall perform holder MRR as defined in clause V.D.1(d) of this permit under a holder MRR plan approved by the Forest Service. The holder MRR plan shall describe required holder MRR and their frequency. The work performed under the holder MRR plan shall not be subject to fee offset under clauses V.D.2 and V.E.1.

<USER NOTES FOR OPTIONAL CLAUSES V.E AND V.F>

<Select the following optional clauses V.E and V.F when the Forest Service or a Forest Service contractor performs the work under a GT fee offset agreement. Delete optional clauses V.E and V.F above. The holder may request an amendment to the permit per FSM 2714 to provide for the holder to perform the work under a GT fee offset agreement. If the amendment is approved, use form FS-2700-23, and replace clauses V.E and V.F with clause A-20 from FSH 2709.11, chapter 50, section 52.1. If optional clauses V.E and V.F are not included, re-letter the remaining clauses in section V.>

E. FOREST SERVICE-PERFORMED GT FEE OFFSET WORK

1. Work in Lieu of Cash Payments. Notwithstanding clauses V.A and V.C, the cost of work performed pursuant to a GT fee offset agreement as provided in clause V.D.2 may be credited in lieu of cash payments against the annual land use fee. The GT fee offset agreement shall specify that the Forest Service will perform the work or

contract with a third party to perform the work. In the absence of an approved GT fee offset agreement, payment shall be made in accordance with clauses V.A and V.C.

2. Payments. The holder shall deposit land use fees [annually or quarterly] into a cooperative account. All deposits shall be retained by the Forest Service until expended or, if unutilized in 5 years, shall be deposited into the U.S. Treasury.

3. Offset for Forest Service Oversight of Major Government MRRI Performed by the Holder. The Forest Service may include in the GT fee offset agreement the cost of a Forest Service employee administering and overseeing major government MRRI projects. For purposes of this clause only, a major government MRRI project is one costing \$[amount] or more.

F. HOLDER MAINTENANCE, RECONDITIONING, AND RENOVATION (MRR) PLAN. The holder at its expense shall perform holder MRR as defined in clause V.D.1(d) of this permit under a holder MRR plan approved by the Forest Service. The holder MRR plan shall describe required holder MRR and their frequency. The work performed under the holder MRR plan shall not be subject to fee offset under clause V.D.2.

G. LAND USE FEE PAYMENTS

1. Crediting of Payments. Payments shall be credited on the date received by the deposit facility, except that if a payment is received on a non-workday, the payment shall not be credited until the next workday.

2. Disputed Fees. Land use fees are due and payable by the due date. Disputed land use fees, other than land use fees recalculated pursuant to an audit, must be paid in full. Adjustments will be made if dictated by an administrative appeal decision, a court decision, or settlement terms.

3. Late Payments

(a) Interest. Pursuant to 31 U.S.C. 3717 *et seq.*, interest shall be charged on any land use fee not paid within 30 days from the date it became due. The rate of interest assessed shall be the higher of the Prompt Payment Act rate or the rate of the current value of funds to the United States Treasury (i.e., the Treasury tax and loan account rate), as prescribed and published annually or quarterly by the Secretary of the Treasury in the *Federal Register* and the Treasury Fiscal Requirements Manual Bulletins. Interest on the principal shall accrue from the date the land use fee is due.

(b) Administrative Costs. If the account becomes delinquent, administrative costs to cover processing and handling the delinquency shall be assessed.

(c) Penalties. A penalty of 6% per annum shall be assessed on the total amount that is more than 90 days delinquent and shall accrue from the same date on which interest charges begin to accrue.

(d) Termination for Nonpayment. This permit shall terminate if the holder fails to pay any land use fee, interest, or any other charges within 90 calendar days of the due date. The holder shall remain responsible for the delinquent charges.

4. Administrative Offset and Credit Reporting. Delinquent land use fees and other charges associated with this permit shall be subject to all rights and remedies afforded the United States pursuant to 31 U.S.C. 3711 *et seq.* and common law. Delinquencies are subject to any or all of the following:

(a) Administrative offset of payments due the holder from the Forest Service.

(b) If in excess of 90 days, referral to the United States Department of the Treasury for appropriate collection action as provided by 31 U.S.C. 3711(g)(1).

(c) Offset by the Secretary of the Treasury of any amount due the holder, as provided by 31 U.S.C. 3720 *et seq.*

(d) Disclosure to consumer or commercial credit reporting agencies.

H. ACCOUNTING RECORDS AND ACCESS. The holder shall follow generally accepted accounting principles or other cash basis of accounting in recording financial transactions. When requested by the Forest Service, the holder at its own expense shall have its annual accounting records audited by an independent public accountant acceptable to the Forest Service. The holder shall require any party who has responsibility for any day-to-day activities under clause II.F of this permit to comply with these same requirements. The holder shall make all of the accounting books and supporting records for the business activities authorized by this permit, as well as those of any parties authorized to operate under clause II.F of this permit, available for audit by the Forest Service or other federal agencies authorized to review Forest Service activities. The holder shall retain these records and make them available for review for five years after the end of the year they were generated, unless disposition is otherwise authorized by the Forest Service in writing.

VI. REVOCATION, SUSPENSION, AND TERMINATION

A. REVOCATION AND SUSPENSION

1. The Forest Service may suspend or revoke this permit in whole or in part:
 - (a) For noncompliance with federal, state, or local laws and regulations;
 - (b) For noncompliance with the terms of this permit;
 - (c) For failure of the holder to exercise the privileges granted by this permit; or
 - (d) At the discretion of the authorized officer, for specific and compelling reasons in the public interest.
2. The authorized officer may revoke this permit at the request of the holder. Revocation at the request of the holder must be agreed to in writing by the authorized officer. As a condition of revocation of this permit at the request of the holder, the authorized officer has discretion to impose any terms deemed appropriate as provided for in this permit.
3. Prior to revocation or suspension, other than revocation at the request of the holder under clause VI.A.2 and immediate suspension under clause VI.B, the authorized officer shall give the holder written notice of the grounds for revocation or suspension and a reasonable period, not to exceed 30 days, to cure any noncompliance.

B. IMMEDIATE SUSPENSION. The authorized officer may immediately suspend this permit in whole or in part when necessary to protect public health or safety or the environment. The suspension decision shall be in writing. The holder may request an onsite review with the authorized officer's superior of the adverse conditions prompting the suspension. The authorized officer's superior shall grant this request within 48 hours. Following the onsite review, the authorized officer's superior shall promptly affirm, modify, or cancel the suspension.

C. APPEALS AND REMEDIES. Written decisions by the authorized officer relating to administration of this permit are subject to administrative appeal pursuant to 36 CFR Part 214, as amended. Revocation or suspension of this permit shall not give rise to any claim for damages by the holder against the Forest Service.

D. TERMINATION. This permit shall terminate when by its terms a fixed or agreed upon condition, event, or time occurs without any action by the authorized officer. Examples include but are not limited to expiration of the permit by its terms on a specified date and, in the case of a permit issued to a business entity, termination upon change of control of the business entity. Termination of this permit is not subject to administrative appeal.

E. CONTINUATION OF OBLIGATIONS AND LIABILITIES BEYOND TERMINATION OR REVOCATION.

Notwithstanding the termination or revocation of this permit, its terms and conditions shall remain in effect and shall be binding on the holder and the holder's personal representative, successors, and assignees until all the holder's obligations and liabilities accruing before or as a result of termination or revocation of this permit have been satisfied.

VII. MISCELLANEOUS PROVISIONS

A. MEMBERS OF CONGRESS. No member of or delegate to Congress or resident commissioner shall benefit from this permit either directly or indirectly, except to the extent the authorized use provides a general benefit to a corporation.

B. CURRENT ADDRESSES. The holder and the Forest Service shall keep each other informed of current mailing addresses, including those necessary for payment of fees.

C. HOLDER REPRESENTATIVE. The holder or a designated representative shall be present on the premises at all times when the facilities are open to the public. The holder shall notify the authorized officer in writing as to who the representative will be.

K. SUPERIOR CLAUSES. In the event of any conflict between any of the preceding printed clauses and any subsequent clauses or provisions in the appendices attached to this permit, the preceding printed clauses shall control.

THIS PERMIT IS GRANTED SUBJECT TO ALL ITS TERMS.

BEFORE THIS PERMIT IS ISSUED TO AN ENTITY, DOCUMENTATION MUST BE PROVIDED TO THE AUTHORIZED OFFICER OF THE AUTHORITY OF THE SIGNATORY FOR THE ENTITY TO BIND IT TO THE TERMS OF THIS PERMIT.

The valid OMB control number for this information collection is 0596-0082. Response to this collection of information is mandatory. The authority to collect the information is the Organic Administration Act, 16 U.S.C. 551. The time required to complete this information collection is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the State or local Agency that administers the program or contact USDA through the Telecommunications Relay Service at 711 (voice and TTY). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination Complaint](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Mail Stop 9410, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

The Privacy Act of 1974, 5 U.S.C. 552a, and the Freedom of Information Act, 5 U.S.C. 552, govern the confidentiality to be provided for information received by the Forest Service.

OMB No. 0596-0082

**U.S. DEPARTMENT OF AGRICULTURE
FOREST SERVICE**

**SPECIAL USE PERMIT FOR
CAMPGROUND AND RELATED GRANGER-THYE CONCESSIONS**

**APPENDIX G
OPERATION OF FEDERALLY OWNED DRINKING WATER SYSTEMS**

Authority: Section 7 of the Granger-Thye Act, 16 U.S.C. 580d

I. INTRODUCTION

The requirements set forth in this Appendix pertain to holders of Forest Service special use permits that authorize the holder to operate federally owned drinking water systems. This includes special use permits authorized under Section 7 of the Granger-Thye Act, 16 U.S.C. 580d.

The requirements set forth below are derived from Forest Service Manual (FSM) 7420, which describes the Forest Service Drinking Water Program. The objective of the Forest Service Drinking Water Program is to protect human health by ensuring that Forest Service drinking water systems are properly operated, maintained, and monitored and deficiencies promptly corrected. Where this objective and applicable standards as described herein cannot be met, the Forest Service policy is to make such waters unavailable for human consumption. "Human consumption" includes the use of water for drinking, food preparation, dishwashing, oral hygiene, or bathing/showering.

When a permit holder operates federally owned water systems, both the Forest Service and the permit holder are considered suppliers of the water. Therefore, permit holders authorized to operate federally owned water systems must operate and maintain the systems to meet the objective and policy of the Forest Service Drinking Water Program. Failure to operate these drinking water systems accordingly may result in revocation of the permit.

In addition to fulfilling the requirements set forth below, permit holders operating federally owned water systems must comply with all applicable federal, State, interstate, and local requirements applicable to drinking water systems, and must follow the Operations and Maintenance (O&M) Plan developed in conjunction with the Forest Service to address the specific system(s).

Nothing in this Appendix should be interpreted as diminishing any obligation imposed by federal, State, interstate, or local authority.

II. APPLICABLE DEFINITIONS

A. Average Daily Population (ADP). For classification and inventory purposes, the ADP is the sum of the daily transient and daily resident population served or having access to the drinking water system, per month, divided by the days of the month. Where actual or sample counts are not available at recreation sites, determine ADP by multiplying Persons-At-One-Time (PAOT) by the percentage of site use where PAOT equals five people per site.

B. Certified Operator. Qualified personnel certified by the primacy agency to operate public drinking water systems.

C. Condition Survey. An onsite survey of the water source, facilities, and equipment as defined in the operations and maintenance plan for the system. Condition surveys are an integral part of the sanitary surveys. They may be combined with the sanitary surveys or serve as a supplement and addendum to the sanitary survey. Condition surveys are also performed to collect and document current condition and maintenance tasks for a water system. Condition surveys are conducted by qualified personnel and documented in a brief report.

D. Consecutive Water System. A water system that buys or otherwise receives some or all of their finished water from another public water system on a regular basis. Consecutive water systems are regulated as separate drinking water systems if they meet the definition of a public water system under the National Primary Drinking Water Regulations (NPDWR).

E. Drinking Water System. A public or a non-public water system for providing water suitable for human consumption via pipes or constructed conveyances, including handpump systems).

F. E. Coli Mcl Violation. A violation that occurs when a water system has:

1. An *E. coli*-positive routine sample followed by a total coliform-positive repeat sample; or
2. Any *E. coli*-positive repeat sample; or
3. A failure to collect all required repeat samples following an *E. coli*-positive routine sample; or
4. A failure to test for *E. coli* in a total coliform-positive repeat sample.

G. Groundwater Under The Direct Influence Of Surface Water (GWUDI). Any water beneath the surface of the ground with significant occurrence of organisms or significant and relatively rapid shifts in water characteristics which closely correlate to climatological or surface water conditions. Direct influence is determined by the primacy agency for individual sources in accordance with criteria established by the primacy agency.

H. Human Consumption. Use of water for drinking, food preparation, dishwashing, oral hygiene, or bathing/showering.

I. Level 1 Assessment. An evaluation of a public water system to identify the possible presence of sanitary defects, defects in distribution system coliform monitoring practices, and (when possible) the likely reason that the system triggered the assessment. It is conducted by the system operator or owner in accordance with primacy agency requirements.

J. Level 1 Assessment Trigger. An event that necessitates conducting a Level 1 Assessment. A Level 1 Assessment must be performed when:

1. Any public water system collecting fewer than 40 samples per month has greater than 1 routine/repeat sample per month which is total coliform-positive; or
2. Any public water system collecting at least 40 samples per month has greater than 5.0 percent of the routine/repeat samples in a month total coliform-positive; or
3. Any public water system fails to take every required repeat sample after each total-coliform routine sample. For non-public systems, the above events trigger a condition survey.

K. Level 2 Assessment. An evaluation of a public water system to identify the possible presence of sanitary defects, defects in distribution system coliform monitoring practices, and (when possible) the likely reason that the system triggered the assessment. A Level 2 Assessment provides a more detailed examination of the system (including the system's monitoring and operational practices) than does a Level 1 Assessment through the use of more comprehensive investigation and review of available information, additional internal and external resources,

and other relevant practices. It is conducted by an individual approved by the primacy agency in accordance with primacy agency requirements.

L. Level 2 Assessment Trigger. An event that necessitates conducting a Level 2 Assessment. A Level 2 Assessment must be performed when:

1. Any public water system has an *E. coli* MCL violation.
2. Any public water system triggers a second Level 1 Assessment within a rolling 12-month period.
For non-public systems, the above events trigger a condition survey.

M. Maximum Contaminant Level (MCL). The maximum amount of a contaminant allowed in water provided to any user of a public water system.

N. Maximum Residual Disinfectant Level (MRDL). The level of a disinfectant added for water treatment that may not be exceeded at the consumer's tap without an unacceptable possibility of adverse health effects.

O. Non-Public Water System. A water system which provides drinking water but does not meet the definition of a public water system as defined by the SDWA. Non-public water systems are classified as one of the following:

1. Non-Public, Non-Transient (NPNT) Water System. A non-public water system serving less than 25 year-round residents or serving less than 25 of the same persons (ADP) more than 180 days per year (for example, smaller Forest Service ranger stations or housing sites).
2. Non-Public Transient (NPT) Water System. A non-public water system serving less than 25 persons (ADP) and not meeting the definition of NPNT water system (for example, smaller recreation sites, seasonal guard stations, or work centers with short-term, seasonal employees).

P. Other Water System (O). A distribution system (consisting of a water meter and distribution system) connected to a public water system (for example, connection of a Forest Service facility to a municipal water supply), that is not considered a Consecutive Water System.

