NOTE 1: A signature block will appear here (replacing these notes) based on the "Dollar Value of this Acquisition" selected above. Since most digital signatures that include date/time-stamps are redacted before they are made publicly available, always insert the date in the "Date" cell when affixing a digital signature to this document.

Department of the Air Force: Justification for Other Than Full and Open Competition

I. Agency and Contracting Activity (RFO 6.104-1(a)(1)):

AFLCMC/PZITB
2275 D St., Bldg. 16, Rm 132
WPAFB, OH 45433-7288

II. Nature and/or description of the action being approved (RFO 6.104-1(a)(2)):

This document approves the award of a contract on a sole source basis to System High Corporation for mobile on-site destruction of classified IT equipment at Wright-Patterson Air Force Base. This justification is made on an individual basis.

III. Description of supplies/services required to meet agency needs (RFO 6.104-1(a)(3)):

The services required are for the on-site classified IT destruction of items across multiple Air Force agencies at Wright Patterson Air Force Base. The contractor shall provide all personnel, equipment, and materials, including a mobile destruction facility, to perform the work. The contractor is required to follow the destruction guidance of NSA/CSS Policy Manual 9-12.

The total estimated value of this order is [REDACTED] This will be a firm-fixed-price contract with cost reimbursement CLINs for travel costs.

IV. Statutory Authority Permitting Other Than Full and Open Competition (RFO 6.104-1(a)(4)):

10 U.S.C. 3204(a)(1), Only one responsible source and no other supplies or services will satisfy agency requirements.

V. Rationale for Use of Authority (RFO 6.104-1(a)(5)):

The requirement is for the on-site destruction of classified IT equipment, which must be performed in strict accordance with the NSA/CSS Policy Manual 9-12, "Storage Device Sanitization Manual."

The nature of this work is highly specialized and requires a contractor with:

- Demonstrated experience and capability in handling and destroying classified materials for the U.S. Government.
- Specialized, mobile equipment and facilities, specifically a self-contained destruction vehicle that is certified to meet the standards outlined in National Security Agency/Central Security Service (NSA/CSS) 9-12 and capable of operating securely on a government installation.
- The logistical capability to bring the necessary destruction equipment to the customer site, thereby eliminating the security risks associated with transporting classified material off-site.
- Personnel with the appropriate security clearances and training to handle classified materials from multiple government agencies in a shared workspace.

System High Corporation is currently the only provider of mobile SAP IT destruction approved by NSA/CSS, demonstrating a unique capability that directly addresses the government's primary security requirement: to ensure classified material is not put at risk during transport.

In summary, the combination of requiring a contractor to provide approved mobile destruction for on-site services adheres to the exacting standards of NSA/CSS Policy Manual 9-12, and manage a multi-agency project on a military installation constitutes a unique and specialized set of qualifications.

Department of the Air Force: Justification for Other Than Full and Open Competition

VI. Integrated Market Analysis and Efforts to Solicit Competition (RFO 6.104-1(a)(6), (8), and (10)):

Market research was conducted and found that System High Corp is the only provider of a mobile SAP IT destruction service that is approved by NSA/CSS. Additional providers have been evaluated since July 2025, but none have been approved.

VII. Determination of Fair and Reasonable Cost (RFO 6.104-1(a)(7)):

The Contracting Officer is responsible for evaluating, determining, and documenting the anticipated contract cost/price is fair and reasonable in accordance with RFO Subpart 15.4, Contract Pricing.

VIII. Any Other Facts Supporting the Justification (RFO 6.104-1(a)(9)):

System High Corporation's capability of a mobile destruction unit demonstrates a unique capability that directly addresses the government's primary security requirement: to ensure classified material is not put at risk during transport.

IX. Actions to Overcome Barriers to Competition (RFO 6.104-1(a)(11)):

The agency will continue to monitor the marketplace for new entrants that may become capable of meeting the government's stringent requirements for mobile classified IT destruction services in accordance with NSA/CSS Policy Manual 9-12. For future acquisitions, the agency will conduct market research to assess if additional approved sources have emerged.
