**D.1 MANPOWER PERSONNEL TESTING ANALYSIS (MPTA) SUPPORT SERVICES
PERFORMANCE WORK STATEMENT (PWS)**

D.1.1 BACKGROUND

The Defense Personnel Analytics Center (DPAC) is part of a Department of Defense (DoD) Field Activity called the Defense Human Resources Activity (DHRA) which supports major programs and initiatives within the DoD. DPAC is the DoD's premier center for excellence providing information on the total force, families, and veterans through the collection of data and analytical research. DPAC is designated to serve in direct analytic support to the Military Services and the Office of the Secretary of Defense (OSD) to conduct comprehensive analysis on how policy or environmental changes will affect the performance or composition of the workforce. Through analysis, DPAC is prepared to inform on questions pertaining to recruiting, hiring and retention, succession planning, training, and increased talent-based assignment matching throughout the Department. Data will be used to support a wide spectrum of studies, analyses, policy objectives, research projects, reporting requirements, and the development of enterprise technology solutions for the Department. These activities support primarily OSD, but major support is also provided to the Military Departments, DoD Agencies, OMB, the Congress, the Congressional Budget Office, other Federal Agencies (including DoL, VA, DoED, DHS, HHS, Commerce, OPM), DoD contractors, private research organizations, universities, financial industry, and the general public. DPAC houses the Office of the Chief Data Officer, the Office of the Actuary and Allowances Directorate, and the Office of People Analytics Directorate (OPA). Within OPA there are six primary functions: (1) recruitment – performed by the Joint Advertising Market Research & Studies (JAMRS) program, (2) testing and assessment – performed by the Defense Testing and Assessment Center (DTAC), (3) retention and readiness research – conducted by the Retention & Readiness Division (R&R), (4) health and resilience research – conducted by the Health & Resilience Division (H&R), research strategy and prioritization – led by the Research, Strategy, Policy, and Dissemination Division (R-SPD), and advanced data science – performed by the Data Science, Statistics and Survey Support Division (DS4). This contract will provide primary support for testing and assessment efforts led by DTAC.

D.1.1.1 DEFENSE TESTING and ASSESSMENT CENTER (DTAC) BACKGROUND

The DTAC is responsible for the research, development and evaluation of the Armed Services Vocational Aptitude Battery (ASVAB); establishment and administration of evidence-based non-cognitive accessions instruments for military compatibility; development of career exploration tools and guidance; and the online test delivery of the ASVAB and associated accession and job classification tests, including all DoD language tests and the Joint Service Tailored Adaptive Personality Assessment System (JS-TAPAS). The ASVAB is the single aptitude battery given to all applicants for the U.S. Armed Forces and is used by the Services to determine qualification for enlistment and entry into military specialties. DTAC is charged with research and development in support of two Department of Defense (DoD) testing programs, and for the development and fielding of the ASVAB. The two DoD programs are the Enlistment

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Testing Program (ETP) and the Career Exploration Program (CEP). The ASVAB is administered in two modes. In the ETP, an adaptive version called the Computerized Adaptive Testing (CAT) version of the ASVAB (CAT-ASVAB) is used in most all locations, while the Paper-and-Pencil ASVAB (P&P- ASVAB) is utilized in a small number of remote locations. In the CEP, administration is currently approximately evenly split between P&P-ASVAB and CAT-ASVAB. Eventual elimination of P&P-ASVAB is a goal for both the ETP and CEP.

D.1.1.1.2 The CAT-ASVAB is currently being administered to applicants that process through the Military Entrance Processing Stations (MEPS) and through nearly all Military Entrance Testing (MET) Sites. Almost all applicants (99+%) take the CAT-ASVAB. The P&P-ASVAB is administered in some remote Military Entrance Testing (MET) sites to less than 1% of military applicants. DTAC is currently responsible for development and sustainment of an online test delivery system for the CAT-ASVAB and special purpose tests administered alongside the CAT-ASVAB via an internet-based system (called iCAT) which is administered at the MEPS, MET sites, and other remote locations. iCAT delivery has been transitioned to a Cloud platform.

D.1.1.1.3 Supporting the ASVAB and other military tests requires a substantial amount of research and development in the areas of selection and classification, military compatibility, and career exploration. This is necessary in order to maintain the most efficient selection and classification procedures. This contract will provide support for all military testing research and development efforts led by DTAC.

D.1.1.1.4 In addition to ASVAB, the DTAC is responsible for delivery of associated accession and job classification tests administered via the CAT-ASVAB platform, including JS-TAPAS. The DTAC is also responsible, depending on the test, for delivery, data extracts, and select psychometric research for computer-based versions of DoD's language tests. These tests currently consist of the Defense Language Proficiency Tests (DLPT), the English Comprehension Level (ECL) tests, the In-Course Proficiency Tests (ICPT), Oral Proficiency Interview (OPI), and the Defense Language Aptitude Battery (DLAB). This contract will provide support for all tests under DTAC's responsibility, including the DoD language testing programs.

D.1.1.2 OBJECTIVE

The contractor shall provide scientific, technical, analytic, marketing and IT support services that lead to the development and execution of studies and applications supporting the Enlistment Testing Program (ETP) and Career Exploration Program (CEP) as well as new DoD personnel programs, research and studies of force readiness and personnel policies to support Deputy Assistant Secretary for Readiness and Director of Accession Policy.

D.1.1.3 PERFORMANCE REQUIREMENTS

The contractor shall provide scientific, technical, analytical, marketing, and IT support services on-site and off-site for Manpower Personnel Testing Analysis (MPTA) Support for the Defense

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Testing and Assessment Center (DTAC) within the Defense Personnel Analytics Center. All work shall be performed in accordance with the Performance Work Statement (PWS). In order to maximize the advantage of rapidly changing technologies and leverage new technological breakthroughs, the contractor shall provide research studies, marketing materials, and technical support for DTAC's primary mission in the following areas:

- (A) Development of the ASVAB, in all modes of administration
- (B) Development of the ASVAB CEP
- (C) Development and computer delivery of language aptitude and language proficiency tests and psychometric technical support for test development
- (D) Research and development of ETP and ASVAB CEP Improvements
- (E) Development and maintenance of software and systems for Computer-based Testing (CBT) selection and classification instruments, to include Computerized Adaptive Testing (CAT) systems, across web and cloud platforms
- (F) Development and maintenance of cloud computing services for test delivery and website hosting
- (G) Development of non-cognitive assessments for use with enlistment and officer populations
- (H) Development and maintenance of websites for program information and marketing materials
- (I) Evaluation of armed forces readiness and representation of today's youth in the armed forces
- (J) Development and evaluation of recruiting-related initiatives related to selection and classification of military applicants

D.1.1.4 PLACE OF PERFORMANCE

Place of performance shall be at the contractor's facility. Some Information Technology (IT) work, identified in tasks D.1.11 and D.1.13, and some test development work, identified in tasks D.1.3, D.1.5, D.1.6, and D.1.10 may be performed at the Government site, DoD Center, 400 Gigling Road, Seaside, CA 93955-6771. Most other work will be performed at the contractor's facility or at field locations.

D.1.1.5 HOURS OF OPERATIONS

The Contractor shall ensure support and coverage between the local core hours of 0830-1700 Monday through Friday except Federal holidays or when the Government facility is closed due to local or national emergencies, administrative closings, or similar Government-directed facility closings.

D.1.1.6 GOVERNMENT HOLIDAYS

The following Government holidays are normally observed by Government personnel: New Year's Day, Martin Luther King's Birthday, Presidential Inauguration Day (metropolitan DC area only), President's Day, Memorial Day, Juneteenth, Independence Day, Labor Day, Columbus Day,

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Veteran’s Day, Thanksgiving Day, Christmas Day, any other day designated by Federal Statute, Executive Order, and/or Presidential Proclamation, or any other kind of administrative leave such as acts of God (i.e. hurricanes, snow storms, tornadoes, etc.), Presidential funerals or any other unexpected Government closures.

D.1.1.7 PERIOD OF PERFORMANCE

The period of performance is as stated in the solicitation/contract.

D.1.1.8 PAYMENT FOR AUTHORIZED WORK

No payments will be made for any unauthorized supplies and/or services or for any unauthorized changes to the work specified herein. This includes any services performed by the Contractor of their own volition or at the request of an individual other than a duly appointed Contracting Officer. Only a duly appointed Contracting Officer is authorized to change the specifications, terms, and conditions under this effort.

D.1.2 PERFORMANCE BASED SCOPE OF TASKS

The Contractor shall effectively participate in planning and strategy sessions, effectively interact with customers, resolve complaints and problems, and keep management properly informed as to operational issues, problems, future needs, and technological developments. The Contractor shall have experience working with Government-approved software, to include but not limited to, MySQL, Oracle, and Microsoft Access databases, Java, C++, .Net, Python, R, RStudio, Fortran, SAS, Adobe Illustrator, Power BI, and Microsoft Office. They should have experience working with ~~eQIP~~ **eAPP** data, JPASE data, CATS data, and OPM DIF data.

- TASK 1 – PROGRAM MANAGEMENT SUPPORT
- TASK 2 – CONDUCT PSYCHOMETRIC ANALYSES OF SELECTION, CLASSIFICATION, AND PROFICIENCY TESTS AND CAREER EXPLORATION INSTRUMENTS
- TASK 3 – DEVELOP TEST ITEMS FOR MILITARY APTITUDE AND PROFICIENCY TESTS
- TASK 4 -- DEVELOP TEST FORMS AND ASSESSMENT INSTRUMENTS FOR USE IN SELECTION, PROFICIENCY, AND CLASSIFICATION TESTING
- TASK 5 – EVALUATE TEST SECURITY
- TASK 6 – ADMINISTER PSYCHOLOGICAL MEASUREMENT INSTRUMENTS
- TASK 7 – EVALUATE CHARACTERISTICS OF THE ARMED FORCES
- TASK 8 – CONDUCT RESEARCH ON NEW TYPES OF TEST ITEMS, CONSTRUCTS, AND SELECTION AND CLASSIFICATION AND PROFICIENCY INSTRUMENTS AND METHODOLOGIES
- TASK 9 – PROVIDE IT SUPPORT FOR RESEARCH EFFORTS
- TASK 10 – CONDUCT ANALYSIS AND STUDIES OF GEOGRAPHIC AND DEMOGRAPHIC DATA FILES
- TASK 11 – SUPPORT THE DEFENSE TESTING AND ASSESSMENT CENTER’S WEB-BASED AND CLOUD-BASED CAT-ASVAB SYSTEMS AND LANGUAGE TESTING SYSTEMS

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

- TASK 12 – DEVELOP AND EVALUATE RECRUITING-RELATED INITIATIVES
- TASK 13 – RESEARCH OTHER SELECTION AND CLASSIFICATION AND ACCESSION POLICY ISSUES

D.1.3 TASK 1 – PROGRAM MANAGEMENT SUPPORT

The contractor shall provide program management and project management support under this Contract. This includes the management and oversight of all activities performed by contractor personnel, including subcontractors, to satisfy the requirements identified in this Performance Work Statement (PWS). The contractor shall identify, by name, a Program Manager (PM), who shall provide management, direction, administration, quality control, and leadership of the execution of this contract. The contractor shall schedule meetings and provide deliverables in accordance with (IAW) Section D.1.16

D.1.3.1 SUBTASK 1 – COORDINATE A PROJECT KICK-OFF MEETING/ POST- AWARD CONFERENCE

The Contractor PM shall schedule and coordinate an onsite or virtual Project Kick-Off Meeting with the Government. The meeting will provide an introduction between the Contractor personnel and Government personnel who will be involved with the contract. The meeting will provide the opportunity to discuss technical, management, security issues, and travel authorization and reporting procedures. The purpose of the kick-off meeting is to aid both the Contractor and the Government in achieving a clear and mutual understanding of all contract requirements in the Contract and identify and resolve potential issues (See FAR Subpart 42.5 Post award Orientation). The meeting may be conducted at a location within the local Seaside/Monterey commuting area at the Government's discretion. At a minimum, the attendees shall include Key Contractor personnel, key stakeholders, other relevant Government personnel, and the GSA Region 9 Contracting Officer (CO) and Project Manager (PM). The Contractor shall provide the following at the Kick-Off meeting:

- (1) Kick-Off Meeting PowerPoint Slides
- (2) Project Management Plan (PMP) - Which was accepted at the time of award and will be reviewed and discussed at the Kick-Off meeting. The Contractor will submit the Final PMP per the deliverables schedule in D.1.16.
- (3) Draft Quality Control Plan (QCP) – Which was accepted at the time of award and will be reviewed and discussed at the Kick-Off meeting. The Contractor will submit the Final QCP per the deliverables schedule in D.1.16.

D.1.3.2 SUBTASK 2 – PREPARE A MONTHLY STATUS REPORT (MSR)

The Contractor PM shall develop and provide an MSR using Microsoft (MS) Office Suite applications, by the 10th of each month via electronic mail to the GSA PM, Contracting Officer's Representative (COR) and the CO. The MSR report shall summarize for each contract line item: Financial Review/Expenses, accomplishments during the period, problems met or anticipated,

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

activities anticipated during the next reporting period, and utilization of personnel. The MSR report will be provided in the format provided as PWS Attachment B: Monthly Status Report. The MSR shall include the following:

- (1) Activities during the reporting period, by task order/ project (include on-going activities, new activities, activities completed; progress to date on all above-mentioned activities). Start each section with a brief description of the task.
- (2) Problems and corrective actions taken. Also include issues or concerns and proposed resolutions to address them.
- (3) Personnel gains, losses, and status (security clearance, etc.).
- (4) Government actions required.
- (5) Schedule (show major tasks, milestones, and deliverables; planned and actual start and completion dates for each).
- (6) Summary of trips taken, conferences attended, etc. (attach trip reports to the MSR for the relevant reporting period).
- (7) Accumulated invoiced cost for each CLIN up to the previous month.
- (8) Projected cost of each CLIN for the current month.
- (9) Badging roster or updates in accordance with PWS D.1.25.5.4.
- (10) QC Plan Surveillance Chart in accordance with PWS Section D.1.3.5.1

D.1.3.3 SUBTASK 3 – CONVENE SENIOR MANAGEMENT REVIEW (SMR)

MEETINGS

The Contractor PM shall convene a monthly Senior Management Review and contract activity meeting with the COR, and other vital Government stakeholders. The purpose of this meeting is to ensure all stakeholders are informed of the monthly activities and MSR, provide opportunities to identify other activities and establish priorities, and coordinate resolution of identified problems or opportunities. The Contractor PM shall provide minutes of these meetings, including attendance, issues discussed, decisions made, and action items assigned, to the COR following the meeting. The monthly SMR report shall summarize for each contract line item: Financial Review/Expenses, accomplishments during the period, problems met or anticipated, activities anticipated during the next reporting period, and utilization of personnel.

D.1.3.4 SUBTASK 4 – PREPARE A PROJECT MANAGEMENT PLAN (PMP)

The Contractor shall document all support requirements in a PMP. The PMP shall:

- (1) Describe the proposed management approach.
- (2) Contain detailed Standard Operating Procedures (SOPs) for all tasks/projects.
- (3) Include milestones, tasks, subtasks and projects required by this contractor.
- (4) Provide for an overall Work Breakdown Structure (WBS) and associated responsibilities and partnerships between Government organizations.

D.1.3.4.1 The Contractor shall provide the Government with a Draft PMP at time of proposal, upon which the Government will accept the PMP virtue of contract award and provide comments at the kick-off meeting.

D.1.3.4.2 The final PMP shall incorporate the Government's comments within the timeframe specified in D.1.16. The PMP is an evolutionary document that shall be updated annually at a minimum. The Contractor shall work from the latest Government-accepted version of the PMP at time of award.

