INTERIOR BUSINESS CENTER
Washington, DC 20240

SOURCES SOUGHT NOTICE

Title: Kijik, Alaska

Issue Date: April 2, 2026

Response Due Date: April 7, 2026 @ 12:00 PM, Mountain Daylight Time (MDT)

THIS IS A SOURCES SOUGHT NOTICE ONLY. THIS IS NOT A REQUEST FOR QUOTE (RFQ) OR A REQUEST FOR PROPOSAL (RFP). THIS DOES NOT CONSTITUTE A SOLICITATION AND SHALL NOT BE CONSTRUED AS A COMMITMENT BY THE GOVERNMENT.

Issued by: This Sources Sought Notice is being issued by the Department of the Interior (DOI), Acquisition Services Directorate (AQD), Interior Business Center (IBC), **on behalf of the** Appraisal and Valuations Services Office (AVSO).

Introduction: The Government is seeking [Indian-owned Small Business Economic Enterprises \(ISBEE\)](#) and [Indian-owned Economic Enterprises \(IEE\)](#) that are interested in supporting this project.

Requirement: The objective of this requirement is to procure appraisal and valuation services. The AVSO has determined there is a need to form an independent opinion of the market value of the fee simple estate of the defined property.

See attachment 1, Draft Statement of Work (SOW), for details.

North American Industry Classification System (NAICS): 531320 “Offices of Real Estate Appraisers”

Product Service Code (PSC): R411 “Support-Professional: Real Property Appraisals”

Response Requirements: Responses should be limited to four (4) pages. Respondents shall include the following information in their submissions:

- a) Name of Company
- b) Company Address
- c) Unique Entity Identifier (UEI)
- d) Commercial and Government Entity (CAGE) Code
- e) Point of Contact (*include telephone number and email address*)

- f) Identification of business size and category, i.e. ISBEE, IEE
- g) Capability statement of the company. The Statement should address the following:
 - i. Vendor's capability as it relates to the requirement referenced herein;
 - ii. Description of recent and RELEVANT experience to the NAICS code identified within this notice;
 - iii. Additional, applicable information as it pertains to this announcement that could assist the Government in determining the contractor's capabilities as it relates to the requirement referenced herein.

Response Due Date: RESPONSES ARE DUE NO LATER THAN April 7, 2026, at 12:00 PM MDT. Responses to this source sought shall be sent directly to the Contracting Officer (CO), Mr. Morgan Schickler, at morgan_schickler@ibc.doi.gov and Contract Specialist (CS), Mr. Robert Staats, at robert_staats@ibc.doi.gov. Responses submitted by any other method will not be accepted or answered. Please ensure that your e-mail response has ***"Sources Sought Notice – Kijik, Alaska"*** in the subject line.

Disclaimer: The purpose of this market research is to survey prospective vendors in order to collect data, comments, and other information pertaining to this industry. The information submitted in response to this announcement will assist IBC in determining the appropriate procurement strategy in the future.

The Government is under no obligation to award a contract as a result of this announcement. No funds are available to pay for any information received from potential sources. All information submitted in response to this announcement is strictly voluntary.

Only electronic mail will be acceptable for vendors' submissions. The Government does not intend to provide feedback or evaluate submissions.

[End of Sources Sought Notice]

UNITED STATES DEPARTMENT OF THE INTERIOR
OFFICE OF THE SECRETARY
Appraisal and Valuation Services Office

APPRAISAL STATEMENT OF WORK

- Any questions about these appraisal instructions or other technical requirements for this assignment should be addressed to the Appraisal and Valuation Services Office (AVSO).
- This Statement of Work (SOW) is a guide to the appraiser to help identify the appraisal problem. It is not intended to limit the scope of appraisal investigations or bias the independent judgment or value opinions of the appraiser.
- The selected appraiser must independently verify all information provided in this statement of work for reliability and subsequent use in the appraisal.

SECTION 1: CASE PROPERTIES

Project Name:	LACL 09-154 & 09-163 (Kijik)
AVIS Case ID:	231359
AVIS Project Number:	P260124
Case Type:	Conservation Easement Acquisition by National Park Service (NPS)
Requested Service:	Two appraisals (Before & After Methodology) of three parcels in two NPS Tracts involving a proposed conservation easement over all of the parcels.
Appraisal Case Type:	Partial acquisition requiring two appraisals: 1) The market value before the imposition of a conservation easement, 2) The market value after, as if the conservation has been imposed.
Location:	West side of Lake Clark south of the Chulitna River within the southwestern portion of Lake Clark National Park & Preserve (LACL), Lake and Peninsula Borough, Alaska.