Q. Primacy Agency. The agency that has been delegated primary responsibility by the U.S. Environmental Protection Agency for the administration and enforcement of primary drinking water regulations and related requirements that are applicable to public water systems within a State.

R. Public Water System. As defined under the SDWA, a public water system is a system for the provision to the public of water for human consumption through pipes or other constructed conveyances, if such system has at least 15 service connections or regularly serves at least 25 individuals. Such term includes (i) any collection, treatment, storage and distribution facilities under control of the operator of such system and used primarily in connection with such system, and (ii) any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system. Public water systems are classified as one of the following:

1. Community (C) Water System. A public water system that:
 - (a) Serves at least 15 service connections used by year-round residents; or
 - (b) Regularly serves at least 25 year-round residents.
2. Non-Community Water System. A public water system that does not meet the definition of a community water system and can be one of the following:
 - (a) Non-Transient Non-Community (NTNC) Water System. A public water system that is not a community water system and that regularly serves at least 25 of the same persons over 6 months per year.

(b) **Transient Non-Community (TNC) Water System.** A public water system that is not a community water system and does not regularly serve at least 25 of the same persons over 6 months per year.

S. Qualified Person/Personnel. Person possessing appropriate training, experience, qualifications, and certifications/licenses to perform specific technical functions with respect to the design, construction, assessment, and operation; or monitoring and maintenance of drinking water systems.

T. Repeat Samples. A set of coliform samples taken when a previous sample is positive for total coliform . Repeat samples must be collected within 24 hours of being notified of a positive result.

U. Routine Sample. A coliform sample that is representative of the water throughout the distribution system, when the system is operational, and is used to determine the microbial quality of the water.

V. Sanitary Survey. An onsite review of the water source, facilities, equipment, operation and maintenance, and overall management of a drinking water system to evaluate compliance with laws and regulations and to evaluate the adequacy with respect to producing and distributing safe drinking water. Sanitary surveys must be conducted no less frequently than every three years for community water systems and every five years for non-community and non-public water systems.

W. Service Connection. Piped connection for conveyance of drinking water from the distribution system to the user. Examples of service connections include: an individual building (for example, residence, crew quarters, office, or mobile home), drinking fountains in campgrounds provided for public use, an individual campground hydrant, a handpump on a well, and a building with toilet and wash basin or shower.

X. Special Sample. A coliform sample collected for purposes other than routine compliance monitoring (for example, investigative samples or pre-opening/pre-season samples on seasonal systems). Special samples must be marked as such when sent in to the laboratory for analysis. Special samples do not count in determining assessment triggers or MCL violations, or in meeting the monthly sampling requirements.

Y. Total Coliform (TC) Sample. Group of bacteria used as an indicator of the potential fecal contamination of drinking water. Although total coliforms are usually not pathogenic themselves, their presence in drinking water indicates that fecal pathogens may also be present.

Z. Water System Operator. Any individual who has direct responsibility for or operates a drinking water system or such parts of the system as would affect the quality and/or quantity of drinking water provided to consumers.

III. REQUIREMENTS FOR OPERATING FEDERALLY OWNED DRINKING WATER SYSTEMS

A. Compliance With Applicable Standards. All federally owned public water systems must be operated in compliance with the most stringent of the following requirements:

1. The Safe Drinking Water Act, as amended (42 U.S.C. 300f *et seq.*);
2. The primacy agency;
3. FSM 7420 and applicable supplements; and
4. This permit.

Requirements of the Safe Drinking Water Act are further delineated in regulations, including but not limited to the National Primary Drinking Water Regulations (NPDWR) (42 CFR Part 141) and National Secondary Drinking Water Regulations (NSDWR) (42 CFR Part 143).

All federally owned non-public water systems must be operated in compliance with FSM 7420 and applicable supplements, and this permit. Non-public water systems must comply with the current MCLs applicable to the

respective public water system class identified in Exhibit 01. Contaminant monitoring for non-public systems may be less frequent than a public water system of respective class, if permitted by the Forest Service.

Exhibit 01

**Respective Public Water System Classes for Operation
of Forest Service Non-Public Water Systems**

Non-Public Forest Service Class	Respective Public System Class
Non-Public Transient (NPT)	Transient Non-Community (TNC)
Non-Public Non-Transient (NPNT)	Non-Transient Non-Community (NTNC)
Other (O) (municipal service connection)	Not applicable

B. Classification. Determination of drinking water system classification (C, TNC, NTNC, NPT, NPNT) shall be made by the regulatory authorities and the Forest Service.

C. Qualified Personnel. The permit holder shall provide qualified personnel to operate, maintain, assess, and monitor each water system. If required by the primacy agency or Forest Service, water system operators and sampling technicians shall be primacy agency-certified. Each water system shall have a primary and backup water system operator. The permit holder shall provide the name of the primary and backup water system operator for each separate water system within the scope of this permit in writing to the Forest Service, and notify the authorized officer within 72 hours of a change in personnel. Operation, maintenance, assessment, and monitoring tasks shall be performed by the primary or backup water system operator, or, if permitted by the primacy agency and Forest Service, by qualified personnel working under the direct supervision of the primary or backup water system operator.

D. Sanitary Surveys. Unless otherwise specified, sanitary surveys will be conducted by a primacy agency-approved agent for public water systems, and by the Forest Service for non-public water systems. The Forest Service may elect to attend sanitary surveys conducted by other agents. Where advance notice is provided by the primacy agency-approved agent, the permit holder shall coordinate the schedule with the Forest Service. The permit holder shall assist the primacy agency and/or Forest Service in the conduct of sanitary surveys by locating components at the site, operating valves and equipment, and providing a copy of the water system records if requested. Sanitary surveys may be conducted more frequently than the minimum required by regulation or policy, at the discretion of the primacy agency or the Forest Service. The permit holder shall coordinate with the Forest Service to ensure correction of identified deficiencies, and reporting of corrections to the primacy agency.

E. Level 1 and Level 2 Assessments and Condition Surveys. The permit holder shall notify the Forest Service in writing prior to conducting Level 1 and Level 2 Assessments and condition surveys. The Forest Service may elect to attend. The permit holder shall coordinate with the Forest Service to ensure correction of identified deficiencies.

1. **Level 1 and Level 2 Assessments.** Qualified personnel shall conduct Level 1 and Level 2 Assessments on public water systems in response to specific coliform test results, *E. coli* test results, or failure to sample, as per the definitions of Level 1 Assessment Trigger and Level 2 Assessment Trigger. Unless otherwise directed, the permit holder shall be responsible for ensuring the completion of all assessments. Unless otherwise directed or required by the primacy agency, the permit holder shall be responsible for conducting Level 1 Assessments, and for ensuring the completion of Level 2 Assessments by coordinating with the primacy agency and the Forest Service.

2. **Condition Surveys (Operational/Other).** Unless otherwise directed, the permit holder shall be responsible for conducting these condition surveys. Qualified personnel shall conduct condition surveys whenever:

(a) A non-public system has specific coliform test results, *E. coli* test results, or failure to sample, that would require a Level 1 or Level 2 Assessment for a public system, or

- (b) A closed seasonal system is opened for service, or
- (c) There is a significant change in conditions that may have affected the system operation and or water quality (for example, severe storm, earthquake, or flood event), or
- (d) Prior to renewal of any special use permit involving Forest Service-owned drinking water systems.

3. Condition Surveys (Maintenance). Qualified Forest Service personnel will conduct condition surveys for maintenance of Forest Service-owned drinking water systems, on an interval not to exceed five years. The permit holder shall assist the Forest Service in the conduct of maintenance condition surveys by locating components at the site, operating valves and equipment, and providing a copy of the water system records if requested.

F. Physical Protection

1. Design and Construction. The permit holder shall not make any design or construction modifications to the system without advance authorization from the Forest Service and primacy agency.
2. Operations and Maintenance (O&M). If an O&M Plan has not been provided by the Forest Service, prepare one for Forest Service approval. Review and modify the O&M Plan whenever operational or physical changes are proposed, and submit proposed revisions for Forest Service approval. At a minimum, review the O&M Plan annually and submit proposed revisions for Forest Service approval with the Annual Operating Plan. Follow the procedures established in the O&M plans. Make no unauthorized changes that would compromise the objectives stated in this Appendix. Obtain approval from the Forest Service prior to opening seasonal systems each year. For seasonal systems that are public, also demonstrate compliance with primacy agency-approved startup procedures prior to opening the system each year. Perform maintenance to ensure continued protection of the water source and water system. When a closed system at a publicly-accessible site is being super-chlorinated and/or flushed, or is being sampled prior to system opening/re-opening, deter public access to the system via signs, barricades, and/or other measures.
3. Cross Connection Control and Backflow Prevention. Maintain cross connection control and backflow prevention practices and devices in accordance with the Forest cross connection control and backflow prevention plan, primacy agency regulations, and OSHA regulations at 29 CFR 1910.141(b)(2)(ii). Properly use and maintain these devices and incorporate annual testing into the system's cross connection control program and O&M Manual. Maintain testing records in the water system file, and document test completion in the annual pre-opening condition survey.
4. Security. Maintain physical security (fences, enclosures, and locks) as necessary and practicable to deter unauthorized access. If vandalism or intentional harm to the water system and its components (wells, springs, treatment systems, storage tanks, and so forth) is suspected, notify law enforcement officers immediately and consult with the Forest Service for further guidance.

G. Treatment. Public water systems must provide treatment as required by the primacy agency or Forest Service. Non-public water systems must provide treatment as required by the Forest Service, to meet objectives stated in this Appendix. The permit holder shall not make substantial treatment modifications without advance authorization from the Forest Service (and primacy agency, if applicable). The permit holder shall notify, in writing, the Forest Service (and primacy agency, if applicable) in the event of any treatment system malfunction.

H. Monitoring and Follow-up Actions. Conduct monitoring and perform follow-up actions in accordance with this Appendix. Meet additional requirements if imposed by the primacy agency. Ensure that sample analyses are conducted at a primacy agency-certified laboratory, and that samples are collected and handled in accordance with laboratory requirements. Maintain and submit monitoring records in accordance with this Appendix. For public systems, submit results to the Forest Service and primacy agency as required by regulation. For non-public systems, submit results to the Forest Service only. The laboratory selection, and the manner in which the laboratory notifies the permit holder of violations, are subject to approval by the Forest Service. The permit holder shall ensure that the laboratory reports results immediately if a test result is positive for *E. coli* or total coliform. The permit holder shall also ensure that the laboratory directly notifies the Forest Service authorized officer of

violations. If requested by the Forest Service, the permit holder shall have the laboratory send an electronic copy of all results to the Forest Service at the same time results are sent to the permit holder. The permit holder is responsible for providing the name and address of the authorized officer to ensure this notification and associated sample results are sent by the laboratory to the Forest Service. The permit holder shall submit a drinking water monitoring plan with the annual operating plan, for approval by the Forest Service. The plan must include the contaminant list and schedule, proposed laboratory, and contacts list (permit holder, operators, and Forest Service representative to be contacted by the laboratory). The plan must also include a sample siting plan for coliform samples that addresses frequency and location, as described below. Each hand pump is considered as a separate water system. Unless otherwise directed, microbiological samples must be taken in the first ten days of the month. The permit holder shall notify and consult with the Forest Service within 24 hours after notification by the laboratory of a sample that tests positive for microbiological contamination, a trigger of a Level 1 or Level 2 assessment or condition survey, or any violation of applicable standards.

1. Microbiological (Coliform) Monitoring

Public Water System

(a) Routine Coliform Samples. Follow NPDWR or primacy agency regulations. Unless otherwise directed by the Forest Service, for seasonal systems, collect at least one sample for each full or partial calendar month the system operates, even if the primacy agency allows less frequent sampling. Prepare a sample siting plan that addresses frequency and location to ensure sampling is representative of water throughout the distribution system. The sample siting plan must include routine and repeat sample sites in the distribution system to ensure compliance with the Revised Total Coliform Rule. Additionally, for systems that use groundwater, the sample siting plan must include a repeat sample site at each groundwater source to meet requirements of the Groundwater Rule.

(b) Repeat Coliform Samples. Collect samples as required by the NPDWR or primacy agency regulations.

(c) Special Samples. Collect samples as required by the NPDWR or primacy agency regulations. Seasonal systems may not be opened for public use until after the special samples show the systems are free from coliform bacteria.

Non-Public Water System

(a) Routine Coliform Samples. Collect samples from non-public (NPT and NPNT) water systems at a minimum frequency of one sample/calendar quarter for systems that are continuously operated. For seasonal systems, collect one sample for each full or partial calendar month that the system operates. Prepare a sample siting plan that addresses frequency and location to ensure sampling is representative of water throughout the distribution system. The sample siting plan must include routine and repeat sample sites in the distribution system. Additionally, for systems that use groundwater, the sample siting plan must include a repeat sample site at each groundwater source.

(b) Repeat Coliform Samples. Within 24 hours of notification of a positive routine sample, collect one repeat sample for each positive routine sample.

(c) Special Samples. Collect one special sample before opening any seasonal water system for use. Seasonal systems may not be opened for public use until after the special samples show the systems are free from coliform bacteria.

2. Microbiological Follow-up Actions. Follow up actions are based on what triggers and/or violations have occurred.

(a) Level 1 Assessment Trigger

Public Water System

- (1) Notify the Forest Service, conduct a Level 1 Assessment, and conduct corrective actions as soon as practicable, and coordinate with the Forest Service to submit the completed assessment form to the primacy agency within 30 days after learning of the trigger. In the completed form, describe sanitary defects detected, corrective actions completed, and a proposed timetable for any corrective actions not already completed.
- (2) Unless otherwise directed by the primacy agency or Forest Service, after performing corrective actions, take daily special samples until two consecutive special samples are negative for coliform. If one special sample is TC positive, consult with the primacy agency and Forest Service on whether to implement precautionary measures such as system closure or a boil water advisory. The Forest Service may require more conservative measures than the primacy agency.
- (3) Follow primacy agency and Forest Service directions for follow-up.

Non-Public Water System

- (1) Notify the Forest Service, conduct a condition survey, and conduct corrective actions as soon as practicable, and document the survey and actions within 30 days after learning of the trigger. In the documentation, describe sanitary defects detected, corrective actions completed, and a proposed timetable for any corrective actions not already completed.
- (2) Unless otherwise directed by the Forest Service, after performing corrective actions, take daily special samples until two consecutive special samples are negative for coliform. If one special sample is TC positive, consult with the Forest Service on whether to implement precautionary measures such as system closure or a boil water advisory.
- (3) Follow Forest Service directions for follow-up.

(b) Level 2 Assessment Trigger

Public Water System (Trigger: *E. coli* MCL violation or second Level 1 Assessment trigger within a rolling 12-month period).

- (1) (For all Level 2 Assessment Triggers) Notify the Forest Service. If the trigger is caused by an *E. coli* MCL violation, also notify the primacy agency, in accordance with NPDWR or primacy agency regulations. Follow primacy agency and Forest Service direction.
- (2) (For *E. coli* MCL violation) Close the system. (The toilet supply may be left open if all points of human consumption, including showers, sinks, and publicly accessible hose bibs, can be isolated and shut off.)
- (3) (For *E. coli* MCL violation) Notify the public and water users, in coordination with the Forest Service, in accordance with NPDWR or primary agency regulations.
- (4) (For *E. coli* MCL violation) Coordinate with the Forest Service to notify the State after completion of public notice (with a copy of the public notice posted/delivered, and dates when the notice was posted and removed).
- (5) (For all Level 2 Assessment Triggers) Coordinate with the Forest Service. Ensure that a Level 2 Assessment is completed by the primacy agency or by a party approved by the primacy agency as soon as practicable, and submit the completed assessment form to the primacy agency within 30 days after learning of the trigger. The completed form must describe sanitary defects detected, corrective actions completed, and a proposed timetable for any corrective actions not already completed.
- (6) (For *E. coli* MCL violation) After performing corrective actions, take daily special samples. A closure order may be lifted only after the problem has been corrected and two consecutive daily special samples are TC negative.