D.1.3.5 SUBTASK 5 – QUALITY CONTROL PLAN (QCP)

The contractor shall provide a detailed draft (QCP) that is applicable to the contract and in consideration of all requirements. The QCP should detail how the contractor intends to monitor, inspect and correct deficiencies for the requirements of the PWS. At a minimum, the plan shall provide its methodologies to be utilized in achieving the Government's objective within acceptable levels of quality as outlined in the Performance Requirements Summary (PRS) (D.1.40). The plan should address:

- (1) Type, level and frequency of Contractor's Quality Control actions, including remediation, if necessary.
- (2) Inspection checklists and records
- (3) Deficiencies reported to COR
- (4) Reports
- (5) Meetings

D.1.3.5.1 QUALITY CONTROL PLAN (QCP) REPORTING

Concurrent with submission of the invoice, the contractor will create a Deliverable Post Award Collaboration (PAC) under the basic contract number in ASSIST for the contractor to upload the Monthly Status Report.

The QC Plan surveillance is a chart that the contractor must fill out and deliver with its monthly status report to summarize performance results for each element in the Performance Requirement Summary (PRS) section of the PWS (D.1.40). This report includes surveillance results at the contract level, including all active task orders. The contractor must fill in the appropriate lot size, number of unacceptable deliverables within each lot size. Lot size for each PRS element is described in the Government's Quality Assurance Surveillance Plan.

The contractor will select the GSA Contracting Officer, GSA Program Manager, and Client COR / A-COR as the Responsible person in ASSIST when creating the PAC. When loading documents into the PAC, the contractor shall select "report" with the submission to ensure the documentation is auto-filed in Tab 47, "Surveillance" in the Contract File (CF).

D.1.3.6 SUBTASK 6 – UPDATE QUALITY CONTROL PLAN (QCP)

The Contractor shall update the QCP submitted with their proposal and provide a final QCP as specified in D.1.16. The Contractor shall periodically update the QCP, as specified in D.1.16, as changes in program processes are identified.

D.1.3.7 SUBTASK 7 – PREPARE TRIP REPORTS

The Government will identify the need for a Trip Report when the request for travel is submitted. The contractor shall keep a summary of all long-distance travel including, but not limited to, the name of the employee, location of travel, duration of trip, and point of contact (POC) at travel location. If a Trip Authorization requirement is identified by the Government, the contractor shall provide a Travel Authorization Request (PWS Attachment E) within five days after trip completion. If a Trip Report is needed, the contractor shall provide the report within five days after trip completion.

D.1.3.8 SUBTASK 8 – STAFFING PLAN

The Contractor shall submit a Staffing Plan that describes the understanding and requirements and details the number of personnel by skill level/ labor category needed to satisfy the objectives and requirements of the contract and demonstrates that it will possess available staff with the requisite education/experience/skills to successfully perform the contract requirements. The Staffing plan must provide at a minimum:

- (1) A detailed discussion of the methods and approach that will be taken to acquire and/or retain skilled staff that will meet or exceed the contract requirements.
- (2) A discussion of the offerors approach to effectively communicate and coordinate with the Government.

D.1.3.9 SUBTASK 9 – LEGACY TASK ORDER TRANSITION

At time of award of this IDIQ contract, the Government will assess the status of any active orders under the legacy IDIQ contract for transition to the follow-on contractor. The outgoing contractor may be required to provide transitional phase out services under the contract terms or the continuity of services clause, as applicable.

D.1.3.9.1 PHASE IN

To minimize any decreases in productivity and to prevent possible negative impacts on additional services, the Contractor must have a transition plan per section D.1.3.9.3 that will ensure requirements will continue with minimal disruption to the DTAC. During the phase in period, the Contractor must become familiar with performance requirements to commence full performance of services on the contract start date. Submit requests for physical and network access at

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

performance locations. The Contractor must provide to DTAC information on all transition tasks. Establish procedures with the predecessor to ensure transition of provided services without any degradation of service.

D.1.3.9.2 TRANSITION:

The Contractor must begin the process of transitioning personnel in coordination with the Contracting Officer's Representative (COR) and user organizations immediately following completion of all security requirements. Contractor shall be required to adhere to DTAC's Contractor in/out processing requirements, section D.1.3.9.4 and D.1.3.9.5. Full Contractor performance begins upon completion of all transition activities with incumbent for up to one hundred eighty (180) days of contract award, or sooner as directed by the Government. Task Orders may specify a more specific transition period. The Contractor must complete the transition of its workforce within one hundred eighty (180) days of contract award.

D.1.3.9.3 TRANSITION PLAN

The Contractor must provide a detailed transition plan with associated timelines for tasks that addresses both phase-in and phase-out for the contract. This plan must be submitted with the Contractor's proposal and should be updated as required.

D.1.3.9.4 PHASE-IN ACTIVITIES

The Contractor must include in its transition plan and perform, at a minimum, the following activities during the phase-in period:

- (1) Submit requests for physical and network access at performance locations
- (2) The Contractor must provide to DTAC information on all transition tasks.
- (3) Establish procedures with the predecessor to ensure transition of provided services without any degradation of service.
- (4) The contractor shall identify how it will coordinate with the incoming contractor and/or Government personnel to transfer knowledge regarding the following:
 - (a) Project management processes.
 - (b) Points of contact.
 - (c) Location of technical and project management documentation.
 - (d) Status of ongoing technical initiatives.
 - (e) Appropriate contractor-to-contractor coordination to ensure a seamless transition.
 - (f) Schedules and milestones.
 - (g) Actions required of the Government.
 - (h) The contractor shall also establish and maintain effective communication with the incoming contractor/Government personnel for the period of the transition via weekly status meetings

D.1.3.9.5 PHASE-OUT ACTIVITIES

The Contractor must include in its transition plan and perform, at a minimum, the following activities during the phase-out period:

- (1) Ensure all services and performance objectives required by the PWS and contract are met throughout the phase-out period.
- (2) The Contractor must provide to DTAC information on all transition tasks.
- (3) Establish procedures with the successor to ensure transition of provided services without a degradation of service.
- (4) Provide copies of all instructions, records, databases, datasets, contract performance metric data, vendor points of contact, and all other procedures and associated artifacts developed by the Contractor or in the performance of this contract to the successor.

D.1.4 TASK 2 – CONDUCT PSYCHOMETRIC ANALYSES OF SELECTION, CLASSIFICATION, AND PROFICIENCY TESTS AND CAREER EXPLORATION INSTRUMENTS

Evaluate issues and instruments in the realms of selection and classification and career exploration. Perform analyses of cognitive and non-cognitive measures; conduct statistical modeling using Item Response Theory (IRT) methods, or other mathematical modeling techniques. Perform analyses of test and item scores and compute item level statistics. These analyses could include factor analyses of test scores, structural equation modeling, advanced applications of IRT, machine learning, natural language processing, artificial intelligence, and other multivariate techniques. Develop criterion measures such as job samples or knowledge, skills, and abilities (KSAs), or using other modern approaches to criterion measurement. Examine test validity utilizing approaches such as validity framework, validity argument, theory of action, or other modern approaches.

D.1.5 TASK 3 – DEVELOP TEST ITEMS FOR MILITARY COMPATIBILITY, APTITUDE AND PROFICIENCY TESTS

Subject Matter Experts and Item Writers/Editors will create, edit, and update test items and accompanying graphics for military compatibility, aptitude and proficiency tests. Conduct content and sensitivity reviews and provide item development reference material and equipment as needed. Item development will include use of an item bank for storage of item content (including images), statistics, and history; coordinating with test developers on pool and form development; coordinating with test delivery specialists on item formatting for online delivery; writing or editing of test specifications; and reviewing and implementing new item development procedures, as required.

D.1.6 TASK 4 -- DEVELOP TEST FORMS AND ASSESSMENT INSTRUMENTS FOR USE IN SELECTION, PROFICIENCY, AND CLASSIFICATION TESTING

Develop item pools, test forms, interest inventories, military compatibility assessments, surveys, and other types of psychological measurement instruments, as needed to evaluate testing program issues and meet accession goals. As necessary, scan paper answer sheets and

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

build analysis databases. Provide test development reference material and equipment as needed. Conduct content, sensitivity, and differential item functioning reviews of test items in accordance with professional testing standards. Document psychometric characteristics and quality of test forms and psychological measurement instruments. Develop and revise test specifications and test development procedures.

D.1.7 TASK 5 – EVALUATE TEST SECURITY

Develop, evaluate, and implement procedures for detecting item or test compromise. This will include statistical procedures as well as procedures to use during site observations and web patrols for content.

D.1.8 TASK 6– ADMINISTER PSYCHOLOGICAL MEASUREMENT INSTRUMENTS

Set up test sites, either computer-based (including remote proctoring or unproctored environments) or paper-and-pencil, train test administrators, administer tests or surveys, and build the necessary analysis files. This includes obtaining Office of Management and Budget (OMB) and Human Subject Protection Program (HSPP) approvals, as necessary, scanning of paper answer sheets, processing of computer-based item level data, developing user guides, test administration instructions, and other training documents, and developing on-line training systems.

D.1.9 TASK 7 – EVALUATE CHARACTERISTICS OF THE ARMED FORCES

Gather data, conduct analyses, and document results of evaluations of characteristics of the Armed Forces. This includes developing population representation reports, evaluating capabilities of the all-volunteer force, and evaluating other aspects of military force readiness.

D.1.10 TASK 8 – CONDUCT RESEARCH ON NEW TYPES OF TEST ITEMS, CONSTRUCTS, AND SELECTION AND CLASSIFICATION AND PROFICIENCY INSTRUMENTS AND METHODOLOGIES

Evaluate new types of test items, constructs, and selection, classification, proficiency, and career exploration instruments. Design and conduct research studies or focus groups to evaluate the new item types, constructs, instruments, and methodologies. Develop criterion measures such as job samples or knowledge, skills, and abilities (KSAs), or using other modern approaches to criterion measurement. Examine test validity utilizing approaches such as validity framework, validity argument, theory of action, or other modern approaches. Work with stakeholder groups to implement promising new approaches operationally into the ETP and CEP. Research and evaluation will address both cognitive and non-cognitive measures. Testing methodologies will include unidimensional, unfolding, mixture and multidimensional IRT and span adaptive, forced-choice, situational judgment, and conventional testing. Efforts may explore the use or incorporation of methodologies based on artificial intelligence, generative artificial intelligence, or emerging technology capabilities.

D.1.11 TASK 9 – PROVIDE IT SUPPORT FOR RESEARCH EFFORTS

Provide programming and technical support for research projects that involve collecting computer-based testing data. This includes developing computer programs using C++, Java, .Net, and other such computer languages. Programming will include documentation of both computer-based conventional testing systems and computerized adaptive testing systems. Work also involves conducting analysis of software system performance and performing troubleshooting of software and hardware systems, providing general troubleshooting for issues that arise as part of the development and data collection efforts, conducting Quality Assurance (QA) software testing on the computer-based testing systems, and providing procedural documentation, including user's guides, software installation procedures, and other such documents. Provide psychometric quality assurance for checking item selection and scoring of adaptive, forced-choice, and conventional computer administered tests. Continuously modernize software development processes and adhere to the DoD CIO guidance on secure software development requirements and methodologies.

D.1.12 TASK 10 – CONDUCT ANALYSIS AND STUDIES OF GEOGRAPHIC AND DEMOGRAPHIC DATA FILES

Conduct analyses and studies of DoD data files containing geographic and demographic data. The files include the Recruit Market Network and Relocations systems files and other data fields of military units and installations as well as of the civilian work force and other geopolitical entities.

D.1.13 TASK 11 – SUPPORT THE DEFENSE PERSONNEL ASSESSMENT CENTER'S WEB-BASED and CLOUD-BASED CAT-ASVAB SYSTEMS AND LANGUAGE TESTING SYSTEMS

Provide architectural, programming, and technical support for the Computer-based testing operational activities. This involves developing and maintaining computer programs and websites using C++, .Net, Java, and other such computer languages. Primary programming efforts will support the CAT-ASVAB for both ETP and ASVAB CEP administrations, other accession and job classification tests administered via the CAT-ASVAB platform (including noncognitive assessments, like JS-TAPAS), and language testing delivery systems, for web-based versions and cloud-based versions. Programming must be performed in accordance with Government guidelines and security requirements. Programming will include documentation of both computer-based conventional testing systems and computerized adaptive testing systems. Programming includes development of web applications for the purpose of dissemination of official selection and classification information.

D.1.13.1 Other computer technical support includes system support to field testing locations, HQ United States Military Entrance Processing Command (USMEPCOM), and Defense Language Institute Foreign Language Center (DLIFLC). This involves supporting maintenance of the certification and accreditation process, conducting analysis of software system performance and performing troubleshooting of software systems, providing general troubleshooting for issues that arise for the ASVAB and language testing systems, including network troubleshooting and phone support. Technical support also includes providing

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Configuration Management (CM) procedures and conducting Quality Assurance (QA) software testing on computer-based testing systems, providing computer programs and utilities to support the operations of the field-testing locations, providing procedural documentation, including user's guides, software installation procedures, and other such documents, and providing technical support for development of learning management systems focused on training test administrators.

D.1.13.2. Other technical support includes sustaining cloud-related services for new and existing testing systems and software to a secure DoD compliant cloud delivery platform. In addition, establishing a continuous modernization strategy that will align with the DoD CIO and DHRA CIO digital modernization requirements and complies with the DevSecOps, Zero Trust, and other Cybersecurity and IT requirements.

D.1.14 TASK 12 – DEVELOP AND EVALUATE RECRUITING-RELATED INITIATIVES

Provide research and development on a wide variety of recruiting-related initiatives in the area of selection and classification of military applicants and personnel. Such efforts may include initiatives such as developing English language skills in military applicants who appear to be otherwise qualified for military service, researching the use of calculators during testing, researching retest score gains, researching using ASVAB as an alternative to Defense Language Aptitude Battery (DLAB) for entrance into language training, and in general, researching avenues to increasing the number of applicants and recruits without degrading the integrity of the military testing program. Provide research, development, and maintenance in the area of career exploration for the purpose of generating recruiting leads and exposing participating students to careers in the military Services. Develop and maintain career exploration instruments for the ASVAB CEP and supporting program materials (to include websites, marketing materials, and publications) for various stakeholders, including students, parents, and counselors. Establish and refine business processes to support administration of the ASVAB CEP.

D.1.15 TASK 13 – RESEARCH OTHER SELECTION AND CLASSIFICATION AND ACCESSION POLICY ISSUES

Conduct research, development, and evaluation of contemporary manpower and personnel issues facing the United States and the NATO Alliance. Evaluate and document the latest developments in strategic military Human Resources (HR) and the HR research community.

