

Q&A LOG (HT003826SC001-03)					
QUESTION #	DATE RECEIVED	Reference	PROSPECTIVE VENDOR'S QUESTION	DATE OF REPLY	GOVERNMENT'S RESPONSE
1	23-Mar-26		The IPR Notice states the Government seeks a "functioning and repeatable framework" that can be sustained by Government personnel long-term. Does the Government expect the offeror to deliver a fully operational governance framework with trained personnel by the end of the 9-month period of performance, or is a documented, piloted framework with a transition and sustainment plan sufficient?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
2	23-Mar-26		May offerors reference past performance from programs where the end customer cannot be named publicly (e.g., sensitive government clients), provided that a point of contact is available for confidential verification?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
3	23-Mar-26		Is teaming permitted under this IPR Notice? If so, are there any restrictions on the number of team members or the role of subcontractors in proposal submissions?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
4	23-Mar-26		Has PEO DHMS already defined any elements of its target state architecture, or is the offeror expected to develop the target state blueprint from the ground up in collaboration with Government stakeholders?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
5	23-Mar-26		Does the Government have an established budget or Not-to-Exceed ceiling for this requirement, or a rough order of magnitude it can share to assist offerors in scoping and pricing their solutions appropriately?	2-Apr-26	This information will not be made available to industry by the Government at this time.
6	24-Mar-26		What is the scope of the "current technology portfolio" for AOI 1? Please clarify whether the portfolio includes applications, infrastructure, platforms, data/integration assets, cybersecurity tools, and related investments, or only a subset. The notice now asks for a "data-driven process to continuously optimize our current technology portfolio" and a "prioritized and time-phased plan for modernization and investment," but it does not define the portfolio boundary.	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
7	24-Mar-26		What is the organizational boundary for the Target State Architecture? Should the future-state blueprint cover only PEO DHMS, or also subordinate program offices, shared DHA enterprise services, and external dependencies? The notice asks for a "clear and actionable technology blueprint that defines the Government's future state," but does not specify the enterprise boundary.	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
8	24-Mar-26		How should Offerors interpret "alignment with the Government's Target State Architecture" in AOI 3? Is the intent architecture review gates, compliance scoring, exception management, investment approval criteria, or some other mechanism? AOI 3 now requires oversight for risk and alignment with the Target State Architecture, which is a more specific requirement than the earlier notice.	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
9	24-Mar-26		What level of implementation is expected within the 9-month period of performance? Is the Government seeking design only, initial implementation, pilot execution, or full operational use of the roadmap, target-state architecture, and performance framework? The notice states the solution should be delivered within a period of performance not to exceed nine months.	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
10	24-Mar-26		What data sources are available to support the data-driven modernization roadmap? For example: project portfolio data, budget data, application inventories, governance records, performance dashboards, risk registers, CMDBs, or architecture repositories. Since AOI 1 explicitly calls for a data-driven process, data availability is central to solution design.	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
11	24-Mar-26		Should Offerors propose a technology-enabled platform, or is a process/methodology framework alone acceptable? The notice describes the desired solution as "a process, methodology, or technology-enabled framework," so it would be helpful to understand whether one of those is preferred.	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
12	25-Mar-26		Could the Government please confirm whether the clarifications provided in Q&A Log HT003826SC001-01 regarding page limits, landscape orientation, and font requirements permitting any font type of at least 11-point also apply to Notice Number HT003826SC001-03?	2-Apr-26	Please see the Notice of Availability section titled Submission and Evaluation Phases. This section has not changed.
13	25-Mar-26		For the attachments titled Terms and Conditions and Organizational Conflict of Interest (OCI) Mitigation Plan, which do not specify page limits, please confirm whether a general statement indicating that we are not subject to any additional commercial terms and conditions and that no OCI exists, if not applicable, would be sufficient?	2-Apr-26	If an Organizational Conflict of Interest does not exist and there are no Terms and Conditions to relay, a general statement will suffice.

					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
14	25-Mar-26		Are there sample datasets or APIs available for prototyping?	2-Apr-26	
15	25-Mar-26		What are the evaluation criteria for integrating new capabilities?	2-Apr-26	Please see the Notice of Availability evaluation section.