Non-Public Water System (Trigger: *E. coli* MCL violation)

- (1) Notify the Forest Service of the violation and follow Forest Service direction.
- (2) Close the system. (The toilet supply may be left open if all points of human consumption, including showers, sinks, and publicly accessible hose bibs, can be isolated and shut off.)
- (3) Coordinate with the Forest Service to notify the water users about the violation within 24 hours and in accordance with the primacy agency requirements and guidance. Content of public notice for non-public systems may be customized to fit a non-public system, subject to approval by the Forest Service.
- (4) Coordinate with the Forest Service on conducting a condition survey and corrective actions as soon as practicable, and document the survey and actions within 30 days after learning of the trigger. In the documentation, describe sanitary defects detected, corrective actions completed, and a proposed timetable for any corrective actions not already completed.
- (5) After performing corrective actions, take daily special samples. A closure order may be lifted only after the problem has been corrected and two consecutive daily special samples are TC negative.

3. Disinfectant and Disinfection By-Products. All public community and non-transient non-community water systems that add a primary or residual disinfectant as part of their water treatment must be monitored in accordance with NPDWR or primacy agency requirements for disinfectant residuals to demonstrate compliance with MRDLs, and for disinfection byproducts to demonstrate compliance with MCLs. Transient non-community systems that use chlorine dioxide as a disinfectant must also be monitored for compliance with the MRDL. All public water systems that add a primary disinfectant to treat the source water (surface water, GWUDI, or groundwater) must be monitored in accordance with NPDWR or primacy agency requirements for disinfectant residuals and other parameters as necessary to demonstrate compliance with applicable pathogen inactivation requirements. All non-public non-transient water systems that add a primary or residual disinfectant as part of their water treatment must be monitored in accordance with NPDWR for disinfectant residual MRDLs and disinfection byproduct MCLs. Non-public transient systems that use chlorine dioxide as a disinfectant must also be monitored for compliance with the MRDL. All non-public water systems that add a primary disinfectant to treat the source water (surface water, GWUDI, or groundwater) must be monitored in accordance with NPDWR for disinfectant residuals and other parameters as necessary to demonstrate compliance with applicable pathogen inactivation requirements.

4. Turbidity. Perform turbidity monitoring in compliance with NPDWR and primacy agency regulations for all public systems and non-public systems using surface water sources or groundwater sources determined to be under the direct influence of surface water, or systems designated by the primacy agency. Non-public systems must monitor the same way as public water systems unless alternative monitoring is approved by the Forest Service on a case-by-case basis.

5. Primary Contaminants, Secondary Contaminants, Regulated and Unregulated Organic and Inorganic Chemicals, and Other Contaminants. For public systems, conduct monitoring of all applicable contaminants as required by the NPDWR, NSDWR, or primacy agency regulations. For non-public systems, conduct monitoring in the same manner and frequency as the respective public water system class, unless the Forest Service has granted a waiver using primacy agency waiver criteria as guidance. Nitrates are typically monitored for annually, and nitrites are typically monitored for every three years.

I. Public Notification. Notification must be performed in accordance with the requirements of NPDWR and primacy agency regulations for public and non-public systems.

J. Recordkeeping. The permit holder shall establish a permanent file for each drinking water system, and maintain records for both public and non-public systems per the NPDWR, primacy agency regulations, and this Appendix. The permit holder shall also include copies of sample siting plans, condition surveys, sanitary surveys, O&M plans, maintenance logs, records of repairs and/or modifications, and any other correspondence in the file.

The permit holder shall submit a copy of the water system file to the Forest Service upon request, and shall surrender the file to the Forest Service upon permit termination or revocation. The permit holder shall forward copies of routine and repeat coliform test results to the Forest Service by the 15th of the month in which the sample was taken. For other parameters (e.g., special coliform samples, disinfection byproducts, organic/inorganic/other chemical samples, disinfectant residuals, turbidity, etc.), unless otherwise requested, the permit holder shall forward copies of test results to the Forest Service by the 15th of the month following the sampling date. Unless otherwise requested, the permit holder shall forward copies of condition surveys, sanitary surveys, Level 1 and Level 2 Assessments, corrective action reports, correspondence, etc. to the Forest Service within one week.

K. Undeveloped Water Sources. Where there are undeveloped sources such as roadside springs, the permit holder shall keep such water sources in an undeveloped condition indicating the water source is unprotected. Undeveloped water sources shall not be identified on trail guides, brochures, maps, etc. in a way that may mislead users into believing the water is protected and safe. The permit holder shall take any additional measures to protect the public as required by Federal, State, or local law with regard to such sources.

L. Range and Wildlife Water Systems. The requirements in this Appendix do not apply to range or wildlife water systems if their design and construction features clearly indicate that they are not for human use. However, if range or wildlife water systems are an integral part of a drinking water system, such integral parts shall meet the requirements for drinking water. The Forest Service and/or primacy agency shall make the final determination of which water systems must be treated as drinking water systems.

M. Water Conservation. The permit holder shall operate, maintain, and monitor the water systems in such a way as to minimize the environmental footprint, including water, energy, and waste reduction. The permit holder shall report water meter readings to the Forest Service on a monthly basis, and maintain readings in the file. The permit holder shall promptly correct wastage or leaks that can be corrected through permit holder operations, maintenance, reconditioning, or renovation. The permit holder shall promptly inform the Forest Service of other wastage or leaks.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the State or local Agency or contact USDA through the Telecommunications Relay Service at 711(voice and TTY). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Mail Stop 9410, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

The Privacy Act of 1974 (5 U.S.C. 552a) and the Freedom of Information Act (5 U.S.C. 552) govern the confidentiality to be provided for information received by the Forest Service.

**SPECIAL USE PERMIT FOR
CAMPGROUND AND RELATED GRANGER-THYE CONCESSIONS**

**APPENDIX B
ANNUAL GRANGER THYE FEE OFFSET AGREEMENT**

**AUTHORITY: Section 7 of the Granger-Thye Act, 16 U.S.C. 580d
<Reference FSH 2709.11 chapter 50>**

This Annual Granger-Thye (GT) Fee Offset Agreement (agreement) is made by [name] (the holder) and the U.S. Department of Agriculture, Forest Service, [name] National Forest (the Forest Service), under section 7 of the G-T Act, 16 U.S.C. 580d, and clause IV.E of the special use permit issued to the holder on [date] (the permit). The total estimated annual land use fee is [amount]. [] percent of that land use fee may be offset by the cost incurred by the holder for the Government maintenance, reconditioning, renovation, or improvement (MRR) projects listed below in accordance with this agreement. Additionally, [] percent of that fee may be offset by the cost incurred by the Forest Service for the Government MRR projects under a separate collection agreement. Projects to be performed by the holder shall be completed by the date specified and within the holder's fiscal year for the year the fee is due. The Forest Service may modify the projects and dates as necessary, after consultation with the holder.

1. Amount of Land Use Fee Subject to Offset. The actual cost of each project that is satisfactorily completed as determined by the Forest Service may be offset against the holder's land use fee. Due dates and cost estimates for completion of each project are enumerated below. Examples of allowable costs include salaries and wages, materials and supplies, and subcontracts that are direct costs of a G-T fee offset project and indirect costs based on an approved indirect cost rate. The total cost for Government MRR projects to be performed under this agreement shall not exceed the holder's annual land use fee.

2. Projects and Project Costs Covered by This Agreement. Upon a determination by the Forest Service that a project has been satisfactorily completed by the holder, the holder shall submit documentation of its actual cost to the Forest Service and shall certify that the representations in that documentation are accurate and complete. The certification shall be signed and dated, and shall state that failure to sign the certification shall vitiate the fee offset claim. The Forest Service shall verify that documentation before giving any credit against the holder's land use fee, and reserves the right not to grant any fee offset if any representations in the documentation are inaccurate or incomplete.

The holder shall perform the work itemized below under this agreement.

Description of Project	Due Date	Estimated Cost	Completion Date	Actual Cost
[itemize projects]				

The Forest Service or Forest Service contractor shall perform the work itemized below under this agreement.

Description of Project	Due Date	Estimated Cost	Completion Date	Actual Cost
[itemize projects]				

<USER NOTES FOR PARAGRAPH 3>

<Include paragraph 3 if the total estimated cost of Government MRRI projects to be performed under this agreement exceeds \$2,000 and the holder is a private entity or a state or governmental entity that is contracting with a private entity to perform the Government MRRI projects. Otherwise delete paragraph 3, and re-number the remaining paragraph.>

3. Davis-Bacon Act Requirements. This agreement is subject to the Davis-Bacon Act, 40 U.S.C. 3141 *et seq.*, and its implementing regulations at 29 CFR 5.5. These regulatory requirements are incorporated by reference into this agreement as if fully set forth in this agreement.

4. Documentation of Project Costs. Upon a determination by the Forest Service that a project has been satisfactorily completed by the holder, the holder shall submit documentation of its actual cost to the Forest Service and shall certify, using form FS-2700-4h, Appendix G, that the representations in that documentation are accurate and complete. The certification shall be signed and dated and shall state that failure to sign the certification shall vitiate the fee offset claim. The Forest Service shall verify that documentation before giving any credit against the holder's land use fee and reserves the right not to grant any land use fee offset if any representations in the documentation are inaccurate or incomplete.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotope, American Sign Language, etc.) should contact the State or local Agency or contact USDA through the Telecommunications Relay Service at 711(voice and TTY). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Mail Stop 9410, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

The Privacy Act of 1974 (5 U.S.C. 552a) and the Freedom of Information Act (5 U.S.C. 552) govern the confidentiality to be provided for information received by the Forest Service.

SAMPLE

Potential Government Maintenance, Reconditioning, Renovation or Improvement (MRRI) Projects

Included below are anticipated government maintenance, reconditioning, renovation or improvement projects. Items on this list could be changed, depending on use and condition of facilities, at the discretion of the Authorizing Officer. Note that costs are estimates, and actual costs may vary.

Many of the future projects consist of bringing the sites into compliance with the National Quality Standards for Recreation Site Management, as described in Appendix 19. Projects may be derived from Appendix 3 – Inventory of Government Furnished Property. In addition, anticipate annual replacement of features that become irreparable or damaged. Items on this list could be changed, depending on use and condition of facilities, at the discretion of the Authorizing Officer. Note that costs are estimates and actual costs may vary.

NOTE: This table represents a sample list of potential Granger-Thye Fee Offset projects for facilities in this prospectus. The Forest Service may find a need for higher priority projects and revise this list at any time.

Forest Wide MRRI Project List

Table 1. Potential MRRI Project List – Forest Wide

Item/Project	Quantity	Completion Date
Restrooms Vault Toilets and Showers: • Paint and repair structure rusty areas affected by coastal conditions • Add/Replace public restroom signage to Campgrounds where needed • Repair/Replace all restrooms and showers to functioning levels • Repair/Replace Vault toilets to Forest Service standards where needed • Repair Vault toilet window/doors where needed • Upgrade and replace all pit toilets to Vault toilets where needed	As Needed	5 years
Trash/Food Storage • Install/Replace animal proof trash bins where needed • Install a cement pad for the dumpsters where needed	As Needed	1-2 years
Hazard tree removal beyond 1% where needed	As Needed	All 5 years
Install/Replace Fire Rings and Grills where needed	As Needed	All 5 years

Item/Project	Quantity	Completion Date
Install/Replace/Repair where needed: • Bollard • Curbs • Wheel stops • Barriers	As Needed	All 5 years
Picnic Tables-replace all within a 5-year period	As Needed	5 years
Roads and Trails • Brush beach access trails at trailhead around signage per operating procedure • Stripe parking space lines as needed • Fill in potholes as needed • Repave/Reseal road surfaces where needed within campgrounds • Repair trail damage where needed • Repair Entrance Gates where needed • Install or replace travel management signs such as speed limit signs, accessibility parking signs, etc. where needed • Establish trailhead Parking Area where needed	As Needed	All 5 years
Install/Repair/Replace site markers to Forest Service Standards where needed	As Needed	5 years
Install/Repair/Replace Information Signage and bulletin boards where needed	As Needed	5 years
Replace entrance sign where needed	As Needed	5 years
Water/Septic Systems- • repair water tanks where needed • repair Septic System where needed • redesign water system as needed to comply with Forest Service standards	As Needed	5 years

Site Specific MRRRI Projects:

Monterey Ranger District

Subject: Indirect Cost Reimbursement in Granger-Thye Permits

To: Regional Foresters

Issue. At the request of the National Forest Recreation Association (NFRA) we have evaluated how the Forest Service reimburses the indirect costs of permit holders who perform Granger-Thye (GT) fee offset work. Holders are concerned that forests are inconsistent on whether and how indirect costs are allowed and what documentation is necessary to support a claim for indirect costs.

Background. Under Section 7 of the GT Act, and when authorized by a permit and GT fee offset agreement (GT agreement), the Forest Service offsets all or part of the permit fee paid by campground concessionaires with the cost of Government renovation, reconditioning, improvement, and maintenance performed at the concessionaire's expense on facilities covered by the permit. When the holder performs the work, it is authorized by an attachment to the permit called a GT fee offset agreement. Alternatively, the Forest Service may enter into a collection agreement as authorized by Section 5 of the GT Act to perform work eligible for fee offset under Section 7.

Historical Practice. Typically the field has offset the holder's direct costs for approved offset work, but reimbursement for the holder's indirect costs has varied. Approaches have included limiting indirect costs to a maximum of 5 percent or 10 percent of the fee to be offset, limiting the type of indirect costs to be reimbursed, or reimbursement of a flat overhead rate without documentation. Review of this issue has shown that these methods are not appropriate, because holders should be reimbursed actual costs. There is a misconception among employees and holders that the Forest Service can reimburse a flat indirect cost rate without documentation. There is often disagreement between forests and holders about what costs may be reimbursed.

Comparison. The Office of Management and Budget (OMB) has issued circulars to guide cost reimbursement for several types of business entities, including Circular A-87 for State and Local Governments and Circular A-122 for Non-Profit Organizations. The Federal Acquisition Regulation (FAR) Part 31 guides cost reimbursement for Commercial (For-Profit) Entities. We evaluated how cost reimbursement is conducted in other agency programs. Regulations at 7 CFR 3019.27 were updated in August 2000 to address the determination of allowable costs for grants and agreements in conformance with applicable OMB circulars. FSH 1509.11, Chapter 70, provides that administration of costs in grants and agreements for commercial entities is subject to FAR Part 31, Contract Cost Principles and Procedures. Adopting these cost standards for GT offset will create consistency among the program areas of special uses, contracting, and grants and agreements and conform to OMB guidance.

Conclusion. Offset of indirect costs is appropriate. Indirect costs are a customary charge in contracting and grants and agreements and should be eligible for offset under GT agreements. The following guidance applies to reimbursement of actual costs to commercial entities holding GT permits. The guidance (enclosed) is excerpted from FAR Part 31 and 48 CFR Part 9904 but has been tailored to address GT agreements. A simplified process for small concessions is included at the end of the document. Cost principles for non-profit entities and state or local governmental entities are not addressed. The guidance does not address the reimbursement of agency indirect costs. When the Forest Service performs the work, agency indirect costs will be assessed in accordance with FSH 1509.11, Chapter 33 and indirect cost rates established nationally (e.g., the FY2002 rate is 18 percent).

Implementation.