D.1.16 DELIVERABLES

The following schedule of milestones will be used by the DTAC COR to monitor timely progress under this contract. The following abbreviations are used in this schedule:

NLT: No Later Than

All references to Days: Government Workdays

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

D.1.16.1 DELIVERABLES REPORTING

All deliverables and reports shall be submitted through the Deliverable Post Award Collaboration (PAC) under the Basic Contract number in ASSIST. The Contractor will select the GSA Contracting Officer, GSA Project Manager and Client COR / A-COR as the Responsible person in ASSIST when creating the PAC. When loading documents into the PAC, the Contractor shall select “report” with the submission to ensure the documentation is auto-filed in Tab 47, “Surveillance” in the Contract File (CF). The contractor shall submit the deliverables listed in the following table:

PROJECT DELIVERABLE / CONTRACT DELIVERABLE	MILESTONE/DELIVERABLE	PWS REFERENCE	PLANNED /COMPLETION DATE
Milestone	Project Start (PS)	D.1.3.1	At contract award
Milestone	Kick-Off Meeting/ Post Award Conference	D.1.3.1	Within 5 workdays of contract award
Contract Deliverable	Kick-Off Meeting Slides (Unclassified)	D.1.3.1 (1)	1 Day before Kick-off meeting
Contract Deliverable	Monthly Status Report (Unclassified)	D.1.3.2	Monthly (10 th calendar day of the next month)
Contract Deliverable	Senior Management Review (SMR) (Unclassified)	D.1.3.3	15th Calendar day of each month
Contract Deliverable	Project Management Plan – Draft (Unclassified)	D.1.3.4; D.1.3.4.1	Considered draft and accepted at time of contract award.
Contract Deliverable	Project Management Plan – Final (Unclassified)	D.1.3.4.2	10 workdays after receipt of Government comments on accepted Project Management Plan
Contract Deliverable	Quality Control Plan (QCP) (Unclassified)	D.1.3.5	The QCP submitted with the offerors proposal will be accepted by the Government by virtue of the award. Updates shall be submitted, as necessary, during the life of the contract.
Contract Deliverable	Final Quality Control Plan (Unclassified)	D.1.3.6	10 workdays after receipt of Government comments on accepted Quality Control Plan
Project Deliverable	Trip Report (Unclassified)	D.1.3.7	5 days after Trip Completion
Contract Deliverable	Transition Plan (Unclassified)	D.1.3.9.3	At time of proposal submission
Contract Deliverable	Service Contract Reporting (eCMRA Reporting) (Unclassified)	D.1.35	NLT 31 October of each calendar year
Project Deliverable	Technical Reports (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Project Deliverable	Informal Technical Information (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	Technical Recommendation involving management actions, policies, or procedures. (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	Data collection instruments or methodology (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	Detailed research, evaluation or data collection design documents (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	Briefing and briefing materials (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	Adjunct lessons learned technical write-ups, reports, or other forms of documentation (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	Test items; test forms; diagrams; chart exhibits; graphs; slides, or photographs; or combination of these forms. (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	User maintenance manuals for implementation of any models, systems, or other software designed to meet specific requirements of a TO or the contract. (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	Empirical databases or datasets including file formats, layouts, and other documentation (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	All executable and source code developed under this contract (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	Documentation necessary for interpreting and maintaining computer programs developed under this contract. (Unclassified or Controlled Unclassified Information)	D.1.2	To be determined at task order level
Project Deliverable	Problem Notification Report (PNR) (Unclassified)	D.1.16.4	Per Government Request
Contract Deliverable	Key Personnel Designation (Unclassified or Controlled Unclassified Information)	D.1.19.1	At time of proposal submission

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Milestone	CPARS (Unclassified)	D.1.36	Annually (at the Contract Level only)
Contract Deliverable	508 Compliance confirmation (Unclassified)	D.1.41	At time of proposal submission
Contract Deliverable	Non-Disclosure Agreement (Unclassified)	D.1.25.7	As necessary.

D.1.16.2 DELIVERABLE MEDIA

The contractor shall provide electronic copies of each deliverable. Electronic copies shall be delivered via email attachment or other media by mutual agreement of the parties. The electronic copies shall be compatible with current MS Office products or other applications as appropriate and mutually agreed to by the parties.

D.1.16.3 DELIVERABLE REPORTING REQUIREMENTS

All applicable deliverables, their required delivery dates, and destination of delivery will be specified under this contract, or otherwise specified by the COR. The schedule for completion of work to be performed under this contract will be delineated under this contract, as applicable. For purposes of delivery, all deliverables shall be made by close of business (COB) 5:00 P.M. local time (Seaside, California) at destination on the date due.

D.1.16.3.1 All deliverables submitted in electronic format shall be free of any known computer viruses or defects. If a virus or defect is found, the deliverable will not be accepted. The replacement file shall be provided within two (2) business days after notification of the presence of a virus.

D.1.16.3.2 Each deliverable shall be accompanied by a cover letter from the Contractor on company letterhead. Multiple deliverables may be delivered with a single cover letter describing the contents of the complete package.

D.1.16.4 NOTIFICATION REGARDING LATE DELIVERY / PROBLEM NOTIFICATION (PNR)

The Contractor shall notify the DTAC COR via a Problem Notification Report (PNR), PWS Attachment A: Problem Notification Report, as soon as it becomes apparent to the Contractor that a scheduled delivery will be late. The Contractor shall include in the PNR the rationale for late delivery, the expected date for the delivery, and the project impact of the late delivery. The GSA DTAC COR will review the new schedule and provide guidance to the Contractor. Such notification in no way limits any Government contractual rights or remedies including, but not limited to, termination.

D.1.17 EMPLOYMENT OF DEPARTMENT OF DEFENSE (DoD) PERSONNEL RESTRICTED

In performing this contract, the contractor will not use a subcontractor at any tier, as a consultant or employ (on either a full or part-time basis) any active-duty DoD personnel (civilian or military) without the prior written approval of the Contracting Officer. Such approval may be given only in

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

circumstances where it is clear that no laws or DoD, or service instruction, regulations, or policies might possibly be contravened and no appearance of a conflict of interest will result.

D.1.18 TRAINING

The Government will not allow costs, nor reimburse costs associated with the Contractor's training of Contractor employees in an effort to attain and/or maintain any minimum personnel qualification requirements that may be established for performance of this contract. Requirement-specific training costs shall be approved in advance by the COR and related to the program as determined by the CO. The Contractor will maintain the professional qualifications and certifications of its personnel through on-going training. Unless specifically authorized by the Contract, the Contractor will not directly bill the Government for any training.

The Contractor shall provide personnel with expertise to successfully perform the aforementioned tasks and maintain a training program to ensure their staff is adequately trained and current on required skills, certifications, and qualifications. Personnel shall demonstrate good communication skills and shall be flexible and adaptable in a dynamic environment. The Contractor shall effectively participate in planning and strategy sessions, effectively interact with customers, resolve complaints and problems, and keep management properly informed as to operational issues, problems, future needs, and technological developments.

The Contractor shall have experience working with Government-approved software, to include but not limited to, MySQL, Oracle and Microsoft Access databases, Java, C++, .Net, Python, R, RStudio, Fortran, SAS, Adobe Illustrator, Power BI, and Microsoft Office. They should have experience working with eQIP data, JPASE data, CATS data, and OPM DIF data.

The Contractor shall have experience working with Cloud technologies, have experience and expertise working with DoD Security Technical Implementation Guides, Cybersecurity Technical Orders and Directives.

D.1.18.1 The Government will not pay training costs for replacement personnel or for the purpose of keeping Contractor personnel abreast of advances in the State of the art or for training of Contractor personnel on equipment, computer languages, and computer operating systems that are available on the commercial market. The Contractor will have full responsibility for keeping Contractor personnel abreast of advances in the State of the Art.

D.1.19 KEY PERSONNEL

The following are the minimum personnel who shall be designated as "Key." The Government does not intend to dictate the composition of the ideal team to perform this contract. Therefore, the Government encourages and will evaluate additional Key Personnel as proposed by the offeror. The overall contract requires a Managing Director be available throughout the order to assume responsibility for overall contract performance, individual project performance, and deliverables, communication between the contractor and the Government as well as all subcontractors that are part of the contractor's team supporting the Government.

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

The Contractor shall:

- (1) Assign to this contract those key personnel listed in table below. No substitutions shall be made except in accordance with the terms below.
- (2) Agree that during the first 12 months of the contract performance period no key personnel substitutions will be permitted unless such substitutions are necessitated by an individual's sudden illness, death, or termination of employment. In any of these events, the Contractor shall promptly notify the COR and Contracting Officer and provide the information required by paragraph (3) below. After the initial 12-month period, all proposed substitutions must be submitted in writing, at least 15 calendar days (30 days if a security clearance is to be obtained) in advance of the proposed substitutions to the COR and Contracting Officer. These substitution requests shall provide the information required below.
- (3) Requests for approval of substitutions under this PWS must be in writing and provide a detailed explanation of the circumstances necessitating the proposed substitutions. They must contain a complete resume for the proposed substitute or addition, and any other information requested by the Government to approve or disapprove the proposed substitutions. The Government reserves the right to meet all proposed substitutions to ensure they meet qualifications for the proposed position.

D.1.19.1 KEY PERSONNEL DESIGNATION

For the purpose of the overall performance of this effort, the following Contractor Personnel shall be designated as key persons:

- (1) Senior Assessment Specialist / Test Developer
- (2) Senior Psychometrician
- (3) Senior Data Collection Coordinator (Cyber)
- (4) Senior Technical Writer/Editor
- (5) Senior Database Administrator
- (6) Senior Software Engineer
- (7) Data Scientist
- (8) Measurement Analyst / Statistical Programmer
- (9) Workforce Planning Specialist
- (10) Career Counselor
- (11) Cloud Security Engineer
- (12) Cloud Engineer
- (13) Systems Administrator / Network Engineer
- (14) UI/UX Designer
- (15) Quality Assurance Manager
- (16) Customer Support Technician Lead

The Government desires that Key Personnel be assigned for the duration of the contract. The Contractor shall be responsible for managing and overseeing the activities of all Contractor

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

personnel, as well as subcontractor efforts used in performance of this effort. The Contractor's management responsibilities shall include all activities necessary to ensure the accomplishment of timely and effective support performed in accordance with the requirements contained in the performance works statement

D.1.19.1.1 The Contractor shall submit resumes for employees designated as “Key Personnel” and shall contain documented experience directly applicable to the functions to be performed. Further, these prior work experiences shall be specific and of sufficient variety and duration that the employee is able to effectively and efficiently perform the functions assigned. The Government expects the key person identified in the offeror’s quote to meet or exceed the education and experience identified for the labor category. See PWS Attachment C: Key Personnel Requirements Summary document for additional information regarding Key Personnel Qualifications.

D.1.20 USE OF HUMAN SUBJECTS

The following are used in this clause:

(1) Definition.

- (a) Risk: For the purpose of these regulations, unusual and potentially hazardous conditions are those which may be reasonably expected to involve the risk, beyond the normal call of duty, or privation, discomfort, distress, pain, damage to health, bodily harm, physical injury, or death.
- (b) Exemptions: The following categories of activities and investigative programs are exempt from the provisions of these regulations:
 - i. Research and non-research programs, tasks and tests which may involve inherent occupational hazards to health or exposure of personnel to potentially hazardous situation encountered as part of training or other normal duties, e.g.; flight training, jump training, marksmanship training, ranger training, fire drills, gas drills, and handling of explosives.
 - ii. That portion of human factors research which involves normal training or other military duties as part of an experiment, wherein disclosure of experimental conditions to participating personnel would reveal the special nature of such conditions and defeat the purpose of the investigation.
- (c) Human subject. Human subjects are those volunteer participants in an effort, the whole or partial object of the effort of which is measuring changes in their physiological, sociological or psychological behavior.

(A) All human subjects in DTAC efforts who are put at risk by participation in a Research Development Test Evaluation (RDTE) effort shall be volunteers who are informed in advance of the risk involved.

(B) The contractor shall comply with the following minimum conditions for any portion of the research effort in which human subjects participate and are put at risk:

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

- (1) The proposed effort has been reviewed and approved by a committee meeting requirements set forth in Chapter 46 of Title 45 of the Code of Federal Regulations. The number of human subjects used will be kept to the minimum number which will reasonably achieve the required results.
 - (2) The effort must be such as to contribute significantly to a field of knowledge and have reasonable prospects of yielding important results which are not obtainable by other methods or means.
 - (3) The effort will be conducted only by persons possessing requisite scientific qualifications.
 - (4) Human subjects will be informed that at any time during the course of participation they have the right to revoke their consent and withdraw from further participation without prejudice to themselves.
 - (5) Participation by subjects will be immediately terminated if it subsequently appears that the risk to the subjects is significantly greater than anticipated at the time review and approval was granted.
 - (6) There shall be no greater intrusion into the privacy of the human subject than is absolutely necessary for the conduct of the effort involved. Except for the submission of reports and other data required by this contract any information obtained about human subjects as a result of participation shall be held as **confidential** as the law allows.
 - (7) The degree of risk to be taken will never exceed that which is justified by the benefits to the subjects, or significance of the scientific knowledge to be gained.
 - (8) Proper preparations will be made, and adequate facilities provided, to protect the subject against all foreseeable possibilities of injury, disability, or death, discomfort, suffering or injury.
 - (9) Human subjects will not be used who have physical or mental conditions which will make participation more hazardous for them than it would be for normal healthy persons, unless such condition is a necessary prerequisite for the research involved. In any such cases the use of human subjects with such pre-existing conditions must have been specifically described and justified in the scope of the work to be performed under this contract.
 - (10) The scientifically qualified person conducting the research and each member of the research team, shall terminate the subject's participation at any stage if he has reason to believe, in the exercise of good faith, superior skill, and careful judgment required of him, that continuation is likely to result in injury, disability or death to the human subject.
- (C) In each portion of a research effort in which human subjects are put at risk, and in such others as the DTAC scientist supervising the effort may direct, the contractor or Grantee shall insure that the following conditions for voluntary consent are met, before permitting any person to participate as a human subject:
- (1) Legally effective informed consent will be obtained by adequate and appropriate methods in accordance with the provisions of this clause.
 - (2) All consent must be voluntary knowing consent of the individual or his legally

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

- authorized representative, so situated as to be able exercise free power of choice without any use of force, fraud, deceit, duress, constraint, coercion, or unlawful or improper inducement. The elements of information necessary to such consent includes:
- (a) A fair explanation of the procedures to be followed, and their purpose, including identification of any procedures which are experimental;
 - (b) A description of any attendant discomfort or risk reasonably to be anticipated;
 - (c) A description of any benefits reasonably to be anticipated;
 - (d) A disclosure of any appropriate alternative procedures that might be advantageous to the subject;
 - (e) An offer to answer any questions concerning the procedures;
 - (f) An instruction that subject is free to revoke his consent and to discontinue participation at any time without prejudice.
- (D) Exculpatory language through which the subjects are made to waive, or appear to waive, any of their legal rights, including any release from liability for negligence, is prohibited.
- (E) Consent by subjects or their legally authorized representative shall be obtained in writing whenever it is reasonably possible to do so. The consent form may be read to subjects or their legally authorized representative, but, in any event, they or their legally authorized representative must be given adequate opportunity to read it and to ask any questions they might have. This consent form should then be signed by the subjects or their legally authorized representative and by a witness not directly involved in the study. Oral consent may be used only when it has been specifically described and justified in the scope of the work to be performed under this contract or approved in writing by the Contracting Officer. When so authorized and used, oral consent is subject to all the same standards as apply to written consent, except that the signature of the subjects or their legally authorized representative is not required.
- (F) Prisoners of war will not be used under any circumstances.
- (G) Provisions should normally be made for a post-study debriefing of subjects. Such provisions recognize an ethical obligation to ensure that subjects remain well informed as to all aspects of their participation, and minimize the chances that subjects might terminate their participation with misunderstandings as to the nature of their participation or the results obtained. Such debriefing should be considered mandatory wherever an exception has been granted for the experimental design to contain some element of deception.

D.1.21 CONTRACTOR FACILITIES

The contractor will use Government furnished equipment and information when available. The contractor is responsible for its off-post office facilities as required; however, contractor support will generally be accomplished on-site at Government facilities. In such cases, the Government will provide the necessary office space and administrative support systems/equipment.

D.1.22 USE OF GOVERNMENT PROPERTY/INFORMATION

Unless otherwise specified in a Task Order, the Contractor shall provide all office equipment and consumable supplies at the Contractor's sole and exclusive expense, including computers/workstations used in daily operation in support of the Contract. The CO must tailor property clauses, provisions, and other applicable terms and conditions specific to each Task Order.

D.1.22.1 RESPONSIBILITY OF GOVERNMENT INFORMATION

The contractor must protect from unauthorized disclosure any materials or information made available by the Government, or that the contractor has access to by virtue of the provisions of this contract or order issued hereunder, that are not intended for public disclosure. The materials and information made available to the Contractor by the Government, or that the Contractor comes into contact with, in completing this contract or order issued hereunder, are the exclusive property of the Government. Any information or materials developed by the Contractor in the performance of this contract are also the exclusive property of the Government. Upon completion or termination of this contract or order, the contractor shall turn over to the Government, all materials (copies included) that were furnished to the Contractor by the Government, and all materials that were developed by the Contractor in the performance of this contract or order.