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
16	25-Mar-26		What legacy systems are still scheduled for decommissioning?	2-Apr-26	
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
17	25-Mar-26		What is the roadmap for FHIR adoption and API-first architecture?	2-Apr-26	
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
18	25-Mar-26		What are the current system throughput and user concurrency levels?	2-Apr-26	
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
19	25-Mar-26		Are there approved environments for AI/ML workloads within DHMS?	2-Apr-26	
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
20	25-Mar-26		What are the primary data sources (clinical, administrative, logistics, external partners)?	2-Apr-26	
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
21	25-Mar-26		What is the primary hosting environment (e.g., AWS GovCloud, DoD private cloud, hybrid)?	2-Apr-26	
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
22	25-Mar-26		What are the authoritative systems within the DHMS ecosystem (e.g., MHS GENESIS, legacy AHLTA/CHCS, ancillary systems)?	2-Apr-26	
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
23	25-Mar-26		Is the current architecture fully transitioned to MHS GENESIS, or are hybrid/legacy systems still operational?	2-Apr-26	
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
24	25-Mar-26		What are the primary integration layers (e.g., ESB, API gateway, middleware platform)?	2-Apr-26	
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
25	25-Mar-26		Could the government confirm what are the core systems, platforms, and tools that are currently in use?	2-Apr-26	
					The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
26	25-Mar-26		To ensure a seamless post-performance handoff, are there specific enterprise architecture, risk management, or portfolio visibility tools (e.g. Advana, ServiceNow, LeanIX) currently standardized at PEO DHMS that proposed frameworks should natively integrate with?	2-Apr-26	

27	25-Mar-26		Can the Government please provide a list of in-scope systems?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
28	25-Mar-26		Regarding AOI 2, what does the Government consider a complete deliverable for the Target State Architecture within the 9-month period of performance — a fully actionable blueprint with defined architectural artifacts, a framework and methodology that enables the Government to develop and maintain the blueprint as an ongoing capability, or some combination of both?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
29	25-Mar-26		For the Performance Framework described in AOI 3, does the Government anticipate the solution includes active enforcement mechanisms at the program execution level, such as deployment gates or controls, or is that outside the intended scope?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
30	25-Mar-26		Does the Government have a portfolio inventory or program registry that offerors should assume as the baseline for the Modernization Roadmap, or should proposed solutions include a methodology for portfolio discovery and baselining as part of the framework?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
31	25-Mar-26		Can the Government provide additional detail on the evaluation criteria and relative weighting that will be applied to proposals submitted in response to IPR Notice #3?	2-Apr-26	See section 11 and 12 of the HT003826SC001 Notice of Availability Innovation Solutions document.
32	25-Mar-26		What program-level tools and reporting mechanisms are currently in use across the PEO DHMS portfolio that a proposed framework should be designed to complement or integrate with?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
33	25-Mar-26		Section 13 of the CSO states that successful offerors 'shall be ineligible to perform, whether as a contractor, subcontractor, or team member, under any Prime Mission Product Support contract that is in any way related to solutions provided under any contract awarded.' For purposes of IPR #3, please define the specific scope of contracts that would trigger this ineligibility. Specifically: (a) does ineligibility extend to existing or future EIDS PMO support contracts or Data Exchange Services contracts; (b) does ineligibility extend to other PEO DHMS program offices (JOMIS, DHMSM) beyond the office that awards the IPR #3 contract; and (c) what is the temporal scope of the ineligibility (i.e., does it expire upon contract completion, (9) months, or remain in effect indefinitely)?	2-Apr-26	If an Organizational Conflict of Interest exists and there is not an adequate Mitigation Plan, this could prevent participation in current and/or future requirements with PEO DHMS.
34	25-Mar-26		The CSO requires fixed-price type contracts based on delivery of tangible results. For Phase 1b pricing, please clarify: (a) may offerors propose a milestone-based payment schedule tied to their own defined deliverables and outcomes, or will the Government provide a required CLIN or milestone structure; (b) may offerors propose options or additional CLINs beyond the base effort to address scope expansion within the nine-month period of performance; and (c) for Factor 2 evaluation, which requires outcomes 'clearly linked to the proposed pricing structure,' will the Government evaluate this linkage in Phase 1a prior to receiving a price proposal, or only after Phase 1b submission?	2-Apr-26	Prices will not be considered until Phase 1b per the HT003826SC001 Notice of Availability Innovation Solutions document.