SECTION 2: SUBJECT OF THE APPRAISAL

Property Description:	Conservation Easement (CE) that will encumber approximately 26,629 acres of undeveloped tundra and wooded land generally owned by the Kijik Corporation. For appraisal purposes, NPS has identified the property as three separate parcels. Parcel 1, which totals approximately 2,890 acres, is NPS Tract 09-154. Parcel 2, which totals approximately 12,612 acres, and the adjacent Parcel 3, which totals approximately 11,158 acres, comprise NPS Tract 09-163.
------------------------------	--

	The subject properties are unimproved and inaccessible by road. According to NPS there are no known environmental concerns or nearby development. The land is identified by NPS as “high amenity recreation” land. It is noted that the properties are in an area of Alaska that does not have formal tax rolls or tax assessor’s parcel numbers. However, they are within the Iliamna Recording District. Please refer to the exhibits to this Statement of Work for more detailed information relating to the property and the proposed CE. The information provided herein must be investigated and confirmed by the appraiser.
Project Background Summary:	Kijik Corporation was created and conveyed 126,000 acres of surface estate lands through the Alaska Native Claims Settlement Act (ANCSA) in 1976, much of which is within Lake Clark National Park and Preserve (LACL) boundaries. Protecting the Kijik owned lands within the park boundaries have long been a priority for the park as outlined in the General Management Plan (GMP). The NPS has had discussions with Kijik over the last decade about using conservation easements to this end, but it wasn't until 2023 that Kijik was willing to advance a project to encumber portions of their property with a conservation easement. Phase 1, which included conservation easements for Chulitna and Tazimina, closed in 2024 and Kijik has approved the appraisal of certain lands to include for a potential Phase 2 conservation easement project, which is the subject of this SOW, utilizing the same terms that were negotiated for Phase 1. According to NPS, there are no other additional phases pending or planned at this time.
Information to be Provided by NPS after Contract Award:	Draft Land Status Report (LSR) and Exhibits A & B & C of the Draft Deed Conservation Easement are to be provided by NPS by or before July 1, 2026.
Legal Description:	See SOW Attachment 8. Any identification by the appraiser of the larger parcels identified by the appraiser shall contain the applicable legal description and the corresponding acreage amounts.
Property Rights Appraised:	Consistent with the Alaska Native Claims Settlement Act, the Regional Corporation, Bristol Bay Native Corporation holds the mineral estate. Thus, the appraisal of the Before Acquisition and the After Acquisition shall be for the surface estate only and shall exclude the subsurface estate. <u>Before Acquisition:</u> Fee simple estate (excluding the subsurface estate), subject to existing exclusions, encumbrances, and exceptions as described in the Preliminary Title Report. <u>After Acquisition:</u> Fee simple estate (excluding the subsurface estate), subject to existing exclusions, encumbrances, and exceptions affecting the remainder property and the terms and conditions of the draft conservation easement.

Outstanding Rights and/or Reservations:	The NPS has provided a Commitment for Title Insurance for the identified property prepared by First American Title Insurance Company, File No. 0209-4336672, dated January 26, 2026. A copy of the Preliminary Title Report is included as an Award Exhibit to this Statement of Work. The outstanding rights and/or reservations applicable to the larger parcel(s) include the Exceptions identified in the Preliminary Title Report. The appraiser must independently research, identify and discuss any outstanding rights affecting the larger parcel.
Conservation Easement:	The Draft Deed Conservation Easement an attachment to this Statement of Work. Parts 1, 2, 3 and 4 of the Conservation Easement identify the purpose (of the easement); rights conveyed to the grantee; rights reserved by the grantor; and prohibited uses of the protected property, respectively. Exhibits A & B of the Draft Deed Conservation Easement as well as the “Baseline Document Report” referenced in the draft conservation easement were not provided by NPS as of the date of this SOW. <i>(Note: Exhibits A & B & C of the Draft Deed Conservation Easement are to be provided by NPS by or before July 1, 2026)</i>
Owner of Record:	Kijik Corporation, as to the Surface Estate, and Bristol Bay Native Corporation, as to the Subsurface rights.
Water Rights:	There are no identified water rights associated with this property according to the realty specialist. This information must be investigated and confirmed by the appraiser.
Water Resources:	The three NPS identified parcels are remote tracts of vacant land situated within the Lake Clark National Park & Preserve in Alaska and are either proximate or adjacent to Lake Clark and the Chulitna River. Specifically: Parcel 1 – is approximately 8 miles west of Lake Clark and is just south of the Chulitna River but does not have direct river frontage. Parcel 2 - is directly adjacent to and west of Lake Clark, and is also directly adjacent to and south of Parcel 3. Parcel 3 - is directly adjacent to and west of Lake Clark, and is also directly adjacent to and south of the Chulitna River. In summary, Parcels 2 and 3 have direct frontage along Lake Clark. Parcel 3 also has a small amount of direct frontage along the Chulitna River according to the NPS Realty Specialist. Also, there are numerous smaller lakes throughout all three parcels, however, according to the NPS Realty Specialist, they are all unnamed bodies of water, aside from Lake Clark. This information must be investigated and confirmed by the appraiser.