D.1.22.2 GOVERNMENT FURNISHED SOFTWARE

In lieu of any other warranty expressed or implied herein the Government warrants that any programming aids and/or software packages supplied for use as Government Furnished software will be suitable for their intended use on the system(s) for which designed. In the case of software aids and/or packages acquired by the Government from a commercial source, such warranty is limited to that set forth in the contractual document covering the product(s). If the Government Furnished Software is not suitable for their intended use on the system(s) for which designed, except where property is furnished "as is", the Contractor shall notify the Contracting Officer's Representative (COR) and supply documentation regarding any defect and their effect on progress under this contract. The Contracting Officer, upon receipt of a written request, shall consider equitably adjusting the delivery or performance dates of the contract, and/or price, and any other contractual provision affected by the software.

D.1.22.3 CONTRACTOR USE OF GOVERNMENT EQUIPMENT

As outlined in FAR 45.000(b)(5), there may be Government property that is incidental to the place of performance, when the contract requires contractor personnel to be located on a Government site or installation, and when the property used by the contractor within the location remains accountable to the Government. If required, these items will be provided at the task order level. These items are considered to be incidental to the place of performance including, for example, office space, desks, chairs, telephones, computers, and fax machines. These types of items will remain on the Government's property book and hand received to the contractor employee. The

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

contractor is required under the PWS to have an effective in/out processing program which ensures all hand received items are returned by the contractor employee upon contract termination or employee departure/termination. Any property so provided shall only be used for contract performance-related purposes. For example, information resources (computers, telephones, facsimile machines, etc.) shall not be used for activities such as accessing pornographic materials/websites, personal business, playing games, or "surfing" the internet. Prior to beginning performance under this contract, the contractor shall instruct each employee on the proper use of Government property. As each new employee is hired, they shall also be briefed before performing work under this contract. Each employee should also be informed that use of Government information resources constitutes consent to monitoring/search. A copy of the content of the briefing shall be submitted to the Contracting Officer prior to the contract start date. A record of who was briefed, and when, shall be kept in a file that shall be made available to the Co and/or COR upon request.

Implementation Guidance for Contract Place of Performance – Public Health Considerations: If, at the time of task order issuance, hand receipted property otherwise considered incidental no longer meets the incidental criteria due to Public Health Considerations, the property would then be considered Government Furnished Property and the appropriate FAR and DFARS property clauses (see FAR 45.107 and DFARS 245.107) included in the contract would then apply and the contractors property control plan invoked.

If, at the time of task order issuance, it is determined to be in the best interest of the Government to furnish additional GFP, other than property ordinarily considered incidental discussed above, the appropriate FAR and DFARS property clauses (see FAR 45.107 and DFARS 245.107) included in the contract would then apply to that order, the contractor's property control plan invoked, with correlating annual inventory requirements.

D.1.22.4 PROPERTY MANAGEMENT SYSTEM

The contractor shall maintain an acceptable Property Management System throughout the duration of the contract. The contractor shall provide technical expertise to support receipt, storage, handling, inventory, employment, and disposal of property supporting this TO. The contractor's execution and maintenance of its Property Management System in support of this contract shall comply with FAR 52.245-1 and DFARS 252.245-7003.

D.1.23 DOD INFORMATION ON NON-DOD INFORMATION SYSTEMS

Assistant Secretary of Defense Directive-Type Memorandum (DTM) 08-027, Security of Unclassified DoD Information on Non-DoD Information Systems, dated July 31, 2009, sets forth the policy on the protection of information owned by the Department of Defense (DoD) or operated on the behalf of DoD on non-DoD information systems. DoD established this policy in accordance with the authority in 35 U.S.C § 44, DoD Directive 5144.1, DoD Directive 5230.09, DoD Instruction 8510.01 and DoD Manual 5220.22-M. This DTM mandates that contractors protect DoD information and DoD information systems appropriately. The contractor must comply with the DFARS 252.204-7000 clause, and, in the event of the contractor using a

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Cloud-based system in performance of the contract requirement, the contractor must comply with DFARS 252.239—7009, DFARS 252.239-7009, and Subpart 239.76.

D.1.23.1 Under this contract, the contractor will: (1) receive information that DoD provides; or (2) collect, develop, receive, transmit, use or store information in support of an official DoD activity. Therefore, the contractor shall ensure that all contractor employees know and understand the requirements regarding the protection of DoD information. Moreover, the contractor shall ensure that all of its employees and agents, as well as employees and agents of any subcontractor, comply with all of these requirements.

D.1.23.2 The contractor shall disseminate such information to the extent required to further the contract objectives, provided that the information is disseminated within the scope of assigned duties and with a clear expectation that confidentiality will be preserved. The contractor shall not process DoD information on public computers or computers that do not have access control. Moreover, the contractor shall protect information by at least one physical or electronic barrier (e.g., locked container or room, login and password) when not under direct individual control. The contractor shall sanitize media (e.g., overwrite) before external release or disposal. The contractor shall encrypt all information that has been identified as controlled unclassified information (CUI), when it is stored on mobile computing devices (such as laptops and personal digital assistants) or removable storage media (such as thumb drives and compact disks) using the best available encryption technology. The contractor shall collect, store, and process CUI data on a system that has been assessed in accordance with DFARS 252.204-7000, DFARS 252.204-7008, DFARS 252.204-7009, DFARS 252.204-7010, DFARS 252.204-7012, and DODI 8582.01.

D.1.23.3 The contractor shall limit information transfer to subcontractors or teaming partners with a need to know and a commitment to at least the same level of protection. The contractor shall transmit e-mail, text messages and similar communications using technology and processes that provide the best level of privacy available, given facilities, conditions, and environment. Examples of recommended technologies or processes include closed networks, virtual private networks, public key-enabled encryption, and Transport Layer Security (TLS). The contractor shall encrypt organizational wireless connections and use encrypted wireless connection where available when traveling. If encrypted wireless is not available, the contractor shall encrypt application files (e.g., spreadsheet and word processing files) using at least application-provided password protection level encryption. The contractor shall transmit voice and fax transmissions only when there is a reasonable assurance that access is limited to authorized recipients.

D.1.23.4 The contractor shall not post DoD information on website pages that are publicly available or have access limited only by domain or internet protocol restriction. The contractor may post such information on website pages that control access by user identification or password, user certificates or other technical means and provide protection via use of TLS or other equivalent technologies. The intranet may also provide access control.

D.1.23.5 The contractor shall provide protection against computer network intrusions and

ID0XXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

data exfiltration, minimally including the following: (1) current and regularly updated malware protection services, e.g., anti-virus, anti-spyware; (2) monitoring and control of inbound and outbound network traffic as appropriate (e.g., at the external boundary, sub-networks, individual hosts) including blocking unauthorized ingress, egress, and exfiltration through technologies such as firewalls and router policies, intrusion prevention or detection services, and host-based security services; and (3) prompt application of security-relevant software patches, service packs and hot fixes.

D.1.23.6 The contractor shall comply with other current federal and DoD information protection and reporting requirements for specified categories of information (e.g., medical, critical program information (CPI), personally identifiable information, export controlled) as specified in this contract. The contractor shall report loss or unauthorized disclosure of information in accordance with contract or agreement requirements and mechanisms.

D.1.23.7 The Contractor and all Contractor personnel with access to or responsibility for nonpublic Government data under this contract shall comply with DoD Instruction 8500.01 Cybersecurity, DoD Instruction 8510.01 Risk Management Framework, NIST SP 800-53 Cybersecurity Controls and Enhancements, DoD Directive 5400.11 DoD Privacy Program, DoD 6025.18-R DoD Health Information Privacy Regulation, ~~DoD 5200.2-R Personnel Security Program~~, and Homeland Security Presidential Directive (HSPD) 12. When a Contractor or their Subcontractors are required to have physical access to a Federal controlled facility or access to a Federal information system, the Contractor shall comply with agency personal identity verification procedures in the contract that implement Homeland Security Presidential Directives-12 (HSPD-12).

D.1.24 GENERAL PURPOSE OFFICE EQUIPMENT (GPOE) AND INFORMATION TECHNOLOGY (IT) COSTS

The cost of acquisition of GPOE and IT shall not be allowable as a direct charge to this contract. The Contractor is expected to have the necessary facilities to perform the requirements of this contract, including any necessary GPOE and IT. GPOE means equipment normally found in a business office such as desks, chairs, computers, calculators, file cabinets, etc. IT is defined as any equipment or interconnected system or subsystem of equipment that is used in the automatic acquisition, storage, manipulation, movement, control, display, switching, interchange, transmission, or reception of data or information. IT equipment includes computers, ancillary equipment, software, firmware and similar products, support services, and related resources.

D.1.25 SECURITY

8.1 Personnel Security. Overarching security requirements are [unclassified](#). Contractor and subcontractor personnel require [unclassified](#) access to [DoD network\(s\)](#), [Information Technology \(IT\) systems](#), and [Government Furnished Equipment \(GFE\)](#). Contractor and subcontractor personnel must obtain, [DoD credentials](#), (also known as the [Common Access Card \(CAC\)](#)) for physical and logical access to federally controlled facilities and [DoD Information Systems \(IS\)](#) containing [Personally Identifiable Information \(PII\)](#) or [Controlled Unclassified Information \(CUI\)](#).

8.1.1 The contractor and subcontractor personnel on this contract will be designated performing in **noncritical-sensitive** positions with **unclassified** access. Personnel assigned to this contract are required to obtain and maintain a **Tier 3** background investigation (BI) and adjudication or suitability determination. This designation aligns with investigative requirements outlined by Defense Counterintelligence and Security Agency (DCSA), and in accordance with the DoDI 5200.02, DoDM 5200.02, and 32 C.F.R. **Part 156**.

8.1.3 No employee may perform under this contract or have access to information or systems under this contract until they have completed a **Tier 3** or higher background investigation (BI) that meets the requirement or be in the process of a Personnel Security Investigation (PSI) with a minimum of interim eligibility.

8.2 Staffing. Contractor personnel requiring access to DHRA-sponsored resources (e.g., DHRA-sponsored credentials, DoD networks, DoD IT systems, DoD Information Systems (IS), CUI/PII data, or federally controlled facilities) must be citizens of the United States. This citizenship requirement also applies to personnel assigned to or working on the contract at any remote site.

8.3 Onboarding. Prior to requesting access to DHRA-sponsored resources, the contractor must submit an official request through the DHRA onboarding system using a secure method (e.g., encrypted email or DoD SAFE). The request must include a completed Defense Logistics Agency Headquarters (DLAH) Form 1728, Request for HQC Contractor Badge and/or Information Technology (IT) Access. The DHRA Security office and the Defense Logistics Agency (DLA) Personnel Security (PERSEC) office will validate that the contractor meets the DoD background investigation requirements based on the request.

8.4 Listing of employees & Clearance Documentation. The Contractor shall maintain a current listing of employees. Within 10 calendar days of contract award, the Contractor shall provide the COR with a list of all company employees assigned to this effort. The employee list should include the following information: contract number, employee information (full legal names), DHRA center/office, location of performance, clearance level needed (e.g., Top Secret/SCI, Top Secret, Secret, or None [Position of Trust determination for unclassified access]), and IT access needed (e.g., privilege, authorize or other). The list shall be validated by the company and DHRA Security. The Contractor shall provide the COR with an updated listing whenever an employee's status or information changes.

8.5 Access to Sensitive Information. To the extent that the work under this contract requires the Contractor to have access to DoD sensitive information, the Contractor shall, upon receipt, treat such information as sensitive and safeguard it from unauthorized use and disclosure. The Contractor shall not appropriate such information for its own use or disclose such information to third parties unless specifically authorized by the Government in writing.

8.5.1 The Contractor shall only allow access to sensitive information to those employees who need it to perform services under this contract and who have acknowledged that it shall be used solely for that purpose. The Contractor shall prevent its employees from discussing, divulging, or disclosing any sensitive information to any person or entity except those within the Contractor's organization directly performing the contract.

8.6 Operations Security (OPSEC) Requirements. The Contractor is not required to develop an OPSEC

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Plan. However, the Contractor shall comply with DoD Directive 5205.02E and the requiring activity's OPSEC program. Contractor employees must complete Level I OPSEC Awareness training. New employees must be trained within 30 calendar days of their reporting for duty and annually thereafter. The Contractor shall maintain all OPSEC training records and shall provide copies to the COR upon request.

8.7 Information Technology (IT) Investigation Requirements. The contractor/subcontractor personnel supporting this contract will require [Privilege \(High\) or Authorized \(Moderate\)](#) access to DHRA IT & Information.

8.7.1 Contractor personnel, who perform work on sensitive networks, IT systems or applications, must possess and maintain the appropriate background investigation (BI) and adjudication determination. The Contractor shall assure that individuals assigned to the contract undergo the respective BI and obtain the proper eligibility, based on job function or tasks performed, before performing any work or accessing any systems or information under the contract.

8.7.2 IT position category designation does not imply or convey authorization to access classified information.

8.7.3 The IT access requirement will determine the category needed to perform work on the DoD IT Systems/Networks. The IT designated is based on the IT system/network requirements according to the DoD Cyber Security Technical Implementation Guides (STIGs) available at <https://public.cyber.mil/stigs/>.

8.7.4 It is the contractor's responsibility to ensure that employees meet the appropriate Tier investigation requirements before requesting IT access.

8.7.5 Privilege Access – High Risk: This category includes all personnel in positions responsible for the planning, direction, and implementation of a computer security program, which may include, but is not limited to:

- Enterprise Administrator
- Domain Administrator (AD Admin)
- Server or System Administrator
- Network Administrator
- Desktop/Workstation Administrator
- Database Design and Administration
- Database – System DBA (Sudo to Oracle, remove logs, modify items that change STIG posture)
- Database – Application DBA (Select / add / update data, can deploy objects: SQL types, packages, triggers, etc.)
- Application Administrator
- Web Design and Administration
- Other: Positions with major responsibility include the direction, planning, design testing, maintenance, operation, monitoring, and/or management of systems hardware and software; or, can access a system during the operation or maintenance. (e.g., privileged access and/or systems security oversight).

8.7.5.1 Contractor personnel in positions with significant involvement in life-critical or mission-critical systems pose a relatively high risk of causing grave damage to National Security.

8.7.5.2 All personnel identified in one or more of these roles above must complete a Tier 5 (T5) or Tier 5 Reinvestigation (T5R), an equivalent or higher BI to meet the Special-Sensitive/Critical-Sensitive role. In accordance with the Department of Defense Cloud Computing Security Requirements Guide, all Contractor

personnel requiring privileged user access to DoD impacted infrastructure on this contract must either have a T5 or T5R, or have a T3 or T3R and documentation defining "work is carried out under *technical review* of a person with a T5 or T5R."The Contactor will maintain at least one senior person with *technical review* responsibilities for all personnel with privileged access to DoD impacted infrastructure.

8.7.6 Authorize Access – Moderate Risk: This access level applies to all personnel in positions where they are responsible for the direction, planning, design, operation, or maintenance of a computer system, and whose work is *technically reviewed* by a higher authority. All personnel performing these job functions must complete a Tier 3 (T3) or Tier 3 Reinvestigation (T3R), or an equivalent or higher background investigation (BI), to meet the requirements for a Noncritical-Sensitive role. These roles may include, but are not limited to:

- Individuals with access to, or the ability to, aggregate and extract large-scale data (more than 100,000 records) containing Personally Identifiable Information (PII) from an automated records repository.
- Other positions designated by the Agency head that involve a degree of access to a system creating a significant potential for damage or personal gain less than that in *Privilege* positions.

8.8 Personal Identifiable Information (PII) and Tier Investigations. All personnel supporting this contract must protect PII data according to the Privacy Act of 1974. Personnel requiring access to Information Technology (IT) or access to DoD Information Systems that contain military active duty, guard, or reservists' PII or information pertaining to Service members that are otherwise protected from disclosure, where such access has the potential to cause serious damage to national security, must be vetted accordingly and protect the data. Background Investigations (BI) levels required for each job function or necessary access include, but are not limited to, the following:

8.8.1 Tier 5/Tier 5R for Special-Sensitive/Critical-Sensitive – High Risk: All personnel with administrative capabilities in a system storing PII, personnel security investigations, or adjudication determinations require a Tier 5 (T5) BI.

8.8.2 Tier 3/Tier 3R for Noncritical-Sensitive – Moderate Risk: All personnel with the ability to aggregate or extract military PII en masses from an automated records repository require, at a minimum, a favorably adjudicated Tier 3 (T3) BI or equivalent.

