

Statement of Requirements
Publication of Military Microgrid Book
Department of Systems Engineering
Naval Postgraduate School

1.0 Background/Introduction:

Springer is the world's leading publisher in design engineering, mechanics, mechanical engineering, robotics and manufacturing engineering – publishing more books in these subjects than any other publishing company. Springer works closely with a large global community of academic researchers and educators who, through their work, want to solve problems and disseminate their ideas, and leave the world better than they found it. They work to reduce our environmental footprint, to promote an inclusive environment, rich in diversity, and to forge links with the communities they serve.

Dr. Douglas Van Bossuyt, with his colleagues, are in the process of editing a book. The textbook is about military microgrids. We are requesting to have the book published in open access and are intending to put out a new edition at a cadence of every 1-2 years. This book is an important contribution to the published books on Microgrids principally because it is geared towards the military microgrid and is very suitable as a textbook for the target audience: military base power managers, staff, military personnel and officers

2.0 Requested Delivery Date: 8/1/2026**3.0 Minimal Technical Requirements/Salient Characteristics:**

<u>Item No.</u>	<u>Qty</u>	<u>Unit</u>	<u>Manufacturer</u> (If known)	<u>Part Number</u> (If known)	<u>Description</u>
	1	EA	Springer	Not known	<i>Production of open access textbook provisionally titled:</i> <i>Military Microgrids – Installation, Operational, Expeditionary, and Tactical Microgrid Applications</i> <i>Comprising of approximately 320 pages including approximately 90 illustrations.</i> <i>The textbook is drafted by multiple editors including Douglas Van Bossuyt (corresponding editor), Giovanna Oriti, Ron Giachetti, and Bill Anderson. Multiple chapters written by a variety of contributing authors are present.</i> <i>The work is intended to be published under the terms of Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License.</i>

NPS Technical POC: Dr. Douglas Van Bossuyt, Associate Professor, Department of Systems Engineering, 831-656-7572, douglas.vanbossuyt@nps.edu

NPS POC for Acceptance of Deliverables: Same as TPOC

NPS Financial POC: Javier Jimenez, Sponsored Program Funds Administrator, javier.jimenez@nps.edu

Delivery Instructions:

Deliveries shall be made to the NPS Warehouse Monday through Friday between the hours of 0700-1130 and 1230-1600 PST. Make sure to include the USG Contract Number on the package and/or packaging slip for ease of reference and processing.

NPS Warehouse
1988 Lake Del Monte Drive -- Building 349
Monterey, CA 93943

Delivery Contact Information:

Warehouse – (831)656-2256

Customer – Dr. Douglas Van Bossuyt