Minerals:	Consistent with the Alaska Native Claims Settlement Act, the Regional Corporation, Bristol Bay Native Corporation holds the mineral estate. Thus, the appraisal of the Before Acquisition and the After Acquisition shall be for the surface estate only and shall exclude the subsurface estate. We've requested a mineral review from AVSO's Division of Minerals Evaluation (DME) that will be forwarded to the contract appraiser upon completion within approximately 4 to 6 weeks of contract award.
Access:	The three NPS identified parcels are remote tracts of land within the Lake Clark National Park & Preserve in Alaska and although they each have some type of physical access (either directly or indirectly), none of them have legal access according to NPS. Specifically: Parcel 1 - has no direct access but is indirectly accessible via floatplane and via boat by nearby lakes and the nearby Chulitna River and also has indirect overland access via foot/snowmachine. Parcel 2 - has Lake Clark shore frontage and is accessible directly by floatplane and via boat and also has indirect overland access via foot/snowmachine. Parcel 3 - has a developed air strip for wheeled plane access. Additionally, Parcel 3 has Lake Clark shore frontage as well as a small amount of shore frontage on the Chulitna River and is accessible directly by floatplane and via boat from both Lake Clark and Chulitna River. Parcel 3 also has indirect overland access via foot/snowmachine. According to NPS, the three NPS identified parcels all have physical access but no recorded legal access. The legal and physical access must be investigated and confirmed by the contract appraiser.

SECTION 3: APPRAISAL PROBLEM IDENTIFICATION	
Client:	U.S. Department of the Interior, AVSO
Intended Users:	AVSO and NPS on behalf of the United States of America
Intended Use:	The appraisal report will be used for the acquisition of a conservation easement of the identified subject property by NPS. It is not intended for any other use.
Type of Value:	Market Value (before and after conditions).
Effective Date: ¹	The effective date (date of value) shall be no more than 30 days prior to the date of the first submission of the appraisal report.
Definition of Value:	The definition of market value to be used in the appraisal is as follows: <i>Market value is the amount in cash, or on terms reasonably equivalent to cash, for which in all probability the property would have sold on the effective date of value, after a reasonable exposure time on the open competitive market, from a willing and reasonably knowledgeable seller to a willing and reasonably knowledgeable buyer, with neither acting under any compulsion to buy or sell, giving due consideration to all available economic uses of the property. [UASFLA 1.2.4., pg. 10]</i>

¹ As defined by USPAP, the effective date is the date to which the appraiser's analyses, opinions, and conclusions apply.