Before the holder's indirect costs may be offset under a GT agreement, the holder must submit its indirect cost rate and supporting documentation for approval. Determination of an indirect cost rate should comply with the Cost Accounting Standards (CAS) and this guidance. When claiming cost reimbursement, the holder must certify that costs claimed comply with this guidance. Indirect costs based on approved Indirect Cost Allocation Rates (ICAR) should be reimbursed starting with 2002 permit fees. This advice for reimbursement of indirect costs is not retroactive to prior year permit fees.

For New Permits: Applicants must disclose accounting procedures and historic indirect cost allocation rates in response to a prospectus.

For Existing Permits: Holders must submit their ICAR to the authorized officer. Because the ICAR will be the same for all permits held by a specific company, it is recommended that the regional external auditor review and approve the rate. Regional auditors should coordinate the review for companies operating in more than one region.

NATIONAL FOREST
RANGER DISTRICT
PERMIT ID NUMBER

Project Name _____

Holder's Fiscal Year (FY)

Total allowable costs may be offset under a Granger-Thye (GT) fee offset agreement to the extent they do not exceed the total annual fee for this permit. Total allowable costs of a GT project included in this GT claim are the sum of the direct GT project costs and indirect costs allocable to this GT project. Costs submitted under this GT claim shall be documented and determined by the Forest Service to be reasonable, allocable, and determined to be allowable, in accordance with the terms of this permit, the applicable GT fee offset agreement, and applicable Forest Service directives.

Direct GT Costs: Provide claimed GT costs by cost element and attach schedules to show the cost breakdown by cost element. Provide supporting documentation for the cost claim.

Indirect Costs: Indirect costs must be computed based on Forest Service-approved indirect cost rate and may be added to the total direct GT costs. Attach the approved indirect cost rate for FY [].

Approval of the fee offset claim is subject to all provisions in the Annual Granger-Thye Fee Offset Agreement (FS-2700-4h, Appendix B) executed by the U.S. Department of Agriculture, Forest Service, [name] National Forest, and [holder name] on [date of GT fee offset agreement].

Collection Agreement
between
<Name of Holder>
and
<Name> National Forest

Agreement Number: _____

Cooperator Tax ID #: _____

THIS COLLECTION AGREEMENT is made by (name of holder) and the U.S. Department of Agriculture, Forest Service, _____ National Forest (the FS), under Section 5 of the Granger-Thye Act, 16 U.S.C. 572.

WHEREAS, the holder operates a FS campground (or campgrounds) under a special-use permit dated ____;

WHEREAS (SELECT EITHER #1 OR #2) 1) THE HOLDER HAS A REQUESTED THE FS TO PERFORM AND THE FS IS WILLING TO PERFORM UNDER A COLLECTION AGREEMENT OR 2) THE FS IS REQUIRING THAT IT PERFORM UNDER A COLLECTION AGREEMENT, the following projects listed in the fee offset agreement: (List all agreed to and approved projects);

WHEREAS, the cost of those projects may be used to offset the permit fee in accordance with the fee offset agreement;

THEREFORE, in consideration of the above, the parties agree as follows:

A. The holder shall:

1. Make advance payments, in accordance with the permit, in amounts sufficient to cover the total cost of performing the Government maintenance and reconditioning work listed in this agreement, including overhead as determined by the FS up to ____ percent of project costs.
2. Pursuant to the Debt Collection Improvement Act of 1996, as amended by P.L. 104-134, furnish their tax identification number upon execution of this instrument. Cooperator also agrees that notice of the FS's intent to use such number for purposes of collecting and reporting on any delinquent amounts arising out of such person's relationship with the Government, has hereby been given.

B. The FS shall:

1. Deposit payments received from the holder under this agreement into the FS cooperative work fund.
2. Upon receipt of payment from the holder, perform the Government maintenance and reconditioning projects listed in this agreement.
3. Contributions authorized for use by the FS, which are not spent or obligated for project(s) approved under this instrument, will be refunded to the cooperator authorized for use for new projects by the cooperative.

C. It is mutually agreed that:

1. No member of or delegate to Congress or resident commissioner shall receive any benefit that may arise from this agreement; provided, that this provision shall not apply to this agreement if it is made with a corporation for its general benefit.

2. This agreement in no way restricts the FS or the holder from participating in similar activities with other public or private agencies, organizations, or individuals.
3. Any holder contributions made under this agreement do not directly or indirectly convey FS endorsement of the holder's products or activities.
4. Modification of this agreement shall be made by in writing mutual consent of the parties and shall be signed and dated by both parties. The FS is not obligated to fund any modifications that are not made in accordance with this clause.
5. Either party(s), in writing, may terminate the instrument in whole, or in part, at any time before the date of expiration. The FS shall not incur any new obligations for the terminated portion of the instrument after the effective date and shall cancel as many obligations as in possible. Full credit shall be allowed for FS expenses and all non-cancelable obligations properly incurred up to the effective date of termination.
6. Unless terminated by written notice, this agreement shall remain in effect until the end of the initial permit term. If the permit term is extended, this agreement may be extended in writing for the same period as the permit term.
7. Per 16 U.S.C. 572, the United States shall not be liable to the holder or the holder's heirs, assigns, agents, employees, contractors, or lessees for any loss, personal injury, or death occurring in connection with performance of work under this agreement, and the holder on behalf of itself and its heirs, assigns, agents, employees, contractors, and lessees hereby waives any and all claims against the United States for compensation for any loss, personal injury, or death occurring in connection with performance of work under this agreement.

In witness where IN WITNESS WHEREOF, the parties have executed this agreement as of the last date written below.

I: The Business and Experience

1. Purpose and Goals:

- A. What is your purpose in pursuing this business?
- B. Define your business goals for the next year and what you foresee five years from now:

2. Description of the Business:

This section should describe the nature and purpose of the company, background on your industry, and what opportunities you see for your services.

- A. Brief description of the business:
- B. Briefly describe your knowledge of this industry:
- C. List the products and services you will provide:

3. Legal Structure:

There are several ways in which your business can be legally organized.

- A. How your company is legally organized? (Check appropriate box).

Sole Proprietorship

General Partnership

Corporation "C" Corp or "S" Corp Limited Partnership

Limited Liability Company (LLC)

Other

- B. Why is this legal organization most appropriate for your business?

- C. Does your operation require a state registration number? YES NO

(If “Yes”, include a copy of the registration in the Supporting Documents.)

Include any appropriate information, including shareholder or partnership agreements, in the Supporting Documents, and complete the following list of owners:

Table 1. List of owners

Name	Address	Social Security Number (SSN)	Percent Ownership

4. Location of Your Business:

Describe the planned geographical location of the business and discuss the advantages and disadvantages of the site location in terms of wage rates, labor availability, closeness to customers or suppliers, access to transportation, state and local taxes, laws, and utilities.

Describe your approach to overcoming any problems associated with the location.

- A. Planned geographical location:
- B. Discuss advantages or disadvantages of the site location:
- C. Describe your approach to overcoming any problems:

5. Market and Customers:

The purpose of this section is to present sufficient facts to convince the evaluation team that your service has a substantial market and can achieve success in the face of competition. Discuss who the customers are for your service. Where are the major purchasers for the service?

- A. Describe your anticipated target market (e.g., age, income, hobbies, regional, national, international):
- B. Describe the size of the current total market and potential annual growth:
- C. Discuss your advertising campaign in terms of how, when, and where you will advertise, and estimated annual cost:

6. Competitive Analysis:

Make a realistic assessment of the strengths and weaknesses of your competitors. Compare the competing services on the basis of image, location, price, advertising, and other pertinent features. Discuss your key competitors and explain why you think that you can capture a share of their business. Discuss what makes you think it will be easy or difficult to compete with them.

- A. Identify your key competitors:
- B. Discuss their strengths and weaknesses.
- C. Compare your product or service on key areas. For each area of comparison rank yourself and your selected competitors on a scale of 1 (high) to 5 (low). Remember: no ties.

Table 2. Competitive Analysis

Area of Comparison	You	Competitor A	Competitor B	Competitor C	Competitor D
Image					
Location					
Price					
Advertising					
Service					
Uniqueness					
Other					

D. Why do you think you can compete with your competitors and capture a share of the market?

7. Management:

The evaluation team is looking for a committed management team with the proper balance of technical, managerial, and business skills and experience which supports your proposal. Be sure to include complete resumes for each key management member in the Supporting Documents section.

(Use additional pages and attach as necessary)

- A. List owners and key management personnel and their primary duties. If any key individuals will not be onboard at the start of the venture, indicate when they will join the staff.
- B. Discuss any experience when the above people have worked together that indicates how their skills complement each other and result in an effective management team.
- C. List the advisors and consultants that you have selected for your venture. Capable, reputable, and well-known supporting organizations can not only provide significant direct and professional assistance, but also can add to the credibility of your venture.

Accountant _____

Attorney _____

Banker _____

Insurance Broker _____

Advertising _____

Others _____

8. Personnel:

Explain how you plan to recruit, develop, and maintain your workers. List the number of employees you will have, as well as their job titles and required skills. (Use additional pages as necessary)

- A. Identify essential employees, their job titles, and required skills:
- B. Identify the source and your plan to recruit essential employees:
- C. Discuss any training or retraining that you plan for your employees. Also, discuss any necessary first-aid certification or recertification, etc.:

9. Supporting Documents:

Each applicant is required to submit the items listed below.

- Personal resumes of business owners, officers, and partners
- Copies of all pertinent existing permits or licenses applicable to this business (Submit only the face pages of all current concession permits)

II: Financial Resources

1. Capital-Equipment List:

Capital equipment is defined as assets which have useful lives of more than one year. Examples include machines, equipment, vehicles, livestock, tack, gear, and computers. Describe the equipment, the quantity, whether the equipment is new or used (N/U), the expected useful life, and the cost. This includes equipment purchased from existing businesses.

Table 3. Capital Equipment List

Equipment	Quantity	New/Used	Life	Cost
Total Cost of Capital Equipment				\$0.00

2. Start-Up Expenses:

Start-up expenses are the various costs it takes to open your doors for business:

Table 4. Start-Up Expenses

Item	Cost
Total cost of capital equipment	
Beginning inventory of operating supplies	
Legal fees	
Accounting fees	
Other professional fees	
Licenses and permits	
Remodeling and repair work	
Deposits (public utilities, etc.)	
Advertising	
Insurance	
Bonds	
Advance permit fees	
Other expenses:	

Item	Cost
Total Start-Up Expenses	\$

3. Sources and Uses of Financing:

A. Sources of Financing:

Table 5. Sources of Financing

Item	Cost
Investment of cash by owners	
Investment of cash by shareholders	
Investment of non-cash assets by owners	
Investment of non-cash assets by shareholders	
Bank loans to business: short term (one year or less)	
Bank loans to business: long term (more than one year)	
Bank loans secured by personal assets	
Small Business Administration loans	
Other sources of financing (specify)	
Total Sources of Financing	\$

B. Uses of Financing

Table 6. Uses of Financing

Item	Cost
Buildings	
Equipment	
Initial inventory	
Working capital to pay operation expenses	
Noncash assets contributed by owners (use same amount as in Sources, above)	
Other assets (specify)	

Item	Cost
Total Uses of Financing	\$

C. Monthly Cash Flow Projection:

The cash flow projection is the most important financial planning tool available to you. The cash flow projection attempts to budget the cash needs of a business and shows how cash will flow in and out of the business over a stated period of time. A cash flow deals only with actual cash transactions. Depreciation, a noncash expense, does not appear on a cash flow. Loan repayments (including interest), on the other hand, do, since they represent a cash disbursement.

NOTE: The Cash Flow Projection chart on the following page is required to be completed and submitted in the existing format (date range can be modified).

Table 7. Cash Flow Projection (or Cash Flow Budget) by Month: Year One

	A	B	C	D	E	F	G	H	I	J	K	L	M	N

41	+ Cash Receipts													
42	-Cash Disbursements													
43	Total = New Balance													

D. Start-Up Balance Sheet:

Balance sheets are designed to show how the assets, liabilities, and net worth of a company are distributed at a given point in time.

NOTE: The following Start-up Balance Sheet is required to be completed and submitted in the existing format.

Table 8. Start-Up Balance Sheet

Item	Cost
Assets:	
Current Assets	\$
Fixed Assets	\$
Less Accumulated Depreciation	\$

Current Liabilities	\$
Long-Term Liabilities	\$
Total Liabilities	\$
Net Worth or Owner's Equity (Total assets minus total Liabilities)	\$
Total Liabilities and Net Worth	
<i>Footnotes:</i>	

E. Start-Up Income Statement Projection:

Income Statements (also called Profit and Loss Statements) complement balance sheets. The income statement provides a moving picture of the company during a particular period of time. For most businesses (and for most bankers), income projections covering one to three years are more than adequate.

If you are in a start-up situation, look for financial-statement information and income ratios for businesses similar to yours. The Robert Morris Associates' Annual Statement Studies and trade association publications are two possible sources.

NOTE: The following Income Projection Statement is required to be completed and submitted in the existing format (date range can be modified).

Table 9. Income Projection by Month: Year One

4. Historical Financial Reports for Existing Business

Each applicant is required to submit all items listed below.

- FS-6500-24
- Tax returns (past three years)
- Current credit report from major credit bureau

5. Supporting Information

Each applicant is required to submit the items listed below, if applicable.

- Financial statements of business owners, officers, and partners
- Bank or investor letters of intent to finance project

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0596-0082. Response to this collection of information is mandatory. The authority to collect the information is the Organic Administration Act, 16 U.S.C. 551. The time required to complete this information collection is estimated to average 8 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the State or local Agency or contact USDA through the Telecommunications Relay Service at 711(voice and TTY). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Mail Stop 9410, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

The Privacy Act of 1974 (5 U.S.C. 552a) and the Freedom of Information Act (5 U.S.C. 552) govern the confidentiality to be provided for information received by the Forest Service.

National Quality Standards for Recreation Site Management and Best Management Practices (Formerly known as Meaningful Measures Standards)

National Quality Standards for developed sites have been established for the Key Measures: Health and Cleanliness, Safety and Security, Condition of Facilities, Responsiveness, Resource Setting. Critical National Standards are identified with an asterisk (*). If not met, the resulting conditions pose a high probability of immediate or permanent loss to people or property.

Key Measure: HEALTH AND CLEANLINESS

- *Visitors are not exposed to human waste.
- *Water, wastewater, and sewage treatment systems meet federal, state and local water quality regulations.
- Garbage does not exceed the capacity of garbage containers.
- Individual units and common areas are free of litter including domestic animal waste.
- Facilities are free of graffiti.
- Restrooms and garbage locations are free of objectionable odor.
- Constructed features are clean.

Key Measure: RESOURCE SETTING

- *Effects from recreation use do not conflict with environmental laws (such as ESA, NHPA, Clean Water, TES, etc).
- Recreation opportunities, site development, and site management are consistent with Recreation management system (ROS, SMS, BBM) objectives, development scale, and the Forest land management plan.
- Landscape character at the developed recreation site is consistent with the Forest scenic integrity objectives.
- Visitors and vehicles do not exceed site capacity.

Key Measure: SAFETY AND SECURITY

- *High-risk conditions do not exist in developed recreation sites.
- *Utility inspections meet federal, state, and local requirements.
- Laws, regulations and special orders are enforced.
- Visitors are provided a sense of security

Key Measure: RESPONSIVENESS

- *When signed as accessible, constructed features meet current accessibility guidelines.

- Visitors feel welcome.
- Information boards are posted in a user-friendly and professional manner.
- Visitors are provided opportunities to communicate satisfactions (needs, expectations).
- Visitor information facilities are staffed appropriately during seasons of use and current information is available.
- Recreation site information is accurate and available from a variety of sources and outlets.