8.8.3 Tier 1 for Non-Sensitive – Low Risk: All Personnel whose access to military PII is limited to data entry or singular search capability require, at a minimum, a favorably adjudicated Tier 1 (T1) BI.

8.8.4 The Contractor shall report any privacy breach immediately to the DHRA Privacy Office and secondly to the COR.

8.9 Controlled Unclassified Information Requirements for DoD Contractors. The following procedures will be used to protect Controlled Unclassified Information (CUI) documents and materials:

8.9.1 HANDLING: Access to CUI material shall be limited to those employees needing the material to perform their duties. The CUI marking is assigned to documents and material created by a DoD User Agency. CUI is not a classification, but requires extra precautions to ensure it is properly safeguarded and disseminated and is not released to the public without government authorization.

8.9.2 **MARKING:** The Contractor shall mark unclassified documents containing CUI as follows: “CUI” at the top and bottom of each page, include the CUI warning box, and the CUI Designation Indicator Block as required in DoDI 5200.48.

8.9.2.1 Mark other records such as computer print outs, photographs, films, tapes, or slides in accordance with DoDI 5200.48 so the receiver or viewer knows that it contains CUI material.

8.9.2.2 Mark a message containing material in accordance with DoDI 5200.48. Unclassified messages containing CUI material must show the abbreviation (CUI) before the text begins.

8.9.2.3 Ensure documents transmitting CUI material call attention to any attachments containing CUI.

8.9.2.4 CUI material released to a contractor by a DoD user agency must have the following statement on the front page or cover:

THIS DOCUMENT CONTAINS CUI MATERIAL AND MUST BE REVIEWED BY A GOVERNMENT REPRESENTATIVE UNDER THE REQUIREMENTS OF DODI 5200.48, DODI 5230.09, and DODI 5230.29.

8.9.3 **STORAGE:** The Contractor shall, place CUI material in an out-of-sight location during normal work hours, if the work area is accessible to persons who do not have an authorized government purpose for access to the material. After normal duty hours, the Contractor shall store CUI material to prevent unauthorized access by filing it with other unclassified records in unlocked files or desks when internal building security is provided and the file is marked as CUI. When there is no internal security, locked buildings or rooms usually provide adequate after hours protection. For additional protection, store CUI material in locked containers such as file cabinets, desks, or bookcases.

8.9.4 **TRANSMISSION:** CUI documents and materials may be transmitted via first class mail, parcel post or, for bulky shipments, fourth class mail. Within the CONUS discussion of CUI material on the telephone is authorized if necessary for the performance of the contract and no alternative is available. Electronic transmission of CUI (voice, data, or facsimile) should be by using approved and secure communications systems whenever practical. If there is a fax transmission, the sender must ensure the intended receiver is available to receive it or a cover sheet will be used to allow carrying it to the final recipient to avoid unauthorized disclosure of the CUI.

8.9.5 **RELEASE:** CUI material shall not be released outside of the contractor’s facility except to the representative of DoD or DHRA.

8.9.6 **DESTRUCTION:** When the CUI material no longer meets the threshold for safeguarding and dissemination, the Contractor shall immediately decontrol it, process it through the records management process, and destroyed by the approved methods identified in DoDI 5200.48 to preclude its disclosure to unauthorized individuals by rendering it unreadable, indecipherable, and irrecoverable.

8.10 Position of Trust (POT) Requirements. DCSA offers tiered background investigations, ranging from Tier 1 (T1) to Tier 5 (T5), to determine Position of Trust eligibility. Tier 5 (T5 is the most stringent investigation, while Tier 1 (T1) is the least stringent.

ID0XXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

8.10.1 The Government is responsible for funding Position of Trust background investigations or sponsoring a DoD-determined equivalent background check for unclassified access.

8.10.2 The Position of Trust Background Investigation (BI) process requires the DoD Government Security Office to review each request and establish the BI sponsorship. Submit a request and a list of personnel requiring security investigation to the DHRA Security Office point of contact(s) (to be provided by the COR) no later than five (5) business days after contract award.

8.10.3 According to DCSA, a **T3 or T3 Reinvestigation (T3R)** background investigation meets the requirements for a **Noncritical-Sensitive** position. A new application for a DoD **T3/T3R** BI for Position of Trust determination requires an FBI fingerprints check, proof of U.S. Citizenship, and a Personnel Security Questionnaire (PSQ) completed on the **Standard Form (SF) 86** using the National Background Investigation Services (NBIS) electronic Application (eApp). Contractor employees shall provide all requested information pursuant to the Privacy Act of 1974 when requested by the Government. The Government Security Office will provide instructions, specific to the individual case and Tier BI level, on how to access the eApp system. For information, visit NBIS website at <https://www.dcsa.mil/is/nbis/>

8.10.4 **Reciprocity.** DHRA and DLA Personnel Security (PERSEC) officers leverage reciprocity to the greatest extent possible. If necessary, will request re-adjudication by the DCSA adjudications to comply with DoD standards as outlined in Executive Order E.O 13488.

8.10.4.1 BI equivalency will be determined according to the investigative alignments provided by DCSA, as detailed in the following document:

https://www.dcsa.mil/Portals/91/Documents/pv/GovHRSec/Position_Designation_Investigation_Type_Chart_Sept_2017.pdf

8.10.4.2 Reciprocity considerations include verifying any break in federal service (e.g., U.S. Military, U.S. Civilian or U.S. Contractor) exceeding 24 months since the last favorable investigation.

8.10.5 A new Position of Trust applicant under this contract, must, at a minimum, obtain interim eligibility approval from DLA Security before being assigned to and performing duties in support of the Government in this contract.

8.10.6 DHRA Security sponsors interim Position of Trust eligibility, which DLA PERSEC approves.

8.10.7 Personnel with interim Position of Trust eligibility are expected to, including but not limited to:

8.10.7.1 Comply with all personnel security requirements specified by DHRA and DLA PERSEC;

8.10.7.2 Obtain and maintain favorable FBI fingerprint results.

8.10.7.3 Comply with all investigative and adjudicative requirements, including responsiveness to time-sensitive requests (e.g., interview(s), additional information, or clarification) from the DHRA Security, DLA PERSEC, a DCSA investigator, or the adjudicative agency.

8.10.7.4 Obtain and maintain favorable eligibility to the designated background investigation.

8.11 Controlled/Restricted Areas. The Contractor shall comply with local procedures for entry to all

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

DoD/DHRA controlled or restricted areas where Contractor personnel will be working.

8.12 Physical Security. The Contractor shall safeguard all Government property and controlled forms provided for Contractor use and shall adhere to the Government property requirements outlined in this contract. At the conclusion of each workday, all Government facilities, equipment, and materials must be secured.

8.13 Pass and Identification Items. The Contractor shall ensure that all necessary passes and identification items required for contract performance are obtained for employees and non-government owned vehicles.

8.14 DoD Credentials/Common Access Card (CAC). Contractor personnel must obtain a DoD credential or CAC if their assigned duties under this contract require recurring access to any of the following: DoD networks, CUI/PII data, IT/Information Systems, DoD Facilities, or non-DoD federally controlled facilities on behalf of the DoD. This requirement is in accordance with DODM 1000.13, DoD Identification (ID) Cards: ID Card Life-Cycle.

8.14.1 Comply with Homeland Security Presidential Directive 12 (HSPD-12) Personal Identity Verification (PIV) issuance requirements. Obtain a CAC or PIV and maintain a ready status before requesting access to DoD resources, such as DoD facilities, DoD IT/Information Systems (IS).

8.14.2 CAC Applicants supporting this contract must meet the following requirements:

8.14.2.1 Execute, and obtain/maintain a favorable FBI National Criminal History Check (fingerprint check);

8.14.2.2 Posses a Tier 3 or higher BI to meet the access or sensitivity requirements for the role or job;

8.14.2.3 Be prepared to provide two forms of identification (I-9 documents);

8.14.2.4 Provide proof of U.S. Citizenship.

8.15 Key Control/Access Badge Control. The Contractor shall establish and implement methods of making sure all keys/badges issued to the Contractor by the Government are not lost or misplaced and are not used by unauthorized persons. The Contractor shall not duplicate any keys issued by the Government.

8.15.1 Prohibited Use. The Contractor shall prohibit the use of keys issued by the Government by anyone other than the Contractor's employees. Contractor employees shall not open locked areas to permit the entrance of anyone other than Contractor employees engaged in the performance of contract work requirements in those areas.

8.16 Conduct while on Government Installation. The Contractor shall not assign work or direct its employees to access government information, systems, or installations unless the employees possess and maintain the required background investigation, clearances, and authorizations.

8.17 Weapons, Firearms, and Ammunition. Contractor employees are prohibited from possessing

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

weapons, firearms, or ammunition, either in their possession or within their contractor-owned vehicle or privately-owned vehicle, while on any government installation.

8.18 Reporting Requirements. Contractor personnel shall report to an appropriate authority any information or circumstance they are aware that may pose a threat to the security of government or contractor personnel, resources, or information.

8.19 Government Furnished Equipment (GFE). The Contractor shall establish and implement procedures to protect Government Furnished Equipment (GFE), including laptops and data processing devices, from lost, misplacement, unauthorized use, and connection of unauthorized external devices. The Contractor shall report any lost GFE to the COR within two (2) hours of discovery. If GFE is lost, the Contracting Officer may direct the Contractor in writing to replace the equipment at no additional cost to the Government; otherwise, the Government may replace the equipment and deduct the cost from the Contractor's monthly payment.

8.20 Offboarding.

8.20.1 Coordination with COR. The Contractor shall coordinate the removal of personnel from work under this contract with the COR upon any of the following occurrences: contract completion, personnel relocation, retirement, resignation, termination, inability to meet contract expectations, or violation of DHRA security policies. In addition, if any Contractor personnel supporting this contract are unable to obtain or maintain the required security clearance or eligibility, the Contractor shall immediately notify the COR. The Contractor shall remove the individual from roles performed under this contract and replace them with a qualified individual possessing the necessary knowledge, skills, and abilities (KSAs) to perform the services. When offboarding personnel, the Contractor shall:

8.20.1.1 Utilize DHRA's employee termination checklists, and notification systems, ensuring all relevant parties are informed of the individual's departure.

8.20.1.2 Retrieving Identification Media. The Contractor shall ensure that all identification media, including vehicle passes and credentials (e.g., CACs, badges, identification cards) is retrieved and returned to the COR, their local Installation Access Control Office, or the Government Security Office.

8.20.1.3 Ensure issued tokens are returned to the appropriate Certificate Authority (CA) or the respective issuing authority.

8.20.1.4 Provide an updated list of personnel to the COR within three (3) business days of any change.

~~DoD 5200.2-R, DoD Personnel Security Program~~, assigns DoD contractor personnel who perform work on IT systems to one of three ~~ADP position categories (ADP-I, ADP-II, ADP-III)~~ that equate to Critical Sensitive, Non-Critical Sensitive, and ~~Non-Critical~~, respectively. ~~DoD 8500.2, Information Assurance~~ Implementation renamed the ~~ADP position categories as IT Level I (IT-I) (Privileged), IT-II (Limited Privileged), and IT-III (Non-Privileged)~~, respectively. The term IT is synonymous with the older term ~~ADP~~.

D.1.25.1 Any contractor employees who work in support of this order that have access to the DoD sensitive data must comply with the ~~National Agency Check with Inquiries (NACI)~~

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

investigative process for ~~IT-H access~~ in accordance with procedures identified by the DHRA, responsible for oversight of all security for DTAC. Individuals proposed for positions on this order requiring a DHRA sponsored CAC or access to DoD network(s), CUI/PII data or IT/Information Systems must be capable of being “vetted” to the IT level, as determined / specified by DHRA, in accordance with DoD Regulation ~~5200.1-R, Personnel~~ who are charged with security as a duty should be professionally certified to the IT level-1 category as specified in ~~8570.01-M~~.

D.1.25.2 The contractor must implement non-disclosure statements to be signed by all of its employees with access to DTAC applications, Administrator passwords (such as for, but not limited to RAPIDS, DBIDS, DNVC, DCCIS, NTS, ETAS, etc.) to ensure that portion of the DoD PKI remains safeguarded. The contractor should refer to DoD Regulation ~~5200.2-R, Personnel Security Program~~ for details.

D.1.25.3 The Government retains the right to direct removal and exclusion from DTAC facilities of any contractor personnel, regardless of prior clearance or adjudication status, whose actions, while assigned to these tasks, conflict with the interests of the Government. Such removal or exclusion will not entitle the contractor to additional compensation or additional time to complete the tasks described in this contract.

~~D.1.25.4~~ ~~NATIONAL AGENCY CHECK & INQUIRIES (NACI)~~

All tasking (not related to classified systems/applications) described in this PWS are Unclassified and the level of clearance, ~~National Agency Check & Inquiries (NACI)~~, or IT level of access required is specified in DoD Regulation ~~5200.1-R~~. All personnel working at DTAC facilities or needing access to Government IT systems will be required to obtain a security clearance at the required level of access. Individuals proposed for positions requiring a DHRA sponsored CAC or access to DoD network(s), CUI/PII data or IT/Information Systems must be capable of being qualified at the proposed IT level in accordance with DoD Regulation ~~5200.1-R~~. U.S. citizenship is required for all personnel requiring a DHRA sponsored CAC or access to DoD network(s), CUI/PII data or IT/Information Systems. This includes personnel assigned or working on the contract at any remote sites. All documentation and cost for clearance processing shall be the responsibility of the contractor. No contractor employee shall commence work under this contract until the appropriate paperwork for trustworthiness determination and / or security clearance has been granted.

D.1.25.5 TRUSTWORTHINESS DETERMINATION AND SECURITY CLEARANCES Work on this project may require that personnel have access to sensitive unclassified information. In the event the contractor is given access by the Government to sensitive Government data, the contractor hereby agrees to protect such data from unauthorized use or disclosure as long as such data remains sensitive. In order to protect this sensitive information, the contractor shall comply with DoD Regulation ~~5200.1-R~~, Information Security Program and DoD Regulation ~~5200.2-R~~, Personnel Security Program.

D.1.25.5.1 The contractor shall take reasonable care to deny access to unauthorized

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

persons, maintain an established information security policy, and uphold procedures for safeguarding and controlling the protected information, so that it is exposed only to those who have a need to know the information and a duty to protect it. The duty to protect shall be established by a confidentiality agreement with the employee.

D.1.25.5.2 Additionally, as required personnel will have access to system administrator accounts and passwords. The contractor shall safeguard this information and shall not share this information, without the express permission of the Government Contracting Officer Representative. The contractor personnel issued CACs will be required to sign a ~~DD Form 2841, “Department of Defense (DoD) Public Key Infrastructure (PKI) Certificate of Acceptance and Acknowledgement of Responsibilities”~~ and shall adhere to these responsibilities.

D.1.25.5.3 Contractors are required to attend annual Security Awareness training and other security related training provided by the DTAC to ensure users understand all DTAC and DoD protocols.

D.1.25.5.4 Contractor Badging Roster

The contractor shall provide a monthly employee roster showing the status of all Government issued badges and identity cards (CAC, Security, etc) with the date the employee was hired, description of the badge issued, the issue date, employee termination date, and the badge surrender date. The contractor shall manage their employee in processing/out processing process in a manner which ensures all Government issued badges are returned prior to employment termination, but no later than 30 days of employee departure.

D.1.25.6 IT SECURITY COMPLIANCE & CYBERSECURITY

D.1.25.6.1 The Contractor shall abide by DHRA security policies and models for system architecture and technology. The contractor shall meet DHRA security requirements in three areas of: Authentication, Authorization, and Auditing. Security information technology will adhere to and be guided by program inception, elaboration, construction, and maintenance Service Oriented Architecture (SOA) life cycle methodology (sees DOD Architecture Framework, DoDAF v1.5; see www.defenselink.mil).

