

DHS | Office of Health Security | Virtual One-on-One Market Research Meeting Request

This form is to be completed by companies requesting a virtual One-on-One Market Research meeting, on May 27, 2026, in support of the DHS OHS Occupational Health Electronic Health Record (Occ Health EHR) / Medical Information System Industry Day.

* Required

1. Your company name *

2. Name and title of company point-of-contact *

3. POC Phone number *

4. POC Email address *

5. **One-on-One Attendees**

Provide the names, roles, and email addresses of personnel who will participate in the virtual 1-on-1 session in the event your company is selected for a virtual one-on-one market research meeting. *

6. **Solution Overview**

Briefly describe your Occupational Health EHR / Management Information System solution and how it aligns to DHS's key focus areas (e.g., occupational privacy and governance, medical surveillance, injury/RTW management, reporting/analytics, interoperability). *

Please enter at most 2000 characters

7. **Demonstration Readiness**

Are you prepared to provide a live capability demonstration of your solution in a 60-minute virtual one-on-one market research meeting on May 27, 2026? *

☐ Yes

☐ No

8. **Proposed Demo Focus Areas**

Identify up to three capabilities and/or workflows you would prioritize demonstrating. Examples include:

- Occupational privacy and RoleBased Access Control (RBAC);
- Surveillance engine and longitudinal review;
- "Exposure and Occupational Summary" views;
- Injury/RTW workflows and use of OEM templates for common injuries;
- Records and document management (e.g., requesting/receiving external records, uploading and routing for clinician review, search/OCR);
- Association of covered employees with specific duty locations over time (including any realtime or nearrealtime capabilities) to support exposure tracking, incident response, and dutystatus management, with appropriate privacy and access controls;
- Readiness dashboards and analytics;
- Interoperability with HR, identity/SSO, labs, or other systems.

*

Please enter at most 2000 characters

9. **Records and Document Management**

Briefly describe which aspects of records and document management you would plan to demonstrate, such as:

- How internal and external records are requested, received, stored, tracked, and sent;
- How new records (including scanned documents) are uploaded, flagged/notified for clinician review, and documented (review and followup);
- Whether and how scanned/attached records can be searched (e.g., OCR, keyword/abbreviation search);
- How records are released and how patients can quickly obtain copies (e.g., for urgent travel or operational needs).

*

Please enter at most 2000 characters

10. **Occupational Privacy and RBAC Demonstration**

Briefly describe which aspects of your rolebased access and privacy model you would plan to demonstrate, including:

- How access to occupational health records is restricted to authorized users;
- How mental/behavioral health and EAPrelated occupational data are segregated and specially protected;
- How “minimum necessary” views are provided for nonclinical roles (e.g., HR, supervisors, safety), including how employers can see employee restrictions, restriction duration, and followup dates;
- How records are entered, addenda created, and previous versions or amendments are displayed and managed.

*

Please enter at most 2000 characters

11. **Comparable Customers** (Optional)

Optionally list up to two comparable customers (e.g., by size and sector) where your occupational health solution and the focus area capabilities above are in production.

Please enter at most 2000 characters

12. **Logistics and Constraints**

Note any technical or scheduling constraints for your organization (e.g., demo environment requirements, time zone limitations) that DHS should consider for planning a one-on-one market research meeting. If none, enter Not Applicable. *