Key Measure: CONDITIONS OF FACILITIES

- Constructed features are serviceable and in good repair throughout the designed service life.
- Constructed features in disrepair due to lack of scheduled maintenance, or in non-compliance with safety codes (e.g. life safety, OSHA, environmental, etc.) or other regulatory requirements (ABA/ADA, etc.), or beyond the designed service life, are repaired, rehabilitated, replaced, or decommissioned.
- New, altered, or expanded constructed features meet FS design standards and are consistent with an approved site development plan, including an accessibility transition plan.

Public Service Maintenance Standards

The following standards should be met in sites offering services to the public. These standards are necessary to ensure a pleasant recreation experience for the visitor.

Toilets, showers, and dressing areas

- Toilet bowls, risers, seats, seat covers, and urinals free of deposits on surfaces
- Building interiors free of dirt, trash, graffiti, insects (dead and alive), and spider webs
- Floors free of standing water
- Chromeware clean and bright
- Toilet paper, towels, and seat covers (where provided), stocked to last until next day and/or cleaning
- Unpleasant odors (both sewage and chemical) minimized
- All restroom buildings and individual toilet units will be fully open and accessible during the entire operating season to accommodate public service needs.

Toilets and other buildings (exterior)

- Walkways and trails clean and clear of obstructions for public safety and accommodating people with disabilities
- Floor mats clean
- Exterior walls free of graffiti
- Roof generally free of leaves and branches
- Eaves free of wasp nests, bird nests, and spider webs

Toilet vaults

- Vaults not more than three-fourths full
- During pumping, the vaults should be cleaned as thoroughly as possible to help prevent the production of odors.

Tables and benches

- Tops and seats free of dirt, grease, and large carvings
- Under portion free of spider webs, etc.
- Tops, seats, and legs secure and functional

Fireplaces, char-grills, fire rings, and stoves

- No more than half-full of ashes
- All ashes and partially burned wood confined to fireplace or grill
- Grill surface free of grease and food particles at time of ash removal Pedestals and bases straight and secure, and components functional Leftover firewood stacked beside unit.

Garbage cans and depositories

- Plastic liner half-full or less
- Cans clean on the outside; all litter and debris picked up around cans or container

Hand-pumps, fountains, and hydrants

- All units free of grease or residue
- All units secure and drip-free
- Catch basins (drains) free of food particles, soaps, grease, debris, standing water, and functioning properly

Site Fees	39

The following appendix provides descriptions for each developed recreation site included in this prospectus.

Each description includes the number and type of sites available at each facility, current fees, minimum operating season, status in the Rec.gov reservation system, maximum occupancy if group use site, the number of parking spaces if day use or group use site, if host is required to be on site during minimum operating season, general type of host utilities and other useful facility information. Unless otherwise specified, capacity information listed in this prospectus is based on the legal number of persons and vehicles allowed in each camp site. Refer to Appendix 4 - Applicable Forest Orders for information on capacity limits.

Maps for each of these locations can be found in Appendix 2 - Maps of Developed Recreation Sites. Appendix 3 - Inventory of Government Furnished Property provides more detailed and complete site information pertaining to each of these facilities. Use all descriptions, maps, and tables together for the most comprehensive overview of the area and specific site properties. Prospective bidders are also strongly encouraged to visit sites listed in this document to further their understanding of each setting.

Every attempt has been made to make this information and that found in the Appendices as accurate as possible. However, it is possible that some errors exist. If any errors are discovered, a correction will be made available.

Description of Developed Recreation sites

Monterey Ranger District

Arroyo Seco Recreation Area

The Arroyo Seco Recreation Area is located approximately 20 miles west of Greenfield, CA off of US Highway 101 in Monterey County. To get there from the north, take Arroyo Seco Road exit (#301) off southbound US Highway 101 and travel west. To get there from the south, take the first Greenfield exit (#293) off northbound Highway 101, turn left at the second light at Elm Avenue, and travel west. The road ends at the campground. The area is made up of steep, rugged terrain with chaparral and a mixture of oak and sycamore trees. The campground sits at approximately 900 feet elevation.

The main attractions in the area are the Arroyo Seco River which runs past the campground, Abbott Lakes, and the Arroyo Seco Gorge and other adjacent hiking areas in the Ventana Wilderness. Upper Abbott Lakes is not open to swimming, but is a popular fishing area, with largemouth bass and blue gill. Lower Abbott Lakes is currently empty, but a medium- to long-term project is currently being planned to restore these lakes and install additional recreation facilities around them. If this is completed during the permit cycle, the applicant is expected to manage these additional facilities. Just southwest of the recreation area is an area along the river known as the Gorge. This very popular but primitive area, which is managed by the Forest Service offers dispersed recreation in a deep canyon gorge with the river running through it. Visitors must drive through the recreation area to reach the Gorge parking lot and will be allowed to do so without being assessed a fee at the entrance kiosk.

The Forest Service has a cooperative agreement with the Monterey County Sheriff's Office for the provision of law enforcement services. In addition, the California Highway Patrol actively assists in the Arroyo Seco Recreation Area with law enforcement services within their mission of highway safety. When conditions such as traffic congestion occur in the Arroyo Seco Recreation Area that may affect safe driving conditions or impede the access of emergency and law enforcement vehicles, the Sheriff's Department, Highway Patrol, or Forest Service may set up temporary road closures.

Applicants are encouraged to read and understand Appendix 7 and enter into agreements with the appropriate law enforcement agency(s) for additional law enforcement support for visitor compliance at high use recreation sites. This support would be beyond that needed for routine visitor compliance needs normally met by campground hosts and managers. The applicant would provide funding for additional law enforcement support from either the local county sheriff offices, California State Parks, California Highway Patrol, or the Forest Service. This agreement would increase law enforcement assistance to the concessionaire during holidays and high use periods.

Drinking water is provided. See further information in Section I. F. Utilities and Waste Management. Both the family campground and the group site have sites that are available for reservations through Rec.gov. The recreation area is open year-round.

A full-time caretaker-manager will be required at this location to oversee all operations. Sites #1, #2 and #6 in the Forest Service Administrative site can be made available for the concessionaire. The concessionaire will be entered into the Forest Service system and charged the current monthly rate for

each occupied trailer pad. The host site offers electricity, water and sewer. A propane tank is available for use, but the concessionaire will need to supply the propane.

This recreation area includes the family campground, group site and day use area.

Arroyo Seco Family Campground

The campground has 47 sites, of which 33 are modern and 14 are primitive.

In the modern camping area, each site includes a picnic table, fire ring and a pedestal grill. There are 30 paved parking spurs. Three of the sites are walk-in sites; nine of the sites are double sites. There are two flush toilet buildings with four toilets and two showers per building.

In the primitive camping area, each site includes a picnic table, fire ring, and pedestal grill. All sites are designated for tents only. There is one double site. There are two vault toilet buildings each with two seats for a total of four seats.

Arroyo Seco Group Campground

The group campground is located between Upper and Lower Abbott Lakes. It has one group site that can accommodate up to 50 people and 10 vehicles. The site has four picnic tables, two food preparation tables, two large barbeque grills and one fire ring.

There is one large parking area with a gravel surface. There are two vault toilet buildings with two seats each, for a total of four seats.

Arroyo Seco Day Use Area

The Arroyo Seco Day Use Area has a capacity limit that is currently set at 105 single cars. Amenities include picnic tables, fire rings and pedestal grills and three large shade structures near the river.

There are two flush toilet buildings with a total of 11 seats. Drinking water is provided by a well which serves the family campground, group site and the day use area, along with the Forest Service facilities.

It is highly recommended, for smooth operations, to staff the kiosk at a minimum on weekends from November to April. The remainder of the year, the kiosk should be staffed daily during all business hours.

Prospective bidders are encouraged to develop proposals demonstrating management and fee collection opportunities for managed parking, such as, an entrance station. Any on-site hosts should be able to speak Spanish as well as English to maximize opportunities for providing users with information about area attractions, as well as regulations.

Bottcher's Gap Campground

Bottcher's Gap Campground is located approximately 19 miles south of Carmel in Monterey County. To get there, take Palo Colorado Road (18S05) east from Highway 1 and follow it to the end of the road.

The campground has 12 sites, each with a picnic table, fire ring and pedestal grill. There is one two-seat vault toilet building.

There is no water available at this site. There is one centralized, paved parking area that is used for the campsites and day use parking. The majority of campsites are walk-in only.

This campground is currently closed due to damage on county-maintained Palo Colorado Road, but if it is to open during the next permit cycle, a full-time caretaker-manager will be required at this campground from Memorial Day weekend through Labor Day weekend. One camp site is available for concessionaire use with water and a propane tank although propane is not provided.

Kirk Creek Campground

Kirk Creek Campground is located in Monterey County approximately 35 miles south of the community of Big Sur. This oceanside campground is located just off Highway 1 and approximately 5 miles north of Plaskett Creek Campground. The campground is located on a bluff overlooking the Pacific Ocean, at an elevation of about 100 feet. It offers fantastic views of the Big Sur coastline. Campsites are spacious, open and grassy. Each site has a view of the ocean, where sunsets are outstanding.

This campground has 34 sites, 32 are single sites, one is a double site, and one accommodates five bicycle/hiker groups. Each site has a picnic table, fire ring and pedestal grill. There are 32 paved parking spurs suitable for car and trailer.

There is no water available at the campground. There are two double-seat vault toilet buildings for a total of four seats.

A full-time caretaker-manager will be required at this campground. One camp site is available for concessionaire use with water, propane tank and septic hookups. Concessionaire will need to provide propane.

Most sites are currently being offered for reservation through Rec.gov.

Plaskett Creek Family and Group Campground

Plaskett Creek Campground is located on Highway 1, approximately 40 miles south of Monterey and 30 miles north of San Simeon in Monterey County. The campground has a park-like setting, under a scattered canopy of mature Monterey pine and cypress trees. Cedar trees provide a fragrant aroma. All sites are grassy. Plaskett Creek Campground is just a short distance from Sand Dollar Beach, one of the largest and most popular beaches in central California.

The campground has 44 sites each with a picnic table, fire ring and pedestal grill. Two of the sites are designated for bicycle/hiker use and one site is a double site. There are three group sites that can accommodate up to 40 people and 10 vehicles each. Group sites are equipped with picnic tables, barbecues and pedestal grills. Each group site has a centralized paved parking area.

Two flush toilet buildings are provided, each with two seats, for a total of four seats. In the group sites, there are two vault toilet buildings with two seats each, for a total of four seats.

Drinking water is provided. See further information in Section I. F. Utilities and Waste Management.

The campground is operated year-round. Most sites are currently being offered for reservation through Rec.gov. Concessionaire may use the group sites as individual sites when not reserved for a group.

A full-time caretaker-manager will be required at this campground. One camp site (#9) is available for concessionaire use with water, propane tank and sewage hookups. Concessionaire will need to provide propane. In addition, sites #1 through #5 in the Forest Service administrative area can be made available for employee housing. The concessionaire will be entered into the Forest Service quarters management system and be charged the current monthly rate for each trailer pad occupied.

Mill Creek Day Use Area

Mill Creek Day Use Area is located in Monterey County approximately 36 miles south of Big Sur and 37 miles north of San Simeon along Highway 1. The day use area is situated on a plateau overlooking the Pacific Ocean and provides beach access.

The site has two picnic tables and two pedestal grills. There are six single car paved spurs. The site includes two single-seat vault toilet buildings. Water is not available at this site.

The site is operated year-round. This is a day use site; no overnight use is allowed.

Pfeiffer Beach Day Use Area

Pfeiffer Beach Day Use Area is in Monterey County, near Big Sur and is located at the end of Sycamore Canyon Road, approximately two miles west of Highway 1.

This site has a capacity limit of 75 vehicles. There is one vault toilet building with four seats. No water is available. There is a kiosk building used for controlling access to the site.

The site is operated year-round, and the operating hours are from sunrise to sunset. This is a day use area; no overnight use is allowed. A daily fee is charged at this site.

This site is very popular, reaching or exceeding capacity on most days during the busy season. The busy season, dependent upon weather, runs from approximately mid-March to approximately mid-October of each year. Pfeiffer Beach and Sycamore Canyon Road have been experiencing unprecedented levels of visitation, creating periodic traffic gridlock at the Highway 1/Sycamore Canyon Road intersection and along Sycamore Canyon Road. To operate the Pfeiffer Beach Day Use Area smoothly during the busy season, a minimum of four staff will be needed during peak times, which includes most weekends and all holiday periods, as well as a majority of the weeks during the busy season as outlined above.

The operation at peak times will consist of two staff who will collect fees and monitor the parking area, with the other two staff working the turn-around lane at the top of Sycamore Canyon Road. As the lot nears capacity, leaving approximately 20 available parking spots, the staff at the top of the road will control the flow of traffic, turning around all vehicles until there are a reasonable number of parking spaces available to accommodate more visitors. Also at this time, the staff at the top of Sycamore Canyon Road will open the *Pfeiffer Beach Closed* sandwich board signs located along Highway 1. No more than five vehicles will be backed up at the kiosk at one time. Staff at the top of the road will be in immediate communication with those operating the kiosk. Communication (radio, satellite phone, internet phone, etc.) between the kiosk and the turn-around lane at the top of Sycamore Canyon Road near Highway 1

will be the responsibility of the concessionaire, as will be the dissemination of up-to-date traffic conditions information to the visitor center at the nearby multi-agency facility.

During certain holiday periods (Easter Break, Memorial Day weekend, July 4th, Independence Day weekend, Labor Day weekend, Thanksgiving, December holiday period) electronic changeable message signs (CMS) will be utilized in lieu of the sandwich board signs and will be the sole responsibility of the permittee to acquire and implement, including all required permits from Caltrans.

Applicants are encouraged to read and understand Appendix 7 and enter into agreements with the appropriate law enforcement agency(s) for additional law enforcement support for visitor compliance at high use recreation sites. This support would be beyond that needed for routine visitor compliance needs normally met by campground hosts and managers. The applicant would provide funding for additional law enforcement support from either the local county sheriff offices, California State Parks, California Highway Patrol, or the Forest Service. This agreement would increase law enforcement assistance to the concessionaire during holidays and high use periods.

There are no permitted weddings or film activities during the busy season from March 15 to October 15 of each year.

Pfeiffer Beach Day Use Area Access Management

Plan and install infrastructure and establish procedures necessary to successfully operate this facility as a day use site:

- Daily gate management to enforce operating periods (sunrise to sunset) and deter overnight camping and use of facility outside of designated operating hours along with associated illegal campfire use.
- Installation of tire rippers or spikes on the exit lane to allow exit but not entry when the gate is closed after hours.
- Installation of permanent Changeable Message Sign (CMS) on Highway 1 near its intersection with Sycamore Canyon Road to inform visitors of open/closed status.
- Develop plan to re-engineer the wash where Sycamore Creek crosses Sycamore Canyon Road in route to the beach to reduce or eliminate weather-related road closures.

Identify and install signage consistent with these management objectives. Examples include;

- Facility operating hours (sunrise to sunset).
- No Parking
- Do Not Block Gate
- Tow Away Zone

Visitor/Traffic Volume Management

Applicants are requested to provide management actions and/or proposals to more effectively manage the increasing visitor volume and associated traffic issues. Examples include, but are not limited to;

- A permit system, where reservations are needed to access Pfeiffer Beach.
- A shuttle system, whereby visitors park offsite and are shuttled to Pfeiffer Beach.
- Funding of additional agency law enforcement support to manage traffic during peak visitor use periods and to assist in recreation site management.