35	25-Mar-26		IPR #3 identifies three Areas of Interest: AOI 1 (Operations/Modernization Roadmap), AOI 2 (Strategy/Target State Architecture), and AOI 3 (Governance/Performance Framework). Please confirm: (a) may a single proposal address all three AOIs within the 15-slide limit, or must offerors submit separate proposals for each AOI; (b) if a single proposal may address multiple AOIs, will the Government evaluate it as a single integrated solution or score each AOI independently; and (c) may the Government make a partial award covering only a subset of the AOIs proposed?	2-Apr-26	See section 11 and 12 of the HT003826SC001 Notice of Availability Innovation Solutions document. The Government does not plan to make a partial award at this time.
36	25-Mar-26	Objective	Please explain the specific gaps or shortcomings DHMS observed in CSO 2 responses that CSO 3 is intended to address?	2-Apr-26	The Government redefined the outcomes.
37	25-Mar-26	Objective	How does DHMS currently define "Enterprise Architecture" for the purposes of this IPR (e.g., business, data, application, technology layers; reference vs. solution architecture)?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
38	25-Mar-26	Objective / AOI 1	IPR States, "Creates a data-driven roadmap to optimize the current portfolio". Does DHMS have an existing EA baseline (artifacts, standards, tools, or frameworks) that offerors should assume as the starting point, or should offerors propose both the baseline assessment approach and the future-state architecture?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
39	25-Mar-26	Objective / Overall	Is DHMS expecting alignment with a specific EA framework (e.g., DoDAF, FEAf, TOGAF), or is the choice of framework left to the offeror?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.

40	25-Mar-26	AOI 1	Does DHMS expect the modernization roadmap to include cost, schedule, and risk trade-offs, or is prioritization based primarily on strategic alignment and architectural fit	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
41	25-Mar-26	AOI 1	What constitutes the "current technology portfolio" for this IPR (e.g., applications only, infrastructure, data platforms, programs, or all technology investments)?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
42	25-Mar-26	AOI 3	How does DHMS envision the "Performance Framework" being used operationally? Is the focus on decision support, compliance enforcement, reporting, or all of the above?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
43	25-Mar-26	Deliverables	Should deliverables such as the Enterprise Technology Strategy Roadmap and Annual Technology Report be recast specifically through an Enterprise Architecture lens, or does DHMS expect them to remain broader in scope?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
44	25-Mar-26	Objective / Overall	What types of existing authoritative data sources (e.g., application inventories, cost data, performance metrics) are currently available to support a data-driven modernization roadmap and what tools are currently in use to capture this data?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
45	25-Mar-26	AOI 2	Does the Government envision the Target State Architecture as primarily: Principles and reference architectures, or Prescriptive standards and constraints for solution delivery?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
48	25-Mar-26	Overall	What Enterprise Architecture artifacts currently exist (e.g., current-state diagrams, standards, reference architectures), and how current and authoritative are they?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
49	25-Mar-26		Can the Government clarify whether it expects a conceptual, repeatable framework, an operational/software-enabled capability (e.g., dashboards, workflows, data models), or an integrated solution combining both?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
50	25-Mar-26		Can the Government clarify the primary problem this requirement is intended to solve (e.g., lack of portfolio visibility, misalignment of investments, execution risk, or decision latency) and how success will be measured at the enterprise level?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
51	25-Mar-26		For the Target State Architecture, does the Government expect a full enterprise architecture, a technology-focused architecture, or a mission-aligned reference architecture tailored to DHMS, or a combination/blended of the above?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
52	25-Mar-26		Should the Target State Architecture align with a specific EA standard (e.g., DoDAF, TOGAF, FEAF), or may the offeror propose the most appropriate framework aligned to DHMS and DoD guidance?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
53	25-Mar-26		Can the Government clarify what data sources will be made available (e.g., system inventories, cost, performance, cybersecurity, technical debt), and whether data access constraints should be assumed?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.

