INSTRUCTIONS & RULES OF ENGAGEMENT

Compliance with the following instructions is mandatory for all attendees.

Requirement	Instruction
Attendance Limit	Limited to a maximum of two (2) attendees per prospective bidder.
Transportation	Contractors must provide their own vehicle to convoy/follow behind Government personnel to the various locations.
Base Access	Personnel without active DoD access credentials must obtain a visitor pass at the Visitor Control Center. A valid driver's license is required. Please allow up to 45 minutes for processing.
Photography	STRICTLY PROHIBITED. No pictures are allowed to be taken at any time during the site visit.

PROJECT OVERVIEW & SCOPE

Project Title: APG-SOUTH Unidirectional Hydrant Flushing and Repair and Potable and Sanitary Utility Infrastructure Maintenance and Repair

Description: A non-personal services contract to support APG's unidirectional flushing program and utility infrastructure maintenance across APG-South (Edgewood) and the Adelphi Laboratory Center.

Contractors attending the site visit should be prepared to observe environments related to the following core scope requirements:

- Flushing & Documentation: Identify, execute, and record unidirectional flushing sequences for integration into APG's existing GIS/Database platform via structured Excel spreadsheets.
- Inspections: Inspect fire hydrants and main line valves for appearance, accessibility, leakage, and functionality in strict accordance with AWWA M-17, AWWA M-44, NFPA 291, and ISO requirements.
- Maintenance & Repair: Repair or replace fire hydrants and potable/sanitary water lines as needed.
- Meter Calibration: Monitor, maintain, and calibrate Neptune water meters.