D.1.25.6.2 The contractor shall execute all activities and tasks required to develop and maintain DoD systems and applications in accordance with DoD, DHRA, and DMDC, policies, directives, instructions, processes, procedures, and guidance. The Deputy Director, DHRA is the DHRA Chief Information Officer (CIO) and Authorizing Official (AO) for DHRA managed systems and applications. DMDC oversees IT system portfolio management and cybersecurity for the entire DHRA enterprise (including DHRA Headquarters and Components, Centers, and Offices) DMDC provides IT strategy, guidance, policy, oversight, and reporting for all DHRA systems.

D.1.25.6.2.1 The Contractor shall manage the DPACS and WPDT ATO package(s) with a system categorization of medium confidentiality, high integrity, high availability, with a Privacy overlay,

and without a Financial overlay.

System Name	Confidentiality	Integrity	Availability	Privacy Overlay	Financial Overlay	(New system) Need by date	(Current System) Authorization Termination Date
DPACS	Moderate	Moderate	Moderate	Yes	No	Existing	June 2027
WPDT	Low	Low	Low	No	No	Existing	August 2026

D.1.25.6.3 Cybersecurity requirements apply to all IT systems and applications that receive, process, store, display, or transmit DoD information. The Contractor must acquire, configure, operate, maintain, and dispose of IT systems and applications consistent with DoD cybersecurity policies, standards, and architectures.

D.1.25.6.4 Risk Management Framework

D.1.25.6.4 .1 All DoD IS or DOD information in electronic format must be authorized to operate by the Authorizing Official (AO) according to Department of Defense (DOD) Instruction (DoDI) 8510.01, Risk Management Framework (RMF) for DoD Systems. Contractor must directly support RMF authorization activities that is consistent with the principles established in the National Institute of Standards and Technology (NIST) Special Publication (SP) 800-37.

D.1.25.6.4 .2 Contractors supporting authorized systems must maintain their authority to operate and conduct RMF activities pertaining to all life cycle phases (Prepare, Categorize, Select, Implement, Assess, Authorize, Monitor) to maintain compliance with RMF.

D.1.25.6.4 .3 The Contractor shall support requirements to maintain current and achieve new Authorities to Operate (ATOs), Interim Authorization to Test (IATTs), Authorities to Connect (ATCs) for all IT systems using the DoD RMF.

D.1.25.6.4 .4 The Contractor shall implement security controls in accordance with NIST SP 800-53 and use assessment procedures from NIST SP 800-53A with additional DoD-specific assignment values, overlays, implementation guidance, and assessment procedures as required. System categorization is performed by DMDC Cybersecurity Division (CSD) and adheres to the Committee on National Security Systems Instruction (CNSSI) 1253 requirements.

D.1.25.6.4 .5 The Contractor shall adhere to Executive Order 13800, which mandates using the NIST publications as the authoritative guidelines for the DoD RMF. The Contractor must employ its experience and knowledge in NIST 800 series publications to align tasks and activities directly supporting the authorization of systems.

D.1.25.6.4 .6 The Contractor shall ensure all systems meet the requirements of the Federal Information Security Modernization Act (FISMA), 44 U.S.C. § 3551 et seq and 40 U.S.C. § 11331.

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

D.1.25.6.4 .7 The Contractor shall develop and maintain a plan of action and milestones (POA&M) to address known vulnerabilities in the system, subsystems, and system components in accordance with DoDI 8531.01. The Contractor shall submit the POA&Ms to the Government and receive the Government's approval of the POA&Ms before implanting them.

D.1.25.6.4 .8 The Contractor shall adhere to the applicable Security Technical Implementation Guide (STIG) for the design, development, testing, deployment and maintenance of the IS required for the contract.

D.1.25.6.4 .9 The Contractor shall support the RMF Certification and Accreditation process. Final approval for all Information Assurance (IA) tasks belongs to the Information System Security Manager (ISSM), Cybersecurity Division. The contractor shall obtain final approval from the Government ISSM. The Contractor must coordinate all IA-related design decisions, including cryptography, authentication, access control, data transfer and storage, and Need-to-Know, with the designated Government representative and receive Government approval before implementation.

D.1.25.6.4 .10 The contractor shall coordinate directly with the Application Compliance Branch within the DMDC / Service Delivery Directorate / Service and Application Support Division for all cyber security and RMF related activities encompassed in this contract.

D.1.25.6.5 System-Level Information System Security Officer (S-ISSO).

D.1.25.6.5.1 The Contractor shall perform S-ISSO responsibilities at the system/application level. The S-ISSO shall manage the IS security and the day-to-day security operations of the system for the entire IS lifecycle. The S-ISSO shall advise the system owner on security requirements and system security design and shall ensure that security controls are in place.

D.1.25.6.5.2 The Contractor shall prepare the RMF Package by using the automated validation capabilities of the Enterprise Mission Assurance Support Service (eMASS). The Contractor shall develop or update the Security Package for each system/application prior to major system or application releases.

D.1.25.6.5.3 The S-ISSO shall develop, document, and maintain the system authorization processes within the DHRA instance of eMASS, including, but not limited to: System Security Plan (SSP), Implementation Plan, control compliance (self- assessment test results, evidence, STIGs, vulnerability scans, and compliance scans), POA&M, and all requisite DMDC Forms.

D.1.25.6.5.3.1 The security plan shall detail the system description to include system locations, boundaries, FISMA information, mission criticality and CUI categorization, user categories, hardware/software, security architecture, information flows/paths, network connection rules, interconnected systems, communication ports, protocols and services, encryption techniques, and crypto key management information.

D.1.25.6.5.3.2 The Contractor shall assemble and submit the security authorization package containing the results of the Security Assessment Report (SAR), the POA&M, the System Security Plan, and other documents that provide the authorizing official with essential information needed to make a risk-based decision on whether to authorize operation.

D.1.25.6.5.4 S-ISSO shall provide Program/Product Owner support for assessments, validations, and audits with respect to eMASS access and clarifications.

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

D.1.25.6.5.5 S-ISSO may obtain information on DoD and DMDC policy and processes for completion of the required Risk Management Framework artifacts from the DMDC Cybersecurity Division, Service Delivery Directorate, or the Program Management Office.

D.1.25.6.5.6 S-ISSO shall support Cyber Security Service Provider (CSSP) tasks and activities supporting the execution and compliance of DoDI 8530.01.

D.1.25.6.6 Cloud Services

D.1.25.6.6.1 In addition to the requirements in DFARS 252.239-7009 and 7010, any commercial cloud computing services used for this requirement shall comply with the DoD Cloud Computing Security Requirements Guide (Cloud SRG) and DoD Cloud Computing Supplemental Guidance and Information as published by the Defense Information Systems Agency (DISA).

D.1.25.6.6.2 The Contractor shall use cloud computing services have been issued an Authority to Operate (ATO) or Provisional-ATO (P-ATO) by the DISA at the impact level appropriate to the requirement (DFARS 239.7602-1). The Contractor shall follow DHRA's RMF processes outlined in this PWS. All cloud computing services must have an Authority to Operate issued by the DHRA AO, as the mission owner. Evidence of DISA authorization must be retrievable from DISA cloud authorization repository.

D.1.25.6.6.3 For information systems that will store, process, or transmit DoD data at the public level (not CUI data), and have no or low levels of PII, the proposed cloud software as a service solution must be certified at least as high as the FedRAMP Moderate level or DISA's Impact Level 2 (IL-2). The PII levels must remain at the no/low PII levels (as determined by a privacy impact assessment (PIA)) and the DoD data levels remain at the public level for the entire period of performance of the contract. A FedRAMP or IL-2 cloud service provider will accommodate data requirements up to low confidentiality and moderate integrity as defined by the Committee on National Security Systems Instruction 1253.

D.1.25.6.6.4 For information systems that will store, process, or transmit DoD data at the unclassified or CUI level, and/or have moderate or higher levels of PII, the proposed cloud software as a service solution must be certified at least at the DISA Impact Level 4 or 5 (IL-4 or IL-5). There is no FedRAMP level of certification that will support DoD CUI data and/or moderate or higher levels of PII. If an IL-4 or IL-4 Software as a Service product is unavailable, the Contractor shall propose an IL-4 or IL-5 Platform as a Service or Infrastructure as a Service solution. A Contractor owned or operated, private data center is not an acceptable solution and is not permitted.

D.1.25.6.7 Monitoring

D.1.25.6.7.1 Information Security Continuous Monitoring (ISCM). ISCM is defined as maintaining ongoing awareness of information security, vulnerabilities, and threats to support organizational risk management decisions. ISCM is a critical part of the risk management process. It ensures that IS and Platform Information Technology (PIT) operations remain within an acceptable level of risk despite any changes that occur. The Contractor shall implement continuous monitoring activities in accordance with Office of Management and Budget Memorandum M-14-03; NIST SP 800-137; NIST SP 800-137A; and DoDIs 8530.01 and 8531.01. Continuous Monitoring (ConMon) is under the responsibility of DMDC's Cybersecurity Division (CSD). The DMDC ConMon plan governs the

Contractor's ConMon performance and related activities and takes precedence over all related policies and procedures.

D.1.25.6.8 Incident Reporting

D.1.25.6.8.1 Cyber Incident Reporting. In addition to DFARS 252.204-7012, within one (1) hour of discovery of any cyber incident the Contractor shall notify the DMDC Incident Response (IR) team by emailing an Initial cyber incident report to the following organizational box: dodhra.dodc-mb.dmdc.list.ir-team@mail.mil, with subsequent reporting every 24 hours until the incident is closed. The Contractor shall also notify the COR and CO at the time the incident is reported to DMDC/IR. Contractors will respond to IR Team requests within the time specified to avoid loss of network access.

D.1.25.6.9 Application Security

D.1.25.6.9.1 The Contractor shall apply DoD Application Security and Development (ASD) STIG configuration requirements for software development and architecture. Contractor developers shall employ secure coding fundamentals and best practices such as the Open Worldwide Application Security Project (OWASP). The Contractor shall adhere to DMDC and DHRA coding standards as described in "Software Delivery Management Coding Standard, version 1.4, 14 March 2022"; available upon request at the URL below:

[https://dod365.sharepoint-mil.us/:w:/r/sites/OSDDHRA-DMDC/bizproc/Business Process Review/_layouts/15/Doc.aspx?sourcedoc=%7BB6377A17-5365-4AA7-84E8-2578EFF2B827%7D&file=DMDC%20Coding%20Standards_v1-4.docx](https://dod365.sharepoint-mil.us/:w:/r/sites/OSDDHRA-DMDC/bizproc/Business%20Process%20Review/_layouts/15/Doc.aspx?sourcedoc=%7BB6377A17-5365-4AA7-84E8-2578EFF2B827%7D&file=DMDC%20Coding%20Standards_v1-4.docx).

D.1.25.6.9.2 The Contractor shall remediate or mitigate software vulnerabilities according to DHRA and DMDC Cyber Hardening Policies. The Contractor shall create and manage POA&Ms and must meet all timelines and execution standards.

D.1.25.6.9.3 The Contractor shall implement Joint Force Headquarters-Department of Defense Information Network (JFHQ- DODIN) and United States Cyber Command (USCYBERCOM) cyberspace tasking orders (CTOs) within the directed timeframe. CTOs include, but are not limited to, application whitelisting, secure protocols, Vulnerability Disclosure Program.

D.1.25.6.9.4 The Contractor shall complete appropriate code review, code scans, POA&Ms, and approvals for internally developed applications and websites before putting them into the production environment.

D.1.25.6.9.5 The Contractor shall perform application code scans in accordance with DHRA/DMDC guidance and policies (available upon request), which require, among other things, using tools such as Fortify and Sonatype. For instance, according to current policy, the Contractor shall conduct code scans before releasing code to production, when rule packs or STIGs change, or on an as-needed basis to identify new findings. DMDC updates cyber tool rule packs monthly and quarterly. The contractor shall provide application source code to support code scanning. The Government may change policies based on, among other things, operations, developments, or changing priorities.

D.1.25.6.9.6 All public websites are subject to DoD PortSwinger BurpSuite scans. The contractor shall remediate findings that result from these external scans.

D.1.25.6.9.7 The Contractor shall utilize a government furnished tool to centrally manage applications risks, which includes viewing/managing vulnerabilities, POA&Ms creation/submission, uploading of source code, and viewing recommended remediation. The government currently utilizes Fortify Software Security Center to perform this function.

D.1.25.6.9.8 The Contractor shall create and maintain entries within established eMASS instances for applications with required artifacts and include evidence of compliance associated with the relevant Common Control Identifier (CCI) security controls.

D.1.25.6.10 Cyberspace Workforce Management Requirements.

D.1.25.6.10.1. The cybersecurity workforce requirements establish the baseline technical and management skills necessary for personnel performing cybersecurity functions across the DHRA enterprise. The Cybersecurity Workforce includes, but is not limited to, all individuals performing any of the cybersecurity functions described in the DoD 8140 series of instructions and manuals, which include any new or updated policies, guidance, and regulations as they are released. The Contractor shall screen personnel performing cybersecurity functions and shall identify and manage its cybersecurity workforce accordingly.

D.1.25.6.10.2 Audit and Compliance Reviews. The Contractor shall be prepared to provide and shall provide all data and information requested during any cybersecurity workforce compliance review or audit within three business days of receiving the request. Audits or reviews may occur at intermittent intervals and at any time the Government deems appropriate. Compliance documentation includes, but is not limited to, educational qualifications, professional or positional certifications, and training records.

D.1.25.6.10.3. The DODI 8140 qualification matrix is accessible on the DoD Cyber Exchange at <https://public.cyber.mil/wid/cwmp/dod-cyber-workforce-qualifications-matrices-management/>

D.1.25.6.11 Cybersecurity Deliverables Table

Deliverable	PWS Ref#	Frequency	Stipulations			
RMF Implementation Plan Report. Summary report to show implementation status versus current control compliance status.	D.1.25.6.7.1 D.1.25.6.5.3	Monthly.	Implementation Plan and control compliance must match within eMASS.			

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Evidence of RMF System Security Plan (SSP) completion.	D.1.25.6.5.2, D.1.25.6.5., D.1.25.6.5.2	5 months prior to ATO expiration date or the ATO need-by date, as applicable.	All SSP work is to be performed within eMASS.			
Plan of Action and Milestone (POA&M)	D.1.25.6.4..7	Add or update POA&Ms 10 business days after: new vulnerability discovered, vulnerability closed, change of remediation timelines, and/or any change affecting POA&M.	POA&Ms must include detailed milestones showing steps to remediate and any mitigating factors to reduce risk.			
Plan of Action and Milestone (POA&M)	D.1.25.6.4..7, D.1.25.6.5.3	Monthly report of POA&M status.	Report must indicate new and updated POA&Ms from previous report.			
Security Technical Implementation Guide (STIGs) Checklists	D.1.25.6.4..8	Current STIG findings within 30 days of ATO package and Change Request submissions.	STIG checklist uploaded into eMASS and mapped to appropriate controls.			
Assessment and Authorization (A&A) Submission Entrance Criteria Checklist (CSD Form 12)	D.1.25.6.4..9, D.1.25.6.4..10 D.1.25.6.5.3	90 days prior to ATO expiration date or prior to ATO need-by date, as applicable.	There shall be no more than 1 Return for Rework (RFR). Must be re-submitted within 5 business days of RFR.			
DoDI 8140.03 Cybersecurity Workforce compliance	D.1.25.6.10..1 D.1.25.6.10..2	As required as part of an audit or when requested by the Government.	Compliance report must be provided within 3 business days of notification of audit or requested by the Government.			

D.1.25.7 DISCLOSURE OF INFORMATION

Performance under this contract may require the contractor to access data and information proprietary to a Government agency, another Government contractor, or of such nature that its dissemination or use other than as specified in this contract would be adverse to the interests of the Government or others. Neither the contractor, nor contractor personnel, shall divulge or release data or information developed or obtained under performance of the contract except to authorized Government personnel or upon written approval of the Contracting Officer. The contractor shall not use, disclose, or reproduce proprietary data that bears a restrictive legend, other than as specified in the contract.

