

**JUSTIFICATION FOR NON-COMPETITIVE PROCUREMENT (JNCP)
FOR ACTIONS ≤ SIMPLIFIED ACQUISITION THRESHOLD (SAT)**

JNCP#: [REDACTED]

PR/Solicitation Number: [REDACTED]

Code: [REDACTED]

1) **Agency, Contracting Activity and Purpose:** Naval Information Warfare Center - Pacific, Justification for Other than Full and Open Competition.

2) **Description of the Supply or Service being procured, its intended use and anticipated/estimated value**

a. MANUFACTURER: Golden Altos Corp.

Item 1: Package Material

Description: 28 QFN with lid

Part No.: TBA
[REDACTED]

Item 2: Non-Recurring Engineering (NRE) for Test Socket Cost for 28 QFN

Description: Up to 40GHz RF sockets

Part No.: TBA
[REDACTED]

Item 3: Assembly - Engineering Build

Description: Engineering assembly process Includes:

- 2nd optical (High Power)
 - Die Attach (H-20)
 - Wire Bond (1 mil gold wire)
 - 3rd optical (Low Power)
 - Epoxy lid attach.
 - Single Mark (Top)
- Part No.: TBA
[REDACTED]

Item 4: Bond Setup Fee

Description:

Part No.: TBA
[REDACTED]

Item 5: Shipping

Description: Ground Shipping

Part No.: TBA
[REDACTED]

b. [REDACTED] requests to procure Quad Flat No-lead (QFN) packages and QFN test sockets for custom designed integrated circuits (IC), by Golden Altos Corp. These packages and sockets will be used in support of the [REDACTED], which works to [REDACTED]

[REDACTED] QFN packages are compact, leadless surface-mount semiconductor protective casings that encapsulate the delicate silicon dice (the actual IC chips) and provide the necessary physical and electrical connections to the external circuitry on a printed circuit board (PCB). The custom test sockets attach to the PCBs, and the

QFN packages are then placed into the sockets, which allows one PCB to [REDACTED].
This procurement will be used to fulfill [REDACTED].

c. [REDACTED]

3) **Possible Authority for Non-Competitive Procurement**

Sole/Limited Source Procurement ((Sole Source: Only one source exists with no known distributors of the required product or service. Only One Responsible/Capable Source IAW either FAR 8.405-6(a), FAR 13.106-1(b) or FAR 16.505(b)(2)).

4) **Reason for Non-Competitive Procurement**

Testing (For example, NIWC Pacific supports laboratory testing that must replicate shipboard/command environment without deviation.)

5) **Provide rationale and justification regarding the above selection.**

Golden Altos Corp. is the only manufacturer capable of fulfilling this requirement as the package provider for the [REDACTED]

[REDACTED] Procuring the required supply ensures compatibility and best testing result outcomes for [REDACTED] at the optimum level, being [REDACTED]. Attempting to integrate this custom supply from an alternative manufacturer (if such a manufacturer exists) would create [REDACTED]. Such risks would cause critical delays and compromise to their mission, thus costing the Government in time, labor, and finances.

6) **Describe the Market Research conducted.**

Market research was based on a contractor's ability to provide a custom package for [REDACTED], which requires 26 or more pins support capability, high frequencies operation, and support placement into a PCB socket for [REDACTED]. This market research was, and has continuously been, conducted since July 2025. To date, Golden Altos Corp. is the only manufacturer with the ability to fulfill this requirement and has delivered this package for other chips designed for the [REDACTED]. Other businesses were considered but were found incapable of meeting the pin-count and frequency requirements.

7) **Any other information of facts supporting the justification to limit competition not described elsewhere on this form (i.e. international agreement).**

Issuing an award to Golden Altos for this requirement is most beneficial to the Government in terms of time and cost. Golden Altos is not only able to provide the necessary custom supply but can provide them to the Government in small quantities and provide the packages and sockets together in single orders. This is an uncommon practice, as other businesses require large quantity orders and separate purchases of packages and sockets, which leads to [REDACTED] inefficiencies.

8) **Provide a statement of actions that will be taken to remove or overcome any barriers to competition prior to any future procurements for this Supply or Service.**

For any future package purposes, the branch will continue to perform market research for competitors that can meet the technical requirements at prices most beneficial to the Government.