Sand Dollar Day Use Area

Sand Dollar Day Use Area is located in Monterey County approximately 40 miles south of Big Sur, and 35 miles north of San Simeon along Highway 1. This day use area provides access to Sand Dollar Beach, one of the largest and most popular beaches in central California.

The site has a capacity limit of 45 vehicles. There are picnic tables and pedestal grills available. There is one vault toilet building with two seats. No water is available.

The site is operated year-round. This is a day use site; no overnight use is allowed. A daily fee is charged at this site.

Willow Creek Day Use Area

Willow Creek Day Use Area is located in Monterey County approximately 45 miles south of Big Sur, and 30 miles north of San Simeon along Highway 1. This site offers beautiful ocean views.

This site has capacity for approximately 12 vehicles. There is one picnic table and one fire ring. There are two single-seat vault toilet buildings. No water is available.

The site is operated year-round. This is a day use site; no overnight use is allowed.

Santa Lucia Ranger District

Cerro Alto Campground

Cerro Alto Campground is located in San Luis Obispo County, approximately eight miles east of Morro Bay, CA on State Highway 41. The campground sits at 1,000 feet elevation in a verdant canyon astride a seasonal creek. Visitors have easy access to stores, beaches, and ocean fishing in Morro Bay. Highway 41 is a main access route for travelers and visitors from the Central Valley to access the Central Coast.

Most visitor use occurs from June 15 to Labor Day. Visitors enjoy camping, hiking, mountain biking and horseback riding opportunities. Cerro Alto Peak (2,624') is a prime destination with its 360° view encompassing the Central California Coast and Inland Valley. The Cerro Alto Trail, which leads to the peak, begins within the campground. Trailhead parking for the Cerro Alto Trail is available in front of the campground and behind the campground. The parking areas are also used for overflow parking for self-contained vehicles. The concessionaire is expected to take care of the trailhead.

The campground has 22 single family camping units equipped with picnic tables and fire rings with grills. Twelve of these sites are handicapped accessible. Fourteen sites have paved parking spurs large enough for vehicle or RV parking, while eight sites are walk-in sites with a central parking area.

The interior campground roads and parking spurs are paved, although the road is narrow, winding and single lane with turnouts.

Drinking water is provided. See further information in Section I. F. Utilities and Waste Management.

There are five accessible, single-seat vault toilets (CXT). There is an amphitheater that seats approximately 40 people within the campground. There are no RV hookups.

There is a 408 square foot cabin that is used as a host site. It is equipped with storage, phone hookups, electricity, septic system, and water. At a minimum, the Forest Service will expect the permit holder to operate all sites year-round at Cerro Alto Campground, with a campground host on site.

A trash dumpster is located in the campground for garbage collection and disposal. In addition, there are five small trash cans that are spread throughout the campground.

This campground has sites that are available for reservations through Rec.gov

Overnight and day use fees may be charged in the campground and in the two associated trailhead parking areas.

Davy Brown Campground

Davy Brown Campground is located 26 miles northeast of Highway 154 on Happy Canyon Road in Santa Barbara County. Access to the facility is via mostly paved roads, however Happy Canyon Road is not recommended for large motorhomes and trailers. Davy Brown Campground can also be reached by a less direct and longer route via the Figueroa Mountain Road. The closest community is Los Olivos, CA, located approximately 45 minutes southwest of the campground. The campground sits at approximately 2,100 feet elevation, in a valley with Davy Brown Creek flowing year-round through the campground. Surrounding vegetation includes chaparral with oak and pine trees. As of March 1, 2013, fishing is not allowed in Davy Brown Creek.

Most recreation use occurs in the spring and summer, but the best time to visit is spring and winter. Weekend visitors come to hike, camp, and see the famous wildflowers on Figueroa Mountain. The Davy Brown Trail begins within the campground and leads to the top of Figueroa Mountain Road. Davy Brown Campground is approximately 2 miles west of Nira Campground.

The campground has 13 sites, each with a picnic table, a fire ring with grill, and in some units, an additional pedestal grill. There is one two-seat vault toilet and one single-seat vault toilet, for a total of three seats.

The interior road and spurs are paved. There is no water available in the campground. One trash dumpster is located in the campground.

Figueroa Campground

Figueroa Campground is located approximately 13 miles northeast of Highway 154 on the Figueroa Mountain Road, within Santa Barbara County. Figueroa Mountain Road is paved although it is not recommended for large motorhomes and trailers. The road is occasionally closed in the winter due to ice and rockslides. The campground sits at approximately 3,500 feet elevation, in a forest of ponderosa pine and large manzanita.

Most recreation use occurs in the spring and summer, but the best time to visit is spring and winter. Weekend visitors come to hike, camp, and see the famous wildflowers on Figueroa Mountain.

The campground has 33 sites each with a picnic table, a fire ring with grill, and in some units, an additional pedestal grill. There are four two-seat vault toilet buildings for a total of eight seats.

There is no water available in the campground. One large trash dumpster is located at the front of the campground at the first campsite. There is an opportunity to move the dumpster and have this first campsite as the host site. Currently, campground has fire damage that needs to be addressed.

Nira Campground

Nira Campground is located 28 miles northeast of Highway 154 on Happy Canyon Road in Santa Barbara County. Access to the facility is via mostly paved roads, however Happy Canyon Road is not recommended for large motorhomes and trailers. Nira Campground can also be reached by a less direct and longer route via the Figueroa Mountain Road. The closest community is Los Olivos, CA, located approximately 45 minutes southwest of the campground. The campground sits at approximately 1,875 feet elevation, in a valley with Manzana and Davy Brown Creeks flowing year-round through the campground. Surrounding vegetation includes chaparral with oak and pine trees.

Most recreation use occurs in the spring and summer, but the best time to visit is spring and winter. Within the campground, the Upper Manzana Trailhead provides parking for users accessing the San Rafael Wilderness. The Upper Manzana Trailhead parking reaches near full capacity on weekends in spring and early summer and exceeds capacity on holiday weekends. The concessionaire is expected to take care of the trailhead. There are 5 horse ties available in the campground as well as handicap-accessible parking. Nira Campground is approximately 2 miles east of Davy Brown Campground.

The campground has 12 sites each with a picnic table, a fire ring with grill, and in some units, an additional pedestal grill. There is one, two-seat vault toilet building. The interior road and spurs are not paved. There is no water available in the campground.

One trash dumpster is located at Lower Manzana Trailhead, less than 2 miles from the campground, which campers use as they enter or exit the facility. There is an opportunity to move the dumpster within the campground.

La Panza Campground

La Panza Campground is located in San Luis Obispo County, approximately 35 miles east of Santa Margarita. Access is via State Highway 58 and Forest Service Road 29S01. The campground sits at approximately 2,160 feet surrounded by large oak trees and private property. An intermittent creek that only flows during wet weather is adjacent to the campground. Most visitor use occurs in the spring, fall

or winter when temperatures are mild. This area is well known for its difficult OHV trails which accommodate motorcycles, ATVs, and 4x4s.

The campground has seven single family camping sites, each with a picnic table, fire ring and pedestal grill. Each site has a parking spur that will accommodate smaller RVs (less than 20 feet).

There are currently two separate single-seat SST toilet buildings in the campground. Drinking water is not available. The campground is operated under a “Pack In-Pack Out” system where visitors are expected to haul their trash out of the area when they leave.

The trailheads for Queen Bee and La Panza Bypass ATV trails are nearby. The campground is relatively close to the Machesna Mountain Wilderness, which many hikers use during the cooler fall and spring months.

Navajo Flat Campground and OHV Staging Area

Navajo Flat Campground is located in San Luis Obispo County, approximately 35 miles east of Santa Margarita. Access is via State Highway 58 and Forest Service road 29S15. The campground sits at approximately 1,920 feet in an open area surrounded by private property. McGinnis Creek, which flows intermittently during the wet season, is adjacent to the campground. Most visitor use occurs in the spring, fall or winter when temperatures are mild. This area is well known for its difficult OHV trails which accommodate motorcycles, ATVs, and 4x4s. McGinnis Creek ATV Trail is located within the campground and connects to the nearby, extensive OHV trail system.

The campground has five double camping units and one single camping unit, each with accessible picnic table, fire ring, pedestal grill and shade structure. Five of the sites have parking spots parallel to the site. The large parking lot provides parking spurs large enough for 35 vehicles with trailers or RV parking.

One single vault toilet building is available. There is one small trash can at the campground. Drinking water is not available.

A beginner’s riding area is located in the campground. A width limiter is located at the entrance to keep large vehicles from entering. This site is used for annual motorcycle events during the year. Hundreds of people park and stage their vehicles to use the OHV trail system during these events.

Turkey Flat OHV Staging Area and Day Use Area

Turkey Flat Staging Area is located in San Luis Obispo County, off of US Highway 58 on Pozo Road. It is one mile from the Pozo Fire Station and is accessed via paved roads. The staging area sits at approximately 1,985 feet in an open area surrounded by oak trees and private property. Most visitor use occurs in the spring, fall or winter when temperatures are mild. This area is well known for its difficult OHV trails which accommodate motorcycles, ATVs, and 4x4s. Powerline 4x4 trail is located adjacent to the staging area and connects to the rest of the OHV trail system.

The staging area has two day use sites with picnic tables. This site is also used for dispersed camping. Although there are no designated camp sites at Turkey Flat Staging Area, trailers and 5th wheels are used by recreationists to camp and stage their OHVs.

There is one, double-seat vault toilet building and one small trash can. Drinking water is not available. Campfires are not allowed at the staging area.

This site is used for annual motorcycle events during the year. Hundreds of people park and stage their vehicles to use the OHV trail system during these events. A small fenced off riding area is north of the staging area to allow for beginner riders and children to practice away from the rest of the traffic in the area.

Santa Barbara Ranger District

Lower Santa Ynez Recreation Area

The Lower Santa Ynez Recreation Area (LSYRA) is located 18 miles from Santa Barbara, CA in Santa Barbara County. Access to the area is by State Highway 154 and a paved county road. The Santa Ynez River is the longest stretch of free-flowing river in southern California, and the recreation area provides a good place to enjoy the river. The LSYRA provides a unique oak-lined river ecosystem with surrounding vegetation made up of oak woodland/mixed chaparral that sits at approximately 2,000 feet elevation.

The Los Padres National Forest Land Management Plan incorporates the Santa Ynez Plan that sets capacity limits for the LSYRA. The current established capacity for day-use is 450 vehicles per day for the area and 325 vehicles past the First Crossing River ford. Use is extremely heavy during spring and summer holidays and weekends with visitor numbers reaching the capacity of the recreation facilities on a regular basis. The capacity may be reduced when portions of the area are closed due to river flows in accordance with the District Gate Plan.

Applicants are encouraged to read and understand Appendix 8 and enter into agreements with the appropriate law enforcement agency(s) for additional law enforcement support for visitor compliance at high use recreation sites. This support would be beyond that needed for routine visitor compliance needs normally met by campground hosts and managers. The applicant would provide funding for additional law enforcement support from either the local county sheriff offices, California State Parks, California Highway Patrol, or the Forest Service. This agreement would increase law enforcement assistance to the concessionaire during holidays and high use periods.

High river flows and winter rains generally result in seasonal closure of the river crossings. During these periods, motorized vehicles are not allowed past the first river ford. Walk in, equestrian, and bicycle use is still allowed up the river and results in visitor use of the recreation facilities past the river closures. During the winter season, two campgrounds and two day use sites west of the first river crossing are normally kept open for public use.

Applicants are required to develop proposals demonstrating parking, traffic, and visitor management for the LSYRA. Proposals shall include daily gate management to enforce operating periods and deter overnight camping and use of facilities outside of designated operating hours along with illegal campfire use, the installation of signage consistent with management objectives, and/or the installation of tire rippers or spikes on exit lanes to allow exit but not entry when gates are closed after hours. Any required on-site hosts or staff should be able to speak Spanish as well as English to maximize opportunities for providing users with information about regulations.

Applicants must propose a system for collecting day use fees within the LSYRA as well as a day use fee rate. The fee collection proposal should address what type of day use fee will be utilized, the cost of the fee, as well as where and how the day use fee will be collected.

One kiosk is currently located in the LSYRA at First Crossing Day-Use Area to assist with managing use. Typically, the kiosk is staffed seven days/week, 9:00am to 6:00pm, from April to November, and three days/week (Friday, Saturday, and Sunday), 8:00am to 5:00pm, from November to April. Currently there are no utilities (phone or power) at the kiosk locations.

First Crossing Kiosk

To run efficiently, it is highly recommended two to three employees staff the kiosk at the First Crossing kiosk during peak times on Saturday, Sunday and summer holidays because of the large numbers of vehicles entering the LSYRA. The concessionaire is responsible for tracking the number of vehicles past the kiosk each day. During peak holidays and weekends, the visitor vehicle capacity beyond the kiosk may hit the 325-vehicle maximum. Employees at the kiosk will then inform visitors the area has reached capacity and turn away arriving vehicles. No more than 10 vehicles can be backed up at the kiosk at one time. During peak traffic flow periods, two employees, one on each side of the crossing, are required to control vehicles traversing the river ford at first crossing. The concrete crossing is one lane wide with a turn located in the center of the riverbed. Therefore, vehicles entering the crossing traffic must be controlled from both sides during peak period traffic flow to prevent traffic backing up.

Currently the Forest Service owns and provides all the garbage dumpsters in the LSYRA. The concessionaire will be responsible for any additional or replacement dumpsters. The concessionaire is responsible for providing a litter free environment within the site boundaries.

The LSYRA is a long narrow canyon with one public road for ingress and egress. In response to potential emergencies such as fires or floods, applicants must include in the proposed operating plan details for a coordinated evacuation plan with the Forest Service.

Drinking water is provided at some sites. See further information in Section I. F. Utilities and Waste Management.

The following sites are located within the Lower Santa Ynez Recreation Area.

Fremont Campground

Fremont Campground has 15 single-family camping sites each equipped with a picnic table and a fire ring with grill. There is one flush toilet building with a total of four seats. Interior roads are paved.

One camp site is available for concessionaire use. Water, electricity and phone hookups are available along with a 1,000-gallon septic tank and associated leach field at the host site.

Water is provided by the centralized Forest Service system and piped to the campground. The concessionaire will be responsible for maintenance of the water system from the main distribution line and throughout the campground.

An area for overflow parking is provided on the north side of Paradise Road across from the campground

Los Prietos Campground

Los Prietos Campground has 36 single-family camp sites each equipped with a picnic table, pedestal grill and fire ring. There are four flush toilet buildings; one with four seats and three with two seats each for a total of 10 seats.

One camp site is available for concessionaire use. Water, electricity and phone hookups are available along with a 1,000-gallon septic tank and associated leach field at the host site.

Water is provided by the centralized Forest Service system and piped to the campground. The concessionaire will be responsible for maintenance of the water system from the main distribution line and throughout the campground.

Paradise Campground

Paradise Campground has 15 camping sites, two of which are double sites. Each site has a picnic table, pedestal grill, and fire ring. There is one flush toilet building with a total of four seats.

One camp site is available for concessionaire use. Water, electricity and phone hookups are available along with a 1,000-gallon septic tank and associated leach field at the host site.

Water is provided by the centralized Forest Service system and piped to the campground. The concessionaire will be responsible for maintenance of the water system from the main distribution line and throughout the campground.

The campground has an overflow area containing 10 wood picnic tables, 10 fire rings and one group BBQ, which the Forest Service reserves the rights to use for administrative purposes or functions after appropriate coordination with the concessionaire.

