

STATEMENT OF WORK (SERVICES)
(SOW)

GENERAL INFORMATION

Title of Project:

Service/Maintenance Agreement renewal for the Discover 2.0 & Liberty Blue HT12/Razor microwave-assisted chemical synthesis systems made my CEM Corporation

Statement of Need and Purpose:

The purpose of this action is the renewal of a service agreement for the Discover 2.0 and Liberty Blue HT12/Razor bench-top microwave reactors designed for small-scale organic and medicinal chemistry synthesis used by the NCATS Early Translation Branch (ETB) Chemistry. This request is intended to begin a new coverage agreement including one preventative maintenance visit. Current PO for this service agreement is PO #: 75N95C24P00096

These instruments are being used for multiple projects in our chemistry lab, including but not limited to, TR000192-10 Selective Inhibitors of ALDH1A1; TR000436-04 Identification of ALPK1 inhibitors; TR000251-09 qHTS to Identify Inhibitors of NNMT1; TR000106-10 qHTS to Identify Inhibitors of DYT1 Inclusion Formation

Background Information and Objective:

We require a service/maintenance agreement for the Discover 2.0 and Liberty Blue HT12/Razor systems. The Liberty Blue system allows scientists to produce high-purity peptides, and the Discover 2.0 is a microwave reactor that aids in performing any organic or inorganic synthetic chemistry. Full function of this equipment is necessary for the continuity and standardization of NCATS research. The service agreement must include unlimited service visits (with troubleshooting and parts replacement coverage) preventative maintenance visits, original equipment manufacturer parts and accessories, and original equipment manufacturer (OEM) factory trained service engineers.

These are specialized laboratory machines that help us make new drug ingredients faster, more consistently, and at lower development cost.

Period of Performance:

Period of Performance: one year upon acceptance of award.

SCOPE OF WORK

General Requirements:

Independently and not as an agent of the Government, the Contractor shall furnish all the necessary services, qualified personnel, material, equipment, and facilities, not otherwise provided by the Government as needed to perform the Statement of Work below:

- Service/Maintenance Agreement for the following systems with the below coverage:
 - o Discover 2.0 (SN#N3308)
 - o Liberty Blue HT12/Razor (LB2403; HA1128; DA3755; RZ1025; Laptop (ST:523QRG3))
- One (1x) Preventative Maintenance performed annually on covered instrument/system
- Inspection stickers will be affixed to each unit at the time of inspection
- An equipment status report will accompany the certificates, providing an overview of inspection findings

Specific Requirements:

Specifically, the NCATS ETB Chemistry Program requires the following maintenance support for the equipment detailed below:

- One (1x) scheduled on-site preventative maintenance (PM) visit should include:
 - o Cleaning of instrument
 - o Part verification and replacement
 - o Efficacy testing
- 24-hour telephone troubleshooting support
- Fast response time
- Travel, labor, and parts included in cost of agreement

LEVEL OF EFFORT:

All PM work and all service work must be completed by a CEM factory trained engineer.

GOVERNMENT RESPONSIBILITIES

NCATS will provide access to the facility.

DELIVERY OR DELIVERABLES

None

REPORTING REQUIREMENTS

None

OTHER CONSIDERATIONS

Travel:

Travel is not NCATS responsibility.

Key Personnel:

All PM work and all service work must be completed by a CEM factory trained engineer.
