

TEST4 Site Tour Q&A

Area	Question	Answer
Capabilities	Will the Government provide a complete and separate list of Quality Programs and Required Certifications?	Required certifications, if any, will be available in the final RFP. Continue to monitor SAM.gov.
Capabilities	Can the Government describe the current capabilities of data review and post-test analysis tooling used?	Data review is developed per customer requirements for each program. Requirements for data review and post-test analysis tooling will be in the RFP.
Capabilities	Does the Government plan to gain certification for the labs, in general, to 17025, or for the cal lab specifically?	No, the Government does not plan to gain 17025 certification in the calibration lab specifically or the labs in general. However, WSTF site calibration processes are Z540.1 compliant.
CBA	Will the Government please provide copies of any relevant Collective Bargaining Agreements (CBAs) applicable to the TEST 4 contract?	Information of this type will be provided in future RFP attachments. Continue to monitor SAM.gov.
CBA	What is the Union contractual period for negotiations? When is the first allowable window for re-negotiations?	Any CBA information NASA is able to provide will be provided in future RFP attachments. Continue to monitor SAM.gov.
CBA	With respect to Union Labor, can the CBA be provided (including category composition, number of personnel per category, and costs)?	Information of this type will be provided in future RFP attachments. Continue to monitor SAM.gov.
Data	For test programs with classified data, can the Government describe how test data storage and analysis are managed across WSTF infrastructure and customer-provided systems?	WSTF data systems are not approved for classified data storage. For programs that require classified data collection and analysis, customers have provided their own data acquisition systems. WSTF systems are airgapped and do not interface with customer provided data acquisition systems.
Equipment	Considering the cost of GSA vehicles, have cost savings measures been implemented, such as electric vehicles or UTVs?	Yes, cost saving measures have been implemented. In accordance with NPR 6000.2, Fleet Management and WSI 24-SW-0009, Fleet Management of GSA Leased and Government Owned Vehicles, the WSTF Vehicle Utilization Review Board (VURB) is required to conduct annual reviews of leased and Government fleet resources to assess organizational fleet requirements and to identify cost cutting measures by rightsizing, and exploring efficiencies such as the introduction of electric and UTV's to maximize fleet capabilities.
Equipment	Do ALL personnel have a computer or access to a computer with individual login credentials for daily timekeeping and email, etc.?	Yes, all personnel either have an assigned IT asset or access to a shared IT asset with individual CAC login.
Equipment	Please provide a list of equipment in the labs and in the machine shops.	Information of this type will be provided in future RFP attachments. Continue to monitor SAM.gov.
Exchanges With Industry	Will the Government consider shifting the Pre Proposal Conference and additional one on one sessions to after Draft RFP release but before Final RFP release?	The acquisition is still in the strategic planning phase. Information concerning the Pre-Proposal conference will be reflected in the draft RFP. Continue to monitor SAM.gov.
File Types	Can the Government share the data types and file formats that are expected to be generated during test activities described in Section 3.0?	There are numerous file types used across the facility. Here is a partial list of possible file types: .pptx, .xlsx, .xls, .doc, .docx, .pdf, .cine, .jpg, .avi, .dwg, .sdp, .sdg, .mpg, .step, .cdb, .dat, .rst, .cas, .def, .inp, .ipt, .rpt, .tmp, .fas, .stp, .iges, .mp4, .stl, .xml, .h5, .tiff, .lam, .psd, .psb, .dsc0, .gif, .png, .exe, .mdb, .mpp, .m, .mat, .prt, .asm, ., .csv, .dtd
Future Work	Can the Government provide information on any projected upgrades, enhancements, or anticipated surge or growth in scope or requirements for the TEST 4 contract over the next five years?	NASA is unable to share any information about changes in scope requirements or future work beyond what is publicly available.
Inspection	Will the Government provide a list of the inspection requirements and frequency from outside organizations such as the New Mexico Environmental Office, etc.?	The known tentative inspection schedule will be provided and uploaded into the Technical Library documents on SAM.gov.
IT	Can a site-wide IT infrastructure layout be provided? This will aid in understanding and bidding the potential type and implementation of software and systems.	Information of this type may be provided in a future addition to the Technical Library. Continue to monitor SAM.gov.