SECTION 4: ASSIGNMENT CONDITIONS	
Applicable Standards:	Applicable standards include: ➤ Uniform Standards of Professional Appraisal Practice (USPAP), 2024-2025 edition; and the ➤ Uniform Appraisal Standards for Federal Land Acquisitions, 6th Edition (UASFLA). ➤ Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs (Uniform Act 49 CFR Part 24).
Extraordinary Assumptions:	None. If the appraiser determines that an extraordinary assumption is necessary, he/she must contact the AVSO review appraiser for prior written approval.
Hypothetical Conditions:	Appraising the property in the after condition with the assumption that the CE is in place is a standard assignment condition, and will be considered as such by the review appraiser. If a legal instruction is necessary, it will be dealt with internally by the AVSO Review appraiser. If the contract appraiser determines that any other hypothetical conditions are necessary, he/she must contact the AVSO Review Appraiser for prior written approval.
Jurisdictional Exceptions:	The appraiser has been instructed to produce a UASFLA compliant appraisal. Section 1.2.4 of the <i>UASFLA</i> states that “appraisers should not link opinions of value under these Standards to a specific opinion of exposure time.” USPAP requires the appraiser to develop and report a reasonable exposure time if it is a component of the definition of market value, which contravenes the UASFLA. Therefore, the appraiser should invoke USPAP’s Jurisdictional Exception Rule to comply with the UASFLA.
Pre-Work Conference:	The appraiser will need to coordinate a pre-work meeting with the assigned AVSO Review Appraiser prior to the inspection of the property. The purpose of the meeting is to discuss the Statement of Work and potential inspection dates. Representatives from the NPS should be notified of the date/time of the meeting and invited to participate if they chose to. The meeting will be conducted by phone/video call. If any significant items of concern are observed during the property inspection, from aerial photographs, or other materials researched during the appraisal process, then the appraiser must contact the AVSO Review Appraiser before continuing with the appraisal assignment.
Property Inspection:	The appraiser must inspect the subject property and all comparable market data used in the appraisal, if possible. The inspection of the subject property will be coordinated with the NPS realty staff and the property owner. The appraiser must notify, in advance, both the NPS realty staff and AVSO review appraiser when the subject property inspection will occur. If a “boots on the ground inspection” is not possible due to the remote location and

	accessibility issues for this property, a Fly-Over is adequate as long as there are good photos.
Contacting Property Owner:	Under the Uniform Act, the owner or the owner's designated representative must be given an opportunity to accompany the appraiser during the inspection of the property (UASFLA 1.2.6.4).
Larger Parcel:	The appraiser must conduct all research necessary to develop a well-supported larger parcel conclusion in accordance with UASFLA 6th Edition, Sections 1.2.7.3.1, 1.4.6, and 2.3.3.1.2. Upon completion of the highest and best use and the larger parcel analysis sections of the report, the appraiser will notify the AVSO review appraiser and forward those sections for discussion prior to finalizing the rest of the appraisal.

SECTION 5: APPRAISAL REQUIREMENTS AND INSTRUCTIONS

General Appraisal Requirements and Instructions

1. The AVSO Statement of Work, engagement letter, and other assignment instructions must be included in the addenda to the appraisal report. Reference to these documents should be provided in the body of the report.
2. The appraisal report should substantially conform to the sequence and content described in Section 2 of the *Uniform Appraisal Standards for Federal Land Acquisitions* 6th Edition.
3. The appraisal should include detailed descriptions of the comparable properties. Each of the comparables should be accompanied by a location map and if possible, a recent photograph. The use of aerial or satellite imagery is acceptable. The appraiser must provide sufficient information relating to the comparable properties in order to provide the intended users with an understanding of the rationale presented within the report.
4. The appraisal report should include contact information for the party or parties relied upon to verify each sale (i.e. telephone number, email, etc.), along with maps clearly showing the location of the subject relative to the comparable property.
5. Sales requiring extraordinary verification in accordance with UASFLA Section 1.5.2.4 must adhere strictly to the standards enumerated therein.
6. The appraisal report will be reviewed for compliance with the terms of this Statement of Work, including all cited standards. Any findings of inadequacy will require clarification and/or correction.
7. While the public is not an intended user of the appraisal report, the Freedom of Information Act (FOIA) and Agency policy may result in the release of all or part of the appraisal report to others.
8. The appraiser shall consider the appraisal report and all U.S. Department of the Interior internal documents furnished to the appraiser to be confidential. Refer all requests for information concerning the appraisal to the AVSO review appraiser.
9. AVSO will not normally accept custody of confidential information. If the appraiser finds it necessary to rely on confidential information, then he/she will contact the AVSO review appraiser

for instructions. The AVSO review appraiser will view the information and provide further instruction to the appraiser regarding handling and storage of the confidential information.

10. If including any proprietary information in the appraisal, the appraiser must gain concurrence from the AVSO review appraiser and deliver the proprietary information in a separate binder.
11. When the appraiser has performed any services regarding the subject property within the prior three years, he/she must disclose this information to the AVSO review appraiser prior to engagement.
12. The appraisal report content should rely on the "AVSO Review Checklist" attached as an exhibit to this Statement of Work. **The contracted appraiser is encouraged to refer to this checklist prior to submitting the appraisal report for review.**

Special Appraisal Requirements and Instructions

1. AVSO is the appraiser's sole client. The appraiser may not communicate assignment results to any party except AVSO, unless authorized to do so in writing by AVSO.
2. If the appraiser discovers material facts which differ from those provided by AVSO or encounters circumstances which prevent the appraiser from developing an unbiased appraisal, the appraiser must contact the AVSO review appraiser for instructions.
3. Any communication (verbal or written) with the NPS realty contact shall include the assigned AVSO review appraiser.
4. Even though communication is encouraged with the property owner and NPS, only the assigned AVSO review appraiser can modify appraisal instructions (in writing).