- (A) To the extent the contractor receives or is given access to proprietary data, data protected by the Privacy Act of 1974, or other classified or privileged technical, business, or financial information under this PWS, the contractor shall treat and protect Privacy Act information IAW any restrictions imposed on such data. Such information and materials will be protected. Access includes the functions of record management, data handling, storage, electronic transmission, and physical distribution. As required by the Contracting Officer or designee, the contractor shall agree to enter into a written agreement with any firm whose proprietary data is used in conjunction with performance of this PWS. The contractor shall furnish the Contracting Officer with executed copies of such agreements and shall not use any proprietary information for any purpose other than which it was provided.
- (B) Neither the contractor nor the contractor's employees shall disclose, or cause to be disseminated, any information concerning the operations of the activity that could result in, or increase the likelihood of, the possibility of a breach of the activity's security or interrupt the continuity of its operation.
- (C) All inquiries received by the contractor for information concerning work performed under this contract shall be referred to the Government for evaluation. The determination of whether records will be released will remain with the Government. The contractor shall assist the COR in compiling information or records for submission upon request by the Government.
- (D) The contractor shall not release any information (including photographs, files, public announcements, statements, denials, or confirmations) on any part of the subject matter of this contract or any phase of any program there under without the prior written approval of the COR. All documentation showing individual's names or other personal information shall be controlled and protected.
- (E) The contractor shall use any data furnished by the Government only for performance under this PWS and shall return copies of such data to the Government upon completion of this effort.
- (F) Data pertaining to other contracts/services may reside on IT systems utilized or accessed by other Government organizations where contractor personnel may be performing.

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Contractor personnel shall in no way divulge this information or use this information for their gain. The contractor shall notify the Contracting Officer of any potential conflicts of interest.

- (G) The Contractor shall ensure that a Non-Disclosure Agreement is signed by all staff assigned to or performing on this contract before performing any work, including all subcontractors and consultants. The Contractor shall ensure that all staff understand and adhere to the terms of the non-disclosure statement, protecting the procurement sensitive information of the Government and the proprietary information of other contractors. (PWS Attachment D – Non-Disclosure Agreement).

D.1.25.8 FEDERAL BUREAU OF INVESTIGATION (FBI) CJIS

Federal Bureau of Investigation (FBI) Criminal Justice Information Services (CJIS) Security Addendum 28 U.S.C. § 534 and 28 CFR 20.33 provide express authority for disclosures to private persons and entities providing support services for criminal justice agencies when subject to appropriate controls. Accordingly, pursuant to a specific agreement with an authorized governmental agency to perform an administration of criminal justice function, a private contractor may obtain access to Criminal History Record Information (CHRI) and related information.

D.1.25.8.1 The contractor shall provide services that require access to CHRI and related information. Therefore, the contractor shall ensure that all contractor employees know and understand the requirements regarding the security of CJIS systems. Moreover, the contractor shall ensure that contractor employees and agents, as well as employees and agents of any subcontractor, comply with all the security addendum requirements. The contractor shall ensure that the necessary security addendum is executed and signed by the contractor and the Department of Defense (DoD), an authorized governmental agency to perform an administration of criminal justice function.

D.1.25.8.2 The contractor's security program shall include consideration of personnel security, site security, system security and data security. The provisions of the contractor's security addendum apply to all personnel (of the contractor and any subcontractor), systems, networks and support facilities supporting and/or acting on behalf of the government agency.

D.1.25.8.3 The contractor's security addendum shall specifically authorize access to CHRI, limit the use of the information to the specific purposes for which it is being provided, ensure the security and confidentiality of the information consistent with applicable laws and regulations, provide for sanctions, and contain such other provisions as the FBI may require. The contractor's security addendum shall include physical and personnel security constraints historically required by National Crime Information Center (NCIC) security practices and other programmatic requirements, together with personal integrity and electronic security provisions comparable to those in NCIC User Agreements between the FBI and criminal justice agencies, and in existing Management Control Agreements between criminal justice agencies and noncriminal justice governmental entities. The contractor's security addendum shall make clear that access to CHRI will be limited to those officers and employees of the private contractor or

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

its subcontractor(s) who require the information to properly perform services for the sponsoring governmental agency, and that the service provider may not access, modify, use or disseminate such information for inconsistent or unauthorized purposes.

D.1.25.8.4 The contractor's security addendum shall provide adequate security for criminal justice systems while: (1) under the control or management of a private entity; or

(2) connectivity to FBI CJIS systems has been provided to a private entity contractor. As defined in Office of Management and Budget Circular A-130, adequate security is "security commensurate with the risk and magnitude of harm resulting from the loss, misuse or unauthorized access to or modification of information."

D.1.25.8.5 The contractor's security addendum shall require a security program that complies with all applicable federal and state laws, regulations, and standards (including the CJIS Security Policy in effect when the contract is executed), as well as with policies and standards established by the CJIS Advisory Policy Board (APB). Furthermore, the contractor shall monitor updates and changes in security requirements. The contractor shall always maintain a compliant security program during the period of performance of this contract.

D.1.25.9 DENIAL OF ENTRY

The Government reserves the right to terminate the entry of any Contractor employee upon disclosure of information which indicates the individual's continued entry to the installation or facility is not in the best interest of national security. Additionally, the violation of or deviation from the established security procedures by contractor employees may result in the confiscation of identification media and the denial of future entry to the installation or facility.

D.1.25.10 CONTROLLED UNCLASSIFIED INFORMATION (CUI)

The contractor will have access to CUI, which is not classified information, but it does require protection from unauthorized disclosure. The contractor shall comply with all requirements to safeguard CUI. Refer to DoDM: 5200.01, Volume 4, "DoD Information Security Program: Controlled Unclassified Information (CUI)", available

at: https://www.dodig.mil/Portals/48/Documents/Policy/520001_vol4.pdf. The contractor will likely have CUI access to or knowledge of Personally Identifiable Information (PII), ~~For Official Use Only (FOUO)~~, and/or Protected Health Information (PHI). The contractor shall ensure PII and PHI are protected as required by the Privacy Act and Associated laws, rules, and regulations and shall complete Privacy Act training before access.

D.1.25.11 RECORDS MANAGEMENT

D.1.25.11.1 Contractor shall comply with all applicable records management laws and regulations, as well as National Archives and Records Administration (NARA) records policies, including but not limited to the Federal Records Act (44 U.S.C. chs. 21, 29, 31, 33), NARA regulations at 36 CFR Chapter XII Subchapter B, and those policies associated with the safeguarding of records covered by the Privacy Act of 1974 (5 U.S.C. 552a). These policies include the preservation of all records, regardless of form or characteristics, mode of transmission, or

state of completion.

D.1.25.11.1.2 In accordance with 36 CFR 1222.32, all data created for Government use and delivered to, or falling under the legal control of, the Government are Federal records subject to the provisions of 44 U.S.C. chapters 21, 29, 31, and 33, the Freedom of Information Act (FOIA) (5 U.S.C. 552), as amended, and the Privacy Act of 1974 (5 U.S.C. 552a), as amended and must be managed and scheduled for disposition only as permitted by statute or regulation.

D.1.25.11.1.3 In accordance with 36 CFR 1222.32, Contractor shall maintain all records created for Government use or created in the course of performing the contract and/or delivered to, or under the legal control of the Government and must be managed in accordance with Federal law. Electronic records and associated metadata must be accompanied by sufficient technical documentation to permit understanding and use of the records and data.

D.1.25.11.1.4 Defense Human Resources Activity and its contractors are responsible for preventing the alienation or unauthorized destruction of records, including all forms of mutilation. Records may not be removed from the legal custody of Defense Human Resources Activity or destroyed except for in accordance with the provisions of the agency records schedules and with the written concurrence of the Contracting Officer's Representative (COR). Willful and unlawful destruction, damage or alienation of Federal records is subject to the fines and penalties imposed by 18 U.S.C. 2701. In the event of any unlawful or accidental removal, defacing, alteration, or destruction of records, Contractor must report to the COR and the Defense Human Resources Activity Component Records Management Officer at dodhra.mc-alex.dhra-hq.mbx.records@mail.mil so DHRA may report promptly to NARA in accordance with 36 CFR 1230.

D.1.25.11.1.5 The Contractor shall immediately notify the COR upon discovery of any inadvertent or unauthorized disclosures of information, data, documentary materials, records or equipment. Disclosure of non-public information is limited to authorized personnel with a need-to-know in accordance with all applicable privacy, security, and information protection policies. The Contractor shall ensure that the appropriate personnel, administrative, technical, and physical safeguards are established to ensure the security and confidentiality of this information, data, documentary material, records and/or equipment is properly protected. The Contractor shall not remove material from Government facilities or systems, or facilities or systems operated or maintained on the Government's behalf, without the express written permission of the COR. When information, data, documentary material, records and/or equipment is no longer required, it shall be returned to DHRA control or the Contractor must hold it until otherwise directed. Items returned to the Government shall be hand carried, mailed, emailed, or securely electronically transmitted to the COR. Destruction of records is EXPRESSLY PROHIBITED unless in accordance with Paragraph (7.4).

D.1.25.11.1.6 The Contractor is required to obtain the Contracting Officer's approval prior to engaging in any contractual relationship (sub-contractor) in support of this contract requiring the disclosure of information, documentary material and/or records generated under, or relating to, contracts. The Contractor (and any sub-contractor) is required to abide by Government and

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Defense Human Resources Activity guidance for protecting sensitive, proprietary information, classified, and controlled unclassified information.

D.1.25.11.1.7 The Contractor shall only use Government IT equipment for purposes specifically tied to or authorized by the contract and in accordance with Defense Human Resources Activity policy.

D.1.25.11.1.8 The Contractor shall not create or maintain any records containing any non-public Defense Human Resources Activity information that are not specifically tied to or authorized by the contract.

D.1.25.11.1.9 The Contractor shall not retain, use, sell, or disseminate copies of any deliverable that contains information covered by the Privacy Act of 1974 or that which is generally protected from public disclosure by an exemption to the Freedom of Information Act.

D.1.25.11.1.10 The Defense Human Resources Activity owns the rights to all data and records produced as part of this contract. The contractor shall not include any contractor markings on deliverables created under the contract. All deliverables under the contract are the property of the U.S. Government for which Defense Human Resources Activity shall have unlimited rights to use, dispose of, or disclose such data contained therein as it determines to be in the public interest. The contractor shall not use or disclose any data or deliverables under this contract for any purposes other than performing the contract, unless expressly approved by the Government.

D.1.26 ORGANIZATIONAL CONFLICT OF INTEREST

The guidelines and procedures of FAR Subpart 9.5 and GSAM Subpart 509.5, Organizational and Consultant Conflicts of Interest, and FAR Part 3 and GSAM Part 3, Improper Business Practices and Personal Conflicts of Interest, will be used in identifying and resolving any issues of a conflict of interest under the contract. The FAR and other applicable agency specific regulatory supplements will govern this contract. Assuming no real or potential conflict of interest, an Prime Contractor may be a Subcontractor to another Prime Contractor; however, the CO may require that the Contractor sign an Organizational Conflict of Interest (OCI) Statement in which the Contractor (and any Subcontractors or teaming partners) agree not to submit any proposal or provide any support to any firm which is submitting (as Prime or Subcontractor) any proposal for any solicitation resulting from the work on this contract.

D.1.26.1 All Contractor personnel (to include Subcontractors and Consultants) who will be personally and substantially involved in the performance of this contract which requires the Contractor to act on behalf of, or provide advice with respect to any phase of an agency procurement shall execute and submit a Non-Disclosure Agreement” Form –

D.7. The CO will provide the appropriate nondisclosure form specific to the procurement. This form shall be required prior to the commencement of any work on such project and whenever replacement personnel are proposed under an ongoing project.

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

D.1.26.2 The Contractor shall be responsible for identifying and preventing personal conflicts of interest of their employees. The Contractor shall prohibit employees who have access to non-public information by reason of performance on a Government contract from using that information for personal gain.

D.1.26.3 In the event that a project requires activity that would create an actual or potential conflict of interest, the Contractor shall immediately notify the CO of the conflict, submit a plan for mitigation, and not commence work until specifically notified by the CO to proceed; or identify the conflict and recommend to the CO an alternate approach to avoid the conflict.

(A) The restrictions imposed by this clause apply to the Contractor, including its parent company, affiliates, divisions, subsidiaries, consultants, subcontractors at any tier, and any tier successors.

(B) The Contractor is subject to the following restrictions:

- (1) The Contractor agrees to review, after contract award and during the life of the contract, its technical, business, financial, and other interests which could give rise to an actual or potential organizational conflict of interest in connection with the performance of this contract. If the Contractor discovers any facts relevant to an organizational conflict of interest, the Contractor shall make an immediate and full disclosure in writing to the CO. The disclosure shall set forth all relevant facts, including identification of contracts under which work was or is being performed and include a description of actions which the Contractor has taken or proposes to take, to avoid, neutralize, or mitigate the actual or potential conflict of interest.
- (2) If work to be performed under this contract requires access to proprietary, business confidential or financial data of other companies, the Contractor shall reach an agreement with such other companies to protect such data from unauthorized use or disclosure as long as it remains proprietary or confidential. Evidence of such an agreement must be made available to the CO upon request. Further, the Contractor agrees that it will not use the data to compete with those other companies.
- (3) The Government may terminate this contract for convenience, in whole or in part, if it deems such termination necessary to avoid an organizational conflict of interest. If the Contractor was aware of an organizational conflict of interest before the award of this contract or discovered such facts after award and intentionally did not disclose or misrepresented relevant information to the CO, the Government may terminate the contract in accordance with the "Default" clause of this contract and pursue such other remedies as may be permitted by law or by this contract.
- (4) The Contractor agrees to insert this provision every subcontract issued in performance of this contract.

D.1.27 JOINT ETHICS REGULATION

The Contractor acknowledges that Government personnel are required to comply with all provisions of DoD Regulation 5500.7R, Joint Ethics Regulation (JER). The regulation restricts

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Government employees from engaging in a number of activities that create an appearance of impropriety or otherwise violate the law, including certain activities involving interaction with contractors and their employees. The Contractor hereby agrees to use its best efforts to prevent its employees from taking any action which could be construed as soliciting, encouraging, assisting, aiding, or abetting any Government employee to violate any provision of the JER. The contractor further agrees to provide a copy of the JER to all of its employees assigned to work under this contract in any Government owned or leased facility. It is available at no cost online at http://www.defenselink.mil/dodge/defense_ethics/index.html.

D.1.28 NO-COST SETTLEMENT

If the parties agree to negotiate a so-called 'no-cost settlement' in lieu of a termination for default by either party or for convenience by the Government, then the following terms shall be included in such bilateral settlement agreement without further negotiation:

- (A) The Government shall pay all unpaid allowable costs that have been incurred by the Contractor as of the date of the notice of termination.
- (B) The Government shall neither pay nor be liable for any anticipatory profits or consequential damages resulting from the termination of this contract or any subcontract, including, without limitation, accounting, legal, clerical, or other fees and/or expenses for the preparation of settlement proposals and supporting data; and
- (C) The maximum amount payable under the no-cost settlement shall be further limited by the total amount of Government funds that have been properly obligated by this contract under the provisions of 31 U.S.C. § 1501(a)(1) as of the date of the notice of termination.
- (D) All other rights and remedies of the parties that are consistent with the mandatory terms of any no-cost settlement agreement set forth above shall remain extant and unaffected by this requirement.

D.1.29 CONTRACTOR PERSONNEL ADMINISTRATION

The contractor shall ensure contractor personnel under this contract are not placed in a position:

- (1) Where they are appointed or employed by government personnel or under the supervision, or direction of government personnel or evaluation of Government personnel military or civilian.
- (2) Of staff or policymaking for the government;
- (3) Of command, supervision, administration, or control over U.S. Government military or
- (4) civilian personnel or of other contractors or become a part of the Government organization.
- (5) Involving administration or supervision of military procurement activities; or

D.1.29.1 The services performed under this contract do not require the contractor or their employees to exercise personal judgment and discretion on behalf of the Government, but rather, the contractor employees shall act and exercise personal judgment and discretion on behalf of the contractor.