Sage Hill Group Campground

Sage Hill Group Campground has four group sites that can accommodate up to 50 people each. There is an additional site exclusively for equestrian use with 12 corrals, hitching posts and an extra-large parking area to accommodate horse trailers. The equestrian site can accommodate up to 60 people. Each of the five sites have picnic tables, a BBQ grill, and fire rings. There are six flush toilet buildings with a total of 14 seats. All interior roads are paved.

One camp site is available for concessionaire use. Water and electric hookups are available along with a 1,000-gallon septic tank and associated leach field at the host site.

Water is provided by the centralized Forest Service system and piped to the campground. The concessionaire will be responsible for maintenance of the water system from the main distribution line and throughout the campground.

This campground includes the parking area for the Aliso Trailhead. The parking area has 14 single car and 11 car/trailer parking spaces. The concessionaire is expected to take care of the trailhead also.

The Santa Ynez River flows adjacent to Sage Hill Group Campground.

All five group sites are available through the NRRS.

It is highly recommended that the concessionaire plan on some type of occupancy or routine patrolling year-round at this site, even when the River Gate is closed.

Upper Oso Campground

Upper Oso Campground has 24 large campsites scattered among plentiful oak trees that provide pleasant shade; 13 of these sites have corrals and extra-long parking spurs for equestrian use. The other 12 sites are primarily used for general camping. Each site has a picnic table, a fire ring and a pedestal grill. There are four flush toilet buildings with a total of 14 seats.

One camp site is available for concessionaire use. Water hookups are available along with a 1,000-gallon septic tank and associated leach field at the host site.

Water is provided by the centralized Forest Service system and piped to the campground. The concessionaire will be responsible for maintenance of the water system from the main distribution line and throughout the campground.

In addition to the campsites, there are 20 single vehicle spaces available for trailhead parking and extended spaces for truck-trailer parking for off-highway vehicles (OHV's). There are an additional 20 spaces for parking close to the equestrian facilities. There is a horse trough at the trailhead. Due to the proximity of Upper Oso Campground to several trailheads, the concessionaire will be required to maintain occupancy year-round, even when the River Gate is closed.

Upper Oso Campground is currently available for reservations through the Rec.gov.

Falls Day Use Area

Falls Day Use Area includes 29 parking spaces, 13 picnic sites with 27 concrete picnic tables and 23 pedestal grills. There is one vault toilet building with two seats.

Water is not provided. All sites are fully accessible. The Santa Ynez River can be accessed from the site.

First Crossing Day Use Area

The First Crossing Day Use Area is a 16-acre day use site located off Paradise Road just before the first Santa Ynez River crossing ford. The facility has 50 picnic tables at 13 picnic sites accommodating 16 to 24 people each. The site consists of 130 parking spaces with one trailer parking space. There are three vault toilet buildings each with two seats for a total of six seats.

Water is provided by the centralized Forest Service system and piped to the day use area. The concessionaire will be responsible for maintenance of the water system from the main distribution line and throughout the area.

The interior roads and parking spurs are paved, all walkways are concrete, and the entire site is accessible. The site is designed for large extended family groups.

There is no host site. There are three large garbage dumpsters located throughout the site. There is no electricity or phone service to the site.

First Crossing Day Use Area is open all year. During high river flows Paradise Road is closed to motorized vehicles at the river ford and this facility becomes the “end of the road” for visitor vehicle access.

Although not a federal government facility, a well, providing water for the adjacent Los Prietos Boy’s Camp, is within the site boundary of First Crossing. Santa Barbara County employees have legal access to this well facility.

Live Oak Day Use Area

Live Oak Day Use Area includes 59 parking spaces, 33 picnic tables and 33 pedestal grills. There are two vault toilet buildings for a total of four seats.

Water is not provided. All sites are fully accessible. The Santa Ynez River is adjacent to Live Oak Day Use Area.

Lower Oso Day Use Area

Lower Oso Day Use Area includes 28 sites, each with a picnic table, pedestal grill and parking spur. There are three flush toilet buildings for a total of eight seats. The Santa Ynez River can be accessed from the site.

Water is provided by the centralized Forest Service system and piped to the day use area. The concessionaire will be responsible for maintenance of the water system from the main distribution line and throughout the area.

It is highly recommended that the concessionaire plan on some type of occupancy or routine patrolling year-round at this site, even when the River Gate is closed.

Red Rock Day Use Area

Red Rock Day Use Area includes 28 sites, each with a picnic table, pedestal grill and parking spur. There are three vault toilet buildings for a total of six seats.

The road system and parking spurs are paved. Water is not provided, although there are garbage bins. The Santa Ynez River can be accessed from the site. This area may remain closed all summer if not needed.

White Rock Day Use Area

White Rock Day Use Area has 25 sites each with a picnic table and pedestal grill. There are 86 paved parking spaces available and three flush toilet buildings with a total eight seats. The Santa Ynez River can be accessed from the site.

One site is available for concessionaire use. Water and electric hookups are available along with a 1,000-gallon septic tank and associated leach field at the host site.

Water is provided by the centralized Forest Service system and piped to the campground. The concessionaire will be responsible for maintenance of the water system from the main distribution line and throughout the campground.

Red Rock Trailhead

Red Rock Trailhead includes 144 parking spaces and four trailer parking spaces. There are two concrete vault toilet buildings for a total of four seats. The Santa Ynez River can be accessed from the site.

This site is fully accessible but there is no water provided. The concessionaire is responsible for providing a portable toilet along the trail to the Red Rock pools from the Red Rock Trailhead.

Ojai Ranger District

Wheeler Gorge Recreation Area

Wheeler Gorge Recreation Area is located in Ventura County approximately 10 miles north of Ojai, CA. Access to the recreation area is via State Highway 33. This area is a popular year-round destination for recreation. The elevation is approximately 2,000 feet and surrounding vegetation is chaparral with some oak and sycamore trees.

In addition to the two campgrounds, the Wheeler Gorge Nature Trail and Wheeler Gorge Visitor Center are included in the recreation area. The nature trail is adjacent to the campground. The Wheeler Gorge Visitor Center is operated year-round on the weekends by a non-profit partner. It offers live interpretive programs in the summer that are popular with the campers.

Both Wheeler Gorge Campground and Holiday Group Campground have been operated under concessionaire management since 1987.

The managed use season for Wheeler Gorge and Holiday Group Campgrounds is year-round. Campsite reservations are currently made on a year-round basis through the Rec.gov.

Holiday Group Campground

Holiday Group Campground is located approximately 1 mile north of nearby Wheeler Gorge Campground.

The campground consists of seven individual campsites that in total comprise the group campground. The group maximum is 50 people. Total parking capacity is 10 vehicles in the adjacent parking area. There are three fire rings, seven wooden/metal picnic tables, one group barbecue and two serving table.

One double-seat vault toilet is provided. There are two trash cans on site and one dual bearproof trash bin; One bear proof storage container.

Drinking water is not available at the campground but may be obtained from Wheeler Gorge Campground.

Wheeler Gorge Campground

Wheeler Gorge Campground has 68 family campsites, of which three are double sites suitable for large families. Each site is equipped with a picnic table and a fire ring with grill. Sixty-two of the sites have pedestal grills. All roads and spurs are paved. Parking spurs vary in length, accommodating RVs up to 25 feet.

There are 15 single-seat vault toilet buildings (SST), each with a 1,000-gallon vault. These buildings are either stand-alone or paired at specific locations.

A full-time caretaker-manager will be required at this campground. Two camp sites are available for concessionaire use. One has water, electricity, and phone and the other has water, electricity, 1,000-gallon septic tank, and phone.

There are nine three-yard dumpsters dispersed throughout the campground for garbage collection.

Drinking water is not provided. See further information in Section I. F. Utilities and Waste Management.

Pine Mountain Recreation Area

The Pine Mountain Recreation Area is a popular summer and fall recreation area located in Ventura County, CA approximately 36 miles north of Ojai, CA off of State Highway 33. Access to the area is via state highways and paved roads. Pine Mountain Road was paved in 2013 and since that time, use has noticeably increased. The area is approximately five miles east of Highway 33 and sits at approximately 7,000 feet elevation on a forested mountaintop. The surrounding vegetation includes mixed conifers along with chaparral and scrub oak.

The area is open annually from May 1 through December 15. The access road is closed to vehicles by a gate during the rest of the year. The area offers a rustic forested setting. Additionally, the area offers a rare opportunity for high-elevation car camping on the Ojai Ranger District.

The entire area is operated under a “Pack In-Pack Out” system where visitors are expected to haul their trash out of the area when they leave.

No drinking water is available at any of the sites.

The area also includes Reyes Peak Trailhead at the end of the road; the trailhead is part of this offering.

The following two recreation facilities are included in this offering:

Pine Mountain Campground

Pine Mountain Campground has seven sites each with a picnic table, fire ring and pedestal grill. There is one single-seat vault toilet building.

One campsite is located 0.3 miles further up the main road. Boulder Canyon Trail (23W03) starts at the campground and runs north to Lockwood Valley.

Reyes Peak Campground

Reyes Peak Campground has six sites each with a picnic table, fire ring and pedestal grill. These campsites are located along the main road for a span of 0.4 miles. There is one single-seat vault toilet building adjacent to the campsites.

The area is popular for day use including rock climbing (bouldering) on nearby rounded rock formations. Two trails start at the campground: Raspberry Spring Trail which runs north for about a half mile and Chorro Grande Trail (23W05) which runs south for approximately 5 miles and ends at Highway 33.

Reyes Peak Trailhead

Reyes Peak Trailhead has one single-seat vault toilet building with 1,000-gallon capacity. A tri-fold interpretative sign is present at the trailhead.

Rose Valley Recreation Area

The Rose Valley Recreation Area is a popular year-round recreation area approximately 20 miles north of Ojai, CA in Ventura County. Access is via State Highway 33 and the paved Sespe River/Rose Valley Road. The area is located approximately five miles east of State Highway 33 at elevations between 3,200 and 3,400 feet. The surrounding vegetation consists of chaparral with pockets of Big Cone Douglas-Fir. The recreation area contains two campgrounds as well as two small day use areas and a trailhead. The trailhead is an optional site.

Rose Valley Falls is a popular attraction in this area and the trailhead to access the falls is adjacent to Rose Valley Campground. There are three lakes in the area: Lower, Middle and Upper Rose Lakes, although

none of them are currently being stocked. Rose Valley Campground is also the starting point for the Nordhoff Ridge Road. Public entry on the Ridge Road open from May 1st to December 15th.

Neither of the two campgrounds has electrical, water, or septic hook-ups. At a minimum, the Forest Service will expect the permit holder to operate both campgrounds on a year-round basis.

Middle Lion Campground

Middle Lion Campground is located at the end of the Sespe River/Rose Valley Road. The campground has eight sites, each with a picnic table, fire ring and pedestal grill. There is one single-seat vault toilet with a 1000-gallon vault.

There are six bear-proof trash cans for garbage collection. No drinking water is available. The campground offers a rustic streamside setting.

A small trailhead is located on the edge of the campground and parking is available before the campground entrance sign.

Rose Valley Campground

Rose Valley Campground has seven fully accessible sites each with a picnic table, fire ring and pedestal grill. There is one single-seat vault toilet with a 1,000-gallon vault.

There are six bear-proof trash cans for garbage collection. No drinking water is available. All roads are paved. Rose Valley Creek flows adjacent to the campground. Reservations are currently being offered for reservation through Rec.gov

Rose Valley Upper Lake Day Use Area

Upper Rose Valley Lake Day Use Area has two single-seat vault toilets building with a 750-gallon vault capacity.

There are one double bear-proof trash cans for garbage collection. No drinking water is available. All roads are paved.

Rose Valley Lower Lake Day Use Area

Lower Rose Valley Lake Day Use Area has two separate single-seat vault toilet building with a 1,000-gallon vault capacity each

There are two single bear-proof trash cans for garbage collection. No drinking water is available. All roads are paved.

There is also one picnic table and a horse corral with four covered holding areas and two horse hitches.

Mt. Pinos Ranger District

Ballinger Campground

Ballinger Campground is located in Ventura and Santa Barbara Counties approximately fifteen miles southeast of New Cuyama, CA, off of Highway 33 on Ballinger Canyon Road (9N10). Ballinger Canyon Road is paved to the campground entrance only; the entire campground area is dirt. The campground sits at approximately 3,200 feet in the eastern foothills of the Cuyama Valley. The surrounding vegetation is considered high desert with large Juniper bushes and other smaller brush and shrub species.

The primary use of Ballinger Campground is as a staging area/campground for OHV riders. Ballinger Canyon and the adjacent Deer Park Canyon are the largest contiguous OHV riding area on the Los Padres National Forest. The Ballinger/Deer Park area has approximately 70 miles of 4X4, motorcycle and ATV designated routes within its boundaries. During hunting season, hunters frequent the Deer Park Canyon Area in search of quail. Most users come from the Los Angeles Basin, Santa Maria area and southern San Joaquin Valley.

The campground contains 13 family sites. The forest has new tables and accessible fire rings to be installed in this facility, but they have not yet been installed. There are two trash bins at the entrance.

Water is not available or provided at the campground. There are two, double-riser concrete cinder-block vault toilets and two single-riser wooden vault toilets at the site. A large loading and unloading dock are located in the campground for riders use. Due to the open nature of the campground, campers that come as a group to recreate together tend to cluster and camp in groups around campsite facilities. There are plans to install a beginner's riding area within the campground boundary at the far eastern end in the future.

As the temperatures cool, the recreation uses increases. The maximum use occurs on holidays and during the winter, spring and early summer months. Due to increased daytime temperatures in late summer (August and September) use decreases. The minimum operating season is year-round.

McGill Campground and McGill Group Campgrounds

McGill Campground is located on Mt. Pinos approximately 14 miles west of Frazier Park, CA and 17 miles west of Interstate 5 in Kern County. Access is via Interstate 5, Frazier Mountain Park Road, Cuddy Valley Road (9N24). The campground sits at approximately 7,600 feet. The surrounding vegetation consists of old growth Jeffrey Pine and white fir forest with smaller brush and shrub species.

Recreation use at McGill Campground is primarily weekend camping. The McGill Hiking Trail is located at the campground. The Exploration Trail, a fully accessible paved interpretive trail is available adjacent to Group Camp I. Mt. Pinos Summit, the highest point on the Los Padres NF, is within 7 miles of the campground.

The family campground consists of 78 family units, each equipped with a picnic table and fire ring. Many of the campsites in this area had new concrete tables and 18-inch accessible fire rings installed in 2010. Site 29 has been reconstructed to be fully accessible including a concrete pad and walkway. An accessible vault toilet is across the road from this campsite. The interior campground roads and parking

spurs are paved. There are six double riser SST-type toilets and two single-riser SST-type toilets at the site.

There are two group camps within the facility. Group Camp I has a capacity of 80 people, and the parking lot can accommodate 10 RVs. In 2010, a new fire pit, five benches, two large double barbeques, one serving table, and eight picnic tables were installed. All of these new facilities are constructed of concrete. There are two, handicap-accessible, 1-riser SST-type toilets nearby.

Group Camp II has a capacity of 60 people or may also be operated as five individual campsites. There is an additional overflow parking area for approximately 20 cars near the main entrance of the campground for use by family unit or group campers. In 2010 within the center group area, a new concrete fire pit, five benches, one large double barbeque, one serving table, and five picnic tables were installed. There is one, accessible, double-riser SST-type toilet located within this group camp area.

Water is not available, but remnants of the old water system still remain. There are three large trash bins dispersed throughout the campground for garbage collection and disposal.

The normal operating season is May thru October but may vary from year to year depending on the weather and snowpack. The host for the area generally resides in McGill Campground.

