

Notice of Intent: Luminex LX200 IVD System

(75N98026Q00289)

The National Institutes of Health intends to award a Firm-Fixed-Price Purchase Order to Luminex Corp.

In accordance with FAR Part 6.302-1, Luminex Corp is the only known responsible source who can provide the products/services that meet our standards. No other source has been identified who can provide the requirements listed below.

This acquisition is for the Luminex 200 IVD System, a flow-based bead reader platform required for high-throughput, multiplexed genomic and proteomic biomarker analysis. The system is necessary for the Clinical Trials Correlative Laboratory Core/Center for Cancer Research at the National Cancer Institute (NCI) to perform simultaneous detection of up to 100 analytes in a single reaction volume. This technology is critical for advancing ongoing research involving complex biological samples where sample volume is limited and high-sensitivity multiplexing is required. The system's xMAP technology allows for comprehensive biomarker profiling while conserving precious clinical specimens. Furthermore, the inclusion of the 21 CFR Part 11 compliance module ensures that all data generated from these clinical trials meets the stringent regulatory standards for data integrity and electronic records.

This notice is not a request for competitive quotes. Luminex Corp is the service provider. However, any available small businesses (e.g., 8(a), service-disabled veteran owned small business, HUBZone small business, small disadvantaged business, veteran-owned small business, and women-owned small business) as stated herein may submit a written capability statement that clearly supports and demonstrates their ability to perform the requirement. A determination by the Government to compete this proposed award based upon responses to this notice is solely within the discretion of the Government.

It is anticipated that an award will be issued approximately five (5) days after the date of this notice unless the Government determines that another vendor has the capability to meet this requirement.

Please email responses to david.shen@nih.gov no later than 11:00 p.m. EDT on May 9, 2026.