D.1.29.2 NON-SUPERVISION OF CONTRACTOR EMPLOYEES ON GOVERNMENT FACILITIES

The Government will not exercise any supervision or control over Contractor employees performing services under this contract. The Contractor's employees shall be accountable solely to the Contractor's management, who in turn is responsible to the Government.

(A) The Government and the Contractor understand and agree that the services delivered by the Contractor to the Government are non-personal services. The parties also recognize and agree that no employer-employee or master-servant relationship exists or will exist between the Government and the Contractor. The Contractor and the Contractor's employees are not employees of the Federal Government and are not eligible for entitlement and benefits given Federal employees.

(B) Contractor personnel under this contract shall not be placed in a position: i) where there is an appearance that they are employed by a Federal Officer, or are under the supervision, direction, or evaluation of a Federal Officer, or ii) in command, supervision, administration, or control over Government personnel.

D.1.30 INTERRELATIONSHIPS OF CONTRACTORS

The Government may enter into other contractual relationships in order to provide additional DTAC services, separate from, but related to, the work to be performed under this contract. Furthermore, the Government may extend these existing relationships or enter into new relationships. The Contractor may be required to coordinate with such other Contractor(s) through the COR on individual tasks providing appropriate, non-conflicting technical interfaces and in avoidance of duplication of effort. By appropriate tasking, such other Contractor(s) may be requested to assist the Government in the technical review of the Contractor's technical efforts. Information provided by the Contractor in performance of the contract may, at the discretion of the Government, be provided to such other Contractor(s) for the purpose of such review.

D.1.31 ETHICS AND CONDUCT

Personal services are not authorized under the contract. The contract is strictly a non- personal services contract which means the personnel rendering the services are not subject, either by the contract's terms or by the manner of its administration, to the supervision and control usually prevailing in relationships between the Government and its employees. The Contractor and its employees must conduct themselves with the highest degree of integrity and honesty and adhere to the policies and procedures as specified in FAR Part 3 and GSAM Part 503 Improper Business Practices and Personal Conflicts of Interest.

D.1.32 GOVERNMENT FURLOUGHS

If Government personnel are furloughed, the Contractor shall contact the CO and the COR to receive direction. It is the Government's decision as to whether the contract price/cost will be affected. Generally, the following situations apply:

- (A) Contractor personnel that can continue contract performance (either on-site or at a site other than their normal workstation) shall continue to work and the contract price shall not be reduced or increased.
- (B) Contractor personnel that are not able to continue contract performance (e.g., support functions) may be asked to cease their work effort.
- (C) In those situations that furloughed Government personnel are reimbursed, the Contractor may not invoice for their employees working during the Government furlough until such time as the special legislation affecting Government personnel is signed into law by the President of the United States. Nothing in this clause changes the rights and responsibilities of the parties relative to stop work requirements as cited elsewhere in this contract.

D.1.33 CONFIDENTIALITY OF INFORMATION

To the extent that the work under this contract requires that the Contractor be given access to confidential or proprietary business, personal, technical, or financial information belonging to other private parties or the Government, the Contractor shall after receipt thereof, treat such information as confidential and agrees not to appropriate such information for its own use or to disclose such information to third parties unless specifically authorized by the CO in writing.

D.1.33.1 The foregoing obligations, however, shall not apply to:

- (1) Information which, at the time of receipt by the Contractor, is in the public domain.
- (2) Information which is published after receipt thereof by the Contractor or otherwise becomes part of the public domain through no fault of the Contractor.
- (3) Information which the Contractor can demonstrate was in its possession at the time of receipt thereof and was not acquired directly or indirectly from the Government or other companies.
- (4) Information which the Contractor can demonstrate was received by them from a third party who did not require the Contractor to hold it in their confidence.
- (5) Information which is independently developed by the Contractor with no access to the received information as shown by written record.

D.1.33.2 The Contractor agrees that upon request by the CO, they will execute an approved agreement with any party whose facilities or proprietary data they are given access to in regard to the restrictive use and disclosure of the data and the information obtained from such facilities. Upon request by CO, personnel shall also sign such an agreement. This clause shall flow down to all sub-contractors.

D.1.34 RESTRICTIONS

Notwithstanding the requirements of FAR Clause 52.216-19, if, in the opinion of the Contractor,

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

issuance of a contract or option exercise to the Contractor would: 1) result in the Contractor (or its personnel or its sub-contractors or teaming partners and their employees) having an organizational conflict of interest for which restrictions would be placed on the Contractor's (or its personnel or its sub-contractors and teaming partners and their personnel) future activities; or 2) violate provisions of the procurement integrity legislation (i.e., Section 27 of the Office of Federal Procurement Policy Act (41 U.S.C. 423), as amended by Section 814 of P. L. 101-189, unless the CO directs the Contractor in writing to commence or continue performance under the contract.

D.1.35 SERVICE CONTRACT REPORTING

Contractor Inventory. In accordance with FAR CLAUSE 52.204-15 and Section 8108 of Public Law 112-10 of the Department of Defense and Full-Year Continuing Appropriations Action, 2011. The contractor shall report all labor hours required for performance of services provided under this task order via the secure SAM.gov data collection site. The contractor is required to completely fill in all required data fields at www.sam.gov. Reporting inputs shall be for the labor executed during the period of performance for each Government fiscal year (FY), which runs 1 October through 30 September. While inputs may be reported anytime during the FY, all data shall be reported no later than 31 October of each calendar year. The contractor may direct questions to the Federal Service Desk help desk (by telephone at 866-606-8220 (U.S.)). The prime contractor is responsible to ensure all subcontractor data is reported.

D.1.36 CONTRACTOR PERFORMANCE ASSESSMENT REPORTING SYSTEM (CPARS)

Past performance information is relevant information, for future source selection purposes, regarding a Contractor's actions under previously awarded contracts. It includes, for example, the Contractor's record of conforming to contract requirements and to standards of good workmanship; record of forecasting and controlling costs; adherence to contract schedules, including the administrative aspects of performance; history of reasonable and cooperative behavior and commitment to customer satisfaction; reporting into required databases; record of integrity and business ethics; and business-like concern for the interest of the customer. GSA requires use of the CPARS modules as the secure, confidential, information management tool to facilitate the performance evaluation process for the contract.

D.1.37 RECORDS MANAGEMENT

In accordance with 36 CFR chapter 12, subchapter B, all persons conducting business on behalf of the Federal Government are required to adhere to federal records management regulations. The Office of the Secretary of Defense requires that all civilians, contractors, and military personnel adhere to the agency-specific guidance outlined in Administrative Instruction 15, according to DOD Instruction 5015.2. Contract staff shall store contract deliverables created in the course of agency business on approved file shares within the DOD information network. Access to the network and the appropriate file shares will be provided by the agency records manager. Contract deliverables created elsewhere shall be migrated to the network prior to the end of the period of performance. Emails can be considered a record, and must be managed; accordingly, emails documenting agency business and deliverables related to this

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

contract shall be created and received on government-furnished email accounts when provided. Records created for the express purpose of executing the deliverables of this contract are federal property and remain with the Government upon termination of the contract. Contract staff are not permitted to retain copies of project files or final deliverables upon personal departure or termination of the contract. Departing employees shall complete the SD-822 Departing Employee Checklist to validate that all records in the employee's possession have been transferred to the appropriate location, and that no records are being retained by the employee upon departure.

D.1.38 ROLES AND RESPONSIBILITIES

D.1.38.1 GSA Contracting Officer (CO)

The CO is responsible for monitoring contract compliance, contract administration, and cost control and for resolving any differences between the observations documented by the Contracting Officer's Representative (COR) and the contractor. The CO will designate one full-time COR as the Government authority for performance management.

Assigned: Mr. Frank Mata

Organization: General Services Administration, Federal Acquisition Service, Contracting Division

D.1.38.2 GSA Project Manager (PM)

The PM assists the CO in monitoring contract compliance, contract administration, and cost control and for resolving any differences between the observations documented by the Client agency Contracting Officer's Representative (COR) and the contractor. The PM reviews and approves invoices and documents contractor performance with the COR.

Assigned: Ms. Carole Bailey

Organization: General Services Administration, Federal Acquisition Service, Assisted Acquisitions Services

D.1.38.3 Client Contracting Officer Representative (COR)

The COR is designated in writing by the CO to act as his or her authorized representative to assist in administering a contract. COR limitations are contained in the written appointment letter. The COR is responsible for technical administration of the project and ensures proper Government surveillance of the contractor's performance. The COR is not empowered to make any contractual commitments or to authorize any contractual changes on the Government's behalf. Any changes that the contractor deems may affect contract price, terms, or conditions shall be referred to the CO for action. The COR will have the responsibility for completing QA monitoring forms used to document the inspection and evaluation of the contractor's work performance. Government surveillance may occur under the inspection of services clause (FAR 52.212-4) for any service relating to the contract.

Assigned: To be provided at contract award

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

Organization: DoD Defense Testing and Assessment Center (DTAC)

D.1.39 QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)

The Government intends to utilize a Quality Assurance Surveillance Plan (QASP) to monitor the quality of the Contractor's performance. The oversight provided for in the order and in the QASP will help to ensure that service levels reach and maintain the required levels throughout the contract term. Further, the QASP provides the COR with a proactive way to avoid unacceptable or deficient performance and provides verifiable input for the required Past Performance Information Assessments. A draft QASP will be provided by the Government and will be revised following contract award. The QASP will be a living document and may be updated by the Government as necessary. By monitoring the Contractor, the COR will determine whether the performance levels set forth in the order have been attained. Performance standards are specified in the following Performance Requirements Summary Matrix found below in the Standard and Acceptable Quality Level columns.

D.1.40 PERFORMANCE REQUIREMENT SUMMARY

#	REQUIRES SERVICES	PERFORMANCE STANDARDS	ACCEPTABLE LEVEL	SURVEILLANCE METHOD	INCENTIVE
1	Delivery / Task Order Deliverables	Deliverables submitted by the due date with all required content. Refer to deliverables in contract/task order PWS documents. PWS D.1.16	No more than 5% of deliverables can be submitted later than required submission date (timeliness) or require more than 1 resubmission to address errors or omissions (accuracy).	Monthly 100% Inspection	1. Past Performance Evaluation (CPARS) 2. FAR 52.212-4(a) reperformance or price reduction for nonconforming products or services
2	Contract/Task Order Application Support	Develop and maintain computer programs and web applications, provide for consultation, resolution and complete application work requests as required by task order PWS. All support needs are fulfilled on time and within budget. All deliverables including providing procedural documentation, including user's guides, software installation procedures, and other such documents are accurate with minimal editing. PWS D.1.11 and D.1.13	No more than 1 validated customer complaint each month. No customer complaints are repetitive in nature during the contract period (Base year, Opt year). Effective corrective action was taken to respond and address customer complaints within 10 calendar days.	Monthly Customer Complaint	1. Past Performance Evaluation (CPARS) 2. FAR 52.212-4(a) reperformance or price reduction for nonconforming products or services
3	Contract/Task Order Key Personnel	Key personnel possess necessary knowledge, skills, and abilities to perform tasks and meet the Key Personnel requirements. PWS D.1.19 and PWS Attachment C	All key personnel packages meet task order personnel requirements and minimum qualifications. No substitutions of key personnel are proposed except as authorized in the PWS D.1.19.	Periodic Surveillance	1. Past Performance Evaluation (CPARS)
4	Cost Control	Contractor stays within task order price amounts and maintains program budget limitations and burn rate. Travel	Task order expenses shall be within awarded task order amounts, monthly status reports shall contain an accurate	100% Inspection	1. Invoice rejection 2. Past Performance Evaluation (CPARS)

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

		and ODC invoices must include backup receipts.	reflection of all expenses to date and all invoices shall be accurate and contain required supporting documentation. No more than one error per quarter and any issues are remedied within seven calendar days of identification of issue.		
5	Section 508 of the Rehabilitation Act of 1973	Electronic and information technology (EIT) procured through this effort must meet the applicable accessibility standards at 36 CFR 1194, unless exception applies and is granted at the task order level	Any/all electronic and information technology (EIT) procured through this effort must meet the applicable accessibility standards at 36 CFR 1194, unless exception applies and is granted at the task order level.	100% inspection	1. Past Performance Evaluation (CPARS) 2. FAR 52.212-4(a) reperformance or price reduction for nonconforming products or services
6	Badging Requirements	The contractor shall provide a monthly employee roster showing the status of all Government issued badges and identity cards (CAC, Security, etc) with the date the employee was hired, description of the badge issued, the issue date, employee termination date, and the badge surrender date. (PWS D.1.25.5.4)	Government badges are returned prior to employee departure/termination, but no later than 30 days of employee departure.	100% inspection	1. Past Performance Evaluation (CPARS)

D.1.41 508 COMPLIANCE

Any/all electronic and information technology (EIT) procured through this effort must meet the applicable accessibility standards at 36 CFR 1194. 36 CFR 1194 implements Section 508 of the Rehabilitation Act of 1973, as amended, and is viewable at <http://www.section508.gov>. The standards apply to the following:

- (1) Software Applications and Operating Systems
- (2) Web-based Information or Applications
- (3) Telecommunication Products
- (4) Video and Multimedia Products
- (5) Self-Contained, Closed Products (e.g., Information Kiosks, Calculators, and Fax Machines)
- (6) Desktop and Portable Computers

D.1.42 INVOICING:

The following procedures shall be followed when submitting invoices:

Contractor Responsibilities to Receive Payment:

- Contractor must first provide invoice(s) and supporting documentation to the Government COR for review and signature on the invoice prior to submitting invoices into GSA ASSIST. The

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

COR will review the invoice and return either a signed invoice or a detailed explanation as to why the invoice was not approved within 5 business days. It is the responsibility of the contractor to resolve issues in a timely manner.

- Contractor shall obtain a password for electronic submission at <https://portal.fas.gsa.gov/assist-web>, submit the approved invoice and a Monthly Status Report in ASSIST.
- Contractor shall reference the appropriate task order (provided by GSA after the award) when submitting requests for client acceptance. A Monthly status report shall accompany the approved/signed invoice in ASSIST. Failure to comply will result in automatic invoice rejection.

If an invoice is rejected, it is the responsibility of the contractor to notify the GSA Project Manager so that issues can be resolved in a timely manner.

Mandatory Training Requirements:

Contractor employees performing under this contract shall complete the following mandatory trainings within 30 calendar days of reporting for duty and annually thereafter when applicable.

1. OPSEC Awareness for Military Members, DoD Employees and Contractors IAW DoDM 5205.02, "DoD Operations Security (OPSEC) Program Manual", dated October 29, 2020.
2. Unauthorized Disclosure of Classified Information and Controlled Unclassified Information IAW DoDI 5200.48, "Controlled Unclassified Information (CUI)", dated March 6, 2020.
3. DoD Mandatory Controlled Unclassified Information (CUI) Training, Executive Order 13556, Controlled Unclassified Information and DoDI 5200.48, "Controlled Unclassified Information (CUI)", dated March 6, 2020.

ID0XXXXXX – Manpower Personnel Testing and Analysis (MPTA) Support Services

4. Insider Threat Awareness IAW DoDD 5205.16, “The DoD Insider Threat Program”, dated August 28, 2017.
5. Privacy Act and Personally Identifiable Information IAW DoDI 5400.11, “DoD Privacy and Civil Liberties Programs”, dated January 29, 2019.
6. IT Security Awareness IAW title 5, Code of Federal Regulations, section 930.301.
7. Counterintelligence Awareness and Reporting Training IAW DoD Directive 5240.06, “Counterintelligence Awareness and Reporting (CIAR)”, dated July 21, 2017.
8. Annual OSD Records and Information Management Training IAW DoD Records Management Program (DoDI 5015.02 Incorporating Change 1, August 17, 2017).
9. Antiterrorism (AT) Level 1 Training. IAW DoDI O-2000.16-V1, “DoD Antiterrorism Program Implementation” dated, November 17, 2016, Change 3, May 7, 2021.

The Contractor shall provide a copy of its employee(s)’ training certificates to the COR to meet the mandatory training requirements.

(END OF PWS)