Mt. Pinos Campground

Mt. Pinos Campground is located in Ventura County, approximately fifteen miles from Frazier Park, CA on Cuddy Valley Road (9N24) and approximately eighteen miles west of Interstate 5. Access is via Interstate 5, Frazier Mountain Park Road, and Cuddy Valley Road (9N24). The campground sits at approximately 7,800 feet and is two miles west of the larger McGill Campground. The surrounding vegetation consists of old growth Jeffrey Pine and white fir forest with smaller brush and shrub species

Recreation use at Mt. Pinos Campground is primarily weekend camping. Most users come from the Los Angeles Basin and southern San Joaquin Valley.

The campground has 19 family units, each with a picnic table and fire ring. The interior campground roads and parking spurs are paved. There are two four-riser pit toilets at the site.

Water is not available, but remnants of the old water system still remain. There is one large trash bin located in the center of the campground for garbage collection and disposal.

The normal operating season is May thru October but may vary from year to year depending on the weather and snowpack.

Reyes Creek Campground

Reyes Creek Campground is located in Ventura County at the southern terminus of the Reyes Creek Road (7N11), approximately five miles east of Highway 33 in the Ozena Valley area. The campground sits at approximately 3,900 feet. It is located adjacent to a small community of Camp Scheideck. Reyes Creek flows year-round through the campground and is periodically stocked with fish. Surrounding vegetation

consists of willow and other riparian vegetation along Reyes Creek and oak trees, pinyon pine, scrub oak, smaller brush and shrub species away from the riparian areas.

The campground consists of 26 family units each with a picnic table and stove or fire ring. The interior campground road and parking spurs are paved. One double vault, accessible SST-type toilet is located near the entrance to the campground and the group camping area and two double-riser concrete block vault toilet structures in the main portion of the campground south of the creek crossing.

A group camping area is located near the entrance to the campground. New concrete facilities were installed in the group area in the fall 2009. They include one fire pit, one large double barbeque, one serving table, and four picnic tables.

Water is not available, but remnants of the old water system still remain. There are five trash bins dispersed throughout the campground.

An accessible fishing pier platform is located on the creek just north of the crossing. Facilities include an accessible parking area and pathway.

The trailhead for the Gene Marshal-Piedra Blanca National Recreation Trail (23W02) accessing the Sespe Wilderness is located adjacent to the campground but is not a part of this offering.

Campo Alto Campground

Campo Alto Campground is located in Kern County approximately ten miles from Pine Mountain Club, CA and approximately thirty-five miles west of Interstate 5 at the end of Cerro Noroeste Road (9N07). The campground is on the summit of Cerro Noroeste at an approximate elevation of 8,200 feet. The surrounding vegetation consists of old growth Jeffrey Pine and white fir forest with smaller brush and shrub species.

Recreation use at Campo Alto CG is primarily weekend camping. The western end of Tumamait Trail (21W03), located near the campground entrance, accesses the Chumash Wilderness. Most users come from the Los Angeles Basin, Santa Maria area and southern San Joaquin Valley.

The campground consists of 17 family units each equipped with a picnic table and fire ring. The interior campground road is paved, but the spur roads to individual campsites are native surface. The forest has new tables and accessible fire rings to be installed in this facility, but they have not yet been installed. Due to the spread out nature of the facilities, large RV's or vehicles towing trailers can be accommodated at some campsites.

Water is not available. There are two six-riser vault toilets (one also has a urinal) at the site.

This area has two group camping areas within its boundary; combined capacity of both group camps is approximately 70 people. There is a large parking area that can accommodate cars or RV's near the group campgrounds for use by group campers or as overflow parking for individual campsites if needed.

The campground is normally closed during the winter season as the only access is via Cerro Noroeste Road, which is not maintained in the winter. The normal operating season is late April thru November.

Chuchupate Campground

Chuchupate Campground is located in Ventura County approximately 10 miles West of I-5. Chuchupate is the Chumash name for California rock parsnip or celery weed, a yellow-flowered plant that grows amidst the scrub-oak and manzanita here. During the late spring, the hillside is accented by wildflowers including Matilija poppies, Indian paintbrush and lupines. The campground is sufficiently shaded by hearty pinyon pines.

This seasonal campground is open daily May through November. There are 29 single and spaciouly situated campsites ideal for tent camping, and RVs under 24 ft. Campfires are allowed only in designated fire rings. Pets are allowed. You should plan to be completely self-sustained for the duration of your trip. There is no potable water or electricity onsite. There is no dump station. This is a "dry" campground with six vault toilets. The road through the campground is narrow in places and long trailers are not advised due to obstructions and difficult angles into the campsites.

Optional Sites

These sites are included as optional bid items; applicants may choose to include these or not. Consideration will be given in the evaluation if these sites are included in the applicant's package.

Monterey Ranger District

Santa Lucia Ranger District

Santa Barbara Ranger District

The following sites are in need of deferred maintenance before campground is operational.

Upper Santa Ynez Recreation Area

The Upper Santa Ynez Recreation Area – which is approximately 40 miles northeast of Santa Barbara and requires a 1.5 hour drive from either Los Prietos or Santa Barbara on winding mountain roads – offers a more primitive recreation experience than the Lower Santa Ynez Recreation Area, centered on picnicking, camping, fishing, and hunting. No piped drinking water is provided in the campgrounds or picnic areas.

During periods of heavy rainfall, the Upper Santa Ynez Recreation Area is closed by a locked gate near the Divide Peak OHV route. There is one public road for ingress and egress. In response to potential emergencies such as fires or floods, applicants must include in the proposed operating plan details for a coordinated evacuation plan with the Forest Service.

Middle Santa Ynez Campground

Middle Santa Ynez Campground is distributed over approximately three acres. The campground has nine tent sites; each site accommodates eight people and includes a picnic table, a pedestal

barbecue, and a steel fire ring with a grill. Other assets include three vault toilets and two information boards. Infrastructure includes a dirt road; no water or trash services are provided.

P-Bar Flat Campground

There is a dirt loop road, but no RV spurs. The campground has four tent sites; each site accommodates eight people and includes a picnic table, a pedestal barbecue, and a steel fire ring with a grill. There is a dirt loop road, no RV spurs. There are two vault toilets and one information board. No water or trash services are provided.

Lower Caliente Campground

Lower Caliente Campground is distributed over approximately one and a half acres. The campground has two tent sites; each site includes a picnic table, a pedestal barbecue, and a steel fire ring with a grill. Other assets include one vault toilet and one information board. Infrastructure includes a dirt road; no water or trash services are provided.

Big Caliente Day Use Area

Big Caliente Day Use Area is distributed over approximately one and a quarter acre. The day use area assets include signage, picnic tables, a vault toilet, concrete tub, and concrete changing facility. No water or trash services are provided. Infrastructure includes a dirt road.

Ojai Ranger District

Piedra Blanca Trailhead

Piedra Blanca Trailhead is located at left fork of the end of Sespe River/Rose Valley Road across from the road leading into Middle Lion Campground. The trailhead has forty-eight parking spots, and 4 picnic tables. There is a double single-seat vault toilet with a 1000-gallon vault each. Piedra Blanca Trailhead is the primary gateway to the Sespe Wilderness and offers many scenic views. This trailhead connects the Piedra Blanca- Gene Marshal National Trail system with the Mount Pinos District. As a day use site, it currently allows visits who have an Adventure Forest Pass to park at the trailhead. This trailhead also has two horse corrals with water troughs and is open year around. There are four bear-proof trash containers (Two singles and a double), and metal garbage bins for garbage collection. No drinking water is available.

Dough Flat Trailhead

Dough Flat Trailhead is located on the other end of the Sespe River trail near Filmore. This trailhead is not paved and consists of a looped access and area to set up stock. Dough Flat is another access to the Sespe Wilderness and is often the end point for visitors hiking from Piedra Blanca Trailhead along the Sespe River Trail. There is a single seat vault toilet with a 1,000- gallon capacity at the trailhead and has a Pack it in and Pack it out policies. Minimum Operating Season is from May 1st to December 15th.

Potrero Seco Campground

Potrero Seco Campground is located 4.1 miles down Potrero Seco road (6N03) off of Highway 33. This campground is primitive with minimal infrastructure and has two fire rings and two picnic tables. There are no restrooms and has a Pack it in and Pack it out policy. Minimum Operating Season is from May 1st to December 15th.

Wheeler Gorge Visitor Center

Wheeler Gorge Visitor Center is located across from Wheeler Gorge Campground and is open on the weekend's all year around. It is currently used as an interpretative center that depicts local wildlife, geography, and provides general information of the district to the public. Contains four outdoor picnic tables, and pedestal grills. The Visitor Center has a small meeting room, kitchenette, bathroom, and two outside storage sheds. The utilities available are water, electricity, phone line, and a septic tank.

Mt. Pinos Ranger District

Site Fees

There has been no fee increase within the last three years, and the amounts reflect the latest fee. Please refer to the following table describes the fees associated with each site, additional fees for holidays and weekends, and the three-year gross revenue per district within the Los Padres National Forest. Most site reservations are currently being offered for reservation through Rec.gov

Table 28. Site Fees.

Site Name	2025 Fees	Other Fees	Three-year Average Gross Revenue (2021-2023)	Additional Details
Mount Pinos Ranger District				
McGill Campground	\$30.00/ per night	\$2.00 additional charge per night on weekends and holidays	\$242,034.00	
McGill Group Campgrounds 1 and 2	\$150/ per night	\$2.00 additional charge per night on weekends and holidays		
Mt. Pinos Campground	\$30.00/ per night	\$2.00 additional charge per night on weekends and holidays		
Reyes Creek Campground	\$30.00/ per night	\$2.00 additional charge per night on weekends and holidays		
Ballinger Campground	\$30.00/ per night	\$2.00 additional charge per night on weekends and holidays		
Campo Alto Campground	\$30.00/ per night & \$150/ per night (Group sites)	\$2.00 additional charge per night on weekends and holidays		
Chuchupate Campground	\$30.00/ per night	\$2.00 additional charge per night on weekends and holidays		
Monterey Ranger District				
Kirk Creek Campground	\$45.00/ per night	\$2.00 additional charge per night on weekends and holidays	\$2,019,016.00	
Plaskett Creek Campground	\$45.00/ per night Family \$200.00/ per night Group	\$2.00 additional charge per night on weekends and holidays		
Arroyo Seco Campground and Dau Use Area	\$40.00/ per night Family \$35.00/ per night Primitive	\$2.00 additional charge per night on weekends and holidays \$10.00 Day Use Fee		

Site Name	2025 Fees	Other Fees	Three-year Average Gross Revenue (2021- 2023)	Additional Details
	\$150.00/ per night Group			
<i>Bottcher's Gap Campground</i>	<i>\$15.00/ per night</i>	<i>\$5.00 Day Use Fee</i>		<i>Most recent fees (closed since 2016)</i>
Pfeiffer Beach Day Use Area	\$15.00 per car \$30.00 per van \$50.00 per bus			
Sand Dollar Day Use Area	\$10.00 day use fee per vehicle \$30.00 per van \$50.00 per bus			
Willow Creek Day Use Area	\$10.00 day use fee per vehicle \$30.00 per van \$50.00 per bus			
Mill Creek Day Use Area	\$10.00 day use fee per vehicle \$30.00 per van \$50.00 per bus			
Santa Lucia Ranger District				
Cerro Alto Campground	\$35.00/ per night	\$2.00 additional charge per night on weekends and holidays	\$278,350.00	
Figueroa Mountain Campground	\$30.00/ per night	\$2.00 additional charge per night on weekends and holidays		
Nira Campground	\$30.00/ per night	\$2.00 additional charge per night on weekends and holidays		
Davy Brown Campground	\$30.00/ per night	\$2.00 additional charge per night on weekends and holidays		
Navajo Flat Campground and OHV Staging Area	\$30.00/ per night	\$2.00 additional charge per night on weekends and holidays

<i>Lower Caliente Campground</i>				

Archaeological and Historical Considerations

Eligible developed recreation sites (and those that have not yet been evaluated) are maintained to preserve the historic features which contribute to the overall historic character of the site by following the guidelines set forth by *The Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring and Reconstructing Historic Buildings* (2017). Historic, or “character-defining” features include the natural character of the site setting and the design or layout of the site including roads and parking areas or spurs that define the overall site design as well as road barrier features, restrooms, tables etc. Management of historic-era restrooms, tables and road barrier features including the posts and post-and-rail features, sometimes interspersed between groups of boulders relies on preserving the existing features in their historic appearance. When needed repairs or replacements in-kind must be undertaken in consultation with Forest Heritage staff until a management plan or design image guide is created for the historic resources.

Management Responsibilities under Federal Law, Regulation and Policy

Archaeological and historical resources are protected under Federal law, most notably the National Historic Preservation Act (NHPA), Archaeological Resources Protection Act (ARPA) and the Native American Graves and Repatriation Act (NAGPRA), and it is unlawful to collect, dig, or otherwise damage or disturb these resources. Archaeological and historical resources within most of the developed recreation sites and facilities are known to the Forest Heritage staff. Public disclosure of the locations of these archaeological resources is prohibited.

Notification Procedures

As maintenance needs are identified at developed recreation sites and facilities, the permit holder is responsible for providing the Forest or District representative information about the maintenance need – location, type of ground-disturbing activity, need to stage vehicles. The Forest or District representative is responsible for requesting project review from one of the Forest’s staff archaeologists. As archaeological and historical resources are located and mapped, and as character-defining features within historic-era campgrounds are located and mapped, the Forest Service will provide the permit holder “sensitive resource area” maps so that the holder can protect the sites from disturbance. The permit holder is responsible for coordinating any projects within the sensitive resource areas with the Forest Service before work is started. The permit holder is responsible for notifying Forest Service law enforcement personnel immediately of any unauthorized disturbance of sites, or if human remains or suspected human remains are found.

The Forest Service has Archaeological Resource Protection Act signs – in both English and Spanish – that may be placed on recreation site kiosk boards by Forest Service personnel or the permit holder.

Standard Practices (SP) – Archaeological and Historical Resources

All archaeological and historical resources 45 years old or older will be protected from damage unless they are determined ineligible for the NRHP and no longer require Forest Service management. To ensure there is no damage to cultural resources adherence to Federal law, regulation and policy is expected and is best accomplished through the following standard practices. These standard practices are the responsibility of the permit holder:

- SP 1 - If bone that may be human is found at a developed recreation site or facility,
 - o a) secure the location, keep forest visitors away from the area;
 - o b) do not move the bone;
 - o c) contact the Line Officer and Law Enforcement, who will notify the County Coroner and the Forest Heritage staff;
- SP 2 – Identify regularly-scheduled operation and maintenance needs early and often and submit these needs to the Forest representative in the annual operating plan, or as soon as practicable. Include a description of the need, its location, and if any ground-disturbing activity or vegetation removal may be required. Allow 2-4 weeks for processing. -A maintenance activity may proceed after review is completed by a staff archaeologist and approved by a District Ranger or the Forest Supervisor;
- SP 3 – For emergencies, notify the Forest representative as soon as possible;
- SP 4 – If artifacts such as arrow points, historic-era coins, cans or bottles are found by forest visitors or others within a developed recreation site, secure the locations and document where they were found. Notify the Forest representative about the finding as soon as possible.
 - o Metal detecting is prohibited within developed recreation sites without a permit, if such recreation sites include archaeological and historical resources within them (<https://www.fs.usda.gov/sites/nfs/files/r01/dpg/publication/fseprd677553.pdf>)
- SP 5 – Character – defining features or elements at historic developed recreation sites and facilities are to be maintained or repaired before replacement will be considered.