NAICS	Does the Government intend to compete TEST 4 as a Small Business set-aside under NAICS 541715, Exception 3 (1300-employee size standard), or as a Full and Open competition utilizing NAICS 541715, Exception 3?	The acquisition is still in the strategic planning phase. Information concerning the type of competition will be reflected in the final RFP. Continue to monitor SAM.gov.
Processes	Please provide the process by which cleaning and calibration are integrated today.	Cleaning and calibration are separate processes and not integrated. See the RFP requirements for further information regarding cleaning and calibration.
PWS	The Draft PWS states that "the Contractor shall ... Develop new methods and design, build, model, and validate new test and evaluation systems where existing capabilities are inadequate" (Sec. 3.0). Are upgrades to data systems (including data acquisition, management, and analysis systems) within this scope for TEST4?	Yes. Task orders will be issued under the TEST4 contract to perform system upgrades.
Site Procedures	In WIMS, there is substantial information in the WSTF Policy and Internal Requirements, do we have access to this information to adequately bid the contract scope?	WIMS documents will be made available via SAM.gov as part of the Technical Library.
Site Procedures	What are the current EOC processes and the respective Training Requirements? Are there Quarterly Semiannually ETC tasks?	Requirements relating to WSTF Fire Department processes and training requirements can be found in the RFP
Site Procedures	What are current policies, procedures, software, etc. that work well and would preferred to be retained? What are current policies, procedures, software, etc. that require improvement?	The acquisition is still in the strategic planning phase. The RFP will outline preference and evaluation factors. It will also state which items, processes, or policies, if any, the contractor is responsible for improving. Continue to monitor SAM.gov.
Site Procedures	Are there any area-specific policies, procedures, software, etc. that would prevent a site-wide implementation of such items? If so, please identify.	No
Site Tour	Will the Government provide a list of all Industry Day attendees, including Points of Contact, to facilitate potential teaming arrangements and enable the formation of well-rounded teams best suited to support WSTF?	The site visit attendee list will be made available via SAM.gov.
Site Tour	Would the RDT provide the talking points/site tour reference print outs the speakers used to all offerors?	Yes, the written talking points can be provided upon request. However, there is no script covering the entirety of the tour.
Staffing	Will the Government provide historical staffing levels for the TEST 4 contract to enable offerors to more accurately project future staffing requirements and, in turn, submit more competitive proposals?	Information of this type will be provided in future RFP attachments. Continue to monitor SAM.gov.
Staffing	Can detailed information for the current anticipated retained staffing be provided? This includes labor categories, wages, additional compensation, union status, number of people for each category, etc.	Information of this type will be provided in future RFP attachments. Continue to monitor SAM.gov.
Staffing	Will the Government provide any Hazard Pay information?	Information of this type will be provided in future RFP attachments. Continue to monitor SAM.gov.
Staffing	How large is the Propulsion Computer Engineering (PCE) team, and can the Government provide any information about their workload?	Overall staffing information will be provided in Information of this type will be provided in future RFP attachments. However, the Government cannot provide specific information about the PCE team's size and workload. Continue to monitor SAM.gov.
Systems	Can the Government share whether Propulsion Computer Engineering (PCE) team uses common data systems and analysis tools across test stands? Do data review, analysis, and reporting applications vary from test stand to test stand, or are there common toolkits available across test stands?	Information relating to the data systems and analysis tools used in the Propulsion department can be found in the RFP requirements.
Systems	Is data centrally managed in the Data Center across test stands at WSTF, or is there local data management and storage at the test stands? How is data transmitted between control centers and the Data Center?	Information relating to data management can be found in the RFP.
Systems	Rothe uses MetTeam, currently, in all of its labs and has supported the Government in upgrading from Met/Track* to Met/Team*. Does the government have plans to upgrade to Met/Team*?	WSTF has already upgraded to and currently uses Met/Team* version 3.3.1.56.
Systems	How many licenses of Met/Track* does WSTF require to ensure all stakeholders have appropriate access?	WSTF currently has 10 Met/Team licenses and 6 Met/Cal licenses.
VPP	If the contractor company is not VPP certified, what is the allowable timeframe to become VPP certified?	The contractor's safety program shall be consistent with VPP, but actual certification is not a requirement. Further requirement information will be in the RFP.
Workload	Please provide the number of pieces of equipment calibrated per year by the cal lab.	The RFP will be updated to include calibration laboratory historical workload. Continue to monitor SAM.gov.