SECTION 6: PERFORMANCE & SUBMISSION REQUIREMENTS

Any questions prior to award please contact the contracting officer directly. After award, the appraiser must address any questions regarding appraisal instructions and/or technical requirements for the appraisal to the AVSO review appraiser. Appraisal assignment contacts will be provided upon award.

The Target Period of Performance for the delivery of the initial appraisal report, in an unlocked PDF format, to the AVSO review appraiser is 120 calendar days from the date of award. If it is determined by the contractor that a performance period of 120 days is not realistically feasible, it is the offeror's responsibility to have provided an alternative delivery date for consideration with their quote, not to exceed 180 days from the time of award.

The appraiser will be notified by email once the initial appraisal report has been received. If comments are provided to the appraiser upon review, it is expected that the appraiser will address any comments and/or concerns promptly. A PDF version of the final appraisal report shall be delivered by email to the AVSO review appraiser (addressing all review comments and/or concerns). Delivery of the final PDF version shall occur within 15 calendar days, or sooner, of notification of review comments and/or concerns. AVSO will distribute the digital PDF to NPS. The appraiser's submission of the report to any other party is strictly prohibited, unless written approval is provided by the AVSO review appraiser.

Invoicing and Payment

Do not submit an invoice prior to notification that the appraisal assignment is complete and that a Completion of Contract Deliverables has been submitted for processing by the assigned AVSO Review Appraiser.

Deliverable/Task Schedule

Initial Appraisal Report:	The Target Period of Performance for the delivery of the initial appraisal report, in an unlocked PDF format, to the AVSO review appraiser is 120 calendar days from the date of award. If it is determined by the contractor that a performance period of 120 days is not realistically feasible, it is the offeror's responsibility to have provided an alternative delivery date for consideration with their quote, not to exceed 180 days from the time of award. The initial submission will include one electronic (pdf) copy of the appraisal report to be submitted directly to the AVSO review appraiser. Simultaneous delivery to any other party is prohibited.
Review Period:	The review period will be 30 days from the receipt of the initial appraisal report. The appraisal report will be reviewed by the AVSO review appraiser for compliance with the terms of this Statement of Work, including all cited standards.
Comments Provided to the Appraiser:	Review comments and/or suggestions, if any, will be provided to the appraiser, and to the extent that revisions are required, the appraiser shall

	complete the revisions within 15 days. An electronic copy of the revised report must be submitted directly to the AVSO review appraiser.
Final Appraisal Report:	Once the report is reviewed by AVSO and a final appraisal report (addressing all review comments and/or concerns) has been delivered, the review appraiser will notify the NPS, and the contracted appraiser in writing that the appraisal assignment is complete. The review appraiser will provide the NPS with the digital copy of the final appraisal report at that time. The appraiser's submission of the report to any other party is strictly prohibited, unless written approval is provided by the AVSO review appraiser.
Invoice Submission and Payment	60 days after Final Appraisal Report acceptance by the Government
Closeout	60 days after final payment

PLEASE NOTE: ANY ADJUSTMENTS TO THE ABOVE DELIVERABLE/TASK SCHEDULE SHALL BE SUBMITTED TO THE CONTRACTING OFFICER (CO). THE CONTRACTING OFFICER WILL APPROVE OR REJECT THE REQUEST BY EMAIL.

SECTION 7: EXHIBITS

The following documents are provided as Attachments to this SOW:

1. Park Overview Map
2. CE Land Status Map
3. CE Overview Aerial
4. Parcel 1 Aerial
5. Parcel 2 Aerial
6. Parcel 3 Aerial
7. Legal Description
8. Property History and Access Notes
9. Draft Deed Conservation Easement
10. AVSO Review Checklist

The following additional Exhibits will be provided only to the winning bidder after contract award:

- A. Appraisal Project Contacts
- B. Preliminary Title Report (PTR)
- C. PTR Supporting Documents
- D. Permission to Inspect (PIC)*

* Please note that Kijik Corporation moved office locations after the PIC was signed, thus, the PIC contact info is now out of date on this document. Please reference exhibit A for updated/current contact information for the property owner.
