## Customer Type of Research Conducted

☐ Additional Info

Internet Search

Expert Opinion

The requirement was identified and validated by the MARSOC CD&I IRAS Program Manager and Combat Developer.

Contact with Industry

Extensive communication with the Original Equipment Manufacturer (MARTAC) confirmed that they are the only source for the required proprietary hardware, software, and integration services.

Prior Purchase

This is a follow-on requirement to the initial purchase of the T12 USVs in FY24/FY25. This integration is necessary to bring those systems to full operational capability.

Other

## Customer Justification for Sole Source/Brand Name (if applicable)

☐ Additional Info

A sole source justification is required because the contractor, Maritime Tactical Systems, Inc. (MARTAC), is the Original Equipment Manufacturer (OEM) of the T12 Unmanned Surface Vehicle (USV). This effort requires the mechanical and software integration of a new depth finder capability into the existing proprietary architecture of the T12 USV and its Mission Control Center (MCC). The wiring harnesses, cables, and software are bespoke to the T12 system and are not available from any other vendor. As the OEM, MARTAC is the only company with the restrictive rights, proprietary data, and technical expertise necessary to perform this integration without creating unacceptable risk to the government-owned assets.

Other/General  
Findings (if applicable)

## Customer Market Research Signature

The above market research documentation is complete and accurate and represents an appropriate level of review for the complexity of the requirement.

The KO is not required to document Market Research at or below the simplified acquisition threshold (FAR 10.001(b)(2))

☐ Additional Info

|                                                                   |                                                                                                                                                                                                                 |
|-------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Methods used to conduct market research                           | Based on the customer's research, the requirement can only be satisfied by the Original Equipment Manufacturer (OEM), MARTAC, due to proprietary rights.                                                        |
| Timeframe in which market research was conducted                  | February 2026 - April 2026                                                                                                                                                                                      |
| Analysis of the capabilities of the offerors that were identified | Only one offeror, MARTAC, was identified as being capable of performing the work. As the OEM, they possess exclusive proprietary knowledge of the T12 USV's hardware and software required for the integration. |
| Conclusion reached as a result of market research                 | Competition is not feasible. Only one source is reasonably available to fulfill the requirement.                                                                                                                |