54	25-Mar-26		Does the Government expect the solution to integrate with existing DHMS tools and systems (e.g., EA repositories, portfolio tools, RMF, DevSecOps), or should it be designed to operate independently if integration points are limited? For the Performance Framework, should the governance model include portfolio-level KPIs, project-level execution metrics, and risk-based decision gates, and should it integrate with existing DHMS governance structures?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
55	25-Mar-26		Can the Government confirm whether the listed deliverables (e.g., roadmap, risk framework, annual report) are mandatory or illustrative, and whether deliverables should be provided as static documents, interactive artifacts, or both?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
56	25-Mar-26		By the end of the 9-month period of performance, does the Government expect a conceptual model, pilot-ready framework, or an operational capability with demonstrated use?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
57	25-Mar-26		Can the Government clarify evaluation priorities and weighting across the AOIs, particularly how it will balance innovation, feasibility, speed-to-value, and sustainment viability?	2-Apr-26	See section 11 and 12 of the HT0038265C001 Notice of Availability Innovation Solutions document.
58	25-Mar-26		Should the proposed governance model integrate with existing DHMS governance bodies and processes, or should the offeror propose a new governance construct if it better supports the Target State Architecture?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
59	25-Mar-26		The IPR states that proposals must follow the format and guidelines specified in "CSO Section 12." We were unable to locate this section or corresponding format guidance in the CSO. Can the Government clarify the applicable reference and provide any associated proposal format guidance?	2-Apr-26	Please see the Notice of Availability document attached to the CSO sam.gov post. In the document the referenced section is titled Submission and Evaluation Phases.
60	25-Mar-26	IPR Notice #3, AOI 1 Description	IPR Notice #3, AOI 1 describes a data-driven process to continuously optimize the current technology portfolio. How many discrete programs, systems, or technology investments currently reside in the PEO DHMS portfolio that fall within scope of the Modernization Roadmap?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
61	25-Mar-26	IPR Notice #3, AOI 1 Description	IPR Notice #3, AOI 1 requires a data-driven process. What data sources, portfolio management systems, or technology inventory tools does PEO DHMS currently use that would feed this process? Will the contractor have access to these systems, and under what data handling and classification requirements?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
62	25-Mar-26	IPR Notice #3, AOI 2 Description	IPR Notice #3, AOI 2 requires a clear and actionable technology blueprint defining the government future state. Does the government require the Target State Architecture to conform to a specific framework standard such as DODAF, TOGAF, or the Federal Enterprise Architecture Framework, or will commercially developed architectural frameworks be evaluated on equal footing?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
63	25-Mar-26	IPR Notice #3, AOI 3 Description	IPR Notice #3, AOI 3 requires a Performance Framework ensuring on-time, on-budget project execution. Does this framework apply to all programs within the PEO DHMS portfolio, a defined subset, or only to contracts awarded under this CSO?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
64	25-Mar-26	IPR Notice #3, AOI 3 Description	IPR Notice #3, AOI 3 requires a Performance Framework aligned with the Target State Architecture. Does PEO DHMS currently have a governance board, investment review process, or technology decision-making body that the Performance Framework must integrate with, or is the offeror expected to design the governance structure from scratch?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
65	25-Mar-26	IPR Notice #3, Deliverables Para, Lines 1-5	IPR Notice #3 lists four anticipated deliverables: Enterprise Technology Strategy Roadmap, Technology Risk Management Framework, Technology Transformation Change Management Plan, and Annual Technology Report. Are these the minimum required deliverables, or illustrative examples? Will proposals that reframe or substitute these deliverables be evaluated on equal footing?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
66	25-Mar-26	IPR Notice #3, Deliverables Para	IPR Notice #3 lists the Annual Technology Report as an anticipated deliverable. Given the 9-month period of performance, does the government expect one Annual Technology Report delivered within the period, or is this a sustainment deliverable the government will produce independently after contract completion?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.

67	25-Mar-26	IPR Notice #3, PoP Para	IPR Notice #3 states the period of performance shall not exceed 9 months. Does the government expect all three AOI deliverables to reach final acceptance within the 9-month period, or will the government consider a phased approach where foundational deliverables are completed first and later deliverables are baselined for government sustainment?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
68	25-Mar-26	IPR Notice #3, PoP Para	IPR Notice #3 does not specify interim milestone deliverables within the 9-month period. Is the offeror free to propose its own phased delivery schedule, or does the government have internal milestone requirements - such as quarterly reviews, executive briefings, or go/no-go decision points - that the schedule must accommodate?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
69	25-Mar-26	CSO Sec. 7, Para 1-2	CSO Section 7 states that organizational changes have highlighted critical capability gaps. Does PEO DHMS currently have an existing enterprise architecture function, documented EA artifacts, or an EA tool suite in place, or is this requirement starting from a clean slate? The answer determines whether the solution must assess and build on existing assets or design the capability from scratch.	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
70	25-Mar-26	CSO Sec. 7, Para 1	CSO Section 7 references the need to bridge the gap left by experienced personnel. Approximately how many EA or strategic technology planning positions have been vacated, and at what organizational level - program office, portfolio, or enterprise?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
71	25-Mar-26	CSO Sec. 8, Para 2	CSO Section 8 states the solution must be structured for full adoption and sustainment by government personnel. Does the government expect the contractor to recommend, procure, or implement specific tooling or software platforms as part of the solution, or must the solution operate within the government's existing tooling and infrastructure?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
72	25-Mar-26	CSO Sec. 10(4)	CSO Section 10(4) requires a comprehensive transition plan ensuring continuity of operations and long-term sustainment. Will dedicated government personnel be available to participate in solution delivery during the 9-month period of performance, or will the contractor operate largely independently with periodic government review?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
73	25-Mar-26	CSO Sec. 10(4)	CSO Section 10(4) requires a comprehensive transition plan. How many government FTEs are designated to operate and sustain the framework after delivery, and what is their current proficiency level in enterprise architecture, data analytics, and technology portfolio management?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
74	25-Mar-26	CSO Sec. 11, Threshold Para; CSO Sec. 7, Para 2; DFARS 212.7001	CSO Section 7 defines innovative under DFARS 212.7001 as a new technology, process, or method, or a new application of an existing one as of submission date. Will the government evaluate the innovation claim against the defense health EA domain specifically, or against the broader federal government EA market? This distinction determines whether a commercially proven but DoD-novel framework satisfies the threshold.	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
75	25-Mar-26	CSO Sec. 11, Factor 1	CSO Section 11, Factor 1 states the proposed solution must be creative and forward-thinking, and that solutions not representing a meaningful improvement will be ineligible for award. Can the government describe what it considers the current status quo for enterprise architecture in the PEO DHMS context, so offerors can clearly differentiate against it?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
76	25-Mar-26	CSO Sec. 11, Factor 2	CSO Section 11, Factor 2 requires specific, measurable outcomes that define success and clearly links these outcomes to the proposed pricing structure. Will the government evaluate outcomes at the AOI level, the individual deliverable level, or both?	2-Apr-26	See the Evaluation section of the Notice of Availability. Prices will not be considered until Phase 1b per the HT003826SC001 Notice of Availability Innovation Solutions document.
77	25-Mar-26	CSO Sec. 12b, Phase 1b Para	CSO Section 12b states the government is only authorized to make fixed-priced contracts. Will the government accept a milestone-based payment structure where each payment is triggered by formal acceptance of a specific deliverable, or does the government prefer a different fixed-price approach such as equal monthly installments?	2-Apr-26	The Government is looking to industry to provide an innovative solution to support all defined outcomes. The solution delivered must be a solution that can be sustained by Government personnel. To ensure you have the freedom to think creatively without constraints, we will not be providing additional guidance. How your approach can be applied to our current situation will be discussed and negotiated in later phases of the process.
78	25-Mar-26	CSO Sec. 12b; CSO Sec. 11, Factor 2	CSO Section 12b states pricing details will be provided at Phase 1b. Will the government require a single fully loaded fixed price, or will it accept a deliverable-based structure where each AOI is priced as a separate line item with its own acceptance criteria?	2-Apr-26	Prices will not be considered until Phase 1b per the HT003826SC001 Notice of Availability Innovation Solutions document.
79	25-Mar-26	CSO Sec. 12d, Collaborative Deep Dive Para	CSO Section 12d describes the Collaborative Deep Dive as a pre-award phase to refine project specifics, metrics, outcomes, pricing, terms and conditions, and contract structure. How many offerors does the government anticipate inviting to the Deep Dive, and will all Phase 1b offerors advance to Phase 3, or will there be a competitive down-select between Phase 1b and Phase 3?	2-Apr-26	Per the Notice of Availability, if the Government is interested in the proposed solution, the Government may select any number of Offerors to proceed to the next phase.
